Vitamin D is metabolized in the liver to 25-hydroxyvitamin D [25(OH)D], (also known as calcidiol), and then in the kidney to 1,25-dihydroxyvitamin D [1,25(OH)2D], also known as calcitriol. 25(OH)D is the major circulating form of vitamin D while 1,25(OH)2D is the active form of vitamin D. In individuals at risk for vitamin D deficiency, the best method for determining a person's vitamin D status is to measure a 25(OH)D concentration. Measurement of 1,25(OH)2D is not useful for monitoring the vitamin D status, as it does not reflect vitamin D reserves.[1] This policy address when measurement of 1,25(OH)2D is appropriate and medically necessary.

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that measurement of serum 1,25(OH)2D (CPT 82652) is **medically necessary** for monitoring certain conditions, such as acquired and inherited disorders of vitamin D and phosphate metabolism, including any of the following indications:
   A. Chronic kidney disease;
   B. Hereditary phosphate-losing disorders;
   C. Oncogenic osteomalacia;
   D. Pseudovitamin D-deficiency rickets;
   E. Vitamin D-resistant rickets;
   F. Chronic granuloma-forming disorders (e.g., sarcoidosis and some lymphomas).

II. It is the policy of health plans affiliated with Centene Corporation that measurement of serum 1,25(OH)2D for routine screening of average risk, asymptomatic individuals is **not medically necessary.**

Background

Vitamin D or calciferol, is a fat-soluble vitamin that plays an important role in calcium homeostasis and bone health. Vitamin D comes in two forms, D_2 and D_3. It is unique among hormones because the major source of vitamin D is exposure to natural sunlight. Very few foods naturally contain, or are fortified with, vitamin D, thus, the major cause of vitamin D deficiency is inadequate exposure to sunlight.

Vitamin D deficiency is defined by the Endocrine Society as a 25(OH)D below 20 ng/ml (50 nmol/liter). Vitamin D deficiency results in abnormalities in calcium, phosphorus, and bone metabolism. It causes a decrease in the efficiency of intestinal calcium and phosphorus absorption of dietary calcium and phosphorus, resulting in an increase in parathyroid hormone (PTH) levels. Secondary hyperparathyroidism maintains serum calcium in the normal range at

the expense of mobilizing calcium from the skeleton and increasing phosphorus wasting in the kidneys.

Screening for Vitamin D deficiency is recommended for individuals at risk, such as those with osteomalacia, osteoporosis, chronic kidney disease, hepatic failure, malabsoprtion syndromes, hyperparathyroidism, African-American and Hispanic children and adults, pregnant or lactating women, older adults with history of falls or non-traumatic fractures, obese children or adults (BMI greater than 30 kg/m^2), granuloma-forming disorders, and some lymphomas.[1]

Circulating 25(OH)D is the best indicator to monitor for vitamin D status as it is the main circulating form of vitamin D, and has a half-life of two to three weeks. In contrast, 1,25(OH)2D, has a much shorter half-life of about four hours, circulates in much lower concentrations than 25(OH)D, and is susceptible to fluctuations induced by PTH in response to subtle changes in calcium levels. Serum 1,25(OH)2D is frequently either normal or even elevated in those with vitamin D deficiency, due to secondary hyperparathyroidism.[1]

The Endocrine Society
The Endocrine Society recommends using the serum circulating 25-hydroxyvitamin D [25(OH)D] level, measured by a reliable assay, to evaluate vitamin D status in patients who are at risk for vitamin D deficiency and in whom a prompt response to optimization of vitamin D status could be expected. They note further, 1,25(OH)2D measurement does not reflect vitamin D status as levels are tightly regulated by serum levels of PTH, calcium, and phosphate. Serum 1,25(OH)2D does not reflect vitamin D reserves, and measurement of 1,25(OH)2D is not useful for monitoring the vitamin D status of patients. Serum 1,25(OH)2D is frequently either normal or even elevated in those with vitamin D deficiency, due to secondary hyperparathyroidism. Measurement of 1,25(OH)2D is useful in acquired and inherited disorders in the metabolism of 25(OH)D and phosphate, including chronic kidney disease, hereditary phosphate-losing disorders, oncogenic osteomalacia, pseudovitamin D-deficiency rickets, vitamin D-resistant rickets, as well as chronic granuloma-forming disorders such as sarcoidosis and some lymphomas.

United States Preventive Services Task Force (USPSTF)
The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of screening for vitamin D deficiency in asymptomatic adults.

American Congress of Obstetricians and Gynecologists
At this time, there is insufficient evidence to support a recommendation for screening all pregnant women for vitamin D deficiency. For pregnant women thought to be at increased risk of vitamin D deficiency, maternal serum 25-hydroxyvitamin D levels can be considered and should be interpreted in the context of the individual clinical circumstance.

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy,

contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note: For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

Note: For Medicare members, to ensure consistency with the Medicare National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), all applicable NCDs, LCDs, and Medicare Coverage Articles should be reviewed prior to applying the criteria set forth in this clinical policy. Refer to the CMS website at http://www.cms.gov for additional information.

Clinical Policy: Helicobacter Pylori Serology Testing

Reference Number: CP.MP.153
Effective Date: 12/17
Last Review Date: 12/17

Coding Implications
Revision Log

See Important Reminder at the end of this policy for important regulatory and legal information.

Description

Helicobacter pylori (H. pylori) is the most prevalent chronic bacterial infection and is associated with peptic ulcer disease, chronic gastritis, gastric adenocarcinoma, and gastric mucosa associated lymphoid tissue (MALT) lymphoma. Noninvasive tests for the diagnosis of H. pylori include urea breath testing (UBT), stool antigen testing, and serology.[1]

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that H. pylori serology testing is **not medically necessary** for diagnosing infection or evaluating treatment effectiveness.

Background

The most common causes of peptic ulcer disease (PUD) are H. pylori infection and use of nonsteroidal anti-inflammatory drugs (NSAIDs). H. pylori infection causes progressive functional and structural gastroduodenal damage.[4] Accurate diagnosis of H. pylori infection is a crucial part in the effective management of many gastroduodenal diseases. Several invasive and non-invasive diagnostic tests are available for the detection of H. pylori and each test has its usefulness and limitations in different clinical situations.[8]

Urea breath tests and stool antigen tests are the most widely used non-invasive tests for identifying H. pylori infection, as well as most accurate. In addition, they can be used to confirm cure. Serologic tests are a convenient but less accurate alternative and cannot be used to confirm cure.[2] Serology testing is useful in screening and epidemiological studies.[6] For patients without alarm symptoms (e.g., weight loss, progressive dysphagia, recurrent vomiting, evidence of gastrointestinal bleeding, or family history of cancer), noninvasive testing for H. pylori, with either carbon-13-labeled urea breath testing or stool antigen testing, is recommended as a first-line strategy.[4]

The urea breath test is the noninvasive test of choice for the diagnosis of H. pylori, with high sensitivity (95%) and specificity (95% to 100%) for the detection of active H. pylori infections.[4] Urea breath tests require the ingestion of urea labeled with the nonradioactive isotope carbon 13 or carbon 14. Specificity and sensitivity approach 100%. Urea breath testing is an option for test of cure and should be performed four to six weeks after completion of eradication therapy. Proton pump inhibitors (PPIs) must be stopped for at least two weeks before the test, and accuracy is lower in patients who have had distal gastrectomy.[2]

Stool antigen tests using monoclonal antibodies are as accurate as urea breath tests if a validated laboratory-based monoclonal test is used. Like urea breath tests, stool antigen tests detect only

active infection and can also be used as a test of cure. PPIs should be stopped for two weeks before testing, but stool antigen tests are not as affected by PPI use.[2]

Serologic antibody testing detects immunoglobulin G specific to H. pylori in serum and cannot distinguish between an active infection and a past infection.[2] Most common serologic tests are based on an enzyme-linked immunosorbent assay (ELISA) technology. As with any test, prevalence of the H. pylori infection and the pretest probability influence the positive or negative predictive values. Overall, where the prevalence of H. pylori infection and the pretest probability are low, the negative predictive value of a serologic test is high whereas false positives are more frequent, with the opposite in high prevalence/high pretest probability cases (i.e., the positive predictive value is high but there is increased prevalence of false negative results).[4] Antibody testing cannot be used as a test of cure.

American Society for Clinical Pathology
Serologic evaluation of patients to determine the presence/absence of H. pylori infection is no longer considered clinically useful. Alternative noninvasive testing methods (e.g., the urea breath test and stool antigen test) exist for detecting the presence of the bacteria and have demonstrated higher clinical utility, sensitivity, and specificity.

The American Gastroenterological Association (AGA)
The AGA no longer recommends serology-based testing for diagnosing infection or evaluating treatment effectiveness as it is unable to distinguish between active infection and previous exposure to H. pylori, does not confirm eradication and has a poor positive predictive value when compared to active infection tests such as the urea breath test or stool antigen test.[7]

The American College of Gastroenterology
All patients with active PUD, a past history of PUD (unless previous cure of H. pylori infection has been documented), low-grade gastric MALT lymphoma, or a history of endoscopic resection of early gastric cancer should be tested for H. pylori infection. In patients with uninvestigated dyspepsia who are under the age of 60 years and without alarm features, non-endoscopic testing for H. pylori infection is a consideration. Other indications to test patients for H. pylori infection may include, patients taking long-term low-dose aspirin, patients initiating chronic treatment with an NSAID, patients with unexplained iron deficiency anemia despite an appropriate evaluation and adults with idiopathic thrombocytopenic purpura. Any individual who tests positive should be offered eradication therapy.[3] Patients with a history of PUD who have previously been treated for H. pylori infection should undergo eradication testing with a urea breath test or fecal antigen test.[3]

Clinical Policy: Thryoid Hormones and Insulin Testing in Pediatrics

Reference Number: CP.MP.154
Effective Date: 12/17
Last Review Date: 12/17

Coding Implications
Revision Log

See Important Reminder at the end of this policy for important regulatory and legal information.

Description

Numerous essential metabolic functions are mitigated by hormones produced by, and affecting the thyroid, *e.g.*, thyroid stimulating hormone [TSH] and thryoxine [T4], as well as by insulin. This policy discusses the medical necessity requirements for the testing of these hormones.

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that thyroid hormone testing in healthy, including obese but otherwise healthy, children (age ≥ 1 and ≤ 18) is **not medically necessary** because these tests have not been demonstrated to have a clear clinical benefit.

II. It is the policy of health plans affiliated with Centene Corporation that insulin testing in healthy, including obese but otherwise healthy, children (age ≥ 1 and ≤ 18) is **not medically necessary** because these tests have not been demonstrated to have a clear clinical benefit.

Background

The thyroid is an endocrine gland that regulates numerous metabolic processes through hormone secretion. Thyroid homeostasis is controlled through a complex feedback loop through the hypothalamus-pituitary-thyroid axis. Thyroxine (otherwise known as T4 due to the presence of four iodine molecules) is the major secretory hormone of the thyroid, and is converted into triiodothyronine (T3). Secretion of thyroxine by the thyroid is regulated by the concentration of thyroid stimulating hormone (TSH). TSH is generated by the pituitary gland and secreted in the bloodstream to generate a feedback loop with T4. Loss of the regulatory feedback cycle of the thyroid hormones could lead to hyperthyroidism and primary or secondary hypothyroidism.

Assessment of thyroid function can be achieved through the quantification of thyroid hormone levels. However, the appropriate clinical utilization of these tests has been a subject of concern in the recent literature.[1,2] For example in pediatrics, TSH and total T4 can be elevated in children who are overweight or obese, but it is not clear if this is a result or cause of obesity.[3,4,5] Therefore general screening may not provide actionable clinical information.[3-7]

The Endocrine Society Clinical Practice Guideline on pediatric obesity recommends against routine laboratory evaluations for endocrine etiologies of pediatric obesity unless the patient's stature and/or height velocity are attenuated (assessed in relationship to genetic/familial potential and pubertal stage. They also recommend against measuring insulin concentrations when evaluating children or adolescents for obesity. They note that although obesity is associated with insulin resistance/hyperinsulinemia, attempts to diagnose insulin resistance by measuring plasma insulin concentration or any other surrogate in the clinical setting has no merit because it has no diagnostic value. Fasting insulin concentrations show considerable overlap between insulin-

resistant and insulin-sensitive youths. Therefore, there is no well-defined cut point differentiating normal from abnormal and no universally accepted, clinically useful, numeric expression that defines insulin resistance, unlike for glucose or lipids. Moreover, measuring insulin is hampered by the lack of standardized insulin assays, and poor reproducibility of even the same assay. Further limitations include race/ethnicity-related differences in insulin concentrations due to differences in the metabolic clearance rate of insulin and the cross reactivity between insulin and proinsulin. In youths with Type 2 diabetes mellitus, despite severe deficiency in insulin secretion, fasting insulin concentrations are higher than in youths without diabetes. Importantly, fasting insulin concentrations are similar in youths who are obese with normal glucose tolerance vs impaired glucose tolerance, allowing for the possible danger of missing a diagnosis of impaired glucose tolerance if one uses fasting insulin concentrations as a screening tool. Because of these limitations, measuring plasma insulin concentrations remains a research tool with no clinical value for evaluation of obesity.[7]

Coding Implications

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and

accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note: For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

Note: For Medicare members, to ensure consistency with the Medicare National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), all applicable NCDs, LCDs, and Medicare Coverage Articles should be reviewed prior to applying the criteria set forth in this clinical policy. Refer to the CMS website at http://www.cms.gov for additional information.

Clinical Policy: EEG in the Evaluation of Headache

Reference Number: CP.MP.155
Effective Date: 12/17
Last Review Date: 12/17

Coding Implications
Revision Log

See Important Reminder at the end of this policy for important regulatory and legal information.

Description

An electroencephalogram (EEG) is a non-invasive method for assessing neurophysiological function. EEG measures the electrical activity that is recorded from many different standard sites on the scalp according to the international (10 to 20) electrode placement system. It is a useful diagnostic test in evaluating epilepsy. This policy addresses the use of EEG in the diagnostic evaluation of headache.

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that an EEG in the routine evaluation of headache is **not medically necessary.** EEG has not been convincingly shown to identify headache subtypes, nor has it been shown to be an effective screening tool for structural causes of headache.

Background

An EEG is an important diagnostic test in the evaluation of a patient with possible epilepsy, providing evidence that helps confirm or refute the diagnosis, as well as guide management. An EEG may be also be performed for other indications, including but not limited to, states of altered consciousness, cerebral infections, and various other encephalopathies.

Headache is a common disorder with many potential causes. The primary headaches, which include migraine, tension-type headache and cluster headache, are benign and account for the majority of headaches. They are usually recurrent and have no organic disease as their cause. Secondary headaches, are less common and caused by underlying organic diseases ranging from sinusitis to subarachnoid hemorrhage.[3] In most instances, the physician can accurately diagnose a patient's headache and determine whether additional laboratory testing or neuroimaging is indicated by considering the various headache types in each category (primary or secondary), obtaining a thorough headache history and performing a focused clinical examination.[4]

The presence of warning signs of a possible disorder, other than primary headache, that should prompt further investigation (e.g. limited laboratory testing, neuroimaging, lumbar puncture) include:

- Subacute and/or progressive headaches that worsen over time (months)
- A new or different headache
- Any headache of maximum severity at onset
- Headache of new onset after age 50
- Persistent headache precipitated by a Valsalva maneuver
- Evidence such as fever, hypertension, myalgias, weight loss or scalp tenderness suggesting a systemic disorder
- Presence of neurological signs that may suggest a secondary cause

- Seizures

Studies designed to determine whether headache patients have an increased prevalence of EEG abnormalities report conflicting results. The American Academy of Neurology reports that EEG has no advantage over clinical evaluation in diagnosing headache, does not improve outcomes, and increases costs. A literature review of 40 articles describing EEG findings in headache patients reported that studies did not show that the EEG is an effective screen for structural causes of headache, nor does the EEG effectively identify headache subgroups with different prognoses.[5]

American Academy of Neurology (AAN)
AAN reports that no study has consistently demonstrated that the EEG improves diagnostic accuracy for the headache sufferer. The AAN makes the following recommendations:

- The EEG is not useful in the routine evaluation of patients with headache (guideline). This does not exclude the use of EEG to evaluate headache patients with associated symptoms suggesting a seizure disorder, such as atypical migrainous aura or episodic loss of consciousness. Assuming head imaging capabilities are readily available, EEG is not recommended to exclude a structural cause for headache (option).[1]
- EEG is not recommended in the routine evaluation of a child with recurrent headaches, as it is unlikely to provide an etiology, improve diagnostic yield, or distinguish migraine from other types of headaches (Level C; class II and class III evidence).[2]
- Although the risk for future seizures is negligible in children with recurrent headache and paroxysmal EEG, future investigations for epilepsy should be determined by clinical follow up (Level C; class II and class III evidence).[2]

International Headache Society
The EEG is not included in the diagnostic criteria of the International Headache Society for migraine or any other major headache categories.

Clinical Policy: Cardiac Biomarker Testing for Acute Myocardial Infarction

Reference Number: CP.MP.156
Effective Date: 12/17
Last Review Date: 12/17

Coding Implications
Revision Log

See Important Reminder at the end of this policy for important regulatory and legal information.

Description

The release of cardiac biomarkers is among the cascade of events that occur during acute coronary syndromes and cardiac ischemia. This policy discusses the medical necessity requirements for testing of these cardiac biomarkers.

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that troponin I or T testing is **medically necessary** for suspected acute myocardial infarctions (AMI).

II. It is the policy of health plans affiliated with Centene Corporation® that creatine kinase myocardial isoenzyme (CK-MB) and myoglobin testing are **not medically necessary** for suspected AMI because these tests have not been demonstrated to have a clear clinical benefit.

Background

Detection of specific cardiac biomarkers in blood serum is a useful clinical indication of AMI, myocarditis, or heart failure. According to the 2014 clinical practice guideline of the American College of Cardiologists / American Heart Association, (ACC/AHA) cardiac troponins have become the main biomarkers used for the diagnoses of acute coronary syndromes, specifically troponins I and T because these subunits are expressed in the myocardium.[1,2] Furthermore, troponin levels are also elevated for acute and chronic decompensated heart failure in instances of myocyte injury and/or necrosis.[3]

Other cardiac peptides that were previously assessed for AMI include CK-MB and myoglobin. However, recent evidence suggests that the sensitivity and specificity of these biomarkers are inferior compared to the troponins, suggesting that troponins are a more accurate biomarker of myocardial injury.[1] According to the 2014 ACC/AHA clinical practice guideline, CK-MB and myoglobin are no longer necessary for acute coronary syndrome diagnosis as a result of the advent of troponin assays.[1] CK-MB detection is comparatively less sensitive and less specific. Voltz et al. performed a retrospective cohort study across 55,000 emergency department visits for AMI and examined their CK-MB and troponin levels with screenings; the authors concluded that CK-MB can be omitted during the initial screening of AMIs.[6] Eggers et al, evaluated the role of myoglobin with troponin I to detect AMI in a sample of 197 patients and determined that neither myoglobin nor CK-MB added clinical diagnostic value.[4] Aviles et al analyzed AMI amongst patients with elevated cardiac troponins in a prospective cohort and noted that at least 20% of patients had normal CK-MB levels, thereby further questioning the validity of CK-MB as a valuable cardiac biomarker.[7] Of note, Singh *et al*. measured CK-MB testing from 2007 to 2013 and found a dramatic decrease from 12,057 tests in 2007 to 36 tests in 2013.[5]

Coding Implications

Clinical Policy: 25-hydroxyvitamin D Testing in Children and Adolescents

Reference Number: CP.MP.157
Effective Date: 12/17
Last Review Date: 12/17

Coding Implications
Revision Log

See Important Reminder at the end of this policy for important regulatory and legal information.

Description

A global consensus statement recommends against universal screening for vitamin D deficiency in healthy children as there is insufficient evidence that the potential benefits of testing outweigh the potential harms.[2]

Policy/Criteria

I. It is the policy of health plans affiliated with Centene Corporation® that 25-hydroxyvitamin D testing in healthy, including obese but otherwise healthy, children (age ≥ 1 and ≤ 18) is **not medically necessary** because these tests have not been demonstrated to have a clear clinical benefit.

Background

Measurement of 25-OH-D (25-hydroxyvitamin D) concentration is the appropriate screening test for vitamin D deficiency, as opposed to 1,25-OH_2-D, which has little to no predictive value related to bone health.[6] However, there is lack of agreement concerning the best type of assay to conduct when measuring 25-hydroxyvitamin D.[4] Furthermore, there is substantial controversy concerning cutoff levels to define vitamin D deficiency, as the evidence is inconsistent regarding optimal levels of vitamin D.[1]

Prevalence of vitamin D deficiency in children (defined in the study as levels < 20 ng/mL) is estimated to be about 14%, although estimates range from 14% to 37%.[3,6] Rates of deficiency vary among certain populations, with increased risk among black and Hispanic teenagers, as well as overweight and obese children and adolescents.[6] Reduced serum vitamin D in overweight and obese children and adolescents reflects sequestration in adipose tissue, but little is known about the significance of low serum vitamin D in this population.[4]

A global consensus of 33 experts, convened at the request of the European Society for Pediatric Endocrinology, reviewed the available literature on prevention and management of nutritional rickets, and determined that routine vitamin D screening is not recommended for healthy children.[2] They note the frequent coexistence of dietary calcium and vitamin D deficiency, which alters the threshold for development of rickets, and makes a single screening value impractical.[2] The global consensus panel advocates for identification and screening of groups at high risk for vitamin D deficiency based on clinical factors, as opposed to universal screening as public health policy.

The American Academy of Pediatrics (AAP) – Section on Endocrinology advises against ordering vitamin D concentrations routinely in otherwise healthy children, including children who are overweight or obese.[5] The AAP's report on optimizing bone health recommends

screening for vitamin D deficiency only in children and adolescents with conditions associated with reduced bone mass and/or recurrent low-impact fractures.[6]

For healthy children and adolescents who are not ingesting enough foods with vitamin D, the AAP recommends supplementation with vitamin D, as does the global consensus panel convened by the European Society for Pediatric Endocrinology.

Coding Implications

This clinical policy references Current Procedural Terminology (CPT®). CPT® is a registered trademark of the American Medical Association. All CPT codes and descriptions are copyrighted 2017, American Medical Association. All rights reserved. CPT codes and CPT descriptions are from the current manuals and those included herein are not intended to be all-inclusive and are included for informational purposes only. Codes referenced in this clinical policy are for informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

Table 1: CPT codes not medically necessary when billed with a corresponding ICD-10CM in Table 2

CPT® Codes	Description
82306	Vitamin D; 25 hydroxy, includes fraction(s), if performed

Table 2: ICD-10-CM diagnosis codes not medically necessary when billed with a corresponding CPT code in Table 1.

ICD-10-CM Code	Description
E66.01	Morbid (severe) obesity due to excess calories
E66.09	Other obesity due to excess calories
E66.1	Drug-induced obesity
E66.3	Overweight
E66.8	Other obesity
E66.9	Obesity, unspecified
Z00.00	Encounter for general adult medical examination without abnormal findings
Z00.129	Encounter for routine child health examination without abnormal findings
Z00.8	Encounter for other general examination
Z68.52	Body mass index (BMI) pediatric, 5th percentile to less than 85th percentile for age
Z68.53	BMI pediatric, 85th percentile to less than 95th percentile for age
Z68.54	BMI pediatric, greater than or equal to 95th percentile for age

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a

discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note: For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

Note: For Medicare members, to ensure consistency with the Medicare National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), all applicable NCDs, LCDs, and Medicare Coverage Articles should be reviewed prior to applying the criteria set forth in this clinical policy. Refer to the CMS website at http://www.cms.gov for additional information.

Clorox Regular Bleach

Overview:
Size/Count 60.0 oz.

- Kills 99.9% of common household germs
- Patented whitest whites technology
- Not harmful to septic systems

Q. What organisms does Clorox® Regular-Bleach kill?

A. **Bacteria**
Staphylococcus aureus (Staph.)
Salmonella choleraesuis
Pseudomonas aeruginosa
Streptococcus pyogenes (Strep.)
Escherichia coli O157:H7 *(E. coli)*
Shigella dysenteriae
Methicillin Resistant Staphylococcus aureus (MRSA)

Fungi
Trichophyton mentagrophytes (can cause Athlete's Foot)
Candida albicans (a yeast)

Viruses
Rhinovirus Type 17 (a type of virus that can cause colds)
Influenza A (Flu virus)
Hepatitis A virus
Rotavirus
Respiratory Syncytial Virus (RSV)
HIV-1 (Human Immunodeficiency Virus)*
Herpes simplex Type 2
Rubella virus
Adenovirus Type 2
Cytomegalovirus

CONFIDENTIAL MORBIDITY REPORT

Remarks:

Title 17, California Code of Regulations (CCR) §2500, §2593, §2641.5-2643.20, and §2800-2812 Reportable Diseases and Conditions*

§ 2500. REPORTING TO THE LOCAL HEALTH AUTHORITY.

- **§ 2500(b)** It shall be the duty of every health care provider, knowing of or in attendance on a case or suspected case of any of the diseases or condition listed below, to report to the local health officer for the juridiction where the patient resides. Where no health care provider is in attendance, any individual having knowledge of a person who is suspected to be suffering from one of the diseases or conditions listed below may make such a report to the local health officer for the jurisdiction where the patient resides.
- **§ 2500(c)** The administrator of each health facility, clinic, or other setting where more than one health care provider may know of a case, a suspected case or an outbreak of disease within the facility shall establish and be responsible for administrative procedures to assure that reports are made to the local officer.
- **§ 2500(a)(14)** "Health care provider" means a physician and surgeon, a veterinarian, a podiatrist, a nurse practitioner, a physician assistant, a registered nurse, a nurse midwife, a school nurse, an infection control practitioner, a medical examiner, a coroner, or a dentist.

URGENCY REPORTING REQUIREMENTS [17 CCR §2500(h)(i)]

✆ ! = Report immediately by telephone (designated by a ♦ in regulations).
† = Report immediately by telephone when two or more cases or suspected cases of foodborne disease from separate households are suspected to have the same source of illness (designated by a ● in regulations.)
FAX ✆ ✉ = Report by electronic transmission (including FAX), telephone, or mail within one working day of identification (designated by a + in regulations).
= All other diseases/conditions should be reported by electronic transmission (including FAX), telephone, or mail within seven calendar days of identification.

REPORTABLE COMMUNICABLE DISEASES §2500(j)(1)

Acquired Immune Deficiency Syndrome (AIDS) (HIV infection only: see "Human Immunodeficiency Virus")
FAX ✆ ✉ Amebiasis
Anaplasmosis/Ehrlichiosis
✆ ! Anthrax, human or animal
FAX ✆ ✉ Babesiosis
✆ ! Botulism (Infant, Foodborne, Wound, Other)
Brucellosis, animal (except infections due to *Brucella canis*)
✆ ! Brucellosis, human
FAX ✆ ✉ Campylobacteriosis
Chancroid
FAX ✆ ✉ Chickenpox (Varicella) (only hospitalizations and deaths)
Chlamydia trachomatis infections, including lymphogranuloma venereum (LGV)
✆ ! Cholera
✆ ! Ciguatera Fish Poisoning
Coccidioidomycosis
Creutzfeldt-Jakob Disease (CJD) and other Transmissible Spongiform Encephalopathies (TSE)
FAX ✆ ✉ Cryptosporidiosis
Cyclosporiasis
Cysticercosis or taeniasis
✆ ! Dengue
✆ ! Diphtheria
✆ ! Domoic Acid Poisoning (Amnesic Shellfish Poisoning)
FAX ✆ ✉ Encephalitis, Specify Etiology: Viral, Bacterial, Fungal, Parasitic
✆ ! *Escherichia coli*: shiga toxin producing (STEC) including *E. coli* O157
† FAX ✆ ✉ Foodborne Disease
Giardiasis
Gonococcal Infections
FAX ✆ ✉ *Haemophilus influenzae*, invasive disease (report an incident of less than 15 years of age)
✆ ! Hantavirus Infections
✆ ! Hemolytic Uremic Syndrome
FAX ✆ ✉ Hepatitis A, acute infection
Hepatitis B (specify acute case or chronic)
Hepatitis C (specify acute case or chronic)
Hepatitis D (Delta) (specify acute case or chronic)
Hepatitis E, acute infection
Influenza, deaths in laboratory-confirmed cases for age 0-64 years
✆ ! Influenza, novel strains (human)
Legionellosis
Leprosy (Hansen Disease)
Leptospirosis
FAX ✆ ✉ Listeriosis
Lyme Disease
FAX ✆ ✉ Malaria
✆ ! Measles (Rubeola)
FAX ✆ ✉ Meningitis, Specify Etiology: Viral, Bacterial, Fungal, Parasitic
✆ ! Meningococcal Infections
Mumps
✆ ! Paralytic Shellfish Poisoning
Pelvic Inflammatory Disease (PID)
FAX ✆ ✉ Pertussis (Whooping Cough)
✆ ! Plague, human or animal
FAX ✆ ✉ Poliovirus Infection
FAX ✆ ✉ Psittacosis
FAX ✆ ✉ Q Fever
✆ ! Rabies, human or animal
FAX ✆ ✉ Relapsing Fever
Rickettsial Diseases (non-Rocky Mountain Spotted Fever), including Typhus and Typhus-like Illnesses
Rocky Mountain Spotted Fever
Rubella (German Measles)
Rubella Syndrome, Congenital
FAX ✆ ✉ Salmonellosis (Other than Typhoid Fever)
✆ ! Scombroid Fish Poisoning
✆ ! Severe Acute Respiratory Syndrome (SARS)
✆ ! Shiga toxin (detected in feces)
FAX ✆ ✉ Shigellosis
✆ ! Smallpox (Variola)
FAX ✆ ✉ *Staphylococcus aureus* infection (only a case resulting in death or admission to an intensive care unit of a person who has not been hospitalized or had surgery, dialysis, or residency in a long-term care facility in the past year, and did not have an indwelling catheter or percutaneous medical device at the time of culture)
FAX ✆ ✉ Streptococcal Infections (Outbreaks of Any Type and Individual Cases in Food Handlers and Dairy Workers Only)
FAX ✆ ✉ Syphilis
Tetanus
Toxic Shock Syndrome
FAX ✆ ✉ Trichinosis
FAX ✆ ✉ Tuberculosis
Tularemia, animal
✆ ! Tularemia, human
FAX ✆ ✉ Typhoid Fever, Cases and Carriers
FAX ✆ ✉ *Vibrio* Infections
✆ ! Viral Hemorrhagic Fevers, human or animal (e.g., Crimean-Congo, Ebola, Lassa, and Marburg viruses)
FAX ✆ ✉ West Nile virus (WNV) Infection
✆ ! Yellow Fever
FAX ✆ ✉ Yersiniosis
✆ ! OCCURRENCE of ANY UNUSUAL DISEASE
✆ ! OUTBREAKS of ANY DISEASE (Including diseases not listed in **§ 2500**). Specifiy if institutional and/or open community.

HIV REPORTING BY HEALTH CARE PROVIDERS § 2641.5-2643.20

Human Immunodeficiency Virus (HIV) infection is reportable by traceable mail or person-to-person transfer within seven calendar days by completion of the HIV/AIDS Case Report form (CDPH 8641A) available from the local health department. For completing HIV-specific reporting requirements, see Title 17, CCR, § 2641.5-2643.20 and http://www.cdph.ca.gov/programs/aids/Pages/OAHIVReporting.aspx

REPORTABLE NONCOMMUNICABLE DISEASES AND CONDITIONS §2800–2812 and §2593(b)

Disorders Characterized by Lapses of Consciousness (§2800-2812)
Pesticide-related illness or injury (known or suspected cases)**
Cancer, including benign and borderline brain tumors (except (1) basal and squamous skin cancer unless occurring on genitalia, and (2) carcinoma in-situ and CIN III of the Cervix) (§2593)***

LOCALLY REPORTABLE DISEASES (If Applicable):

* This form is designed for health care providers to report those diseases mandated by Title 17, California Code of Regulations (CCR). Failure to report is a misdemeanor (Health & Safety Code §120295) and is a citable offense under the Medical Board of California Citation and Fine Program (Title 16, CCR, §1364.10 and 1364.11).
** Failure to report is a citable offense and subject to civil penalty ($250) (Health and Safety Code §105200).
*** The Confidential Physician Cancer Reporting Form may also be used. See Physician Reporting Requirements for Cancer Reporting in CA at: www.ccrcal.org.

CONFIDENTIALITY AND RELEASE OF INFORMATION FORM

SAMPLE COPY

As employees of ________________________, we are required to observe Health Net's Member Rights. These rights include the right to confidentiality and release of information.

Any release of medical records information must have a consent signed by the patient. When requesting information from another facility, doctor's office, insurance company or a release of records directly to the patient, a Patient Access of Medical Records Authorization is to be completed.

The purpose of confidentiality is to protect the patient's right to privacy to prevent civil or criminal prosecution. The information in the medical record is confidential because it is considered a private communication that exists both legally and ethnically between the physician and his or her patient. This special communication is to be protected from unauthorized disclosure. Therefore, we must, in all ways possible, preserve the confidentiality of that communication.

All personnel shall strictly adhere to legal requirements governing release of information and shall not release any information to any person not directly concerned with the care of the patient except as above. In addition, all employees must avoid any type of gossip or discussion of patient care, diagnosis or treatment. Inadvertent comments could result in harm to the patient and make you and/or the health plan physically legally liable. Violation of the patient's right to medical confidentiality is grounds for immediate termination.

I do hereby affirm that I have read and understood the above and agree that I will strictly observe the rules set forth.

CONFIRMATION OF PREGNANCY FORM

To qualify for the incentive:

- Complete this form for Health Net Medi-Cal members only and fax to Health Net within seven days of the visit.
- This form must be signed by a primary care physician (PCP), nurse practitioner (NP), or physician's assistant (PA).
- A timely prenatal visit is in the first trimester of pregnancy or within 42 days of enrollment into Health Net Medi-Cal.
- This form must be kept in the patient's medical record.

Fax to Health Net at 877-783-0287

Consent for Minors to Travel without an Escort

1. I,____, residing at ________________________________ ____________________________________(Address) hereby affirm that I am the Parent/ Legal Guardian of______________________________(name of minor.)(Child).
2. The Child is_______________years old. The Child's date of birth is ___________________. The Child's Medi-Cal number is ________________________________.
3. I hereby consent to the Child riding unaccompanied for medical and non-medical transportation with any transportation provider under contract to ModivCare.
4. I understand the risks that can be reasonably anticipated by medical and non-medical transport of the Child including possible medical equipment, aircraft, vehicle failure, traffic hazards, adverse weather conditions, pilot or driver error, interruption of medical treatment during transport, or consequences of actions of persons outside the control of transport personnel. I also understand the risks associated with the Child's condition including the possible worsening of the Child's condition during transport or the inability to fully treat or diagnose due to unavailability of more sophisticated medical equipment or facilities not normally available during transport. I consider the above risks of transport are outweighed by the advantage of the Child receiving transport.
5. By giving this consent and release of liability, I hereby represent that the Child is fully capable of being transported without an adult escort, will not be disruptive, will follow all rules communicated by the driver and does not need an escort to provide emotional or any other type of support.
6. I understand that if any of the factors set forth in paragraph 5, above, cease to apply, then ModivCare will no longer transport the minor without an escort.
7. I agree to inform ModivCare, within 48 hours if, for any reason, I cease being the Legal Guardian of the Child and to inform ModivCare of the name and address of the new Legal Guardian.

In consideration of ModivCare's agreement to transport the minor without an escort, I hereby release ModivCare and its employees, officers, agents and subcontractors from any and all liability, caused of actions, or claims, in connection with the Child's transportation by ModivCare and its subcontractors. I understand the content of this form and have been notified of the risks of transport.

Mail the completed form to the address listed above or fax to the fax number listed above. The completed form must be on file at the ModivCare office for any trips to be set up without an escort for the Child. Once a completed consent form is on file, it is considered to be active and valid for all transports until the consent is withdrawn.

STERILIZATION CONSENT FORM (NON-FEDERALLY FUNDED)

NOTICE: YOUR DECISION AT ANY TIME NOT TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITHHOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from

____
(Doctor or Clinic)

When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I understand that I can change my mind at any time.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED **PERMANENT** AND **NOT REVERSIBLE**. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN, OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will undergo an operation known as a

____

The discomforts, risks, and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least 30 days after I sign this form except in specific instances that have been fully explained to me.

I wish to waive the 30-day waiting period to ______ days (not less than 72 hours).

I am at least 18 years of age.

OR

I am under 18 **AND**

I have entered into a valid marriage, **OR**

I am on active duty with the U.S. armed services, **OR**

I have received a declaration or emancipation pursuant to Section 64 of the Civil Code, **OR**

I am over 15 years old, live apart from my parents or guardians, and manage my own financial affairs.

I was born on ______________________________
(Month) (Day) (Year)

I, ______________________________, hereby consent of my own free will to undergo an operation intended to sterilize me, to be performed by ______________________________
(Doctor)

by a method called ______________________________ .

I am not in labor and it has been at least 24 hours since I gave birth or had an abortion. I am not seeking to obtain or obtaining an abortion at this time.

I am not under the influence of alcohol or other substances that affect my state of awareness.

I understand that I may have a witness of my choice present during the time my consent is obtained.

My consent expires 180 days from the date of my signature below.

I have received a copy of this form.

______________________________ ______________________________
(Signature) *(Date [Month/Day/Year])*

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______________________________ language and explained its contents to him/her. To the best of my knowledge and belief, he/she understood this explanation.

______________________________ ______________________________
(Interpreter) *(Date [Month/Day/Year])*

STATEMENT OF PERSON OBTAINING CONSENT

Before ______________________________ signed the
(Name of Individual)

consent form, I explained to him/her the nature of the sterilization operation ______________________________, the fact that it is intended to be a final and irreversible procedure and the discomforts, risks, and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by federal funds.

To the best of my knowledge and belief, the individual to be sterilized is at least 18 years old, or meets the necessary age requirements under applicable regulations, and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

I certify that I explained orally to the person to be sterilized the requirements for informed consent as set forth on this form and in applicable regulations.

FORMULARIO DE PERMISO LA ESTERILIZACIÓN (CON FONDOS NO FEDERALES)

NOTA: SI EN CUALQUIER MOMENTO DECIDE NO HACERSE ESTERILIZAR ELLO NO RESULTARA EN QUE SE LE RETIREN O RETENGAN CUALQUIERA DE LOS BENEFICIOS PROPORCIONADOS POR PROGRAMAS O PROYECTOS QUE RECIBEN FONDOS DEL GOBIERNO FEDERAL.

PERMISO PARA ESTERILIZACIÓN

He pedido y recibido información sobre la esterilización de

____
(Doctor o Clínica)

Cuando me informé al respecto, se me dijo que la decisión de permitir que se me esterilice es absolutamente mía. Me han informado que, si así lo deseo, puedo decidir no permitir que se me esterilice. Si decido no permitir que se me esterilice, esta decisión no afectará mis derechos a cuidados o tratamientos futuros. Entiendo que puedo cambiar de opinión en cualquier momento.

ENTIENDO QUE LA ESTERILIZACIÓN SE CONSIDERA **PERMANENTE** E **IRREVOCABLE.** HE DECIDIDO QUE NO QUIERO QUEDAR EMBARAZADA, TENER O PROCREAR HIJOS.

Se me ha informado acerca de los métodos anticonceptivos temporarles que están disponibles y que se me podrán proporcionar, los que sí me permitirán procrear un hijo en el futuro. He rechazado estas alternativas y he elegido ser esterilizado(da).

Entiendo que se me hará una operación conocida bajo el nombre de

____

Los malestares, riesgos y beneficios asociados con esta operación me han sido explicados. Todas mis preguntas han sido contestadas en forma satisfactoria.

Entiendo que la operación no será realizada por lo menos 30 días después de haber firmado este formulario, con excepción de situaciones especificas que me han sido minuciosamente explicadas.

Deseo renunciar el derecho de tener 30 días de espera. En cambio, estoy de acuerdo en esperar ______ días. (No menos de 72 horas.)

Tengo por lo menos 18 años de edad.

O

Soy menor de 18 años de edad, ***Y***

Estoy casado(da) legalmente, ***O***

Estoy en servicio activo en las fuerzas armadas de los EEUU, ***O***

He recibido una declaración de emancipación de acuerdo a la Sección 64 del Código Civil, ***O***

Tengo más de 15 años de edad, vivo separado(da) de mis padres o guardianes, y manejo mis asuntos financieros.

Nací en ______________________________
(Mes) (Día) (Año)

Yo, ______________________________, por mi firma doy mi permiso a que se me haga una operación cuyo fin es el de estirilizarme, y que será hecha por ______________________________
(Doctor)

por el método conocido como ______________________________ .

No estoy en trabajo de parto y han transcurrido por lo menos 24 horas desde que di a luz o tuve un aborto. Yo no estoy buscando u obteniendo un aborto en este momento.

No estoy bajo la influencia del alcohol u otras substancias que afecten mis facultades.

Entiendo que puedo tener un te`stigo de mi preferencia presente en el momento que dé el permiso para que se me esterilice.

Mi permiso se vence a los 180 días de la fecha de mi firma.

He recibido una copia de éste formulario.

______________________________ ______________________________
(Firma) *(Fecha [Mes/Día/Año])*

DECLARACIÓN DEL INTÉRPRETE

Si se proporciona un intérprete para asistir a la persona a ser esterilizada:

He traducido la información y consejos oralmente por la persona que obtiene este permiso, a la persona a ser esterilizada. También le he leído el formulario de permiso en español y le he explicado su contenido. Según mi mejor entender el/ella ha comprendido esta explicación.

______________________________ ______________________________
(Intérprete) *(Fecha [Mes/Día/Año])*

DECLARACIÓN DE LA PERSONA QUE OBTIENE ESTE PERMISO

Antes de que ______________________________ firmara este
(Nombre de la Persona)
formulario de permiso, le expliqué la naturaleza de la operación para la esterilización llamada ______________________________ el hecho de que se trata de un procedimiento final e irrevocable, habiéndole explicado también los malestares, riesgos y beneficios que la acompañan.

Yo advertí a la persona a ser esterilizada que existen métodos anticonceptivos alternos, que son temporarles. Le expliqué que la esterilización es diferente porque es permanente.

He informado a la persona a ser esterilizada que puede retirar su consentimiento a cualquier momento y que el/ella no perderá ninguno de los servicios de salud o cualquier otros beneficios proporcionados con fondos federales.

De acuerdo a mi mejor entender y creer la persona a ser esterilizada tiene por lo menos 18 años de edad, o reune los requisitos necesarios de edad bajo los reglamentos en vigor, y parece mentalmente competente. El/Ella sabiendo y voluntariamente ha solicitado ser esterilizado(da) y parece comprender la naturaleza y consecuencias del procedimiento.

Yo certifico que le he explicado a la persona a ser esterilizada los requisitos por el entendimiento de permiso. Según está suscrito en este formulario y en regulaciones pertinentes.

______________________________ ______________________________

(Dirección)

DECLARACIÓN DEL MÉDICO

Poco antes de efectuar la operación para la esterilización de ______________________________ el ______________________________,
(Nombre de la Persona a ser Esterilizada) *(Fecha de la Operación de Esterilización)*
yo le expliqué la naturaleza de la operación llamada

____
(Tipo de Operación)
el hecho de que es un procedimiento final e irrevocable, y los malestares, riesgos y beneficios derivados del mismo.

Yo advertí a la persona a ser esterilizada que existen métodos anticonceptivos que son temporarles. Yo le expliqué que la esterilización es diferente, porque es permanente.

He informado a la persona a ser esterilizada que su permiso puede ser retirado en cualquier momento y que por ello el/ella no perderá ninguno de los cuidados médicos o beneficios proporcionados con fondos federales.

A mi mejor entender, la persona a ser esterilizada tiene por lo menos 18 años de edad, o reune los requisitos de edad necesarios bajo los reglamentos en vigor, y parece mentalmente competente. Ha pedido voluntariamente y con pleno conocimiento ser esterilizado(da) y parece comprender la naturaleza y consecuencias del procedimiento.

(Instrucciones para el uso de los párrafos finales alternos: Utilice el primer párrafo que sigue, excepto en casos de parto prematuro, cirugía abdominal de emergencia o renuncia del paciente pare que la esterilización se efectúe en menos de 30 días después de la fecha de la firma del formulario de permiso. En dichos casos, deberá usarse el segundo párrafo. Tache el párrafo que no utilice.)

1. Por lo menos 30 días han transcurrido entre la fecha en que la persona firmó el formulario de permiso y la fecha en que se efectuó la operación de esterilización.
2. Yo certifico que esta esterilización fue efectuada antes de los 30 días pero después de 72 horas de haber firmado la persona el formulario de consentimiento, debido a las circunstancias siguientes (haga una marca donde corresponda y dé la información requerida):
   a. Parto prematuro:
      Fecha en que debería haber ocurrido el parto: ______________
   b. Cirugía abdominal de emergencia (describa las circunstancias):
      ____
      Fecha en que la persona intentó ser esterilizada: ______________
   c. El/La paciente renunció el derecho al período de espera de 30 días a cambio de un período de espera de _____ días. (No menos de 72 horas.)

CONSENT FORM - PM 330

NOTA: NINGUNO DE LOS BENEFICIOS QUE RECIBO DE LOS PROGRAMAS O PROYECTOS SUBSIDIADOS CON FONDOS FEDERALES SE ME CANCELARÁ O SUSPENDERÁ EN CASO DE QUE YO DECIDA NO ESTERILIZARME.

■ CONSENTIMIENTO PARA ESTERILIZACIÓN ■

Declaro que he solicitado y obtenido información sobre esterilización de ______________________ (doctor o clínica). Al solicitar información se me dijo que yo soy la única persona que puede decidir esterilizarme o no y que estoy en mi derecho a negarme a ser esterilizado. Mi decisión de no esterilizarme no afectará mi derecho a recibir atención o tratamiento médico en el futuro, y tampoco dejaré de recibir ningún tipo de asistencia o beneficios que recibo actualmente de los programas subsidiados con fondos federales, tales como A.F.D.C. o Medicaid o de aquellos a los que pudiera tener derecho en el futuro.

ENTIENDO QUE LA ESTERILIZACIÓN DEBE SER CONSIDERADA **PERMANENTE** E **IRREVERSIBLE**. DECLARO QUE ES MI DECISIÓN EL NO QUERER VOLVER A EMBARAZARME, DAR A LUZ O SER PADRE NUEVAMENTE.

Declaro que se me ha informado acerca de la existencia de otros métodos anticonceptivos temporales que están a mi disposición y que me permitirían en un futuro tener hijos o ser padre nuevamente. Sin embargo, he rehusado estos metodos alternativos y he decidido esterilizarme.

Entiendo que se me va a esterilizar mediante un método conocido como:

____
(Nombre del procedimiento)

Declaro que se me explicaron los malestares, riesgos y beneficios asociados con la operación, y que se respondió a todas mis preguntas satisfactoriamente.

Entiendo que la operación no se llevará a cabo hasta por lo menos treinta (30) días después de que firme este formulario, y que puedo cambiar de parecer en cualquier momento y decidir no esterilizarme. Si decido no esterilizarme, no dejaré de recibir ninguno de los beneficios o servicios médicos ofrecidos por los programas subsidiados con fondos federales.

Declaro tener al menos 21 años de edad y que nací en ____/____/____.
Mes Día Año

Apellido

Nombre *I.*

por medio de la presente doy mi consentimiento libre y voluntario para ser esterilizado/a por ______________________
(Nombre del Doctor)

utilizando un método conocido como ______________________
(Nombre del procedimiento)

Mi consentimiento es válido sólo por un plazo de **180 días** a partir de la fecha en que firme este formulario como se muestra **abajo**.

Asimismo, doy mi consentimiento para que este formulario y otros expedientes médicos sobre la operación se den a conocer a:

- **Representantes del Departamento de Salud y Servicios Humanos.**
- **Empleados de los programas o proyectos que reciben fondos de dicho Departamento, pero únicamente para determinar si se cumplieron las leyes federales.**

He recibido copia de este formulario.

DOSE (mg/ml – mg/tab): ________________________________ PROVIDER'S DEA NUMBER ______________________

ORIGINAL QUANTITY (ORIGINAL NUMBER OF DOSES): ________________________________

DATE	PATIENT NAME	DISPENSED/GIVEN BY	QUANTITY DISPENSED	BALANCE AVAILABLE

PCP:	
SECTION: Infection Control	
POLICY AND PROCEDURE: Decontamination of Surfaces	Approved date: ____________________ Approved by: ______________________ Effective date: ____________________ Revised date: _____________________ Revised date: _____________________

POLICY:
The site will follow decontamination procedures on contaminated surfaces according to Cal-OSHA Standards, 8 CCR §5193; CA H&S Code §118275. The site will utilize products from the Current EPA product lists and information available from the EPA, Antimicrobial Division (703) 305-1284 or (703) 308-0127.

PROCEDURE:

I. ROUTINE DECONTAMINATION

A. Contaminated work surfaces are decontaminated with an appropriate disinfectant (29 CFR 1910.1030). Written “housekeeping” schedules have been established and are followed for regular routine daily cleaning. Staff is able to identify frequency for routine cleaning of surfaces and equipment, the disinfectant used and responsible personnel.

II. SPILL PROCEDURE

A. Staff is able to identify procedures for prompt decontamination of blood/body fluid spills, the disinfectant used, and the responsible person(s).

III. DISINFECTANT PRODUCTS

A. Products used for decontamination have a current EPA-approved status. Product will effectively kill HIV/HBV/TB. If manufacturer’s product label indicates it will kill TB, it is understood that product will effectively kill HIV and HBV. Decontamination products are reconstituted and applied according to manufacturer’s guidelines for “decontamination.”

IV. 10% BLEACH SOLUTION

A. If 10% bleach solution is used, it is changed/reconstituted ***every*** 24 hours (due to instability of bleach once mixed with water). Surface is cleaned prior to disinfecting [due to presence of organic matter (e.g., dirt, blood, excrement) inactivates active ingredient, sodium hypochlorite]. Surface is air dried or allowed appropriate time (stated on label) before drying. Manufacturer’s directions, *specific* to every bleach product, are followed carefully.

Delegation of Services Agreements – Change in Regulations

Recently, Title 16, Division 13.8, Article 4, section 1399.540 has been amended to include several requirements for the delegation of medical services to a physician assistant. There are four specific changes with this amendment:

Background:
The Delegation of Services Agreement (DSA) is a document used by supervising physicians and physician assistants to meet requirements of Section 1399.540.
The DSA is the foundation of the relationship between a supervising physician and the physician assistant, and specifies the names of the supervising physicians and what types of medical services the physician assistant is allowed to perform, how they are performed, how the patient charts will be reviewed and countersigned, and what type of medications the physician assistant will transmit on behalf of the supervising physician.

Regulatory Requirements:

1) A physician assistant may provide medical services, which are delegated in writing by a supervising physician who is responsible for patients, cared for by the physician assistant. The physician assistant may only provide services which he or she is competent to perform, which are consistent with their education, training and experience, and which are delegated by the supervising physician.

2) The delegation of services agreement is the name of the document, which delegates the medical services. More than one supervising physician may sign the delegation of services agreement only if each supervising physician has delegated the same medical services. A physician assistant may provide medical services pursuant to more than one delegation of services agreement.

3) The Physician Assistant Board or their representative may require proof or demonstration of competence from any physician assistant for any medical services performed.

4) If a physician assistant determines a task, procedure or diagnostic problem exceeds his or her level of competence, and then the physician assistant shall either consult with a physician or refer such cases to a physician.

Question: What if a physician assistant works for more than one supervising physician at a hospital or clinic? Do we need to have separate DSAs for each supervising physician?

Answer: The Board has had questions regarding how the DSA would be written if a physician assistant works for more than one supervising physician at a hospital or clinic. If the duties and medical services performed are consistent with each supervising physician, then one DSA can be written to include several supervising physicians. Each supervising physician must sign and date the DSA, along with the signature of the physician assistant.

Question: What if a physician assistant works for one supervising physician who is an ob-gyn, and also works for an ortho supervising physician, and both are at the same clinic or hospital?

Answer: If the duties and medical services provided by the physician assistant differ from one supervising physician to another, then it is recommended that a separate DSA be written for each supervising physician. However, one DSA could be used, but it would need to be separated with which duties are allowed under each supervising physician. Again, signatures and dates from all parties must be included on the DSA.

Question: What if the physician assistant works at several different clinics – can one DSA be written?

Answer: A separate DSA should be made for each hospital or clinic, regardless of how many supervising physicians the physician assistant works with.

Alternatively, a physician assistant may have a DSA that specifies what services can be provided at a specific site.

Question: How long should I retain my DSA?

Answer: You should retain the DSA as long as it is valid. Additionally, it is recommended that you keep a copy of your DSA for at least one to three years after it is no longer the current DSA in case you need to reference the document. However, there is no legal requirement to retain the DSA once it is no longer valid and current.

DELEGATION OF SERVICES AGREEMENT
BETWEEN
A SUPERVISING PHYSICIAN AND A PHYSICIAN ASSISTANT
and
SUPERVISING PHYSICIAN'S RESPONSIBILITY FOR SUPERVISION OF A PHYSICIAN ASSISTANT

Title 16, Section 1399.540 of the Physician Assistant Regulations states, in part, "A physician assistant may only provide those medical services which he or she is competent to perform and which are consistent with the physician assistant's education, training, and experience, and which are delegated in writing by a supervising physician who is responsible for the patients cared for by that physician assistant. b) The writing which delegates the medical services shall be known as a delegation of services agreement. A delegation of services agreement shall be signed and dated by the physician assistant and each supervising physician. A delegation of services agreement may be signed by more than one supervising physician only if the same medical services have been delegated by each supervising physician. A physician assistant may provide medical services pursuant to more than one delegation of services agreement."

The following two sample documents are attached to assist you with meeting this legal requirement:

- Delegation of Services Agreement (DSA) Between Supervising Physician and Physician Assistant; and,
- Supervising Physician's Responsibility for Supervision of Physician Assistant Agreement.

These are sample documents. They are for your convenience, information, and use. Please feel free to duplicate or modify them as appropriate and consistent with law.

If you choose not to use the sample documents, please be aware that you are still required by law to execute a DSA with your supervising physician. The DSA must be signed and dated by you and your supervising physician. The original or a copy of this document should be maintained at all practice sites where the physician assistant practices, and should be readily accessible. It is recommended that you retain prior DSAs for one to three years after the DSA is no longer current or valid.

While every practicing physician assistant is required to have a DSA, you are **not** required to submit it to the Physician Assistant Board. If requested, you must make a copy of your DSA available to any authorized agent of the Medical Board of California, the Osteopathic Medical Board of California, or the Physician Assistant Board who may request it.

Failure to have a current DSA constitutes a violation of the Physician Assistant Regulations and is grounds for disciplinary action against a physician assistant's license. In addition, failure by the physician assistant and supervising physician to comply with the supervision requirements specified in the Physician Assistant Regulations and in the Delegation of Services Agreement is ground for disciplinary action.

THE ATTACHED DOCUMENTS DO NOT NEED TO BE RETURNED TO THE PHYSICIAN ASSISTANT BOARD

rev 11/08

He/she took (or is to take) the licensing examination for physician assistants recognized by the State of California (e.g., Physician Assistant National Certifying Examination or a specialty examination given by the State of California) on _________________________.
(Date)

He/she was first granted licensure by the Physician Assistant Board on ______________________, which expires on ___________________, unless renewed.
(Date) (Date)

SUPERVISION REQUIRED. The physician assistant named above (hereinafter referred to as PA) will be supervised in accordance with the written supervisor guidelines required by Section 3502 of the Business and Professions Code and Section 1399.545 of the Physician Assistant Regulations. The written supervisor guidelines are incorporated with the attached document entitled, "Supervising Physician's Responsibility for Supervision of Physician Assistants."

AUTHORIZED SERVICES. The PA is authorized by the physician whose name and signature appear below to perform all the tasks set forth in subsections (a), (d), (e), (f), and (g) of Section 1399.541 of the Physician Assistant Regulations, when acting under the supervision of the herein named physician. (In lieu of listing specific lab procedures, etc. the PA and *supervising* physician may state as follows: "Those procedures specified in the practice protocols or which the supervising physician specifically authorizes.")

The PA is authorized to perform the following laboratory and screening procedures:

____

____

The PA is authorized to assist in the performance of the following laboratory and screening procedures:

____

____

The PA is authorized to perform the following therapeutic procedures:

____

____

The PA is authorized to assist in the performance of the following therapeutic procedures:

____

____

The PA is authorized to function as my agent per bylaws and/or rules and regulations of (name of hospital):

____

____

a) The PA is authorized to write and sign drug orders for Schedule: II, III, IV, V without advance approval (circle authorized Schedule(s). The PA has taken and passed the drug course approved by the Board on __________ (attach certificate). DEA #:______________________________.
Date

or

b) The PA is authorized to write and sign drug orders for Schedule: II, III, IV, V with advance patient specific approval (circle authorized Schedule(s). DEA #:______________________________.

CONSULTATION REQUIREMENTS. The PA is required to always and immediately seek consultation on the following types of patients and situations (e.g., patient's failure to respond to therapy; physician assistant's uncertainty of diagnosis; patient's desire to see physician; any conditions which the physician assistant feels exceeds his/her ability to manage, etc.)

____
(List Types of Patients and Situations)

____

MEDICAL DEVICES AND PHYSICIAN'S PRESCRIPTIONS. The PA may transmit by telephone to a pharmacist, and orally or in writing on a patient's medical record or a written prescription drug order, the supervising physician's prescription in accordance with Section 3502.1 of the Business and Professions Code.

The supervising physician authorizes the delegation and use of the drug order form under the established practice protocols and drug formulary. ________ YES _________ NO

The PA may also enter a drug order on the medical record of a patient at ______________________________
(Name of Institution)
in accordance with the Physician Assistant Regulations and other applicable laws and regulations.

Any medication handed to a patient by the PA shall be authorized by the supervising physician's prescription and be prepackaged and labeled in accordance with Sections 4076 of the Business and Professions Code.

PRACTICE SITE. All approved tasks may be performed for care of patients in this office or clinic located at ______________________________________ and, in ____________________________ hospital(s) and
(Address / City) (Address / City)
____ skilled nursing facility (facilities) for care of
(Name of Facility)
patients admitted to those institutions by physician(s) ______________________________________ .
(Name/s))

EMERGENCY TRANSPORT AND BACKUP. In a medical emergency, telephone the 911 operator to summon an ambulance.

The _______________________________________ emergency room at __________________________
(Name of Hospital) (Phone Number)
is to be notified that a patient with an emergency problem is being transported to them for immediate admission. Give the name of the admitting physician. Tell the ambulance crew where to take the patient and brief them on known and suspected health condition of the patient.

SUPERVISING PHYSICIAN'S RESPONSIBILITY FOR SUPERVISION OF PHYSICIAN ASSISTANT

SUPERVISOR____, M.D./D.O. is licensed to practice in California as a physician and surgeon with medical license number ________________. Hereinafter, the above named physician shall be referred to as the supervising physician.

SUPERVISION REQUIRED. The physician assistant (PA) named in the attached Delegation of Services Agreement will be supervised by the supervising physician in accordance with these guidelines, set forth as required by Section 3502 of the Business and Professions Code and Section 1399.545 of the Physician Assistant Regulations, which have been read by the physician whose signature appears below.

The physician shall review, countersign, and date within seven (7) days the medical record of any patient cared for by the physician assistant for whom the physician's prescription for Schedule II medications was transmitted or carried out.

REPORTING OF PHYSICIAN ASSISTANT SUPERVISION. Each time the physician assistant provides care for a patient and enters his or her name, signature, initials, or computer code on a patient's record, chart or written order, the physician assistant shall also enter the name of his or her supervising physician who is responsible for the patient. When the physician assistant transmits an oral order, he or she shall also state the name of the supervising physician responsible for the patient.

MEDICAL RECORD REVIEW. One or more of the following mechanisms, as indicated below, by a check mark (x), shall be utilized by the supervising physician to partially fulfill his/her obligation to adequately supervise the actions of the physician assistant named ____.
(Name of PA)

______ Examination of the patient by a supervising physician the same day as care is given by the PA.

______ The supervising physician shall review, audit, and countersign every medical record written by the PA within __________________________________ of the encounter.
(Number of Days May- Not Exceed 30 Days)

______ The physician shall audit the medical records of at least 5% of patients seen by the PA under any protocols which shall be adopted by the supervising physician and the physician assistant. The physician shall select for review those cases which by diagnosis, problem, treatment, or procedure represent, in his or her judgment, the most significant risk to the patient.

______ Other mechanisms approved in advance by the Physician Assistant Board may be used. Written documentation of those mechanisms is located at ____.
(Give Location)

______ INTERIM APPROVAL. For physician assistants operating under interim approval, the supervising physician shall review, sign, and date the medical records of all patients cared for by the physician assistant within seven (7) days if the physician was on the premises when the physician assistant diagnosed or treated the patient. If the physician was not on the premises at that time, he or she shall review, sign, and date such medical records within 48 hours of the time the medical services were provided.

BACK UP PROCEDURES: In the event this supervising physician is not available when needed, the following physician(s) has (have) agreed to be a consultant(s) and/or to receive referrals:

____Phone: ________________________
(Printed Name and Specialty)

____Phone: ________________________
(Printed Name and Specialty)

PROTOCOLS NOTE: This document **does not** meet the regulation requirement to serve as a protocol. Protocols, if adopted by the supervising physician, must fully comply with the requirements authorized in Section 3502 (c) (1) of the Business and Professions Code.

Re: Provider Delegation Agreement
«PPG_Name» #«Commercial_PPG»

Dear «Contact_Name»:

Health Net of California, Inc., (Health Net) Delegation Oversight Committee has reviewed and accepted the documentation and findings from your annual assessment. You have met Health Net's criteria for the delegation of Utilization Management/Complex Case Management (CCM)/Special Needs Program (SNP) in connection with your Health Net Provider Participation Agreement.

Please have an authorized representative (Medical Director or Administrator) review and sign the enclosed "Provider Delegation Agreement" and return it to Health Net by **<Date, 15 calendar days from the date of the letter>**. Please retain a copy for your files.

Attached is the delineation of delegated Utilization Management, CCM and SNP responsibilities.

Health Net will continue to oversee your delegated activities. I will work with you on an on-going basis during the upcoming year to monitor your compliance with the delegated activities and to assist you with corrective actions as appropriate. Health Net agrees to provide available member experience data related to PPG's performance of utilization management and case management functions to the PPG on request.

If you have any questions, please call me at <insert MPM phone number> or e-mail me at <insert MPM email address>@healthnet.com. Congratulations on your successful management of delegated responsibilities and thank you for your cooperation and support.

Sincerely,

Clinical Compliance Auditor
Delegation Oversight
Health Net of California, Inc.

Attachments: Provider Delegation Agreement

Provider Delegation Agreement

In connection with its Health Net of California, Inc., ("Health Net") Provider Participation Agreement, «PPG_Name» agrees to accept responsibility for delegation of Utilization Management/CCM/SNP activities (per the attached grid).

Effective «audit or contract date», «PPG_Name» agrees to comply with the responsibilities (including the performance requirements) set forth in the Health Net / Participating Physician Group / Provider Delineation of Delegated Utilization Management/CCM/SNP Responsibilities grid. Health Net may determine that a periodic visit is indicated. In such case, Health Net will contact you to establish a time and date for the visit. At a minimum, Health Net will schedule an annual visit to evaluate the delegated activities.

In compliance with accreditation standards and regulatory requirements «PPG_Name» shall not restrict the rights and obligations of Member Physician to communicate freely with Members regarding their medical condition and treatment alternatives, including medication treatment options, regardless of benefit coverage limitations.

«PPG_Name» (if contracted to serve Medicare Advantage members) recognizes its responsibility to conform to the delegation requirements in a manner consistent with CMS regulations.

«PPG_Name» agrees to abide by mutually agreed upon corrective action plans. In the event that «PPG_Name» does not perform the delegated responsibilities as defined in the attached Health Net / Participating Physician Group / Provider Delineation of Delegated Utilization Management/CCM/SNP Responsibilities grid, and in accordance with Health Net, NCQA and regulatory standards, Health Net reserves the right, upon written notice, to revoke the delegation of some or all these responsibilities for Health Net members as set forth herein. Except in the event of risk to Members, «PPG_Name» will be provided a thirty- (30) day cure period prior to delegation being revoked.

This agreement shall remain in effect unless the «PPG_Name» is notified otherwise by Health Net.

Health Net of California, Inc. Date: <insert DOC approval date>

Elaine Robinson-Frank

Goals	☒ Yes ☐ No	Delegate has written care management P&Ps and systems to assure access to: • Medical services across life cycle • Mental health services • Social services • Translation and linguistic services • Coordination of care through a central point of contact • Seamless transitions across healthcare settings, care providers and health services • Preventive health services • Appropriate utilization of services in all settings where appropriate • Promote member independence and self-management • Improve member health status through improved mobility and functional status • Pain management services • Improve member's health status through improved satisfaction with health status and healthcare services • Improve member's health status by developing SMART and prioritized goals identified and stratified with member. • Identification of barriers to meeting members' goals.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute performance standards and guidelines to providers that are consistent with CMS SNP requirements. • Monitor and oversee delegated function to ensure standards are met.	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Staff Structure and Roles	☒ Yes ☐ No	Delegate has appropriate staff to perform administrative and clinical oversight duties. These staff include some or all of the following: • Medical Director • Administrator, director or executive staff (with implementation at committee or local level as needed) Delegate assures that staff effectively performs administrative and clinical oversight duties. These duties include some or all of the following: • Review medical charts • Conduct/document performance assessments • Conduct/document and/or observe interdisciplinary team meetings	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers the performance standards and guidelines that are consistent with CMS SNP requirements • Provide staff job descriptions as needed • Monitor and oversee delegated function to ensure standards are met • Provide Benefit coordinator, account liaison, plan representative, Quality Improvement Specialist and HIPPA compliance officer as needed by Delegate	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
	☒ Yes ☐ No	Delegate has appropriate staff to perform care management and coordination of services and benefits. These staff include some or all of the following: • Care manager or coordinator • Durable medical equipment coordinator • Utilization review coordinator • Discharge planning specialist • Nurse Manager or coordinator • Health information specialist • Training • Data analysis	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Maintain a call center for 24-hour telephonic care management • Maintain a website for member educational material and plan information • Facilitate translation services	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

	☒ Yes ☐ No	Delegate assures that care management staff performs duties including some or all of the following: • Facilitates the implementation of the individualized care plan for each member • Schedules or facilitates scheduling appointments and follow-up services. • Facilitates transportation services Requests consultation and diagnostic reports from network specialists	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Maintain a call center for 24-hour telephonic care management • Maintain a website for member educational material and plan information • Facilitate translation services	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
	☒ Yes ☐ No	Delegate assigns each member to an interdisciplinary care team (ICT) composed of primary, ancillary, and specialty care providers, where appropriate. Required members of the ICT include the following: : • Medical expert • Mental health/behavioral health expert (if member has identified BH needs) • Social services expert The ICT may include some or all of the following: • Primary care physician • Registered nurse • Restorative health specialist (physical, occupational, speech, recreation) • Board-certified physician • Dietitian, nutritionist • Caregiver/family member • Preventive health/health promotion specialist • Pharmacist • Pastoral specialist	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements~~, and NCQA standards.~~ • Monitor and oversee delegated function to ensure standards are met • HN's Pharmacy Department to provide Medication Therapy Management (MTM) program. only • Provide Behavioral and/or mental health specialist psychiatrist, psychologist, drug or alcohol therapist • Review interdisciplinary care team meeting minutes and attendance including member and or caregiver attendance • Review documentation in individualized care plan. Identification of vulnerable members with special needs and how needs were met with benefits and services	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
	☒ Yes ☐ No	Delegate assures that the interdisciplinary care team works together to manage member care by performing duties including some or all of the following: • Conduct care coordination meetings on a regular schedule (these may be face to face or web-based) • If regular meetings are not held, documentation and justification for lack of meetings will be required. • Conduct case rounds on a regular schedule • Conduct conference calls among plan, providers, and members if appropriate • Use e-mail, fax, and written correspondence to communicate • Delegate analyzes data demonstrating the beneficiary/caregiver/member participation in the ICT meetings and takes action to improve deficiencies	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Call line or other mechanism for member inquiries and input • Maintain a mechanism for member complaints and grievances • Review interdisciplinary care team meeting minutes and attendance including member and/or caregiver attendance • Review documentation in individualized care plan. Identification of vulnerable members with special needs and how needs were met with benefits and services	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Provider Network	☒ Yes ☐ No	Delegate assures that providers and facilities have specialized clinical expertise pertinent to the targeted special needs population beyond the scope of the interdisciplinary team. Specialized clinical experts' duties may include: • Assess, diagnose, and treat in collaboration with the interdisciplinary team • Provide specialized services such as wound management services/referral to wound specialist • Conduct home visits to include home safety assessments utilizing contracted vendors • Conduct risk prevention programs such as fall prevention or wellness promotion • Provide hospital-based or urgent care facility-based emergency services • The Delegate/provider contacts beneficiaries to remind them of upcoming appointments • The Delegate/provider contacts beneficiaries to follow up on missed appointments	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• 24-hour access to a clinical consultant • Disease management programs • Provide pharmacotherapy consultation and management clinics • Provide home-based palliative or end-of-life care • Review interdisciplinary care team meeting minutes and attendance including member and or caregiver attendance • Review documentation in individualized care plan identification of vulnerable members with special needs and how needs were met with benefits and services • Annually conduct Geo access survey	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Provider Network	☒ Yes ☐ No	Delegate has a process to coordinate the delivery of standard services and benefits through a provider and facility network having clinical expertise pertinent to the targeted special needs population. The process includes some or all of the following: • The beneficiary's interdisciplinary care team approves all referrals to the provider network prior to the delivery of services when such referrals require prior authorization • The interdisciplinary care team, determines whether beneficiaries require services outside the existing provider network and approves services prior to delivery • Communicates need for add-on benefits to HN based on issues identified in the beneficiary's individualized care plan. • The Delegate has a process to track and analyze services and benefits utilization • The Delegate disseminates the results of the utilization analysis to the interdisciplinary team.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Contract with providers having the clinical expertise to meet the specialized needs of the targeted SNP population • Facilitate access to Specialist in narrow fields not frequently available within each Delegate network • Contract with facilities that provide diagnostic and treatment services to meet the specialized needs of the targeted SNP population • Establish and share policies and procedures that direct how the network providers and facilities will deliver services to members • Review individualized care plan for documentation of transition of care management consistent with SNP structure and process measures	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Provider Network	☒ Yes ☐ No	Delegate assures its providers deliver evidence-based services in accordance with nationally recognized clinical protocols and guidelines when available (see the Agency for Healthcare Research and Quality's National Guideline Clearinghouse at http://www.guideline.gov)	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	Written contract with Delegate stipulates that contracted providers deliver services in accordance with nationally recognized clinical protocols and guidelines when available	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Provider Network	☒ Yes ☐ No	Delegate has policies, procedures, and a system to coordinate the delivery of add-on benefits and services that meet the specialized needs of the most vulnerable including frail/disabled beneficiaries and beneficiaries near the end of life. The system includes: • Contracts with providers having the clinical expertise to meet the specialized needs of frail/disabled beneficiaries and beneficiaries near the end of life • Contracts with facilities that provide diagnostic and treatment services to meet the specialized needs of frail/disabled beneficiaries and beneficiaries near the end of life • Policies and Procedures that direct how the network providers and facilities will deliver services to the frail/disabled beneficiaries and beneficiaries near the end of life and notifies the interdisciplinary care team • The Delegate administrative staff approves all referrals for frail/disabled beneficiaries and beneficiaries near the end of life to the appropriate specialized providers and notifies the ICT. • The ICT approves all referrals for frail/disabled beneficiaries and beneficiaries near the end of life and notifies the providers.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Work with Delegate to approve add-on benefits • Offer transportation to facilitate access to services for frail/disabled beneficiaries and beneficiaries near the end of life	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Model of Care Training	☒ Yes ☐ No	Delegate has appropriate staff (employed, contracted, or non-contracted, temporary) trained on the model of care to coordinate and/or deliver all services and benefits including some or all of the following: • All SNP employees/contractors/ temporary staff have initial and annual refresher training on the SNP model of care as evidenced by attendance lists and/or evaluations • All network providers have initial and annual refresher training on the SNP model of care as evidenced by attendance lists and/or evaluations	Annually submit evidence of required trainings i.e.: attendance list, evaluations, newsletters, website, and/or orientation or other course material at the time of the annual audit survey process	Establish a training strategy that uses a variety of methods including some or all of the following: • Face-to-face training • Web-based interactive training • Self-study program (electronic media, print materials) • Distribute training material to Delegate • Monitor to ensure annual training has occurred	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Individualized Care Plan	☒ Yes ☐ No	Delegate has written policies, procedures, and a system to assure that the interdisciplinary care team develops and implements a comprehensive individualized plan of care for each member. The system includes some or all of the following: • Results from the initial health risk assessment are used to develop the individualized care plan • Member's medical history is used to develop the individualized care plan • Member's healthcare preferences are incorporated in the individualized care plan • Each member is assigned to an interdisciplinary care team that develops the individualized care plan with member involvement when feasible • Interdisciplinary team beneficiaries update the individualized care plan as member health status changes • Initial and annual assessments are analyzed to determine the need for add-on services and benefits, and these needs are incorporated into the individualized care plan for each member.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports Monthly: SNP Case Management Engagement Report	• Share member specific initial and annual HRA results with Delegate • Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates, P&P's as needed for activities • Work with Delegate regarding need for add-on benefits	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Individualized Care Plan	☒ Yes ☐ No	Delegate has a written process to facilitate member/caregiver participation in care planning when feasible. The process includes any of the following: • Beneficiaries and/or caregivers participate either face-to-face or telephonically in care planning • Beneficiaries and/or caregivers participate in care planning either through an exchange of written correspondence with or web-based electronic interface or virtual correspondence with their interdisciplinary team	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports Monthly: SNP Case Management Engagement Report	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Care Transitions	☒ Yes ☐ No	Delegate has a policy and procedure to facilitate safe transitions by either conducting or assigning to providers the following tasks and monitoring system performance: • For planned transitions from beneficiaries usual setting of care to the hospital and transitions from the hospital to the next setting, identifying that a planned transition is going to happen • For planned and unplanned transitions sharing the sending settings care plan with the receiving setting within one business day of notification of the transition • For planned or unplanned transitions from any setting to any other setting, notifying the beneficiaries usual practitioner of the transition within a timeframe specified by the Delegate (i.e. two business days)	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Supporting Members Through Transitions	☒ Yes ☐ No	The Delegate has a policy and procedure to facilitate safe transitions by either conducting or assigning to providers the following tasks and monitoring system performance: • For planned and unplanned transitions from any other setting, communicating with the member or responsible party about the care transition process within a timeframe specified by Delegate (i.e. 2 business days) • For planned and unplanned transitions from any setting to any other setting, communicating with the member or responsible party about changes to the member's health status and plan of care within a timeframe specified by Delegate (i.e. 2 business days) • For planned and unplanned transitions from any setting to any other setting, providing each member who experiences a transition with a consistent person or unit within the organization who is responsible for supporting the member through transitions between any points in the system within a timeframe specified by Delegate (i.e. 2 business days)	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Reducing Transitions	☒ Yes ☐ No	The Delegate has a policy and procedure, based on the findings from the Delegate's monthly analysis of data, to identify individual members at risk of a transition, the Delegate minimizes unplanned transitions and works to maintain members in the least restrictive setting possible by: • Coordinating services for members at high risk of having a transition. • Educating members or responsible parties about transitions and how to prevent unplanned transitions.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Analyzing Transitions	☒ Yes ☐ No	The Delegate has a policy and procedure to minimize unplanned transitions and work to maintain members in the least restrictive setting possible by: • Analyzing data at least monthly, to identify individual members at risk of transition • Analyzing rates of all member admissions to facilities and ED visits at least annually to identify areas for improvement.	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted. •	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA. •

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Performance and Health Outcomes Measurement	☒ Yes ☐ No	Delegate collects data from a variety of sources including some or all of the following: • Claims • Encounters • Medical record reviews • Diagnostics (labs, pathology, radiography) • Utilization reports • Hospital admissions • Long term facility admissions • ED admissions	Monthly submission of claims/encounters	HN has written policies, procedures, and a system to collect and analyze data to evaluate the effectiveness of its model of care including: • Member demographics • Administrative • Pharmacy • HEDIS data • HOS data • CAHPS data • Health Risk Assessments • Internal quality assurance specialists implementing a performance improvement program • Participation by plan, provider network, and beneficiaries/caregivers	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Performance and Health Outcomes Measurement	☒ Yes ☐ No	Delegate takes actions to improve the model of care including some or all of the following: • Changes in policies or procedures • Changes in staffing patterns or personnel • Changes in provider or facility network • Changes in systems of operation • Communication of results internally and externally • Delegate collects and analyzes data that demonstrates beneficiaries have access to covered services and benefits, and acts to improve deficiencies that are identified • Delegate collects and analyzes data that demonstrates beneficiaries have improved health status, and acts to improve deficiencies that are identified. • Delegate collects and analyzes data on service delivery processes and outcomes, and acts to improve deficiencies that are identified. • Delegate collects and analyzes data on the utilization of evidence-based guidelines by the interdisciplinary team and provider network, and acts to improve deficiencies that are identified.	Annually submits data and analysis reports to HN Hospice referrals, pain management referrals, ER rates and readmit rates are reported annually with at least 2 year trending of month to month data. These reports will be on all the SNP beneficiaries since we do not delineate one health plan from another. Annually, based on health outcomes, Delegate provides corrective action plan to address the following: • access, • health status, • service delivery This will be done through geo-access survey process.	• Establish, publish and distribute to providers performance standards and guidelines that are consistent with CMS SNP requirements • Monitor and oversee delegated function to ensure standards are met • Establish and create documentation templates as needed for activities	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Performance and Health Outcomes Measurement	☒ Yes ☐ No	Delegate collects and analyzes data demonstrating the participation of beneficiaries and interdisciplinary care team beneficiaries in care planning, and acts to improve deficiencies that are identified. The data includes some or all of the following: • Written summaries of care planning meetings are included in the care plan and list attendees. • Interdisciplinary team beneficiaries maintain attendance logs for all care planning meetings • Beneficiaries are surveyed to determine the level of their own and their interdisciplinary team's participation in care planning meetings .	Annually: UM/SNP Program Description or P&Ps UM/SNP Program Evaluation Semi-annually: ICE UM/SNP Work plan/Reports Annually submits data and analysis reports to HN	HN will develop/implement audit process including tools and distribute to Delegate regarding: • Perpetual audits of complaint and grievance summaries a to assure beneficiaries and team beneficiaries participate in care planning • Collects and analyzes data on member utilization of communication mechanisms (e.g., call centers, complaint logs, etc.), and acts to improve deficiencies that are identified. • Collects and analyzes data related to add-on services and benefits including member utilization and/or satisfaction with such services and benefits, and acts to improve deficiencies that are identified.	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.
Performance and Health Outcomes Measurement	☐ Yes ☒ No	N/A	N/A	HN will: Have written policies, procedures, and a system to submit required public reporting data that inform stakeholders about the plan's performance as requested by CMS. These data include some or all of the following: • HEDIS data • Structure and process measures data • HOS data • CAHPS data	N/A	N/A

Activities	Delegate SNP Status Delegated (Yes) or Not Delegated (No)	Delegate Responsibilities	Frequency of Reporting	Health Net's Responsibilities	Health Net's Process for Evaluating Delegate's Performance	Corrective Actions if Delegate Fails to Meet Responsibilities
Performance and Health Outcomes Measurement	☒ Yes ☐ No	Delegate has written policies, procedures, and a system to submit required reporting data that monitors performance as requested by CMS. This data include some or all of the following: • Community services access/utilizations rates • Facilitation of member developing advance directives/health proxy • Functional/ADLs status/deficits • Hospice referral and utilization rates • Hospital discharge outreach and follow-up rates • Pain and symptoms management effectiveness • Policies and procedures for effectiveness and staff compliance • Screening for elder/physical/sexual abuse	Annually submits data and analysis reports to HN	HN will review/audit/publish the following: • Health information for accuracy and appropriateness of data • Member/caregiver education for frequency and appropriateness • Clinical outcomes • Behavioral health/psychiatric services utilization rates • Complaints, grievances, services and benefits denials • Establish and publish disease management indicators • Disease management referrals for timeliness and appropriateness • Emergency room utilization rates • Enrollment/disenrollment rates • Provide Evidence-based clinical guidelines or protocols for utilization rates • Hospital admissions/readmissions • Immunization rates • Medication compliance/utilization rates • Medication therapy management effectiveness • Preventive programs utilization rates (e.g., smoking cessation) • Preventive screening rates • Primary care visit utilization rates •	• Review UM/SNP Work plan/reports with written evaluation provided to Delegate. • Initial assessment utilizing Health Net SNP Provider Delegation Assessment Tool (PDAT). • Annual assessment utilizing Health Net SNP PDAT. • Focused reviews to measure areas of noncompliance as warranted.	• Require Corrective Action Request(s) for elements of non-compliance. • Potential revocation of SNP Care Management delegation if CAP objectives are not achieved. • Continued noncompliance may lead to a breach of the PPA and subsequent termination of the PPA.

Federal Use Only:	Authorized for Local Reproduction Standard Form LLL (Rev. 7-97)

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, State and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee," then enter the full name, address, city, State and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, State and zip code of the lobbying registrant under the Lobbying Disclosure Act of 1995 engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

According to the Paperwork Reduction Act, as amended, no persons are required to respond to a collection of information unless it displays a valid OMB Control Number. The valid OMB control number for this information collection is OMB No. 0348-0046. Public reporting burden for this collection of information is estimated to average 10 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, DC 20503.

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Personnel Training: Domestic Violence Reporting	Approved date: ____________________ Approved by: ____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:
Health care providers who provide medical services for a physical condition to a patient whom he or she knows or reasonably suspects of suffering from injuries resulting from a firearm or assaultive or abusive conduct, are required to make a report (Penal Code Section 11160 et. seq.).

PROCEDURE:

I. Reporting

A. Reports must be made both by telephone and in writing to a local law enforcement agency

1. A **telephone report** must be made **immediately** or as soon as practically possible
2. A **written report** is to be made **within two working days** of receiving the information using OCJP 920: Suspicious Injury Report Form (see attachment)
3. The report must include the following:
   - Name of the injured person, if known
   - The injured person's whereabouts
   - Character and extent of the person's injuries
   - The identity of the person who allegedly inflicted the injury
4. **Failure to make a mandated report is a misdemeanor, punishable by imprisonment in the county jail for up to six months, or a fine of up to $1,000, or both**
5. Check with the local law enforcement agency of where to report if the patient was injured in another county
6. <u>If the battered patient is a minor then the Child Abuse and Neglect Reporting Act applies. (see Child Abuse Reporting policy and procedure)</u>

II. Medical Record

A. The law (P.C. § 11161 [b]) recommends that the medical record include the following:
   - Any comments by the injured person regarding past domestic violence or regarding the name of any person suspected of inflicting the injury
   - A map of the injured person's body showing and identifying injuries and bruises
   - A copy of the reporting form

III. Important Considerations

A. Sensitivity and awareness
- Reassure patient he/she is not alone and does not deserve to be treated this way
- Be careful not to imply patient is to blame
- Patients may be scared of seeking care because they do not want police involvement
- Some patients may fear reporting for other reasons (i.e. immigration status)
- There are many barriers to leaving an abusive situation (i.e. threats from the batterer, fear of financial instability, failure of police and others to effectively intervene, hope the relationship can work, feel responsible for the battering, may be embarrassed, humiliated and degraded about the abuse)

B. Patient Safety
- Address directly the risk of retaliation by the batterer and discuss how the patient might protect her/himself from further abuse
- Discuss the patient's short-term option and plan, including whether the patient can safely return home
- Indicate on the reporting form any special concerns regarding how the report should be handled to maximize patient safety

C. Referral
- Provide patient with referrals to domestic violence services
- Assist the patient in calling a domestic crisis line if willing

D. Special Considerations
- Patients who plan to leave with their children (applies to children for whom the abusive partner is the biological or adoptive parent) should call on eof the shelter lines to learn how to file a "Good Cause Report" which can protect them from kidnapping charges

IV. Definitions

A. Assaultive or abusive conduct is defined to include a list of 24 criminal offenses, among which are murder, manslaughter, torture, battery, sexual battery, incest, assault with a deadly weapon, rape, spousal rape, abuse of spouse or cohabitant, sodomy, oral copulation and an attempt to commit any of these crimes

DRUG USE QUESTIONNAIRE (DAST-20)

	These questions refer to the past 12 months.	Circle Your Response	
1.	Have you ever used drugs other than those required for medical reasons?……………	Yes	No
2.	Have you abused prescription drugs?………………………………………………….	Yes	No
3.	Do you abuse more than one drug at a time?…………………………………………..	Yes	No
4.	Can you get through the week without using drugs?…………………………………..	Yes	No
5.	Are you always able to stop using drugs when you want to?………………………….	Yes	No
6.	Have you had "blackouts" or "flashbacks" as a result of drug use?…………………...	Yes	No
7.	Do you feel bad or guilty about your drug use?……………………………………….	Yes	No
8.	Does your spouse (or parents) ever complain about your involvement with drugs?…..	Yes	No
9.	Has drug abuse created problems between you and your spouse or your parents?……	Yes	No
10.	Have you lost friends because of your use of drugs?………………………………….	Yes	No
11.	Have you neglected your family because of your use of drugs?………………………	Yes	No
12.	Have you been in trouble at work because of drug abuse?…………………………….	Yes	No
13.	Have you lost a job because of drug abuse?…………………………………………...	Yes	No
14.	Have you gotten into fights when under the influence of drugs?……………………...	Yes	No
15.	Have you engaged in illegal activities in order to obtain drugs?………………………	Yes	No
16.	Have you been arrested for possession of illegal drugs?………………………………	Yes	No
17.	Have you ever experienced withdrawal symptoms (felt sick) when you stop taking drug?……………………………………………………………………..	Yes	No
18.	Have you had medical problems as a result of your drug use (e.g. memory loss, hepatitis, convulsions, bleeding, etc.)?…………………………………………………...	Yes	No
19.	Have you gone to anyone for help for a drug problem?……………………………….	Yes	No
20.	Have you been involved in a treatment program specifically related to drug use?……	Yes	No

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
Ankle-foot/knee-ankle-foot orthotics	Orthotic replacements are included in the reimbursement for orthotics
Automatic external defibrillators	External defibrillators are eligible for reimbursement when the member meets coverage criteria and when submitted with the appropriate modifier*
Blood glucose monitoring	Glucose monitors/supplies are reimbursable for diabetics only and when reported with the appropriate modifier (KS or KX)
	Continuous noninvasive glucose monitors are considered experimental/investigational because the safety or efficacy of these devices have not been established by review of the available published literature
	A disposable glucose monitor is a non-covered item
	Only one home blood glucose monitor is reimbursable per 12-month period of time
	A laser skin piercing device or replacement cartridge is reimbursed at the rate for the spring powered lancet and/or lancet replacements
Breast prosthesis	A custom breast prosthesis is reimbursed at the rate of a prefabricated breast prosthesis
Canes and crutches	When an underarm, articulating, spring-assisted crutch is provided, it is reimbursed at the rate of an underarm crutch other than wood
	Only one crutch type is covered per date of service
Cervical traction devices	Cervical traction that is free-standing or attached to a headboard is reimbursed at the rate of overdoor cervical traction
	Free-standing cervical traction is eligible for reimbursement coverage when the requirements have been met and filed with the appropriate modifier.* Otherwise it is reimbursed at the rate for overdoor cervical traction
Commodes	An extra wide/heavy duty commode chair is reimbursable for a member who weighs 300 pounds or more, when reported with the appropriate modifier.* It is otherwise reimbursable at the rate for a regular commode if basic coverage criteria for a commode chair are met
	A commode chair with detachable arms is reimbursable when the clinical criteria are met and when it is reported with the appropriate modifier*
	A pail or pan for use with commode chair is included in the reimbursement for a commode chair
	A seat-lift mechanism is included in the reimbursement for a commode chair with a seat-lift mechanism
Diabetic shoes	Orthopedic shoes and accessories for members with diabetes are reimbursable when reported with codes specific to diabetic footwear
	An insert that is direct formed and molded to a member's foot without an external heat source is a non-covered item

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
	Only one pair of therapeutic shoes for members with diabetes is reimbursable per calendar year
	Therapeutic shoe inserts or modifications for members with diabetes are reimbursable up to six units per calendar year
	Diabetic shoe inserts or modifications reported with non-diabetic footwear are not eligible for reimbursement
Enteral nutrition	Enteral feeding supply kits are reimbursable once per day
	Additives for enteral formula are included in the reimbursement for enteral formulas
	Components of a more complete kit are included in the reimbursement for the kit
	Nasogastric tubes are reimbursable once a month
External infusion pumps	Supplies for maintaining a drug infusion catheter are not eligible for reimbursement in the same month as a drug infusion kit
	Components of a more complete kit are included in the reimbursement for the kit
	IV poles are included in the reimbursement of ambulatory infusion pumps
	Replacement batteries for an infusion pump are included in the monthly rental reimbursement of an infusion pump
Eye prosthesis	An eye prosthesis is eligible for replacement once the useful lifetime of the prosthesis is reached (typically five years)
Hospital headboards and accessories	Hospital bed rental is reimbursable once per month
	Hospital bed rails are included in the reimbursement for hospital beds with bed rails
	Hospital bed rails and mattresses are included in the reimbursement for hospital beds with bed rails and mattresses in their description
Lower limb prosthesis	A below-knee suction socket or suction suspension for an above-knee or knee disarticulation socket is not separately reimbursed with a knee suspension locking mechanism
	A custom fabricated socket insert is not eligible for reimbursement when reported with a replacement prosthesis or addition
	Lower extremity diagnostic test sockets are included in reimbursement for immediate prosthesis
	A maximum of two test (diagnostic) sockets for an individual prosthesis is considered for reimbursement.
	Special features for lower limb prosthesis (such as multiaxial ankle/foot, flexfoot system, high activity knee) is considered for reimbursement based on the member's functional level
	Special features/additions added at the time of provision of the preparatory prosthesis are not separately reimbursed
	Replacement prosthesis components are not reimbursable when reported with a prosthesis
Manual and power wheelchair accessories	Manual wheelchair accessories are appropriately reported when used with manual wheelchairs
	Power wheelchair accessories are appropriately reported when used with power wheelchairs

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
	The following power wheelchair accessories are non-covered items: power seat elevation system and power standing system
Modifiers	Prosthetics and orthotics that can be reported bilaterally require an RT (right) and/or LT (left) modifier
	Lower limb prostheses require a valid and appropriate functional modifier (K0-K4)
	A prosthesis is reimbursable when there is expectation that the amputee reaches or maintains a defined functional state within a reasonable time frame and when reported with the appropriate modifier
	Capped rental modifiers are restricted to usage with items listed as capped rental equipment by the Centers for Medicare and Medicaid Services (CMS)
	Items requiring an order prior to delivery (pressure reducing surfaces, power operated vehicles, seat lift mechanisms, or TENS units) are reimbursable when a written order is on file prior to delivery. In this case, report the code with modifier EY
	For DMEPOS providers, adhesive tape requires an appropriate modifier (AU, AV, AW or AX.). Adhesive tape is not reimbursable in an office setting
Nebulizers	Disposable large volume nebulizers are non-covered items
	Controlled inhalation medication delivery system is eligible for reimbursement when reported with the appropriate medication
	A pharmacy supply fee is reimbursable when reported with the appropriate medications
	A 90-day dispensing fee is reimbursable once per 90 days
	A 30-day pharmacy dispensing fee is not reimbursable when reported in the same time period as a 90-day pharmacy dispensing fee
	A 90-day pharmacy dispensing fee is not reimbursable when reported in the same time period as a 30-day pharmacy dispensing fee
	A 30-day pharmacy dispensing fee for inhalation medication(s) is reimbursable once per month
	Corrugated tubing for use with a large volume nebulizer is reimbursable once per two months
	An immersion heater for a nebulizer or durable bottle type nebulizer is reimbursable once per three years
	A non-disposable administration set used with a small volume nebulizer reimbursable once every six months
	The non-disposable administration set is reimbursable once every three months if used with a controlled dose inhalation delivery system
	A battery powered compressor is a non-covered item
	Atropine, administered by nebulizer, is reimbursable up to 558 units every three months
	Bitolterol, administered by nebulizer, is reimbursable up to 1302 units every three months
	Glycopyrrolate, administered by nebulizer, is reimbursable up to 225 units every three months
	Isoetharine HCL, administered by nebulizer, is reimbursable up to 2790 units every three months

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
	Metaproteranol sulfate, administered by nebulizer, is reimbursable up to 740 units every three months
	Terbutaline sulfate, administered by nebulizer, is reimbursable up to 558 units every three months
	Isoproterenol HCL, administered by nebulizer, is reimbursable up to 1350 units every three months
Non-contact normothermic wound warming devices	The non-contact wound warming device and accessories are not eligible for reimbursement as they are not considered safe nor effective
Orthopedic footwear	Orthopedic footwear and the associated inserts or modifications are eligible for reimbursement when the member meets coverage criteria and when submitted with the appropriate modifier*
	Custom-molded prosthetic shoes are not reimbursable when reported with partial foot prosthesis or other lower extremity prosthesis
Osteogenesis stimulators	Only one type of osteogenesis (bone) stimulator is reimbursable for covered fractures
Ostomy supplies	Components of a more complete kit are included in the reimbursement for the kit
	Options and accessories that are part of a more complete ostomy product are included in the reimbursement for the ostomy appliance
Oxygen and oxygen equipment	Only one oxygen stationary system rental is reimbursable per month for those who qualify for coverage
	Portable oxygen rental is reimbursable once per month
	Frequently serviced items, such as oxygen systems, are reimbursable as a rental only
	Accessories and supplies that are used to administer oxygen are included in the monthly oxygen rental reimbursement
	Oxygen contents reimbursement is included in the reimbursement for monthly rental of a stationary oxygen system
	Oxygen modifiers QE, QF and QG are recognized only when submitted with stationary oxygen rentals
	Oximeters and replacement probes are not covered because they do not meet the definition of DME
	Oxygen is included in monthly oxygen system rental
Parenteral nutrition	Parental nutrition administration pumps are reimbursable once per month
	Homemix nutrient and component solutions are included in the reimbursement for the complete premix solution
	Parenteral nutrients solution is reimbursable at one unit per day
	One supply kit and one administration kit are reimbursable for each day that parenteral nutrition is administered
	Use of an IV pole and parenteral nutrition pump in an outpatient setting is included in the reimbursement for the underlying nutrition service

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
Patient lifts	An electric patient lift with seat and a multi-positional patient support system with integrated lift are non-covered items
	Patient lifts for the toilet and patient lifts that are free moving or fixed are non-covered items
	A sling is included in the reimbursement for a patient lift
Pneumatic compression devices	A segmental pneumatic appliance is eligible for reimbursement when reported with a segmental pneumatic compressor
	A non-segmental pneumatic compression appliance or segmental gradient pressure pneumatic appliance is eligible for reimbursement when reported with a non-segmental pneumatic compressor
	Only one type of pneumatic compressor (lymphedema pump) is eligible for reimbursement in the same month
Pressure reducing support surfaces	Alternating pressure pad and pressure pad alternating pump replacement are included in the reimbursement for an alternating pressure pad with pump
Prosthetic repair and replacement	Labor is included in the reimbursement for the replacement prosthesis and components
	Labor for prosthetic repair is included in the reimbursement for the prosthesis when it is reported within 90 days of a prosthesis
Rentals	Rental durable medical equipment (DME) is considered for reimbursement once per month
	Maintenance and servicing, as identified by modifier MS, is eligible for reimbursement after seven months has elapsed since the last rental payment and only at a frequency of once every six months
Repair	Repair of DME is included in the initial provision of DME
Replacement	DME is eligible for replacement after its useful lifetime has been reached (typically a period of 5 years)
Transcutaneous electrical nerver stimulations (TENS)	The TENS supply allowance includes electrodes, conductive paste or gel, tape or other adhesive, adhesive remover, skin preparation materials, batteries, and a battery charger in the monthly supply fee
Urological supplies	Urinary catheter insertion trays are considered for reimbursement at the frequency of two per calendar month. An additional two foley catheters are considered for reimbursement in the same month
	Bedside drainage bags for catheter maintenance are considered for reimbursement up to 6 units in a 3 month period
	Adhesive tape used with ostomy or urological supplies are eligible for reimbursement up to 40 units per month
	A percutaneous catheter anchoring device when reported with an indwelling urethral catheter is reimbursable at the rate of an adhesive catheter anchoring device
	Sterile intermittent catheters are reimbursable up to 600 times within 90 days
Walkers	When an enclosed walker with rear seat is provided it is reimbursed at the rate of a standard walker

Durable Medical Equipment, Prosthetics, Orthotics, and Supplies – State Health Programs	
Category	**Coding Edit**
	Walker wheel attachments reported within the same month as a nonwhelled walker are not eligible for reimbursement
Wheelchair options and accessories	Options and accessories that are part of a wheelchair or wheelchair option are included in the reimbursement for the wheelchair or wheelchair option

*Use modifier KX when the coverage criteria as defined by the Durable Medical Equipment Regional Administrative Contractor (DME RAC) has been documented in the medical record.

All claims submissions remain subject to Health Net's prior authorization requirements.

Health Net does not require documentation at the time of claim submission. In the event the claim is audited, documentation may be required.

Edinburgh Perinatal/Postnatal Depression Scale (EPDS)

For use between **28–32 weeks** in **all** pregnancies and **6–8 weeks** postpartum

Name: ______________________________ Date: ________________ Gestation in Weeks: ______

As you are having a baby, we would like to know how you are feeling. Please mark "X" in the box next to the answer which comes closest to how you have felt in the **past 7 days**–not just how you feel today.

In the past 7 days:

1. I have been able to laugh and see the funny side of things
   - 0 ☐ As much as I always could
   - 1 ☐ Not quite so much now
   - 2 ☐ Definitely not so much now
   - 3 ☐ Not at all

2. I have looked forward with enjoyment to things
   - 0 ☐ As much as I ever did
   - 1 ☐ Rather less than I used to
   - 2 ☐ Definitely less than I used to
   - 3 ☐ Hardly at all

3. I have blamed myself unnecessarily when things went wrong
   - 3 ☐ Yes, most of the time
   - 2 ☐ Yes, some of the time
   - 1 ☐ Not very often
   - 0 ☐ No, never

4. I have been anxious or worried for no good reason
   - 0 ☐ No, not at all
   - 1 ☐ Hardly ever
   - 2 ☐ Yes, sometimes
   - 3 ☐ Yes, very often

5. I have felt scared or panicky for no very good reason
   - 3 ☐ Yes, quite a lot
   - 2 ☐ Yes, sometimes
   - 1 ☐ No, not much
   - 0 ☐ No, not at all

6. Things have been getting on top of me
   - 3 ☐ Yes, most of the time I haven't been able to cope
   - 2 ☐ Yes, sometimes I haven't been coping as well as usual
   - 1 ☐ No, most of the time I have coped quite well
   - 0 ☐ No, I have been coping as well as ever

7. I have been so unhappy that I have had difficulty sleeping
   - 3 ☐ Yes, most of the time
   - 2 ☐ Yes, sometimes
   - 1 ☐ Not very often
   - 0 ☐ No, not at all

8. I have felt sad or miserable
   - 3 ☐ Yes, most of the time
   - 2 ☐ Yes, quite often
   - 1 ☐ Not very often
   - 0 ☐ No, not at all

9. I have been so unhappy that I have been crying
   - 3 ☐ Yes, most of the time
   - 2 ☐ Yes, quite often
   - 1 ☐ Only occasionally
   - 0 ☐ No, never

10. The thought of harming myself has occurred to me
    - 3 ☐ Yes, quite often
    - 2 ☐ Sometimes
    - 1 ☐ Hardly ever
    - 0 ☐ Never

Total Score ☐

HEALTH NET Q/CARE SYSTEM

Effective Date February 1, 2004

Eligibility Specifications - 277 EZ-CAP

ITEM	TYPE	POSITION	NAME	DEFINITION
1	X (01)	01-01	Transaction Code	For full files, Transaction Code will be A (Add). For incremental update files: Transaction Code will be A (Add) if the member was added since last run/file. Transaction Code will be C (Change) for changes to member data since last run/file.
2	X(08)	02-09	File Create Date	Date file was created (CCYYMMDD)
3	X(11)	10-20	Member ID	Health Net member ID number
4	X(02)	21-22	County Code	Member county code: 10=Fresno; 19=Los Angeles; 33=Riverside; 34=Sacramento; 36=San Bernardino; 37=San Diego; 54=Tulare
5	X(02)	23-24	Aid Code	Member's current Medi-Cal aid category code
6	**X(09)**	**25-33**	**CIN Number**	**Client Index Number assigned by DHS**
7	X(02)	34-35	Relationship to Subscriber	Code defining member's relationship to subsriber, Medi-Cal always 01
8	X(30)	36-65	Last Name	Member's last name
9	X(15)	66-80	First Name	Member's first name
10	X(01)	81-81	Middle Initial	Member's middle initial
11	X(01)	82-82	Gender	Member's gender (M=male; F=female)
12	X(30)	83-112	Street Address	Member's street address
13	X(20)	113-132	City	Member's city
14	X(02)	133-134	State	Member's state
15	X(10)	135-144	Zip	Member's ZIP code (five or nine digit ZIP code)
16	X(10)	145-154	Home Phone	Home phone number including area code (no dashes, hyphen, or parentheses)
17	X(08)	155-162	Full Birth Date	Member's birth date (CCYYMMDD)
18	X(01)	163-163	Contract Type	Always "3"
19	X(01)	164-164	Other Coverage	´Y` if member has other insurance coverage, ´N` if member has no other insurance
20	X(01)	165-165	Other Coverage Primary/Secondary	P=Primary if member's other insurance coverage is primary; S=Secondary if member's other insurance coverage is secondary; Blank if member has no other insurance coverage
21	X(30)	166-195	Other Coverage Name	Name of other insurance carrier if member has other insurance coverage
22	**X(02)**	**196-197**	**Health Plan Code**	**Always "HN"**
23	X(02)	198-199	CCS Code	California Children Services Code: CA=CCS Elig Active; CC=CCS Elig Closed; CD=CCS Elig Denied; CM=Case Mgmt; CP=CCS Elig Pended; CR=CCS Elig Conflict Resolution; NA=CCS Newborn Elig Active; NC=CCS Newborn Elig Closed; ND=CCS Newborn Elig Denied; NP=CCS Newborn Elig Pending; NR=CCS Newborn Elig in Conflict Resolution

For assistance or questions, contact: Medi-Cal Provider Services Center at 1-800-675-6110

ITEM	TYPE	POSITION	NAME	DEFINITION
24	X(01)	200	Member Language Code	1=Spanish; 7=English; C=Chinese; D= Cambodian; E= Armenian; H= Hmong; N=Russian; V=Vietnamese
25	X(01)	201	Member Ethnicity Code	1=White; 2=Hispanic; 3=Black; 4=Other Asian or Pacific Islander; A= Amerasian (Asian Mother/American Father); C=Chinese; N=Asian Indian; T=Laotian; V=Vietnamese
26	X(08)	202-209	PCP Effective Date	For medical group/PPG, the PCP effective date is the begin date of the member's most current PCP affiliation for this medical group/PPG. For ancillary hospitals, the effective date is the most current ancillary affiliation date for this facility. Note: if there are breaks in eligibility periods where the member's eligibility ended and was restarted, with the same affiliations, the effective date is the most current eligibility begin date (CCYYMMDD)
27	**X(04)**	**210-213**	**Redetermination Date**	**Member's Medi-Cal redetermination date (YYMM)**
28	X(06)	214-219	Benefit Option Code	Member's Health Net Benefit Option Code. Note: if the member is termed, the Benefit Option Code reported if from when they ended with the PCP/PPG. If the member is active, it is the current Benefit Option Code.
29	X(08)	220-227	Member Effective Date	The begin date associated with the member's medical group/PPG/facility affiliation. Note: if there are instances where the member's eligibility was ended and restarted with the same affiliation, then the effective date is the most current eligibility begin date. (CCYYMMDD)
30	X(08)	228-235	Member Termination Date	The end date associated with the member's medical group/PPG/facility affiliation. Note: if the member is no longer eligible with Health Net, this will have the member's eligibility termination date. If the member is currently eligible with Health Net and affiliated with the PPG/facility, this field will be blank. (CCYYMMDD)
31	X(03)	236-238	PCP Address Number	PCP's address number where the member is assigned to receive services
32	X(01)	239	Filler	Blank
33	X(07)	240-246	Provider/Facility License	Physician or facility license number
34	X(01)	247	Member Enrollment Status Code	Current enrollment status: E = Eligible; T = Terminated; P = Pending (for pending members, contact Health Net to obtain latest status)
35	X(30)	248-277	Provider Name	For medical group/PPG, the provider name is the PCP. Format is last name, comma, first name, middle initial. For ancillary hospitals, the provider name is the facility name.

Emergency Earthquake Plan

STAY CALM AT THE FIRST SIGN OF AN EARTHQUAKE.

Instruct any patients and staff to duck and cover under a sturdy desk, table, or other furniture.

Hold onto it and be prepared to move with it.

Stay clear of windows.

Do not try to use stairs or elevators while the building is shaking or while there is danger of being hit by glass or falling debris.

Do not rush outside or crowd exits.

After the Earthquake, check for any employee or patient injuries.

A. If person is not breathing, open the airway. If still not breathing, begin rescue breathing.

B. If person is bleeding put pressure over the wound.

C. Do not attempt to move seriously inured persons unless they are in immediate danger of further injury.

Immediately clean up any spilled medicines, drugs, or other potentially harmful materials.

Office first aid kit is located ____

Flashlights are located (highly recommended) ______________________________

Examine the area for fire hazards and call 911 if there is a fire hazard.

Outside meeting place is ____

Employee Alarm System:

Type of system (please circle or write in): verbal (if 10 employees or less), fire pull, alarm button or pull string in each room, code words, distinct sound/signal (silent alarm, paging system), panic button, and/or other____.

APPROVED BY: Dr. ______________________________ **Date:** __________________

Emergency Fire Plan

STAY CALM AT THE SIGN OF FIRE, DIAL 911, and INITIATE THE EMPLOYEE ALARM SYSTEM.

To report a fire Dial 911 and spell the last name of the doctor as it is listed on the building. BE PREPARED TO GIVE OFFICE ADDRESS AND PCP/CLINIC NAME.

Fire Extinguishers are located ____.

(Name of) Employee____is

to immediately assist all patients in leaving the building and have them wait outside.

The designated outside meeting place for employees is _________________________

____.

All employees are to review the emergency exit plan which is posted and to initial the plan.

Employee Alarm System:

Type of system (please circle or write in): verbal (if 10 employees or less), fire pull, alarm button, or pull string in each room, code words, distinct sound/signal (silent alarm, paging system), and/or other__________________________________.

APPROVED BY: Dr. ______________________________ **Date:** __________________

PCP:	
I. SECTION: Access/Safety	
POLICY AND PROCEDURE: Emergency Health Care Services	Approved date: ___________________ Approved by: ____________________ Effective date: ___________________ Revised date: ___________________ Revised date: ___________________

POLICY:
Emergency health care services shall be available and accessible twenty-four hours a day, seven days a week.

PROCEDURE:
I. EMERGENCY MEDICAL EQUIPMENT

A. Minimum emergency medical supplies/equipment, sufficient to establish and maintain a patent/open airway and manage anaphylactic reactions, shall be maintained in the facility. The equipment will include:

1. An oxygen tank which is portable.
2. An oxygen delivery system which includes tubing and mask/cannula and Adjustable Flow Meter (Oxygen Tank should be at least ¾ full.
   - Providers may NOT use small oxygen tanks where the liter flow cannot be adjusted. There is no size requirement for the tank; however, it must reflect the content balance in increments of ¼, ½, or ¾ full and full. The oxygen should last long enough to handle an emergency until the arrival of the emergency medical response team.
   - Office staff will know how to turn on and regulation the oxygen flow.
3. Population-appropriate (infants/children/adults) ambu bag(s) and oral airway(s) **devices**.
4. Epinephrine 1:1000 (injectable), Benadryl 25 mg oral, or Benadryl 50 mg./ml (injectable).
5. Naloxone
6. Chewable aspirin 81 mg.
7. Nitroglycerin spray/ tablet,
8. Bronchodilator medication(solution for nebulizer or metered dose inhaler)
9. Appropriate sized ESIP needles/ syringes
10. Tuberculin syringes (safety syringes), alcohol wipes.
11. **Bulb syringe**
12. Emergency medication dosage chart (see attached).

B. The supplies/equipment will be located in an accessible location allowing for retrieval by all staff members without the use of assistive devices.

C. The supplies and equipment will be located together and checked for expiration and operating status at least monthly. Staff responsible for checking the equipment/supplies will document:

1. The date the supplies/equipment was checked, and
2. His/her initials verifying that equipment is in working order, the oxygen tank is full, the supplies are within expiration date and the medication dosage chart is present.

D. Replacing/restocking supplies:

1. An extra oxygen tank will be maintained onsite -OR- each time the oxygen is used, the remaining supply will be checked. If the tank is 3/4 or less full, the supplier will be called to replace the used tank with a full tank.
2. The month prior to the noted expiration date, the supplies/medication will be ordered to ensure delivery before the supplies actually expire.
3. The medication and supplies will be ordered/replaced immediately after use.

II. EMERGENCY SERVICES TRAINING

A. All staff members will be trained on the emergency medical protocol. Staff will be able to:

1. Describe facility-specific actions, and,
2. Locate written emergency procedures and information.

B. Training will be completed upon hire and annually thereafter.

C. Training will be documented.

III. EMERGENCY INFORMATION

A. Emergency phone number contacts will be posted at the reception desk and at the work station. Posted list includes local emergency response services (e.g., fire, police/sheriff, ambulance), emergency contacts (e.g., responsible managers, supervisors), and appropriate State, County, City and local agencies (e.g., local poison control number).

B. The list should be dated and telephone numbers updated annually and as changes occur.

EXAMPLE - DOSAGE CHART

2019 Site Review DHCS Guidelines
Emergency Medication\Anaphylactic Reaction Management

Medication Administration Reference (e.g. Medication Dosage Chart)

Anaphylaxis Kit*	Adult	Pediatric	Infant
Epinephrine (Anaphylaxis) Anaphylaxis 1:1000 (injectable)	0.01mg/kg IM (up to maximum of 0.5mg)	0.01 mg/kg IM (up to maximum of 0.3mg)	0.01 mg/kg IM (up to maximum or 0.3mg)
(1) X 1 mL vial of injectable diphenhydramine (**Benadryl**) 50 mg/mL	10mg to 50mg IV/IM (NTE 400mg/day) *If IV route, IV push at a rate of ≤25mg/min	1 to 2 mg/kg/dose IV/IM (NTE 50mg/dose) *If IV route, IV push at a rate of ≤25mg/min	1 to 2 mg/kg/dose IV/IM (NTE 50mg/dose)
(2) X 1 tab of oral diphenhydramine (**Benadryl**) 25 mg (Oral)	Take 25mg to 50mg by mouth	Not preferred. Refer to parenteral route or oral solution	Not preferred. Refer to parenteral route or oral solution
Oxygen Delivery System – tank at least ¾ full	Can consider any oxygen delivery systems if appropriate	Nasal prongs or nasal catheters preferred; can consider face mask, bead box, or incubator for older children	Nasal prongs or nasal catheters preferred
Oxygen delivered 6-8 L/minute	6 to 8 L/minute	1 to 4 L/minute	1 to 2 L/minute
Other Emergency Medications	**Adult**	**Pediatric**	**Infant**
Naloxone (Narcan®)	**Nasal (Narcan)**: Spray 4mg (content of 1 nasal spray) in one nostril as a single dose; may repeat every 2-3 minutes in alternating nostrils **Auto-injector (Evzio)**: Inject 2mg (content of 1 auto-injector) IM as a single dose; may repeat every 2-3 minutes with another Evzio auto-injector **Solution injection**: Inject 0.4mg to 2mg IM as a single dose; may repeat every 2-3 minutes up to 10 mg	**Nasal (Narcan):** 4mg (content of 1 nasal spray) as a single does in one nostril; may repeat every 2-3 minutes in alternating nostrils **Auto-injector (Evzio)**: Inject 2mg (content of 1 auto-injector) IM as a single dose; may repeat every 2-3 minutes with another Evzio auto-injector **Solution injection** (age ≥5 years old or ≥20kg): 2mg/kg IM/SQ; may repeat every 2-3 minutes prn	**Nasal (Narcan)**: 4mg (content of 1 nasal spray) as a single does in one nostril; may repeat every 2-3 minutes in alternating nostrils **Auto-injector (Evzio):** Inject 2mg (content of 1 auto-injector) IM as a single dose; may repeat every 2-3 minutes with another Evzio auto-injector **Solution injection** (age <5 years old or ≤20kg): 0.1mg/kg IM/SQ; may repeat every 2-3 minutes prn
Chewable aspirin	Chew 160mg to 325mg nonenteric coated aspirin upon presentation or within 48 hours of stroke	Aspirin is not recommended for patients <18 years of age who are recovering from chickenpox or flu symptoms due to association with Reye syndrome	Aspirin is not recommended for patients <18 years of age who are recovering from chickenpox or flu symptoms due to association with Reye's syndrome
Nitroglycerin spray/tablet	**Tablet:** 0.3mg to 0.4mg sublingually every 5 minutes up to 3 doses **Spray:** Spray 0.4mg (1 spray) sublingually every 5 minutes up to 3 doses	Safety and effectiveness of oral nitroglycerin in pediatric patients have not been established	Safety and effectiveness of oral nitroglycerin in pediatric patients have not been established
Nebulizer or metered dose inhaler (albuterol)	**Nebulizer:** 2.5mg to 5mg every 20 minutes for 3 doses, then 2.5mg to 10mg every 1 to 4 hours prn **MDI** (90mcg/actuation): 4 to 8 inhalations every 20 minutes for up to 4 hours, then 1 to 4 hours prn	**Nebulizer:** 2.5mg to 5mg every 20 minutes for 3 doses, then 2.5mg to 10mg every 1 to 4 hours prn **MDI** (90mcg/actuation)**:** 2 to 10 inhalations every 20 minutes for 2 to 3 doses; if rapid response, can change to every 3 to 4 hours prn	**Nebulizer:** 2.5mg every 20 minutes for the 1st hour prn; if there is rapid response, can change to every 3 to 4 hours prn **MDI** (90mcg/actuation)**:** 2 to 6 inhalations every 20 minutes for 2 to 3 doses; if there is rapid response, can change to every 3 to 4 hours prn
Glucose	15gm (3-4 tablets) by mouth	10gm to 20gm (0.3gm/kg) by mouth	Not preferred. Parenteral route recommended (IV dextrose or IM glucagon)

7.30.19 Jenny Nguyen, PharmD, SFHP Pharmacy

SAMPLE

Emergency Protocol

IN THE EVENT OF A MEDICAL EMERGENCY:

____________________________________ **is to call 911**

____________________________________ **is to start CPR.**

____________________________________ **is to bring the ER supplies to the patient.**

____________________________________ **is to bring the Oxygen to the patient.**

____________________________________ **is to attend to other patients.**

LOCATION OF EMERGENCY SUPPLIES: ____________________________________

____

LOCATION OF OXYGEN (full tank, tubing & mask/cannula): ____________________

____

Employee Alarm System:

Type of system (please circle or write in): verbal (if 10 employees or less), fire pull, alarm button or pull string in each room, code words, distinct sound/signal (silent alarm, paging system), panic button, and/or other____________________.

APPROVED BY: Dr. ________________________________ **Date:** ___________________

Emergency Response Worksheet

What to do in case of a power failure or other event that results in vaccine storage outside of the recommended temperature range

Follow these procedures:

1. Close the door tightly.
2. Ensure the vaccine is kept at appropriate temperatures. Make sure the refrigerator or freezer is plugged in and working properly, or move the vaccines into proper storage conditions as quickly as possible.
3. Do NOT discard the affected vaccines unless directed to by your state/local health department and/or the manufacturer(s). Label the vaccines "Do Not Use" so that the potentially compromised vaccines can be easily identified.
4. Notify the state/local health department or call the manufacturer (see manufacturers' phone numbers below).
5. Document the inventory of affected vaccines below and document the circumstances of the event and the actions taken on the *Vaccine Storage Troubleshooting Record* (see www.immunize.org/catg.d/p3041.pdf).

Vaccines Stored in Refrigerator

Vaccine	Manufacturer	Lot #	Expiration Date	# of Doses (i.e., *not* # of vials)

Vaccines Stored in Freezer

Vaccine	Manufacturer	Lot #	Expiration Date	# of Doses (i.e., *not* # of vials)

Important Contact Information:

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
31231	Nasal endoscopy, diagnostic, unilateral or bilateral (separate procedure)	X	
31233	Nasal/sinus endoscopy, diagnostic with maxillary sinusoscopy (via inferior meatus or canine fossa puncture)	X	
31235	Nasal/sinus endoscopy, diagnostic with sphenoid sinusoscopy (via puncture of sphenoidal face or cannulation of ostium)	X	
31237	Nasal/sinus endoscopy, surgical; with biopsy, polypectomy or debridement (separate procedure)		X
31238	Nasal/sinus endoscopy, surgical; with control of hemorrhage		X
31239	Nasal/sinus endoscopy, surgical; with dacryocystorhinostomy		X
31240	Nasal/sinus endoscopy, surgical; with concha bullosa resection		X
31241	Nasal/sinus endoscopy, surgical; with ligation of sphenopalatine artery		X
31253	Nasal/sinus endoscopy, surgical; with ethmoidectomy, total (anterior and posterior), including frontal sinus exploration, with removal of tissue from frontal sinus, when performed		X
31254	Nasal/sinus endoscopy, surgical; with ethmoidectomy, partial (anterior)		X
31255	Nasal/sinus endoscopy, surgical; with ethmoidectomy, total (anterior and posterior		X
31256	Nasal/sinus endoscopy, surgical; with maxillary antrostomy		X
31257	Nasal/sinus endoscopy, surgical; with ethmoidectomy, total (anterior and posterior), including sphenoidotomy		X
31259	Nasal/sinus endoscopy, surgical; with ethmoidectomy, total (anterior and posterior), including sphenoidotomy, with removal of tissue from the sphenoid sinus		X
31267	Nasal/sinus endoscopy, surgical; with removal of tissue from maxillary sinus		X
31276	Nasal/sinus endoscopy, surgical with frontal sinus exploration, with or without removal of tissue from frontal sinus		X
31287	Nasal/sinus endoscopy, surgical, with sphenoidotomy		X
31288	Nasal/sinus endoscopy, surgical, with sphenoidotomy; with removal of tissue from sphenoid sinus		X
31290	Nasal/sinus endoscopy, surgical, with repair of cerebrospinal fluid leak; ethmoid region		X
31291	Nasal/sinus endoscopy, surgical, with repair of cerebrospinal fluid leak; sphenoid region		X
31292	Nasal/sinus endoscopy, surgical; with medial or inferior orbital wall decompression		X
31293	Nasal/sinus endoscopy, surgical; with medial orbital wall and inferior orbital wall decompression		X
31294	Nasal/sinus endoscopy, surgical; with optic nerve decompression		X
31295	Nasal/sinus endoscopy, surgical; with dilation of maxillary sinus ostium, transnasal or via canine fossa		X
31296	Nasal/sinus endoscopy, surgical; with dilation of frontal sinus ostium		X
31297	Nasal/sinus endoscopy, surgical; with dilation of spenoid sinus ostium		X
31298	Nasal/sinus endoscopy, surgical; with dilation of frontal sphenoid sinus osia (such as balloon dilation)		X
31505	Laryngoscopy, indirect; diagnostic (separate procedure)	X	
31510	Laryngoscopy, indirect; with biopsy	X	
31511	Laryngoscopy, indirect; with removal of foreign body		X
31512	Laryngoscopy, indirect; with removal of lesion		X
31513	Laryngoscopy, indirect; with vocal cord injection		X
31515	Laryngoscopy, direct, with or without tracheoscopy; for aspiration		X
31520	Laryngoscopy, direct, with or without tracheoscopy; diagnostic, newborn	X	
31525	Laryngoscopy, direct, with or without tracheoscopy; diagnostic, except newborn	X	

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
31526	Laryngoscopy, direct, with or without tracheoscopy; diagnostic, with operating microscope	X	
31527	Laryngoscopy, direct, with or without tracheoscopy; with insertion of obturator		X
31528	Laryngoscopy, direct, with or without tracheoscopy; with dilation, initial		X
31529	Laryngoscopy, direct, with or without tracheoscopy; with dilation, subsequent		X
31530	Laryngoscopy, direct, operative with foreign body removal		X
31531	Laryngoscopy, direct, operative with foreign body removal; with operating microscope		X
31535	Laryngoscopy, direct, operative, with biopsy		X
31536	Laryngoscopy, direct, operative, with biopsy; with operating microscope		X
31540	Laryngoscopy, direct, operative, with excision of tumor and/or stripping of vocal cords or epiglottis		X
31541	Laryngoscopy, direct, operative, with excision of tumor and/or stripping of vocal cords or epiglottis; with operating microscope		X
31545	Laryngoscopy, direct, operative, with operating microscope or telescope, with submucosal removal of non-neoplastic lesion(s) of vocal cord; reconstruction with local tissue flap(s)		X
31546	Laryngoscopy, direct, operative, with operating microscope or telescope, with submucosal removal of non-neoplastic lesion(s) of vocal cord; reconstruction with graft(s) (includes obtaining autograft)		X
31560	Laryngoscopy, direct, operative, with arythenoidectomy		X
31561	Laryngoscopy, direct, operative, with arythenoidectomy; with operating microscope		X
31570	Laryngoscopy, direct, with injection into vocal cord(s), therapeutic		X
31571	Laryngoscopy, direct, with injection into vocal cord(s), therapeutic; with operating microscope		X
31572	Laryngoscopy, flexible; with ablation or destruction of lesion(s) with laser, unilateral		X
31573	Laryngoscopy, flexible; with therapeutic injection(s) (eg, chemodenervation agent or corticosteroid, injected percutaneous, transoral, or via endoscope channel), unilateral		X
31574	Laryngoscopy, flexible; with injection(s) for augmentation (eg, percutaneous, transoral), unilateral		X
31575	Laryngoscopy, flexible fiberoptic; diagnostic	X	
31576	Laryngoscopy, flexible fiberoptic; with biopsy	X	
31577	Laryngoscopy, flexible fiberoptic; with removal of foreign body		X
31578	Laryngoscopy, flexible fiberoptic; with removal of lesion		X
31579	Laryngoscopy, flexible or rigid fiberoptic, with stroboscopy		X
31615	Tracheobronchoscopy through established tracheostomy incision		X
31622	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, diagnostic, with cell washing when performed (separate procedure)	X	
31623	Bronchoscopy, rigid or flexible, with brushing or protected brushings	X	
31624	Bronchoscopy, rigid or flexible, with bronchial alveolar lavage	X	
31625	Bronchoscopy, rigid or flexible, with bronchial or endobronchial biopsy(s), single or multiple sites	X	
31626	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, diagnostic, with placement of fiduciary markers, single or multiple		X
31627	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, diagnostic, with computer assisted image guided navigation (List separately in addition to code for primary procedure)	X	
31628	Bronchoscopy, rigid or flexible with transbronchial lung biopsy(s) single lobe	X	
31629	Bronchoscopy, rigid or flexible, with transbronchial needle aspiration biopsy(s), trachea, main stem and/or lobar bronchus(i)	X	

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
31630	Bronchoscopy, rigid or flexible, with tracheal/ bronchial dilation or closed reduction of fracture		X
31631	Bronchoscopy, rigid or flexible with placement of tracheal stent(s) (includes tracheal/bronchial dilation as required)		X
31632	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with transbronchial lung biopsy(s), each additional lobe (list separately in addition to code for primary procedure)	X	
31633	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with transbronchial needle aspiration biopsy(s), each additional lobe (list separately in addition to code for primary procedure)	X	
31634	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with balloon occlusion, with assessment of air leak, with administration of occlusive substance (for example fibrin glue), if performed procedure)		X
31635	Bronchoscopy, rigid or flexible, with removal of foreign body		X
31636	Bronchoscopy, rigid or flexible, with placement of bronchial stent(s) (includes tracheal/bronchial dilation as required), initial bronchus		X
31637	Bronchoscopy, rigid or flexible, each additional major bronchus stented (list separately in addition to code for primary procedure)		X
31638	Bronchoscopy, rigid or flexible, with revision of tracheal or bronchial stent inserted at previous session (includes tracheal/bronchial dilation as required)		X
31640	Bronchoscopy, rigid or flexible, with excision of tumor		X
31641	Bronchoscopy, (rigid or flexible); with destruction of tumor or relief of stenosis by any method other than excision (for example laser therapy, cryotherapy)		X
31643	Bronchoscopy, (rigid or flexible); with placement of catheter (s) for intracavitary radioelement application		X
31645	Bronchoscopy, (rigid or flexible); with therapeutic aspiration of thracheobronchial tree, initial (for example, drainage of lung abscess)		X
31646	Bronchoscopy, (rigid or flexible); with therapeutic aspiration of tracheobronchial tree, subsequent		X
31647	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with balloon occlusion, when performed, assessment of air leak, airway sizing, and insertion of bronchial valve(s), initial lobe		X
31648	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with removal of bronchial valve(s), initial lobe		X
31649	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with removal of bronchial valve(s), each additional lobe (List separately in addition to code for primary procedure)		X
31651	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with balloon occlusion, when performed, assessment of air leak, airway sizing, and insertion of bronchial valve(s), each additional lobe (List separately in addition to code for primary procedure[s])		X
31652	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (e.g., aspiration[s]/biopsy[ies]), one or two mediastinal and/or hilar lymph node stations or structures	X	
31653	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (e.g.,	X	

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
	aspiration[s]/biopsy[ies]), one or two mediastinal and/or hilar lymph node stations or structures		
31654	Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with transendoscopic endobronchial ultrasound (EBUS) during bronchoscopic diagnostic or therapeutic intervention(s) for peripheral lesion(s) (list separately in addition to code for primary procedure[s])	X	
32601	Thoracoscopy, diagnostic (separate procedure); lungs and pleural space, without biopsy	X	
32604	Thoracoscopy, diagnostic (separate procedure); pericardial sac, with biopsy	X	
32606	Thoracoscopy, diagnostic (separate procedure); mediastinal space, with biopsy	X	
32607	Thoracoscopy; with diagnostic biopsy(ies) of lung infiltrate(s) (for example wedge, incisional), unilateral		X
32608	Thoracoscopy; with diagnostic biopsy(ies) of lung nodule(s) or mass(es) (for example wedge, incisional), unilateral		X
32609	Thoracoscopy; with biopsy(ies) of pleura		X
32650	Thoracoscopy, surgical; with pleurodesis (for example, mechanical or chemical) any method		X
32651	Thoracoscopy, surgical; with partial pulmonary decortication		X
32652	Thoracoscopy, surgical; with total pulmonary decortication, including intrapleural pneumonolysis		X
32653	Thoracoscopy, surgical; with removal of intrapleural foreign body or fibrin deposit		X
32654	Thoracoscopy, surgical; with control of traumatic hemorrhage		X
32655	Thoracoscopy, surgical; with excision-plication of bullae, including any pleural procedure		X
32656	Thoracoscopy, surgical; with parietal pleurectomy		X
32658	Thoracoscopy, surgical; with removal of clot or foreign body from pericardial sac		X
32659	Thoracoscopy, surgical; with creation of pericardial window or partial resection of pericardial sac for drainage		X
32661	Thoracoscopy, surgical; with excision of pericardial cyst, tumor, or mass		X
32662	Thoracoscopy, surgical; with excision of mediastinal cyst, tumor, or mass		X
32663	Thoracoscopy, surgical; with lobectomy, total or segmental		X
32664	Thoracoscopy, surgical; with thoracic sympathectomy		X
32665	Thoracoscopy, surgical; with esophagomyotomy (Heller type)		X
32666	Thoracoscopy, surgical; with therapeutic wedge resection (for example mass, nodule), initial unilateral		X
32667	Thoracoscopy, surgical; with therapeutic wedge resection (for example mass or nodule), each additional resection, ipsilateral (List separately in addition to code for primary procedure)		X
32668	Thoracoscopy, surgical; with diagnostic wedge resection followed by anatomic lung resection (List separately in addition to code for primary procedure)		X
32669	Thoracoscopy, surgical; with removal of a single lung segment (segmentectomy)		X
32670	Thoracoscopy, surgical; with removal of 2 lobes (bilobectomy)		X
32671	Thoracoscopy, surgical; with removal of lung (pneumonectomy)		X
32672	Thoracoscopy, surgical; with resection-plication for emphysematous lung (bullous or non-bullous) for lung volume reduction (LVRS), unilateral includes any pleural procedure, when performed		X
32673	Thoracoscopy, surgical; with resection of thymus, unilateral or bilateral		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
32674	Thoracoscopy, surgical; with mediastinal and regional lymphadenectomy (List separately in addition to code for primary procedure)		X
39401	Mediastinoscopy; includes biopsy(ies) of mediastinal mass (e.g., lymphoma), when performed	X	
39402	Mediastinoscopy; with lymph node biopsy(ies) (e.g., lung cancer staging)	X	
43180	Esophagoscopy, rigid, transoral with diverticulectomy of hypopharynx or cervical esophagus (for example Zenker's diverticulum), with cricopharyngeal myotomy, includes use of telescope or operating microscope and repair, when performed		X
43191	Esophagoscopy, rigid, transoral; diagnostic, including collection of specimen(s) by brushing or washing when performed (separate procedure)	X	
43192	Esophagoscopy, rigid, transoral; with directed submucosal injection(s), any substance		X
43193	Esophagoscopy, rigid, transoral; with biopsy, single or multiple	X	
43194	Esophagoscopy, rigid, transoral; with removal of foreign body(s)		X
43195	Esophagoscopy, rigid, transoral; with balloon dilation (less than 30 mm diameter)		X
43196	Esophagoscopy, rigid, transoral; with insertion of guide wire followed by dilation over guide wire		X
43197	Esophagoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing when performed (separate procedure)	X	
43198	Esophagoscopy, flexible, transnasal; with biopsy, single or multiple	X	
43200	Esophagoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing when performed (separate procedure)	X	
43201	Esophagoscopy, flexible, transoral diagnostic, with directed submucosal injection(s), any substance		X
43202	Esophagoscopy, flexible, transoral; with biopsy, single or multiple	X	
43204	Esophagoscopy, flexible, transoral; with injection sclerosis of esophageal varices		X
43205	Esophagoscopy, flexible, transoral; with band ligation of esophageal varices		X
43206	Esophagoscopy, flexible, transoral with optical endomicroscopy	X	
43210	Esophagogastroduodenoscopy, flexible, transoral; with esophagogastric fundoplasty, partial or complete, includes duodenoscopy when performed		X
43211	Esophagoscopy, flexible, transoral; with endoscopic mucosal resection		X
43212	Esophagoscopy, flexible, transoral; with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)		X
43213	Esophagoscopy, flexible, transoral; with dilation of esophagus, by balloon or dilator, retrograde (includes fluoroscopic guidance, when performed)		X
43214	Esophagoscopy, flexible, transoral; with dilation of esophagus with balloon (30 mm diameter or larger) (includes fluoroscopic guidance, when performed)		X
43215	Esophagoscopy, flexible, transoral; with removal of foreign body(s)		X
43216	Esophagoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesions(s) by hot biopsy forceps		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
43217	Esophagoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique		X
43220	Esophagoscopy, flexible, transoral; with balloon dilation (less than 30 mm diameter)		X
43226	Esophagoscopy, flexible, transoral; with insertion of guide wire followed by dilator(s) over guide wire		X
43227	Esophagoscopy, flexible, transoral; with control of bleeding any method		X
43229	Esophagoscopy, flexible, transoral; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)		X
43231	Esophagoscopy, flexible, transoral; with endoscopic ultrasound examination	X	
43232	Esophagoscopy, flexible, transoral; with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s)	X	
43233	Esophagogastroduodenoscopy, flexible, transoral; with dilation of esophagus with balloon (30 mm diameter or larger) (includes fluoroscopic guidance, when performed)		X
43235	Esophagogastroduodenoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
43236	Esophagogastroduodenoscopy, flexible, transoral; diagnostic, with directed submucosal injection(s), any substance		X
43237	Esophagogastroduodenoscopy, flexible, transoral; diagnostic, with endoscopic ultrasound examination limited to the esophagus	X	
43238	Esophagogastroduodenoscopy, flexible, transoral; diagnostic, with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s), esophagus (includes endoscopic ultrasound examination limited to the esophagus)	X	
43239	Esophagogastroduodenoscopy, flexible, transoral; with biopsy, single or multiple	X	
43240	Esophagogastroduodenoscopy, flexible, transoral; with transmural drainage of pseudocyst (includes placement of transmural drainage catheter[s]/stent[s], when performed, and endoscopic ultrasound, when performed)		X
43241	Esophagogastroduodenoscopy, flexible, transoral; with insertion of intraluminal tube or catheter		X
43242	Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s) (includes endoscopic ultrasound examination of the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis)	X	
43243	Esophagogastroduodenoscopy, flexible, transoral; with injection sclerosis of esophageal/gastric varices		X
43244	Esophagogastroduodenoscopy, flexible, transoral; with band ligation of esophageal/gastric varices		X
43245	Esophagogastroduodenoscopy, flexible, transoral; with dilation of gastric/duodenal stricture(s) (for example balloon, bougie)		X
43246	Esophagogastroduodenoscopy, flexible, transoral; with directed placement of percutaneous gastrostomy tube		X
43247	Esophagogastroduodenoscopy, flexible, transoral; with removal of foreign body(s)		X
43248	Esophagogastroduodenoscopy, flexible, transoral; with insertion of guide wire followed by passage of dilator(s) through esophagus over guide wire		X
43249	Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic balloon dilation of esophagus (less than 30 mm diameter)		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
43250	Esophagogastroduodenoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps		X
43251	Esophagogastroduodenoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique		X
43252	Esophagogastroduodenoscopy, flexible, transoral; with optical endomicroscopy	X	
43253	Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound-guided transmural injection of diagnostic or therapeutic substance(s) (for example anesthetic, neurolytic agent) or fiducial marker(s) (includes endoscopic ultrasound examination of the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis)		X
43254	Esophagogastroduodenoscopy, flexible, transoral; with endoscopic mucosal resection		X
43255	Esophagogastroduodenoscopy, flexible, transoral; with control of bleeding, any method		X
43257	Esophagogastroduodenoscopy, flexible, transoral; with delivery of thermal energy to the muscle of lower esophageal sphincter and/or gastric cardia, for treatment of gastroesophageal reflux disease		X
43259	Esophagogastroduodenoscopy, flexible, transoral; with endoscopic ultrasound examination, including the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis	X	
43260	Endoscopic retrograde cholangiopancreatography (ERCP); diagnostic, including collection of specimen(s) by brushing or washing (separate procedures)	X	
43261	Endoscopic retrograde cholangiopancreatography (ERCP); with biopsy, single or multiple	X	
43262	Endoscopic retrograde cholangiopancreatography (ERCP); with sphincterotomy/papillotomy		X
43263	Endoscopic retrograde cholangiopancreatography (ERCP); with pressure measurement of sphincter of Oddi (pancreatic duct or common bile duct)		X
43264	Endoscopic retrograde cholangiopancreatography (ERCP); with endoscopic retrograde removal of calculus/calculi from biliary and/or pancreatic ducts		X
43265	Endoscopic retrograde cholangiopancreatography (ERCP); with endoscopic retrograde destruction, lithotripsy of calculus/calculi, any method		X
43266	Esophagogastroduodenoscopy, flexible, transoral; with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)		X
43270	Esophagogastroduodenoscopy, flexible, transoral; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)		X
43273	Endoscopic cannulation of papilla with direct visualization of pancreatic/common bile duct(s) (List separately in addition to code(s) for primary procedure)	X	
43274	Endoscopic retrograde cholangiopancreatography (ERCP); with placement of endoscopic stent into biliary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent		X
43275	Endoscopic retrograde cholangiopancreatography (ERCP); with removal of foreign body(s) or stent(s) from biliary/pancreatic duct(s)		X
43276	Endoscopic retrograde cholangiopancreatography (ERCP); with removal and exchange of stent(s), biliary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent exchanged		X

Endoscopy Matrix			
CPT Code	**Description of Endoscopy**	**Diagnostic**	**Therapeutic (Surgical)**
43277	Endoscopic retrograde cholangiopancreatography (ERCP); with trans-endoscopic balloon dilation of biliary/pancreatic duct(s) or of ampulla (sphincteroplasty), including sphincterotomy, when performed, each duct		X
43278	Endoscopic retrograde cholangiopancreatography (ERCP); with ablation of tumor(s), polyp(s), or other lesion(s), including pre- and post-dilation and guide wire passage, when performed		X
43284	Laparoscopy, surgical, esophageal sphincter augmentation procedure, placement of sphincter augmentation device (i.e., magnetic band), including cruroplasty when performed		X
43285	Removal of esophageal sphincter augmentation device		X
43290	Esophagogastroduodenoscopy, flexible, transoral; with deployment of intragastric bariatric balloon		X
43291	Esophagogastroduodenoscopy, flexible, transoral; with removal of intragastric bariatric balloon(s)		X
44360	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedures	X	
44361	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with biopsy, single or multiple	X	
44363	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with removal of foreign body		X
44364	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with removal of tumor(s), polyp(s) or other lesion(s) by snare technique		X
44365	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with removal of tumor(s), polyp(s) or other lesion(s) by hot biopsy forceps or bipolar cautery		X
44366	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with control of bleeding (for example, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)		X
44369	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with ablation of tumor(s), polyp(s) or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique		X
44370	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with transendoscopic stent placement (includes predilation)		X
44372	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with placement of percutaneous jejunostomy tube		X
44373	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, not including ileum; with conversion of percutaneous gastrostomy tube to percutaneous jejunosotomy tube		X
44376	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, including ileum; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)	X	
44377	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, including ileum; with biopsy, single or multiple	X	
44378	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, including ileum; with control of bleeding, (for example, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)		X
44379	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum, including ileum; with transendoscopic stent placement (includes predilation)		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
44380	Ileoscopy, through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed(separate procedure)	X	
44381	Ileoscopy, through stoma; with transendoscopic balloon dilation		X
44382	Ileoscopy, through stoma; with biopsy, single or multiple	X	
44384	Ileoscopy, through stoma; with placement of endoscopic stent (includes pre and post-dilation and guide wire passage, when performed)		X
44385	Endoscopic evaluation of small intestinal pouch (for example Kock pouch, ileal reservoir [S or J]); diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
44386	Endoscopic evaluation of small intestinal pouch (for example Kock pouch, ileal reservoir [S or J]); with biopsy, single or multiple	X	
44388	Colonoscopy through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
44389	Colonoscopy through stoma; with biopsy, single or multiple	X	
44390	Colonoscopy through stoma; with removal of foreign body(s)		X
44391	Colonoscopy through stoma; with control of bleeding, any method		X
44392	Colonoscopy through stoma; with removal of tumor(s), polyp(s) or other lesion(s) by hot biopsy forceps		X
44394	Colonoscopy through stoma; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique		X
44401	Colonoscopy through stoma; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre-and post-dilation and guide wire passage, when performed)		X
44402	Colonoscopy through stoma; with endoscopic stent placement (including pre- and post-dilation and guide wire passage, when performed)		X
44403	Colonoscopy through stoma; with endoscopic mucosal resection		X
44404	Colonoscopy through stoma; with directed submucosal injection(s), any substance		X
44405	Colonoscopy through stoma; with transendoscopic balloon dilation		X
44406	Colonoscopy through stoma; with endoscopic ultrasound examination, limited to the sigmoid, descending, transverse, or ascending colon and cecum and adjacent structures	X	
44407	Colonoscopy through stoma; with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s), includes endoscopic ultrasound examination limited to the sigmoid, descending, transverse, or ascending colon and cecum and adjacent structures	X	
44408	Colonoscopy through stoma; with decompression (for pathologic distention) (for example volvulus, megacolon), including placement of decompression tube, when performed		X
45300	Proctosigmoidoscopy, rigid; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)	X	
45303	Proctosigmoidoscopy, rigid; with dilation, (for example, balloon, guide wire, bougie)		X
45305	Proctosigmoidoscopy, rigid; with biopsy, single or multiple	X	
45307	Proctosigmoidoscopy, rigid; with removal of foreign body		X
45308	Proctosigmoidoscopy, rigid; with removal of single tumor, polyp or other lesion by hot biopsy forceps or bipolar cautery		X
45309	Proctosigmoidoscopy, rigid; with removal of single tumor, polyp or other lesion by snare technique		X
45315	Proctosigmoidoscopy, rigid; with removal of multiple tumors, polyps or other lesions by hot biopsy forceps, bipolar cautery or snare technique		X
45317	Proctosigmoidoscopy, rigid; with control of bleeding, (for example, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
45320	Proctosigmoidoscopy, rigid; with ablation of tumor(s), polyp(s) or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique (for example, laser)		X
45321	Proctosigmoidoscopy, rigid; with decompression of volvulus		X
45327	Proctosigmoidoscopy, rigid; with transendoscopic stent placement (includes predilation)		X
45330	Sigmoidoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
45331	Sigmoidoscopy, flexible; with biopsy, single or multiple	X	
45332	Sigmoidoscopy, flexible; with removal of foreign body(s)		X
45333	Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s) or other lesion(s) by hot biopsy forceps		X
45334	Sigmoidoscopy, flexible; with control of bleeding, any method		X
45335	Sigmoidoscopy, flexible; with direct submucosal injection(s), any substance		X
45337	Sigmoidoscopy, flexible; with decompression (for pathologic distention) (for example volvulus, megacolon),including placement of decompression tube, when performed		X
45338	Sigmoidoscopy, flexible; with removal of tumor(s), polyp(s) or other lesion(s) by snare technique		X
45346	Sigmoidoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)		X
45340	Sigmoidoscopy, flexible; with transendoscopic balloon dilation		X
45341	Sigmoidoscopy, flexible; with endoscopic ultrasound examination	X	
45342	Sigmoidoscopy, flexible; with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s)	X	
45346	Sigmoidoscopy, flexible; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed)		X
45347	Sigmoidoscopy, flexible; with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed)		X
45349	Sigmoidoscopy, flexible; with endoscopic mucosal resection		X
45350	Sigmoidoscopy, flexible; with band ligation(s) (for example hemorrhoids)		X
45378	Colonoscopy, flexible, proximal to splenic flexure; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
45379	Colonoscopy, flexible, with removal of foreign body(s)		X
45380	Colonoscopy, flexible, with biopsy, single or multiple	X	
45381	Colonoscopy, flexible, with directed submucosal injection(s), any substance		X
45382	Colonoscopy, flexible, with control of bleeding, any method		X
45384	Colonoscopy, flexible, with removal of tumor(s), polyp(s) or other lesion(s) by hot biopsy forceps		X
45385	Colonoscopy, flexible, with removal of tumor(s), polyp(s) or other lesion(s) by snare technique		X
45386	Colonoscopy, flexible, with transendoscopic balloon dilation		X
45388	Colonoscopy through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
45389	Colonoscopy, flexible; with endoscopic stent placement (includes pre- and post-dilation and guide wire passage, when performed)		X
45390	Colonoscopy, flexible; with endoscopic mucosal resection		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
45391	Colonoscopy, flexible, with endoscopic ultrasound examination limited to the rectum, sigmoid, descending, transverse, or ascending colon and cecum, and adjacent structures.	X	
45392	Colonoscopy, flexible, with transendoscopic ultrasound guided intramural or transmural fine needle aspiration/biopsy(s)includes endoscopic ultrasound examination limited to the rectum, sigmoid, descending, transverse, or ascending colon and cecum, and adjacent structures.	X	
45393	Colonoscopy, flexible; with decompression (for pathologic distention) (for example volvulus, megacolon), including placement of decompression tube, when performed		X
45398	Colonoscopy, flexible; with band ligation(s) (for example hemorrhoids)		X
46600	Anoscopy; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	X	
46601	Anoscopy; diagnostic, with high-resolution magnification (HRA) (for example colposcope, operating microscope) and chemical agent enhancement, including collection of specimen(s) by brushing or washing, when performed	X	
46604	Anoscopy; with dilation, (for example, balloon, guide wire, bougie)		X
46606	Anoscopy; with biopsy, single or multiple	X	
46607	Anoscopy; with high-resolution magnification (HRA) (for example colposcope, operating microscope) and chemical agent enhancement, with biopsy, single or multiple	X	
46608	Anoscopy; with removal of foreign body		X
46610	Anoscopy; with removal of single tumor, polyp, or other lesion by hot biopsy forceps or bipolar cautery		X
46611	Anoscopy; with removal of single tumor, polyp, or other lesion by snare technique		X
46612	Anoscopy; with removal of multiple tumors, polyps or other lesions by hot biopsy forceps, bipolar cautery or snare technique		X
46614	Anoscopy; with control of bleeding (for example, injection, bipolar cautery, unipolar cautery, laser, heater probe, stapler, plasma coagulator)		X
46615	Anoscopy; with ablation of tumor(s), polyp(s), or other lesion(s) not amenable to removal by hot biopsy forceps, bipolar cautery or snare technique		X
47550	Biliary endoscopy, intraoperative (choledochoscopy) (list separately in addition to code for primary procedure)	X	
47552	Biliary endoscopy, percutaneous via T-tube or other tract; diagnostic, with or without collection of specimen(s) by brushing and/or washing (separate procedure)	X	
47553	Biliary endoscopy, percutaneous via T-tube or other tract; with biopsy, single or multiple	X	
47554	Biliary endoscopy, percutaneous via T-tube or other tract; with removal of calculus/calculi		X
47555	Biliary endoscopy, percutaneous via T-tube or other tract; with dilation of biliary duct stricture(s) without stent		X
47556	Biliary endoscopy, percutaneous via T-tube or other tract; with dilation of biliary duct stricture(s) with stent		X
49320	Laparoscopy, abdomen, peritoneum, and omentum, diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)	X	
49321	Laparoscopy, surgical; with biopsy (single or multiple)	X	
49322	Laparoscopy, surgical; with aspiration of cavity or cyst (for example, ovarian cyst) (single or multiple)		X
49323	Laparoscopy, surgical; with drainage of lymphocele to peritoneal cavity		X
49327	Laparoscopy, surgical; with placement of interstitial device(s) for radiation therapy guidance (for example fiducial markers, dosimeter),		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
	intra-abdominal, intrapelvic, and/or retroperitoneum, including imaging guidance, if performed, single or multiple (List separately in addition to code for primary procedure)		
49329	Unlisted laparoscopy procedure, abdomen, peritoneum and omentum		X
50551	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service		X
50553	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography; with ureteral catheterization, with or without dilation of ureter		X
50555	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography; with biopsy		X
50557	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy		X
50561	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus		X
50562	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with resection of tumor		X
50570	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service		X
50572	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with ureteral catheterization, with or without dilation of ureter		X
50574	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with biopsy		X
50575	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with endopyelotomy (includes cystoscopy, ureteroscopy, dilation of ureter and ureteral pelvic junction, incision of ureteral pelvic junction and insertion of endopyelotomy stent)		X
50576	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy		X
50580	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, installation or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus		X
50945	Laparoscopy, surgical; ureterolithotomy		X
50947	Laparoscopy, surgical; ureteroneocystostomy with cystoscopy and ureteral stent placement		X
50948	Laparoscopy, surgical; ureteroneocystostomy without cystoscopy and ureteral stent placement		X
50949	Unlisted laparoscopy procedure, ureter		X
50951	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service		X
50953	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with ureteral catheterization, with or without dilation of ureter		X
50955	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with biopsy		X

Endoscopy Matrix			
CPT Code	Description of Endoscopy	Diagnostic	Therapeutic (Surgical)
50957	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy		X
50961	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus		X
50970	Ureteral endoscopy with ureterotomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service		X
50972	Ureteral endoscopy with ureterotomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with ureteral catheterization, with or without dilation of ureter		X
50974	Ureteral endoscopy with ureterotomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with biopsy	X	
50976	Ureteral endoscopy with ureterotomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with fulguration and/or incision, with or without biopsy		X
50980	Ureteral endoscopy with ureterotomy, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus		X
52000	Cystourethroscopy (separate procedure)	X	
52001	Cystourethroscopy with irrigation and evacuation of multiple obstructing clots		X
52005	Cystourethroscopy, with ureteral catheterization, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service		X
52007	Cystourethroscopy, with ureteral catheterization, with or without irrigation, instillation or ureteropyelography, exclusive of radiologic service; with brush biopsy of ureter and/or renal pelvis	X	
52010	Cystourethroscopy, with ejaculatory duct catheterization, with or without irrigation, instillation or duct radiology, exclusive of radiologic service		X
52204	Cystourethroscopy, with biopsy	X	
52250	Cystourethroscopy and radiotracer with or without biopsy or fulguration		X
52282	Cystourethroscopy, with insertion of urethral stent		X
52327	Cystourethroscopy (including ureteral catheterization); with subureteric injection of implant material		X
52330	Cystourethroscopy (including ureteral catheterization); with manipulation, without removal of ureteral calculus		X
52351	Cystourethroscopy with ureteroscopy and/or pyeloscopy; diagnostic	X	
52352	Cystourethroscopy with ureteroscopy and/or pyeloscopy; with removal or manipulation of calculus (ureteral catheterization is included)		X
52353	Cystourethroscopy with ureteroscopy and/or pyeloscopy; with lithotripsy (ureteral catheterization is included)		X
52354	Cystourethroscopy with ureteroscopy and/or pyeloscopy; with biopsy and/or fulguration of lesion		X
52355	Cystourethroscopy with ureteroscopy and/or pyeloscopy; with resection of ureteral or renal pelvic tumor		X
52356	Cystourethroscopy, with ureteroscopy and/or pyeloscopy; with lithotripsy including insertion of indwelling ureteral stent (for example Gibbons or double-J type)		X
52400	Cystourethroscopy with incision, fulguration or resection of congenital posterior urethral valves, or congenital obstructive hypertrophic mucosal folds		X
52402	Cystourethroscopy with transurethral resection or incision of ejaculatory ducts		X
52441	Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; single implant		X

Endoscopy Matrix			
CPT Code	**Description of Endoscopy**	**Diagnostic**	**Therapeutic (Surgical)**
52442	Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; each additional permanent adjustable transprostatic implant (List separately in addition to code for primary procedure		X
54690	Laparoscopy, surgical; orchiectomy		X
54692	Laparoscopy, surgical; orchiopexy for intra-abdominal testis		X
57452	Colposcopy of the cervix including upper/adjacent vagina	X	
57454	Colposcopy of the cervix including upper/adjacent vagina;with biopsy(s) of the cervix and endocervical curettage		X
57455	Colposcopy of the cervix including upper/adjacent vagina; with biopsy(s) of the cervix	X	
57456	Colposcopy of the cervix including upper/adjacent vagina; with endocervical curettage		X
57460	Colposcopy of the cervix including upper/adjacent vagina; with loop electrode biopsy(s) of the cervix	X	
57461	Colposcopy of the cervix including upper/adjacent vagina; with loop electrode conization of the cervix		X
58555	Hysteroscopy, diagnostic (separate procedure)		X
58558	Hysteroscopy, surgical; with sampling (biopsy) of endometrium and/or polypectomy, with or without D & C		X
58559	Hysteroscopy, surgical; with lysis of intrauterine adhesions (any method)		X
58560	Hysteroscopy, surgical; with division of resection of intrauterine septum (any method)		X
58561	Hysteroscopy, surgical; with removal of leiomyomata		X
58562	Hysteroscopy, surgical; with removal of impacted foreign body		X
58563	Hysteroscopy, surgical; with endometrial ablation (for example endometrial resection, electrosurgical ablation, thermoablation)		X
58565	Hysteroscopy, surgical; with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants		X
58660	Laparoscopy, surgical; with lysis of adhesions (salpingolysis, ovariolysis) (separate procedure)		X
58661	Laparoscopy, surgical; with removal of adnexal structures (partial or total oophorectomy and/or salpingectomy)		X
58662	Laparoscopy, surgical; with fulguration or excision of lesions of the ovary, pelvic viscera or peritoneal surface by any method		X
60650	Laparoscopy, surgical, with adrenalectomy, partial or complete, or exploration of adrenal gland with or without biopsy, transabdominal, lumbar or dorsal		X
G0104	Colorectal cancer screening; flexible sigmoidoscopy	X	
G0105	Colorectal cancer screening; colonoscopy on individual at high risk	X	
G0121	Colorectal cancer screening; colonoscopy on individual not meeting criteria for high risk	X	
S0601	Screening proctoscopy	X	
C7509	Bronchoscopy, rigid or flexible, diagnostic with cell washing(s) when performed, with computer-assisted image-guided navigation, including fluoroscopic guidance when performed	X	
C7510	Bronchoscopy, rigid or flexible, with bronchial alveolar lavage(s), with computer-assisted image-guided navigation, including fluoroscopic guidance when performed		X
C7511	Bronchoscopy, rigid or flexible, with single or multiple bronchial or endobronchial biopsy(ies), single or multiple sites, with computer-assisted image-guided navigation, including fluoroscopic guidance when performed	X	
C7512	Bronchoscopy, rigid or flexible, with single or multiple bronchial or endobronchial biopsy(ies), single or multiple sites, with transendoscopic endobronchial ultrasound (EBUS) during	X	

Endoscopy Matrix			
CPT Code	**Description of Endoscopy**	**Diagnostic**	**Therapeutic (Surgical)**
	bronchoscopic diagnostic or therapeutic intervention(s) for peripheral lesion(s), including fluoroscopic guidance when performed		
C7541	Diagnostic endoscopic retrograde cholangiopancreatography (ERCP), including collection of specimen(s) by brushing or washing, when performed, with endoscopic cannulation of papilla with direct visualization of pancreatic/common bile ducts(s)	X	
C7542	Endoscopic retrograde cholangiopancreatography (ERCP) with biopsy, single or multiple, with endoscopic cannulation of papilla with direct visualization of pancreatic/common bile ducts(s)	X	
C7543	Endoscopic retrograde cholangiopancreatography (ERCP) with sphincterotomy/papillotomy, with endoscopic cannulation of papilla with direct visualization of pancreatic/common bile ducts(s)		X
C7544	Endoscopic retrograde cholangiopancreatography (ERCP) with removal of calculi/debris from biliary/pancreatic duct(s), with endoscopic cannulation of papilla with direct visualization of pancreatic/common bile ducts(s)		X
C7550	Cystourethroscopy, with biopsy(ies) with adjunctive blue light cystoscopy with fluorescent imaging agent		X
C7554	Cystourethroscopy with adjunctive blue light cystoscopy with fluorescent imaging agent		X
0781T	Bronchoscopy, rigid or flexible, with insertion of esophageal protection device and circumferential radiofrequency destruction of the pulmonary nerves, including fluoroscopic guidance when performed; bilateral mainstem bronchi		X
0782T	Bronchoscopy, rigid or flexible, with insertion of esophageal protection device and circumferential radiofrequency destruction of the pulmonary nerves, including fluoroscopic guidance when performed; unilateral mainstem bronchus		X

ESTABLISHED CCS/GHPP CLIENT SERVICE AUTHORIZATION REQUEST (SAR)

Provider Information

1. Date of request
2. Provider name
3. Provider number
4. Address (number, street) City State ZIP code
5. Contact person
6. Contact telephone number ( )
7. Contact fax number ( )

Client Information

8. Client name—last First Middle
9. Gender ☐ Male ☐ Female
10. Date of birth (mm/dd/yyyy)
11. CCS/GHPP case number
12. Client index number (CIN)
13. Client's Medi-Cal number

Diagnosis

14. Diagnosis (DX)/ICD-10:____________ DX/ICD-10:____________ DX/ICD-10:____________

15. Service Authorization Request for *(Check one)*
☐ a. CCS/GHPP New SAR
☐ b. Authorization extension (If checked, enter authorization number:____________)

Requested Services

16.* CPT-4/ HCPCS Code/NDC	17. Specific Description of Service/Procedure	18. From (mm/dd/yy)	To (mm/dd/yy)	19. Frequency/ Duration	20. Units	21. Quantity (Pharmacy Only)

* A specific procedure code/NDC is required in column 16 if services requested are other than ongoing physician authorizations, hospital days, or special care center authorizations.

22. Other documentation attached ☐ Yes
23. Enter facility name (where requested services will be performed, if other than office.)

Inpatient Hospital Services

24. Begin date	25. End date	26. Number of days	27. Extension begin date	28. Extension end date	29. Number of extension days

Additional Services Requested from Other Health Care Providers

30. Provider's name Provider number Telephone number ( ) Contact person
Address (number, street) City State ZIP code
Description of services Procedure code Units Quantity
Additional information

31. Provider's name Provider number Telephone number ( ) Contact person
Address (number, street) City State ZIP code
Description of services Procedure code Units Quantity
Additional information

Privacy Statement (Civil Code Section 1798 et seq.)
The information requested on this form is required by the Department of Health Care Services for purposes of identification and document processing. Furnishing the information requested on this form is mandatory. Failure to provide the mandatory information may result in your request being delayed or not be processed.

32. Signature of physician/provider or authorized designee
33. Date

INSTRUCTIONS

1. Date of the request: Date the request is being made.

Provider Information

2. Provider's name: Enter the name of the provider who is requesting services.
3. Provider number: Enter billing number (no group numbers).
4. Address: Enter the requesting provider's address.
5. Contact person: Enter the name of the person who can be contacted regarding the request; all authorizations should be addressed to the contact person.
6. Contact telephone number: Enter the phone number of the contact person.
7. Contact fax number: Enter the fax number for the provider's office or contact person.

Client Information

8. Client name: Enter the client's name—last, first, and middle.
9. Gender: Check the appropriate box.
10. Date of birth: Enter the client's date of birth.
11. CCS/GHPP case number: Enter the client's California Children's Services (CCS)/Genetically Handicapped Persons Program (GHPP) number. If not known, leave blank.
12. Client index number (CIN): Enter the client's CIN number. If not known, leave blank.
13. Client's Medi-Cal number: Enter the client's Medi-Cal number. If number is not known, leave blank.

Diagnosis

14. Diagnosis and/or ICD-10: Enter the diagnosis or ICD-10 code, if known, relating to the requested services.

Requested Services

15. a. CCS/GHPP New SAR: Check if requesting a new authorization for an established CCS/GHPP client.
    b. Authorization extension: Check if requesting an extension of an authorized request. Please enter the authorization number on the line.
16. CPT-4/HCPCS code/NDC: Enter the requested CPT-4, HCPCS code, or NDC code. This is only required if services requested are other than ongoing physician authorizations or special care center authorizations. Also not required for inpatient hospital stay requests.
17. Specific description of procedure/service: Enter the specific description of the procedure/service being requested.
18. From and to dates: Enter the date you would like the services to begin. Enter the date you would like the services to end. These dates are not necessarily the dates that will be authorized.
19. Frequency/duration: Enter the frequency or duration of the procedures/services being requested.
20. Units: For NDC, enter the total number of fills plus refills. For all other codes, enter the total number/amount of services/supplies requested for SAR effective dates.
21. Quantity: Use only for products identified by NDC. For drugs, enter the amount to be dispensed (number, ml or cc, gms, etc.). For lancets or test strips, enter the number per month or per dispensing period.
22. Other documentation attached: Check this box if attaching additional documentation.
23. Enter facility name: Complete this field with the name of the facility where you would like to perform the surgery you are requesting.

Inpatient Hospital Services

24. Begin date: Enter the date the requested inpatient stay will begin.
25. End date: Enter the date the requested inpatient stay will end.
26. Number of days: Enter the number of days for the requested inpatient stay.
27. Extension begin date: Enter the date the requested extension of authorized inpatient stay will begin.
28. Extension end date: Enter the date the requested extended stay will end.
29. Number of extension days: Enter number of days for the requested extension inpatient stay.

Additional Services Requested from Other Health Care Providers

30. and 31. Provider's name: Enter name of the provider you are referring services to.
Provider number: Enter the provider's provider number.
Telephone: Enter provider's telephone number.
Contact person: Enter the name of the person who can be contacted regarding the request.
Address: Enter address of the provider.
Description of services: Enter description of referred services.
Procedure code: Enter the procedure code for requested service other than ongoing physician services.
Units: For NDC, enter the total number of fills plus refills. For all other codes, enter the total number/amount of services/supplies requested for SAR effective dates.
Quantity: Use only for products identified by NDC. For drugs, enter the amount to be dispensed (number, ml or cc, gms, etc.). For lancets or test strips, enter the number per month or per dispensing period.
Additional information: Include any written instructions/details here.

Signature

32. Signature of physician or provider: Form must be signed by the physician, pharmacist, or authorized representative.
33. Date: Enter the date the request is signed.

Primary Care Provider- Site Review Standards

<u>Purpose</u>: The Facility Site Review Standards provide the instructions, rules, regulations, parameters, and indicators for conducting Facility Site Reviews using the Facility Site Review tool. The site reviewer must use these Standards for measuring, evaluating, assessing, and making decisions.

<u>Scoring</u>: Site reviews include on-site inspection and interviews with site personnel. Reviewers are expected to use reasonable evidence available during the review process to determine if practices and systems on site meet review criteria. Critical Elements have a weight of two (2) points each and non-Critical Elements have a weight of one (1) point on the site review tool. Compliance levels include:

1) Exempted Pass: 90% or above *<u>without deficiencies</u>* in Critical Elements, Pharmaceutical or Infection Control
2) Conditional Pass: 80-89%, or 90% and above with deficiencies in either Critical Elements, Pharmaceutical or Infection Control
3) Fail: 79% and below

A corrective action plan (CAP) is required for a total score less than 90%, *OR* for a total score of 90% or above if there are deficiencies in Critical Elements, Pharmaceutical Services or Infection Control. Compliance rates are based on 170 total possible points, or on the total "adjusted" for Not Applicable (N/A) items. "N/A" applies to any scored item that does not apply to a specific site as determined by the reviewer. Reviewers are expected to determine how to ascertain information needed to complete the review. Review criteria that shall be reviewed *only* by a registered nurse (RN), nurse practitioner (NP), Certified Nurse Midwife (CNM), Licensed Midwife (LM), physician (MD), or physician assistant (PA) is labeled "**RN/NP/CNM/LM/MD/PA".**

<u>Directions</u>: Score full point(s) if review item is met. Score zero (0) points if item is not met. Do not score partial points for any item. Explain all "N/A" and "No" (0 point) items in the comment section. Provide assistance/consultation as needed for CAPs and establish follow-up/verification timeline.

1) Add the points given in each section.
2) Add points given for all six (6) sections to determine total points given for the site.
3) Subtract all "N/A" items from 170 total possible points to determine the "adjusted" total possible points. If there are no "N/A" items, calculation of site score will be based on 170 points.
4) Divide the total points given by 170 or by the "adjusted" total. Multiply by 100 to calculate percentage rate.

Scoring Example:

Step 1: Add the points given in each section.

Step 2: Add points given for all six (6) sections.

Example:
31 (Access/Safety)
27 (Personnel)
25 (Office Management)
40 (Clinical Services)
13 (Preventive Services)
34 (Infection Control)
170 (POINTS GIVEN)

Step 3: Subtract "N/A" points from 170 total points possible.

170 (Total points possible)
- 5 (N/A points)
165 ("Adjusted" total points possible)

Step 4: Divide total points given by the "adjusted" points, then multiply by 100 to calculate percentage rate.

$$\frac{\text{Points given}}{\text{“Adjusted” total}} \quad \text{or} \quad \frac{140}{165} = 0.8485 \times 100 = \mathbf{85\%}$$

Criteria	I. Access/Safety Standards
A. Site is accessible and useable by individuals with physical disabilities.	**Sites must have the following safety accommodations for physically disabled persons:** **Americans with Disabilities Act (ADA) Regulations:** • Site must meet city, county, and state building structure and access ordinances for persons with physical disabilities. A site/facility includes the building structure, walkways, parking lots, and equipment. • All facilities designed, constructed; or altered by, on behalf of, or for the use of a public entity must be readily accessible and usable by individuals with disabilities, if the construction or alteration was begun after January 26, 1992.[1] • Any alteration to a place of public accommodation or a commercial facility, after January 26, 1992, must be made to ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and useable by individuals with disabilities, including individuals who use wheelchairs.[2] **I.A.1) Clearly marked (blue) curb or sign designating disabled-parking space near accessible primary entrance.** **Parking:** • Parking spaces for persons with physical disabilities are located in close proximity to accessible building entrances. • Each parking space reserved for persons with disabilities is identified by a permanently affixed reflectorized sign posted in a conspicuous place. • If the provider has no control over availability of accessible parking within lot or nearby street spaces for persons with disabilities, the provider must have a plan in place for making program services available to persons with physical disabilities. **I.A.2) Pedestrian ramps have a level landing at the top and bottom of the ramp.** **Ramps:** • A clear and level landing is at the top and bottom of all ramps and on each side of an exit door. • Any path of travel is considered a ramp if its slope is greater than a 1-foot rise in 20 feet of horizontal run. • Ramps must be a minimum of 36-inches wide. Some areas require wider ramps.

[1] Title 28, Code of Federal Regulations (CFR), section 35.151. The CFR is searchable at: https://www.ecfr.gov/search.
[2] 28 CFR section 36.402.

Criteria	I. Access/Safety Standards
	• All edges must be protected to keep anyone from slipping off. • All ramps that are 5 feet long shall have a level top and bottom landings. • Ramps must have handrails on both sides if length is longer than 6 feet. **I.A.3) Exit and exam room doorway openings allow for clear passage of a person in a wheelchair.** **<u>Exit Doors</u>:** • All entrances and exterior and interior exit doors, regardless of the occupant load shall be made accessible to persons with disabilities. • Exam room and exit doorways have a minimum opening of 32 inches with the door open at 90 degrees that will allow for passage of wheelchairs. • Door hardware = operable with a single effort without requiring ability to grasp hardware. • Effort to operate doors = a maximum pressure of 5 pounds at interior doors. • Door hardware height = 30" – 44" above floor. • Exit doors include all doors required for access, circulation and use of the building and facilities, such as primary entrances and passageway doors. • Furniture and other items do not obstruct exit doorways or interfere with door swing pathway. **I.A.4) Accessible passenger elevator or reasonable alternative for multi-level floor accommodation.** **<u>Elevators</u>:** • If there is no elevator, a freight elevator may be used to achieve program accessibility if it is upgraded for general passenger use and if passageways leading to and from the elevator are well-lit, neat, and clean. **I.A.5) Clear floor space for wheelchair in waiting area and exam room.** **<u>Clear Floor Space</u>:** • Clear space in waiting/exam areas is sufficient (at least 30-in. x 48-in.) to accommodate a single, stationary adult wheelchair and occupant. • A minimum clear space of 60-inch diameter or square area is needed to turn a wheelchair. **<u>Sanitary Facilities</u>:** **I.A.6) Wheelchair accessible restroom facilities.** • A wheelchair accessible restroom stall allows sufficient space for a wheelchair to enter and permits the door to close.

Criteria	I. Access/Safety Standards
	• Sufficient knee clearance space underneath the sink allows wheelchair users to safely use a lavatory sink for hand washing. • If wheelchair-accessible restrooms are not available within the office site, reasonable alternative accommodation are provided such as a wheelchair-accessible restroom located within the building. Other reasonable alternatives may include, but is not limited to, urinal, bedpan, or bedside commode in a private area. **IA.7) Wheelchair accessible handwashing facilities or reasonable alternative.** • Restroom and hand washing facilities are accessible to able-bodied and physically disabled persons. • If wheelchair-accessible handwashing facilities are not available within the office site, reasonable alternative accommodation are provided such as sanitizers and wheelchair-accessible restroom located within the building. **Note:** • A public entity may not deny the benefits of its program, activities, and services to individuals with disabilities because its facilities are inaccessible.[3] • Every feature need not be accessible, if a reasonable portion of the facilities and accommodations provided is accessible.[4] • Reasonable Portion and/or Reasonable Alternatives are acceptable to achieve program accessibility. • Reasonable Portion applies to multi-storied structures and provides exceptions to the regulations requiring accessibility to all portions of a facility/site. • Reasonable Alternatives are methods other than site structural changes to achieve program accessibility, such as acquisition or redesign of equipment, assignment of assistants/aides to beneficiaries, provision of services at alternate accessible sites, and/or other site-specific alternatives to provide services.[5] • Points shall not be deducted if Reasonable Portion or Reasonable Alternative is made available on site.

[3] 28 CFR sections 35.149 – 35.150.
[4] Title 24, California Code of Regulations (CCR), sections 2-419, California Administrative Code, the State Building Code. CCR is searchable at: https://govt.westlaw.com/calregs/Search/Index.
[5] Title II-5.2000 of the ADA Technical Assistance Manual, available at: https://www.ada.gov/taman2.html.

Criteria	I. Access/Safety Standards
	Specific measurements are provided strictly for "*reference only"* for the reviewer. Site reviewers are *NOT* expected to measure parking areas, pedestrian path of travel walkways and/or building structures on site.
B. Site environment is maintained in a clean and sanitary condition.	**I.B.1) All patient areas including floor/carpet, walls, and furniture are neat, clean, and well maintained.** • The physical appearance of floors/carpets, walls, furniture, patient areas, and restrooms are clean and well maintained. **I.B.2) Restrooms are clean and contain appropriate sanitary supplies.** • Appropriate sanitary supplies, such as toilet tissue, hand washing soap, cloth/paper towels or antiseptic towelettes are made available for restroom use. • Environmental safety includes the "housekeeping" or hygienic condition of the site. • Clean means unsoiled, neat, tidy, and uncluttered. • "Well maintained" means being in good repair or condition.
C. Site environment is safe for all patients, visitors and personnel.	**Ordinances:** • Sites must meet city, county, and state fire safety and prevention ordinances. • Reviewers should be aware of applicable city and county ordinances in the areas in which they conduct reviews. **There is evidence staff has received safety training and/or has safety information available on the following:** **I.C.1) Fire safety and prevention.** **I.C.2) Emergency non-medical procedures (e.g. site evacuation, workplace violence).** **Emergency Action Plans:** • Non-medical emergencies include incidents of fire, natural disaster (e.g. earthquakes), workplace violence, etc. • Specific information for handling fire emergencies and evacuation procedures is available on site to staff. Personnel know ***where to locate*** information on site, and ***how to use*** information.[6]

[6] 29 CFR section 1910.38

Criteria	I. Access/Safety Standards
	I.C.3) Lighting is adequate in all areas to ensure safety. **<u>Illumination</u>:** Lighting is adequate in-patient flow working and walking areas such as corridors, walkways, waiting and exam rooms, and restrooms to allow for a safe path of travel. **<u>I.C.4) (CE) Exit doors and aisles are unobstructed and egress (escape) accessible.</u>** **<u>Access Aisle</u>:** • Accessible pedestrian paths of travel (ramps, corridors, walkways, lobbies, elevators, etc.) between elements (seats, tables, displays, equipment, parking spaces, etc.) provide a clear circulation path. • The minimum clear passage needed for a single wheelchair is 36 inches along an accessible route but may be reduced to a minimum of 32 inches at a doorway. • Means of egress (escape routes) are maintained free of obstructions or impediments to full instant use of the path of travel in case of fire or other type of emergency. • Building escape routes provide an accessible, unobstructed path of travel for pedestrians and/or wheelchair users at all times when the site is occupied. • Cords (including taped cords) or other items are not placed on or across walkway areas. **I.C.5) Exit doors are clearly marked with "Exit" signs.** **<u>Exits</u>:** Exit doorways are unobstructed and clearly marked by a readily visible "Exit" sign.[7] **I.C.6) Clearly diagramed "Evacuation Routes" for emergencies are posted in a visible location at all elevators, stairs and exits.** **<u>Evacuation Routes</u>**: • Clearly diagramed "Evacuation Routes" for emergencies are posted in a visible location at all elevators, stairs and exits.[8] **I.C.7) Electrical cords and outlets are in good working condition.** **<u>Electrical Safety</u>:** • Electrical cords are in good working condition with no exposed wires, frayed or cracked areas. Cords are not affixed to structures, placed in or across walkways, extended through walls, floors, and ceiling, or under doors or floor coverings.

[7] 29 CFR 1910.37

[8] 29 CFR 1910.33-39, 19 CCR 3.09 (a) (1) (B).

Criteria	I. Access/Safety Standards
	• Extension cords are not used as a substitute for permanent wiring. • All electrical outlets have an intact wall faceplate. • Sufficient clearance is maintained around lights and heating units to prevent combustible ignition. **I.C.8) Fire Fighting Equipment in accessible location.** **Firefighting equipment:** **There is firefighting equipment that must be in accessible locations on site. At least one of the following types of fire safety equipment is on site:** • **Fire Extinguisher:** The employer shall provide portable fire extinguishers and shall mount, locate, and identify them so that they are readily accessible. Fire extinguishers are maintained in a fully charged and operable condition and kept in their designated places at all times except during use.[9] • Smoke Detector with intact batteries. • Automatic Sprinkler System With a 10-inch clearance between sprinkler heads and stored materials. **I.C.9) An employee alarm system.** **Employee Alarm System:** • Employers must install and maintain an operable employee alarm system that has a distinctive signal to warn employees of fire or other emergencies, unless employees can promptly see or smell a fire or other hazard in time to provide adequate warning to them.[10] OSHA: For those employers with 10 or fewer employees in a workplace, direct voice communication is an acceptable procedure for sounding the alarm provided all employees can hear the alarm. Such workplaces do not need a back-up system. **Note:** Specific measurements are provided strictly for "*reference only"* for the reviewer. Site reviewers are *NOT* expected to measure parking areas, pedestrian path of travel walkways and/or building structures on site.

[9] 29 CFR 1910.157
[10] 29 CFR 1910.37

Criteria	I. Access/Safety Standards
D. Emergency health care services are available and accessible 24 hours a day, 7 days a week. **RN/NP/CNM/LM/MD/PA**	**I.D. 1) Personnel are trained in procedures/action plan to be carried out in case of medical emergency on site.** **<u>Site Specific Emergency Procedures</u>:** • Staff can describe site-specific actions or procedures for handling medical emergencies until the individual is stable or under care of local emergency medical services (EMS). • There is a written procedure for providing immediate emergent medical care on site until the local EMS is on the scene. Although site proximity to emergency care facilities may be considered when evaluating medical emergency procedures, the key factor is the ability to provide immediate care to patients *on site* until the patient is stable or EMS has taken over care/treatment. • When the physician or non-physician medical practitioner (NPMP) is not on site, staff/MA may call 911, and CPR-certified staff may initiate CPR if needed. • Non-CPR-certified staff may only call 911 and stay with the patient until help arrives. **I.D.2) Emergency equipment is stored together in easily accessible location and is ready to be used.** **<u>Emergency Medical Equipment</u>:** During business hours providers are prepared to provide emergency services for management of emergency medical conditions that occur on site ***until*** the emergent situation is stabilized and/or treatment is initiated by the local 911 Emergency Medical Service (EMS) system. Minimum emergency equipment is available on site to: o Establish and maintain a patent/open airway. o Manage emergency medical conditions. Emergency equipment and medication, appropriate to patient population served, are available in an accessible location and ready for use. • An accessible location is one that is reachable by personnel standing on the floor, or other permanent working area, without locating/retrieving step stool, ladder or other assistive devices. • For emergency "Crash" cart/kit, contents are appropriately sealed and are within the expiration dates posted on label/seal. • Site personnel are appropriately trained and can demonstrate knowledge and correct use of all medical equipment they are expected to operate within their scope of work. https://www.aafp.org/afp/2007/0601/p1679.html

Criteria	I. Access/Safety Standards
	I.D. 3) Emergency phone number contacts are posted, updated annually and as changes occur. **<u>Emergency Phone Number list</u>:** Posted in an accessible and prominent location(s) and includes: o Local emergency response services (e.g., fire, police/sheriff, ambulance). o Emergency contacts (e.g., responsible managers, supervisors). o Appropriate State, County, City, and local agencies (e.g., local poison control number). The list should be dated, and telephone numbers updated annually and as changes occur. **Emergency medical equipment appropriate to practice/patient population is available on site:** **<u>I.D. 4) (CE) Airway management: oxygen delivery system, nasal cannula or mask, bulb syringe and Ambu bag</u>:** Without the ability to adequately maintain the patient's airway, all other interventions are futile. Minimum airway control equipment with various sizes of airway devices appropriate to patient population within the practice and examples of oxygen delivery systems include: o Wall oxygen delivery system o Portable oxygen tank o Portable oxygen concentrator (POC) All oxygen delivery systems must be able to be regulated up to 6 liters of oxygen per minute, maintained for a minimum of 15 minutes. This flow rate establishes a minimum total oxygen delivery capacity of 90 liters for these devices:[11] o Nasal cannula or mask o Bulb syringe o Ambu bag as appropriate to patient population served. Mask should be replaced when they no longer make a solid seal.

[11] See the Food and Drug Administration (FDA) guidelines for oxygen generators and oxygen equipment for emergency use, available at: https://www.fda.gov/regulatory-information/search-fda-guidance-documents/review-guidelines-oxygen-generators-and-oxygen-equipment-emergency-use

	○ Portable oxygen tanks are maintained at least ¾ full. There is a method/system in place for oxygen tank replacement. If oxygen tanks are less than ¾ full at time of site visit, site has a back-up method for supplying oxygen if needed ***and*** a scheduled plan for tank replacement. ○ Oxygen tubing does not need be connected to oxygen tank, but must be kept in close proximity to tank. Oropharyngeal airways are no longer required. **I.D.5) (CE) Emergency medicine for anaphylactic reaction management, opioid overdose, chest pain, asthma, and hypoglycemia:** Severe allergic reaction can cause urticaria (hives), hypotension, bronchospasm, wheezing, and pulmonary edema. Per the American Academy of Family Practice (AAFP), the minimum equipment to manage emergency anaphylactic reaction, asthma exacerbation, chest pain, opioid overdose, and hypoglycemia, based on the patient population served, shall include: ○ Epinephrine 1mg/mL (injectable) ○ Diphenhydramine 25 mg (oral) or 50 mg/ml (injectable) ○ Naloxone[12] ○ Chewable aspirin 81 mg[13] ○ Nitroglycerin spray/tablet[14] ○ Bronchodilator medication (solution for nebulizer or metered dose inhaler) ○ Glucose (any type of glucose containing at least 15 grams) ○ Appropriate sizes of ESIP needles/syringes[15] and alcohol wipes • The typical adult strength to address cardiac emergencies is 325 mg (four doses of 81 mg chewable aspirin or one dose of 325 non-enteric coated aspirin). • If the site is seeing adults, the reviewer shall assess whether the appropriate number of chewable aspirin tablets of 81 mg is available (at least four tablets). **I.D.6) Medication dosage chart for all medications included with emergency equipment (or other method for determining dosage) is kept with emergency medications.** • There is a current medication administration reference (e.g. medication dosage chart) available for readily identifying the correct medication dosages (e.g. adult, pediatric, infant, etc.). • Package inserts are not acceptable as dosage charts. • All emergency medications in the emergency kit/ crash cart must have dosage charts. Score should be either a **Yes or No only**

[12] In 2018, the U.S. Surgeon General issued an advisory emphasizing the importance of health care professionals having naloxone (an opioid antagonist) on hand and being trained in how to use it. The U.S. Surgeon General's advisory is available at: https://www.hhs.gov/surgeongeneral/priorities/opioids-and-addiction/naloxone-advisory/index.html. Also see the FDA's approval of Narcan to reverse opioid overdose: https://www.fda.gov/drugs/postmarket-drug-safety-information-patients-and-providers/narcan-naloxone-nasal-spray-approved-reverse-opioid-overdose, and articles regarding overdose preparedness for ambulatory clinics, available at: https://www.aafp.org/fpm/2021/0100/p17.html and https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5753997/.

[13] See the American Heart Association's article on Aspirin and Heart Disease, available at: https://www.heart.org/en/health-topics/heart-attack/treatment-of-a-heart-attack/aspirin-and-heart-disease.

[14] Pediatric offices only serving patients under 18 years old are not required to keep Nitroglycerin in their emergency kit. According to the FDA, "The safety and effectiveness of nitroglycerin in pediatric patients (under 18 years old) have not been established." Also see page 8 of an article on Nitrostat, available at: https://www.accessdata.fda.gov/drugsatfda_docs/label/2014/021134s007lbl.pdf.

[15] If the emergency kit or "crash cart" has only non-safety needles/syringes, score that deficiency in Section VI., Infection Control, criteria B.2. See Infection Control Standards.

Criteria	I. Access/Safety Standards
	I.D.7) Document checking of emergency equipment/supplies for expiration and operating status at least monthly. Documented evidence that emergency medication and equipment is checked at least monthly may include a log, checklist or other appropriate method(s). **I.D.8) Replace/re-stock emergency medication, equipment, and supplies immediately after use.** A receipt or documentation showing medication is ordered is acceptable for any medication shortage. **<u>Note</u>:** An "emergency medical condition" is a medical condition that manifests itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in: 1) placing the health of the individual (or unborn child of a pregnant woman) in serious jeopardy 2) serious impairment to bodily functions 3) serious dysfunction of any bodily organ or part "Emergency services" means those services required for alleviation of severe pain, or immediate diagnosis and treatment of unforeseen medical conditions, which, if not immediately diagnosed and treated, would lead to disability or death.
E. Medical and lab equipment used for patient care is properly maintained. **RN/NP/CNM/LM/MD/PA**	**I.E.1) Medical equipment is clean.** **<u>Medical and Laboratory Equipment</u>:** All equipment used to measure or assess patient health status/condition is clean. **I.E.2) Written documentation demonstrates the appropriate maintenance of all medical equipment according to equipment manufacturer's guidelines.** **<u>Documentation</u>:** • There is documented evidence that standard operating procedures have been followed for routine inspection/maintenance, calibration, repair of failure or malfunction, and testing and cleaning of all specialized equipment. • Appropriate written records include calibration or other written logs, work orders, service receipts, dated inspection sticker, etc.

Criteria	I. Access/Safety Standards
	• All equipment used to measure or assess patient health status/condition is functioning properly. All specialized equipment (e.g., ultrasonography equipment, electrocardiogram (EKG) machine, defibrillator, audiometer, hemoglobin meter, glucometer, scales, etc.) are adequately maintained according to the specified manufacturer's guidelines for the equipment or is serviced annually by a qualified technician. • Blood pressure cuffs, monitors, and other related equipment need not be calibrated unless required by the manufacturer. Manufacturer guidelines must be available on site, indicating that it is not necessary to calibrate the equipment. **Note:** The term monitor includes, but not limited to, glucometers, EKG, BP monitors, hemocues, and audiometers.

Criteria	II. Personnel Standards		
A.1. Professional health care personnel have current California licenses and certifications.	**Medical Professional**	**License/Certification**	**Issuing Agency**
	Certified Nurse Midwife (CNM)	RN License & Nurse-Midwife Certificate. Drug Enforcement Agency (DEA) Registration, *if appropriate*	CA Board of Registered Nursing DEA
	Certified Radiological Technologist (CRT)	CRT Certificate.	California Department of Public Health (CDPH), Radiologic Health Branch
	Doctor of Osteopathy (DO)	Physician's & Surgeon's Certificate DEA Registration	Osteopathic Medical Board of CA DEA
	Licensed Midwife (LM)	Licensed Midwife Certificate. Drug Enforcement Agency (DEA) Registration, *if appropriate*	Medical Board of CA DEA
	Licensed Vocational Nurse (LVN):	LVN License	CA Board of Vocational Nursing and Psychiatric Technicians
	Nurse Practitioner (NP)	RN License w/NP Certification & Furnishing Number DEA Registration, *if appropriate*	CA Board of Registered Nursing DEA
	Pharmacist (Pharm. D)	Pharmacist License	CA State Board of Pharmacy
	Physician/Surgeon (MD)	Physician's & Surgeon's Certificate DEA Registration	Medical Board of CA DEA
	Physicians' Assistant/ Associate (PA)	PA License DEA Registration, *if appropriate*	Physician Assistant Examining Committee/Medical Board of CA DEA
	Radiological Technician	Limited Permit	CDPH, Radiologic Health Branch

Criteria	II. Personnel Standards		
	Registered Dietitian (RD)	RD Registration Card	Commission on Dietetic Registration
	Registered Nurse (RN)	RN License	CA Board of Registered Nursing
	II.A.1) All required Professional Licenses and Certifications, issued from the appropriate licensing/certification agency, are current. **<u>Note</u>:** All medical professional licenses and certifications must be current and issued from the appropriate agency for practice in California, and available on site. Although sites with centralized personnel departments are not required to keep documents or copies on site, copies and/or lists of currently certified or credentialed personnel must be readily available when requested by reviewers.		
A.2. All required professional licenses and certifications, issued from the appropriate licensing/certification agency, are current.	**<u>Note</u>:** Effective June 27, 2010, MDs (does not apply to Osteopaths) shall provide notification to each patient that states the MD(s) on site is licensed and regulated by the Board, and includes the following:[16] NOTICE Medical doctors are licensed and regulated by the Medical Board of California (800) 633-2322 www.mbc.ca.gov.	**<u>Note</u>:** Effective August 11, 2011, PAs shall provide notification to each patient that states the PA(s) is licensed and regulated by the Physician Assistant Board , and includes the following:[17] NOTIFICATION TO CONSUMERS Physician Assistants are licensed and regulated by the Physician Assistant Board (916) 561-8780 www.pab.ca.gov	
	II.A.2) Notification is provided to each member that the MD(s) is licensed and regulated by the Medical Board, and that the Physician Assistant(s) is licensed and regulated by the Physician Assistant Board. The notice to consumers above shall be provided by one of the following methods:		

[16] 16 CCR 1355.4, as mandated by Business and Professions Code (BPC) section 138.
[17] 16 CCR 1399.547, as mandated by BPC section 138.

Criteria	II. Personnel Standards
	○ Prominently posted sign in an area visible to patients in at least 48-pt Arial font. ○ A written statement signed and dated by the patient (or patient's representative) and kept in the medical record, stating the patient understands that the MD is licensed and licensed and regulated by the board (for PA's, that the PA is licensed and regulated by the PA Board). ○ A statement on letterhead, discharge instructions or other document given to the patient (or patient's representative), where the notification is placed immediately above the signature line for the patient in at least 14-pt font.
B. Health care personnel are properly identified.	**II.B.1) Health care personnel wear identification badges/tags printed with name and title.** • Health care personnel shall disclose, while working, their name and title on a name tag at least 18-point type. • It is acceptable for health care personnel in a practice or an office, whose license is prominently displayed, to opt not to wear a nametag. **Note:** • In the interest of public safety and consumer awareness, it shall be unlawful for any person to use the title "nurse" in reference themselves, in any capacity, except for an individual who is a registered nurse, or a licensed vocational nurse. • "Health care practitioner" means any person who engages in acts that are the subject of licensure or regulation under Business and Professions Code (Sections 680-681). If a health care practitioner or licensed clinical social worker is working in a psychiatric setting or in a setting that is not licensed by the state, the employing entity or agency shall have the discretion to make an exception from the nametag requirement for the individual safety or therapeutic concerns.
C. Site personnel are qualified and trained for assigned responsibilities. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**Unlicensed Personnel:** Medical assistants (MAs) are unlicensed health personnel, at least 18 years of age, who perform basic administrative, clerical, and non-invasive routine technical supportive services under the supervision of a licensed physician, surgeon, or podiatrist in a medical office or clinic setting. • "Supervision" means the licensed physician must be physically present in the treatment facility during the performance of authorized procedures by the MA.

Criteria	II. Personnel Standards
	• Per Business and Professions Code Section 2069 (a) (1), a supervising physician and surgeon at a "community clinic" licensed under Health and Safety Code section 1204(a) may, at their discretion, in consultation with the nurse practitioner, nurse midwife, or physician assistant provide written instructions to be followed by a medical assistant in the performance of tasks or supportive services. • The written instructions may provide that the supervisory function for the medical assistant in performing these tasks or supportive services may be delegated to the nurse practitioner, nurse midwife, or physician assistant and that those tasks may be performed when the supervising physician and surgeon is not on site. **II.C.1) Documentation of education/training for non-licensed medical personnel is maintained on site.** • Training may be administered under a licensed physician; or under an RN, LVN, PA, or other qualified medical assistant acting under the direction of a licensed physician. The supervising physician is responsible for determining the training content and ascertaining proficiency of the MA. Training documentation maintained on site for the MA must include the following: • Diploma or certification from an accredited training program/school, or • Letter/statement from the current supervising physician that certifies in writing: date, location, content, and duration of training, demonstrated proficiency to perform current assigned scope of work, and signature. • For facilities that have pediatric patients (under 21 years old) obtain evidence of completed training (valid for 4 years) in: o Audiometric screening o Vision screening o Anthropometric measurements, including obtaining Body Mass Index (BMI) percentile o Dental screening and fluoride varnish application **<u>II.C.2) (CE) Only qualified/trained personnel retrieve, prepare or administer medications.</u>** Medication administration by an MA means the direct application of pre-measured medication orally, sublingually, topically, vaginally or rectally; or by providing a single dose to a patient for immediate self-administration by inhalation or by simple injection. • **All medications including vaccines must be verified with (shown to) a licensed person prior to administration.**

Criteria	II. Personnel Standards
	• Unlicensed staff (e.g. MAs) have evidence of appropriate training and supervision in all medication administration methods performed within their scope of work. • To administer medications by subcutaneous or intramuscular injection, or to perform intradermal skin tests or venipunctures for withdrawing blood, an MA must have completed at least the minimum number of training-hours established in CCR, Title 16, Section 1366.1. **<u>Note</u>:** • **MAs cannot administer anesthetics, including local anesthetic agents (such as Rocephin hydrated with Xylocaine).** [18] • MAs may not place an intravenous needle, start or disconnect the intravenous infusion tube, administer medications or injections into an intravenous line, or administer anesthesia. • The supervising physician must specifically authorize all medications administered by an MA. "Authorization" means a specific written or standing order prepared by the supervising physician. **II.C.3) Site has a procedure in place for confirming correct patient, correct medication/vaccine, correct dosage, and correct route prior to administration.** • To help reduce the risk of medication errors, staff shall follow procedures for confirming the correct patient, correct medication/vaccine, correct dosage, and correct route prior to administration. **II.C.4) Only qualified/trained personnel operate medical equipment.** **<u>Medical Equipment</u>:** • Provider and/or staff can demonstrate appropriate operation of medical equipment used in their scope of work. Not all staff is required to be proficient in use of all equipment but at any given time, a staff must be prepared to operate equipment that is not routinely needed by every patient such as patient lifts and accessible scales. Health care personnel at the site must demonstrate that they can turn on the oxygen tank and tell when an oxygen tank needs to be replaced and/or refilled.

[18] 16 CCR 1366.3(a) (1), also see information from the Medical Board of California on Medical Assistants, available at: https://www.mbc.ca.gov/Licensing/Physicians-and-Surgeons/Practice-Information/Medical-Assistants.aspx.
https://www.mbc.ca.gov/FAQs/?cat=Licensees&topic=Medical%20Assistants

<table>
<tr><th>Criteria</th><th>II. Personnel Standards</th></tr>
<tr><td></td><td>

For facilities that see pediatric patients (under 21 years old), the facility staff responsible for conducting hands on preventive screening, specifically: audiometric screening, vision screening, anthropometric measurements, including obtaining Body Mass Index (BMI) percentile, dental screening and fluoride varnish application, must demonstrate competency and appropriate application of these screenings/services.

Reviewers may interview site personnel regarding the appropriate use of equipment and/or request demonstrated use of equipment, as appropriate.
Reviewers may utilize Competency Guidelines for

Audiometric screening
Vision screening
Anthropometric measurements, including obtaining Body Mass Index (BMI) percentile
Dental screening and fluoride varnish application

<u>Note</u>:

Personnel on site must be qualified for their responsibilities and adequately trained for their scope of work.
Site staff should have a general understanding of the systems/processes in place, appropriate supervision, and knowledge of the available sources of information on site.
Family members and personal care assistants, whether paid or unpaid, are not “unlicensed personnel” or otherwise captured within the scope of this tool.

</td></tr>
<tr><td>D. Scope of practice for non-physician medical practitioners (NPMP) is clearly defined.
RN/NP/CNM/LM/MD/PA</td><td>
II.D.1) Standardized Procedures provided for NPs and/or CNMs.

The scope of practice for NPs and CNMs is clearly defined including the delegation of the supervision of MAs when supervising physician is off premises.
Documents may be utilized to determine and/or clarify practice procedures and supervisory processes on site.
Reviewers are expected to verify that NP and/or CNM standardized procedures, and PA Practice Agreement and Supervision Physician’s Responsibility documentation are present on site.
Reviewers are not expected to make in-depth evaluation of “appropriateness” of the NPMP’s scope of practice.

</td></tr>
</table>

Criteria	II. Personnel Standards
	<u>NPs</u>: • NPs are prepared through education and experience to provide primary care and to perform advanced procedures. • The extent of required supervision must be specified in the Standardized Procedures. • Standardized procedures legally define the expanded scope of nursing practice that overlaps the practice of medicine. • Standardized Procedures should identify the furnishing of drugs or devices, extent of physician or surgeon supervision, method of periodic review of competence, including peer review, and review of provisions in the Standardized Procedures. **<u>CNM</u>:** • The certificate to practice nurse-midwifery authorizes the holder, under supervision of a licensed physician or surgeon, to attend cases of normal childbirth and to provide prenatal, intrapartum, and postpartum care, including family planning care for the mother, and immediate care for the newborn. • The supervising and back-up physician or surgeon for the CNM must be credentialed to perform obstetrical care in the same delivering facility in which the CNM has delivery privileges. **<u>Note</u>:** CNMs and NPs operate under written Standardized Procedures that are collaboratively developed and approved by the supervising physician, the NP and administration within the organized health care facility/system in which standardized procedures will be used. **II.D.2) A Practice Agreement defines the scope of services provided by PAs and Supervisory Guidelines define the method of supervision by the Supervising Physician.** **<u>PA</u>:** • Practice Agreement: a) Defines specific procedures identified in practice protocols or specifically authorized by the supervising physician, and must be dated and signed by physician and PA. b) The delegation of the supervision of MAs when supervising physician is off premises. c) An original or copy must be readily accessible at all practice sites in which the PA works.

Criteria	II. Personnel Standards
	d) Failure to maintain a Practice Agreement is a violation of the PA Regulations and is grounds for disciplinary action by the Medical Board of California against a physician assistant's licensure. • Supervising Physician's Responsibility for Supervision of PAs' Practice Agreement: Defines supervision responsibilities and methods required by Title 16, section 1399.545 of the Physician Assistant Regulations, and is signed by the physician. The following procedures must be identified: o Emergency transport of patients and back-up procedures (e.g., can call 911, name of hospital to transport patient included in Practice Agreement) for when the supervising physician is not on the premises. **Note:** • A Delegation of Services Agreement (DSA) in effect prior to January 1, 2020, shall be updated to meet the current requirements.[19] • DSAs that still reflect components that are no longer required by BPC section 3502.3 should be enforced since the DSA is the currently established agreement between the PA and the supervising physician. • The reviewer should assess the site's process for compliance with the DSA. • Any deficiency shall result in a CAP requesting the site to adhere to the DSA components or establish a new Practice Agreement. **II.D.3) Standardized Procedures, Practice Agreements, and Supervisory Guidelines are revised, updated, and signed by the supervising physician and NPMP when changes in scope of services occur.** • Standardized Procedures, Practice Agreements shall undergo periodic review, with signed, dated revisions completed at each change in scope of work by supervising physician. • Frequency of the review to identify changes in scope of service shall be specified in writing. **II.D.4) Each NPMP that prescribes controlled substances has a valid DEA Registration Number.** **DEA:**

[19] BPC 3502.3

Criteria	II. Personnel Standards
	Each NP, CNM, and PA that prescribes controlled substances is required to have a valid DEA Registration Number.

E. Non-physician medical practitioners (NPMP) are supervised according to established standards.
RN/NP/CNM/LM/MD/PA
	The designated supervising physician(s) on site:
	
	II.E.1) Ratio to number of NPMPs does not exceed established ratios in any combination.
	<u>NPMPs</u>:
	• The supervising physician holds ultimate responsibility for the practice of each supervised NPMP.
	• The maximum number of NPMPs who may be supervised by a single primary care physician (PCP) is limited to the following at any given time/shift in any of their locations:[20]
	  o 4 NPs with furnishing license (there is no limit to the number of NPs the physician may supervise if the NP does not hold a furnishing license);
	  o 4 CNMs; and
	  o 4 PAs.
	
	This ratio is based on each physician, not the number of offices. A PCP, an organized outpatient clinic, or a hospital outpatient department cannot utilize more NPMPs than can be supervised within these stated limits.
	
	Physician Assistant Board (PAB) is at https://www.pab.ca.gov/ or the PAB office at 916-561-8780.
	
	II.E.2) The designated supervising or back-up physician is available in person or by electronic communication at all times when a NPMP is caring for patients.
	<u>Supervising Physician</u>:
	• "Supervision" means that a licensed physician and surgeon oversee the activities of, and accept responsibility for, the medical services rendered by a PA.
	• Supervising or back-up physician is available in person or by electronic communication at all times when a NPMP is caring for patients.

[20] BPC 3516(b), Welfare and Institutions Code (WIC) section 14132.966

Criteria	II. Personnel Standards
	II.E.3) Evidence of NPMP supervision. **<u>Evidence of NPMP Supervision:</u>** • Standardized Procedures for NP or CNM should identify the furnishing of drugs or devices, extent of physician or surgeon supervision, method of periodic review of competence, including peer review, and review of provisions in the Standardized Procedures.[21] • Standardized Procedures shall undergo periodic review, with signed, dated revisions completed at each change in scope of work. • Evidence of supervision of NPMP(s) are verifiable through on-site observation of supervisory processes, documentation, or supervisor/NPMP's knowledge of the process.
F. Site personnel receive safety training. **RN/NP/CNM/LM/MD/PA**	**II.F. There is evidence that site staff has received training on the following:** **1) Infection Control/Universal Precautions (annually)** **2) Bloodborne Pathogens Exposure Prevention (annually)** **3) Biohazardous Waste Handling (annually)** Training occurs ***prior to*** initial exposure to potentially infectious and/or biohazardous materials. Review and re-training sessions occur ***<u>at least annually</u>***. Training content is appropriate (language, educational level, etc.) to personnel on site. Training *minimally* includes the following: ○ Universal/standard precautions ○ Use of personal protective equipment ○ Accessible copy of Bloodborne Pathogens Standard ○ Work practice controls/exposure prevention ○ Modes of transmitting bloodborne pathogens ○ Epidemiology/symptoms of HBV and HIV ○ Recognition of activities with exposure element ○ Handling and labeling of biohazardous waste(s) ○ Hepatitis B vaccination protocol and requirements ○ Explanation of emergency procedures ○ Post exposure reporting/evaluation/follow-up procedures ○ Decontamination of equipment/work areas ○ Site's written bloodborne pathogen exposure plan ○ Opportunity for discussion/questions

[21] BPC 2834

Criteria	II. Personnel Standards
	Personnel must know ***where to locate*** information/resources on site about infection control, the Bloodborne Pathogens Exposure Plan, and ***how to use*** the information. Evidence of training must be verifiable. Evidence of training may include: o Informal in-services o New staff orientation o External training courses o Educational curriculum o Participation lists, etc. Training documentation must contain: 1) Employee's name 2) Job titles 3) Training date(s) 4) Type of training 5) Contents of training session 6) Names/qualifications of trainers Records must be kept for three (3) years. **Note:** Site personnel treat all blood and other potentially infectious materials (OPIM) as if these *are* infectious. Site personnel who are reasonably anticipated to have eye, skin, mucous membranes and potential exposure to blood and/or OPIM receive training as required by the Bloodborne Pathogens Standard.[22]
G. Site personnel receive training on member rights. **RN/NP/CNM/LM/MD/PA**	**II.G. There is evidence that site staff has received information and/or training on the following:** **II.G.1) Patient Confidentiality** • Site personnel have received information and/or training about patient confidentiality and must be prepared to provide information on how patient confidentiality is protected at the site.

[22] 8 CCR 5193

Criteria	II. Personnel Standards
	• Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written patient confidentiality information on site and explain how to use information. **II.G.2) Informed Consent, including Human Sterilization** • Site personnel have received information and/or training on informed consent, including human sterilization. • Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written informed consent, including human sterilization information on site and explain how to use information. **II.G.3) Prior Authorization Requests** • Site personnel have received information and/or training on prior authorization requests. • Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written prior authorization requests information on site and explain how to use information. **II.G.4) II.F.4) Grievance/Complaint Procedure** • Site personnel have received information and/or training on grievance/complaint procedure. Staff must be prepared to provide information to patient when requested. • Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written grievance/complaint procedures information on site and explain how to use information. **II.G.5) Child/Elder/Domestic Violence Abuse**

Criteria	II. Personnel Standards
	Abuse Reporting: Site personnel have specific knowledge of local reporting requirements, agencies, and procedures, and know *where to locat*e information on site and *how to use* information. **Note:** • Health practitioners (e.g., physicians, surgeons, licensed nurses, licensed social workers, paramedics) in a health facility, (e.g., clinic, physician's office, public health clinic) are legally mandated reporters of known or reasonably suspected cases of child abuse, elder abuse and domestic violence. • Legally mandated reporters must make telephone and written reports according to timeliness standards established by the designated local law enforcement agencies in each county. "Reasonably suspected" means having objectively reasonable suspicion based upon facts that could cause a reasonable person in a like position, drawing when appropriate on his or her training and experience, to suspect abuse (CA Penal Code 11164). • Failure to report by legally mandated reporters can result in criminal or civil prosecutions, punishable by monetary fines and/or county jail confinement. Any person entering employment, which makes him/her a mandated reporter, must sign a statement, provided and retained by the employer, that the employee has knowledge of the Child Abuse reporting law and will comply with its provision.[23] **II.G.6) Sensitive Services/Minors' Rights** • Site personnel have received information and/or training on sensitive services/minors' rights. Sensitive Services include family planning, pregnancy, sexually transmitted infections, etc. • PCP sites must have basic information on sensitive services that are appropriate to their practice office and be prepared to provide information to patients when needed. • Minor's Rights: California Family Code provides that a minor may, without parental consent, receive a number of sensitive services including outpatient mental health treatment and counseling for children 12 years and older. **II.G.7) Health Plan Referral Process/Procedures/Resources**

[23] Penal Code section 11166.5

Criteria	II. Personnel Standards
	• Site personnel have received information and/or training on health plan referral process/procedures/resources. • Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written health plan referral process/procedures/resources information on site and explain how to use information. **II.G.8) Cultural and Linguistic Training** • Site personnel have received information and/or training on cultural and linguistic appropriate services. • Evidence is verifiable for any occurrences of staff training which may include informal in-services, new staff orientation, external training courses, educational curriculum and participant lists, etc. • If there is no verifiable evidence of staff training, staff is able to locate written cultural and linguistic information on site and explain how to use information. Cultural and Linguistic Training- Culturally and Linguistically Appropriate Services (CLAS) mandates are Federal requirements for all recipients of Federal funds.[24] **II.G.9) Disability Rights and Provider Obligations** • Site personnel have received information and/or training on patient rights and provider obligations under the Americans with Disabilities Act (ADA), Section 504 of the Rehabilitation Act of 1973, and/or Section 1557 of the Affordable Care Act • Training content should include information about physical access, reasonable accommodations, policy modifications, and effective communication in healthcare settings. **https://www.hhs.gov/sites/default/files/ocr/civilrights/resources/factsheets/504.pdf** **https://www.hhs.gov/sites/default/files/section-1557-final-rule-faqs.pdf** **https://www.hhs.gov/sites/default/files/1557-fs-lep-508.pdf**

[24] See the National Standards on CLAS, available at: https://www.health.pa.gov/topics/Documents/Health%20Equity/CLAS%20Standards%20FactSheet.pdf.

Criteria	III. Office Management Standards
A. Physician coverage is available 24 hours a day, 7 days a week.	**III.A.1) Clinic office hours are posted or readily available upon request.** Current clinic office hours are posted within the office or readily available upon request. **III.A.2) Provider office hour schedules are available to staff.** **III.A.3) Arrangement/schedule for after-hours, on-call, supervisory back-up physician coverage is available to site staff and members after-hours.** Current site-specific resource information is available to site personnel and members about physician office hour schedule(s), local and/or Plan-specific systems for after-hours urgent care, emergent physician coverage available 24 hours a day, 7 days per week, and system for providing follow-up care. **III.A.4) Contact information for off-site physician(s) is available at all times during office hours.** When a physician is not on site during regular office hours, personnel are able to contact the physician (or covering physician) at all times by telephone, cell phone, pager, etc. **III.A.5) Routine, urgent and after-hours emergency care instructions/telephone information is made available to patients.** **Note:** One objective of effective clinic office management is to support the provision of appropriate, coordinated health care services. The review of clinic office management is to evaluate if effective systems are in place and whether site personnel appropriately follow established site-specific procedures.
B. There are sufficient health care personnel to provide timely, appropriate health Care services. **RN/NP/CNM/LM/MD/PA**	**III.B.1) Appropriate personnel handle emergent, urgent, and medical advice telephone calls.** • In addition to the physician, only appropriately licensed medical personnel such as a CNM, LM, NP, RN, or PA handles emergency, urgent, and medical advice/triage telephone calls.

Criteria	III. Office Management Standards
	• The California Board of Vocational Nursing and Psychiatric Technician Examiners has determined that the Licensed Vocational Nurse Practice Act does not permit the LVN to perform triage independently.[25] • The LVN may perform that part of the triage process that includes observation and data collection relative to basic physical assessment. • The LVN may not perform that part of the triage process that includes independent evaluation, interpretation of data, and determination of treatment priorities and levels of care. • Unlicensed personnel, such as medical assistants, may provide patient information or instructions only as authorized by the physician.[26] **Note:** Telephone triage is the system for managing telephone calls during ***and*** after office hours. **III.B.2) Telephone answering machine, voice mail system, or answering service is used whenever office staff does not directly answer phone calls.** • Telephone answering machine, voice mail system, or answering service is used whenever office staff does not directly answer phone calls. **III.B.3) Telephone system, answering service, recorded telephone information, and recording device are periodically checked and updated.** • Telephone system, answering service, recorded telephone information, and recording device are periodically checked and updated.
C. Health care services are readily available. **RN/NP/CNM/LM/MD/PA**	**III.C.1) Appointments are scheduled according to patients stated clinical needs within the timeliness standards established for Plan members.** **Note:** Medi-Cal Managed Care Health Plans *require* the following timeliness standards for access to appointments: o Urgent Care: 48 hours o Access to the first Prenatal Visit: 10 business days o Non-urgent (Routine) Care: 10 business days

[26] 16 CCR 1366(b)

Criteria	III. Office Management Standards
	III.C.2) Patients are notified of scheduled routine and/or preventive screening appointments. • The process established on site provides timely access to appointments for routine care, urgent care, prenatal care, pediatric periodic health assessments/immunizations, adult initial health assessments, specialty care, and emergency care. • Systems, practices, and procedures used for making services readily available to patients will vary from site to site. **III.C.3) There is a process in place verifying follow-up on missed and canceled appointments.** • An organized system must be evident (in use) for scheduling appointments appropriately, notifying, and reminding members of scheduled appointments, and following up on missed or canceled appointments. • Missed and/or canceled appointments and contact attempts must be documented in the patient's medical record.
D. There is 24-hour access to interpreter services for non- or limited-English proficient (LEP) members.	**III.D.1) Interpreter services are made available in identified threshold languages specified for location of site.** • Sites must provide 24-hour interpreter services for all members either through telephone language services or interpreters on site. **III.D.2) Persons providing language interpreter services, including sign language on site, are trained in medical interpretation.** • Site personnel used as interpreters have been assessed for their medical interpretation performance skills/capabilities. • Reviewer should ask for a written policy which includes the languages spoken by bilingual providers and staff. **Note**: https://www.lep.gov; 22 CCR 51309.5 • If bilingual staff are asked to interpret or translate, they should be qualified to do so. Assessment of ability, training on interpreter ethics and standards, and clear policies that delineate appropriate use of bilingual staff, staff or contract interpreters and translators, will help ensure quality and effective use of resources.

Criteria	III. Office Management Standards
	• Those utilizing the services of interpreters and translators should request information about certification, assessments taken, qualifications, experience, and training. Quality of interpretation should be a focus of concern for all recipients. • Family or friends should not be used as interpreters, unless specifically requested by the member's circumstances. Minors, under 18 years old, accompanying members shall not be used as interpreters. • The Affordable Care Act of 2010, Section 1557: prohibits from using low-quality video remote interpreting services or relying on unqualified staff, translators when providing language assistance services. • A request for or refusal of language/interpreter services must be documented in the member's medical record. Sign language interpreter services may be utilized for medically necessary health care services and related services such as: o Obtaining medical history and health assessments o Obtaining informed consents and permission for treatments o Medical procedures o Providing instructions regarding medications o Explaining diagnoses o Treatment and prognoses of an illness o Providing mental health assessment o Therapy or counseling
E. Procedures for timely referral/ consultative services are established on site. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**Office practice procedures allow timely provision and tracking of:** **III.E.1) Processing internal and external referrals, consultant reports, and diagnostic test results.** • An organized, timely referral system is evident for making and tracking referrals, reviewing reports, providing/scheduling follow-up care and filing reports in medical records. • Referral informational resources are readily available for use by site personnel. • Site staff can demonstrate (e.g., "walk through") the office referral process from beginning to end Systems, practices, and procedures used for handling referrals will vary from site-to-site.

Criteria	III. Office Management Standards
	<u>III.E.2 (CE) Physician Review and follow-up of referral/consultation reports and diagnostic test results.</u> • There is a documented process of the practitioner review of diagnostic tests/consultations and subsequent outreach to follow-up with the patient to communicate results and provide next steps. • Practitioner review is evidenced by date and signature/initials on the report of the reviewing practitioner.
F. Member grievance/ complaint processes are established on site.	**III.F.1) Phone number(s) for filing grievances/complaints are located on site.** • At least one telephone number for filing grievances is posted on site or is readily available upon request. **III.F.2) Complaint forms and a copy of the grievance procedure are available on site.** • Complaint forms and a copy of the grievance procedure are readily available on site and can be provided to members promptly upon request. • Includes The Department of Managed Health Care Help Center 1-888-466-2219 and Ombudsman 1-888-452-8609. **<u>Note</u>:** A “grievance” is defined as any written or oral expression of dissatisfaction and shall include any complaint, dispute, and request for reconsideration or appeal made by an enrollee or their representative to a Plan or entity with delegated authority to resolve grievances on behalf of the Plan.
G. Medical records are available for the practitioner at each scheduled patient encounter.	**III.G.1) Medical records are readily retrievable for scheduled patient encounters.** • The process/system established on site provides for the availability of medical records (paper and electronic), including outpatient, inpatient, referral services, and significant telephone consultations for patient encounters.

Criteria	III. Office Management Standards
	III.G.2) Medical documents are filed in a timely manner to ensure availability for patient encounters. • Medical records are filed in a timely manner that allows for ease of accessibility within the facility or in an appropriate health record storage facility if stored off-premises.[27]
H. Confidentiality of personal medical information is protected according to State and federal guidelines. **RN/NP/CNM/LM/MD/PA**	**III.H.1) Exam rooms and dressing areas safeguard patients' right to privacy.** **Privacy:** • Patients have the right to privacy for dressing/undressing, physical examination, and medical consultation. • Practices are in place to safeguard patient privacy. • Because dressing areas and examination room configurations vary greatly, reviewers will make site-specific determinations. **III.H.2) Procedures are followed to maintain the confidentiality of personal patient information.** **Confidentiality:** • Personnel follows site policy/procedures for maintaining confidentiality of individual patient information. • Individual patient conditions or information is not discussed in front of other patients or visitors, displayed or left unattended in reception and/or patient flow areas (this includes unattended electronic devices, patient registration sign-in sheets with more than one unique patient identifier). • There must be a confidentiality agreement between the provider and the cleaning service agency/persons if the medical records are kept in an open space and/or are unsecured. **Electronic Records:** • Electronic record-keeping system procedures have been established to ensure patient confidentiality, prevent unauthorized access, authenticate electronic signatures, and maintain upkeep of computer systems.

[27] 22 CCR 75055

Criteria	III. Office Management Standards
	• Security protection includes an off-site backup storage system, an image mechanism with the ability to copy documents, a mechanism to ensure that recorded input is unalterable, and file recovery procedures. • Confidentiality protection may also include use of encryption, detailed user access controls, transaction logs, and blinded files. **III.H. 3) Medical record release procedures are compliant with State and federal guidelines.** **<u>Record Release</u>:** • Medical records are not released without written, signed consent from the patient or patient's representative, identifying the specific medical information to be released. • The release terms, such as to whom records are released and for what purposes, and the expiration date of the consent to medical record release should also be described. • This does not prevent release of statistical or summary data, or exchange of individual identifiable medical information between individuals or institutions providing care, fiscal intermediaries, research entities and State or local official agencies.[28] **III.H.4) Storage and transmittal of medical records preserves confidentiality and security.** **<u>Storage and transmittal:</u>** • Health care services rendered under the Medi-Cal program or any other health care program administered by the department or its agents or contractors, shall confidentially and securely keep and maintain records of each service rendered under the Medi-Cal program or any other health care program administered by the department or its agents or contractors, the beneficiary or person to whom rendered, the date the service was rendered, and any additional information as the department may by regulation require. • FAX cover sheet shall have confidentiality statement. **III.H.5) Medical records are retained for a minimum of 10 years.** **<u>Record Retention:</u>** • Records required to be kept and maintained under this section (including minors under 18 years old) shall be retained by the provider for a period of 10 years from the final date of the contract

[28] 45 CFR 164.524

Criteria	III. Office Management Standards
	period between the plan and the provider, from the date of completion of any audit, or from the date the service was rendered, whichever is later, in accordance with 42 CFR 438.3(u).[29]

[29] WIC 14124.1

Criteria	IV. Clinical Services - Pharmaceutical Standards
A. Drugs and medication supplies are maintained secured to prevent unauthorized access.	**<u>Deficiencies</u>:** All deficiencies related to Pharmaceutical Services (e.g. medication maintenance, storage, safety, distribution, disposition, etc.) must be addressed in a corrective action plan. **IV.A.1) Drugs are stored in specifically designated cupboards, cabinets, closets or drawers.** **<u>Security</u>**: • All drugs for dispensing are stored in an area that is secured at all times.[30] The Medical Board defines "area that is secure" to mean a locked storage area within a physician's office. • Keys to locked storage area are available only to staff authorized by the physician to have access.[31] • The Medical Board of California interprets "all drugs" to also include both sample and over-the-counter drugs.[32] **IV.A.2) Drugs, drug samples, and over-the-counter drugs, hypodermic needles/syringes, all medical sharp instruments, hazardous substances and prescription pads are securely stored in a lockable space (cabinet or room) within the office/clinic.** • All drugs (including sample and over the counter), medication supplies, hazardous substances and prescription pads are securely stored in a lockable space (room, closet, cabinet, drawer) within the office/clinic.[33] (CA B&P Code, 4051.3) • A secure area means that drugs and biologicals are stored in a manner to prevent unmonitored access by unauthorized individuals. Drugs and biologicals must not be stored in areas that are readily accessible to unauthorized persons. (42 CFR 482.13-CMS Manual System; 42 CFR Part 482.25) • Keys to the locked storage area are available only to staff authorized by the physician to have access.[34] (16 CCR, Chapter 2, Division 3, Section 1356.32) • During business hours, the lockable space may remain unlocked ONLY if there is no access to

[30] BPC 4172

[34] 16 CCR 1356.32

Criteria	IV. Clinical Services - Pharmaceutical Standards
	this area by unauthorized persons and authorized clinic personnel remain in the immediate area at all times. At all other times, all drugs (including sample and over the counter), medication supplies, prescription pads and hazardous substances must be securely locked. **IV.A.3) Controlled drugs are stored in a locked space accessible only to authorized personnel.** **<u>Controlled substances</u>**: • Controlled substances are stored separately from other drugs in a securely locked, substantially constructed cabinet accessible only to authorized personnel.[35] **IV.A.4) A dose-by-dose controlled substance distribution log is maintained.** • Written records are maintained of controlled substances inventory list(s) that includes: 1) Provider's DEA number 2) Name of medication 3) Original quantity of drug 4) Dose 5) Date 6) Name of patient receiving drug 7) Name of authorized person dispensing drug and 8) Number of remaining doses • Control substances include all Schedule I, II, III, IV, and V substances listed in the CA Health and Safety Code, Sections 11053-11058, and do not need to be double locked. • Personnel with authorized access to controlled substances include physicians, dentists, podiatrists, PAs, licensed nurses, and pharmacists and specifically authorized employees.[36] **IV.A.5) Written site-specific policy/procedure for dispensing of sample drugs are available on site.** • A list of drugs available for use in the clinic shall be maintained. Site should have written site-specific policies and procedures (P&Ps) for use of sample medications including governing activities of pharmaceutical manufacturers' representatives American Society of hospital

[35] 21 CFR 1301.75
[36] 21 CFR 1301.72

Criteria	IV. Clinical Services - Pharmaceutical Standards
	pharmacist (ASHP) Guidelines: Minimum Standard for pharmaceutical services in ambulatory care).[37] • Each clinic, which provides drug distribution services, shall have written policy and procedures for the safe and effective distribution, control, storage, use and disposition of drugs. **<u>Note</u>:** During business hours, the drawer, cabinet or room containing drugs, medication supplies or hazardous substances may remain unlocked ***only*** if there is no access to area by unauthorized persons. Whenever drugs, medication supplies or hazardous substances are unlocked, authorized clinic personnel must ***always remain*** in the immediate area. At all other times, drugs, medication supplies, and hazardous substances must be securely locked. Controlled substances are ***always locked***.
B. Drugs are handled safely and stored appropriately. **RN/NP/CNM/LM/MD/PA**	**<u>Deficiencies</u>:** All deficiencies related to Pharmaceutical Services (e.g. medication maintenance, storage, safety, distribution, etc.) must be addressed in a corrective action plan (CAP). **IV.B.1) Drugs are prepared in a clean area or "designated clean" area if prepared in a multi-purpose room.** **<u>Drug Preparation</u>:** Drugs shall be drawn up in a designated clean medication preparation area that is not adjacent to potential sources of contamination, including sinks or other water sources. The drug preparation area should be cleaned and disinfected on a regular basis. CDC guidelines for drug preparation and safety: https://www.cdc.gov/injectionsafety/providers/provider_faqs_med-prep.html **IV.B.2) Drugs for external use are stored separately from drugs for internal use.** **<u>Storage</u>:** • Drugs shall be separated by route of administration, especially ophthalmic and otic preparations. • Vaccines and other drugs should be stored separately from food, lab specimens, human specimens, cleaning supplies, and other items that may potentially cause contamination.

[37] The ASHP Guidelines for Minimum Standard for Ambulatory Care Pharmacy Practice is available at: https://www.ashp.org/-/media/assets/pharmacy-practice/resource-centers/anticoagulation/guidelines-minimum-standard-ambulatory-care-pharmacy.ashx?la=en&hash=ABF816352CAF1AB846B7C339A45AA74D80F820A6.

Criteria	IV. Clinical Services - Pharmaceutical Standards

	• The Center for Disease Control (CDC) recommends avoiding storing other medications and biological products such as lab specimens/human specimens in a vaccine storage unit.
	
	IV.B.3) Items other than medications in refrigerator/freezer are kept in a secured, separate compartment from drugs.
	• Storing food, other medications, and biological products with vaccines put vaccines at risk for temperature fluctuation, excessive light exposure, administration errors, and contamination.
	    ○ If food, other medications and biological products must be stored in the same refrigerator with vaccines, they must be in the sealed containers and stored below vaccines on the different shelves.
	• Drugs are stored under appropriate conditions of temperature, humidity, and light so that the identity, strength, quality, and purity of the drug product are not affected.[38]
	• Room temperature where drugs are stored does not exceed 30ºC (86ºF).[39]
	• A drug or device is considered “adulterated” if it contains any filthy, putrid, or decomposed substance, or if it has been prepared, packed or held under unsanitary conditions.[40]
	• A drug is considered contaminated if it has been held under unsanitary conditions that may have been contaminated with filth or rendered injurious to health.
	• Drugs that are unused are considered by the Environmental Protection Agency (EPA) to be toxic wastes and must be disposed in accordance with 40 CFR, part 261.
	
	American College of Physician guidelines state sound management procedures include:
	    ○ Routinely checking for expiration dates.
	    ○ Keeping medicines off the floor.
	    ○ Labeling the sample medicines or writing prescribing information directly on the sample package.
	    ○ Keeping a log of sample medicines given. In case of a recall, keeping a log allows to track down a patient to whom the recalled drug had been prescribed.
	    ○ When a medication sample is given to a patient, the name and strength of the medication, instructions for use and the quantity or duration of therapy is always documented in the patient’s chart.

[38] 21 CFR 211.142
[39] 22 CCR 75037(d)
[40] Title 21, United States Code (USC), section 351. USC is searchable at: https://uscode.house.gov/search/criteria.shtml.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	ASHP guidelines for minimum standard for pharmaceutical services in ambulatory care: ○ Site should have written site-specific policies and procedures (P&Ps) for use of sample medications including governing activities of pharmaceutical manufacturers' representatives. ○ Each clinic, which provides drug distribution services, shall have written policy and procedures for the safe and effective distribution, control, storage, use and disposition of drugs.[41] **Immunobiologics:[42]** • Sites should have a written Vaccine Management Plan for routine and emergency vaccine management (required for Vaccines for Children (VFC) providers). • Vaccines are refrigerated immediately upon receipt on site and stored according to specific instructions on the package insert for each vaccine. • Diluent does not need refrigeration if vaccine is administered right after diluent is added. • Vaccines are not stored in the doors, floors, vegetable bins, or under or near cooling vents of a refrigerator or freezer. **IV.B.4) Refrigerator thermometer temperature is 36º-46º Fahrenheit or 2º-8º Centigrade (at time of site visit).** **Refrigerator:** Vaccines are kept in a refrigerator **maintained at 2-8ºC or 36-46ºF,** and include, but are not limited to, DTaP, Td, Tdap, Hepatitis A, Hepatitis B, IPV, Pneumococcal, Rotavirus, Hib, Influenza (inactivated and FluMist), MCV, HPV, recombinant Zoster, or any combinations of these listed vaccines.[43] **IV.B. 5) Freezer thermometer temperature is 5º Fahrenheit or –15º Centigrade, or lower (at time of site visit).**

[41] The ASHP Guidelines for Minimum Standard for Ambulatory Care Pharmacy Practice is available at: https://www.ashp.org/-/media/assets/pharmacy-practice/resource-centers/anticoagulation/guidelines-minimum-standard-ambulatory-care-pharmacy.ashx?la=en&hash=ABF816352CAF1AB846B7C339A45AA74D80F820A6.
[42] See the FDA's webpage on Vaccines, available at: https://www.fda.gov/vaccines-blood-biologics/vaccines/questions-about-vaccines.
[43] See the CDC Vaccine Recommendation and Guidelines of the Advisory Committee on Immunization Practices, available at: https://www.cdc.gov/vaccines/hcp/acip-recs/general-recs/storage.html, and the CDC Vaccine Storage and Handling Toolkit, available at: https://www.cdc.gov/vaccines/hcp/admin/storage/toolkit/storage-handling-toolkit.pdf.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	<u>Freezer:</u> Varicella and MMRV vaccines are stored in the **freezer at -15ºC or 5ºF, or lower,** and are always protected from light. ○ MMR may be stored in a refrigerator or freezer; VFC recommends MMR be stored in the freezer with MMRV. ○ Never freeze vaccine diluents. **IV.B. 6) Site utilizes drugs/vaccine storage units that are able to maintain required temperature.** CDC recommends for both temporary and long-term storage refrigerators and freezers using: ○ Purpose-built units designed to either refrigerate or freeze (can be compact, under-the counter style or large units). ○ Stand-alone household units. ○ Units dedicated to storage of biologics. Measures should be in place to ensure that vaccine storage units are not accidentally physically disconnected from the power supply, such as "Do Not Disconnect" labels and not plugging units into surge protectors with an on/off switch. **Do not store any vaccine in a dormitory-style or bar-style combined refrigerator/freezer unit under any circumstances.[44]** **IV.B. 7) Daily temperature readings of drugs/vaccines refrigerator and freezer are documented.** Refrigerator and freezer temperatures are documented at least once a day (required twice daily for VFC providers). CDC recommends use of a continuous temperature monitoring device (digital data loggers). ○ Digital data loggers (DDL) should have a minimum accuracy of +/- 1°F (0.5°C) ○ Equipped with buffered probe ○ Active temperature display outside of the unit ○ Capacity for continuous monitoring and recording where the data can be routinely downloaded ○ Calibrated at least every 2 years, to monitor vaccine storage unit temperatures

[44] See the CDC Vaccine & Immunization webpage, available at: https://www.cdc.gov/vaccines/.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	At least one back-up device should be readily available for emergency vaccine transport or when primary DDL is sent in for calibration. **IV.B. 8) Has a written plan for vaccine protection in case of power outage or malfunction of the refrigerator or freezer.** • A written plan for vaccine protection in case of power outage or malfunction of the refrigerator or freezer is required. www.cdc.gov https://www.cdc.gov/disasters/poweroutage/vaccinestorage.html • Site personnel must be able to verbalize the procedures in the plan used to promptly respond to OUT OF RANGE TEMPERATURES. • Quarantine vaccines until guidance is obtained. • Action is taken when temperatures are identified to be outside of the recommended range. • Contacting VFC (http://eziz.org/vfc/overview/) or manufacturer are acceptable procedures. • For VFC providers, follow program requirements for documentation and reporting. Consultation with CDC is available when necessary.[45] www.cdc.gov **IV.B. 9) Drugs and vaccines are stored separately from test reagents, germicides, disinfectants, and other household substances.** • As these items may potentially cause contamination to verify that drugs are stored separately from test reagents, germicides, disinfectants, and other household substances. **IV.B.10) Hazardous substances are appropriately labeled.** **IV.B.11) Site has method(s) in place for drug and hazardous substance disposal.** **Hazardous Substances Labeling and Disposal**: • Safety practices are followed in accordance with current/updated CAL-OSHA standards and 29 CFR 1910.1030.

[45] See the CDC General Best Practice Guidelines for Immunization: Best Practices Guidance of the ACIP, available at: https://www.cdc.gov/vaccines/hcp/acip-recs/general-recs/storage.html, the CDC Vaccine Storage and Handling Toolkit, available at: https://www.cdc.gov/vaccines/hcp/admin/storage/toolkit/storage-handling-toolkit.pdf, the FDA Questions about Vaccines, available at: https://www.fda.gov/vaccines-blood-biologics/vaccines/questions-about-vaccines, and the CDC webpage on Vaccines and Immunizations, available at: https://www.cdc.gov/vaccines/.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	• The manufacturer's label is not removed from a container (bag, bottle, box, can, cylinder, etc.) only if the hazardous material or residues of the material remain in the container. • Containers for biohazard waste shall comply with United States Department of Transportation requirements when prepared for transport offsite from the facility. • A hazardous waste transporter transporting medical waste shall maintain a completed tracking document and provide a copy of that document to the medical waste generator (clinic, etc.). All portable containers of hazardous chemicals and secondary containers into which hazardous substances are transferred or prepared require labeling. Labels must provide the following information: 1) Identity of hazardous substance 2) Description of hazard warning: can be words, pictures, symbols 3) Date of preparation or transfer **Exception**: Labeling is not required for portable containers into which hazardous chemicals are transferred from labeled containers, and which are intended only for the immediate use of the individual who performs the transfer. **Note:** The purpose of hazard communication is to convey information about hazardous substances used in the workplace. A hazardous substance is any substance that is a physical or health hazard.
C. Drugs are dispensed according to State and federal drug distribution laws and regulations. **RN/NP/CNM/LM/MD/PA**	**Deficiencies:** All deficiencies related to Pharmaceutical Services (e.g. medication maintenance, storage, safety, distribution, etc.) must be addressed in a corrective action plan. **IV.C.1) There are no expired drugs on site.** **Expiration Date:** • The manufacturer's expiration date must appear on the labeling of all drugs and formulas. • All prescription drugs not bearing the expiration date are deemed to have expired. • If a drug is to be reconstituted at the time of dispensing, its labeling must contain expiration information for both the reconstituted and unreconstituted drug. • Expired drugs may not be distributed or dispensed. • Per CDC – Medication Vials should be discarded whenever sterility is compromised or questionable.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	• Per CDC "If a multi-dose has been opened or accessed (e.g., needle-punctured) the vial should be dated and discarded within 28 days unless the manufacturer specifies a different (shorter or longer) date for that opened vial". • Per VFC "For multi-dose vials that do not require reconstitution, doses that remain after withdrawal of a dose can be administered until the expiration date printed on the vial unless otherwise specified by the manufacturer (Polio, meningococcal polysaccharide vaccine (MPSV4), PPSV, TIV, IPV, and yellow fever that are available in multi-dose vials)".[46] Both CDC and VFC recommend to follow the manufacturer's product information. **IV.C.2) Site has a procedure to check expiration date of all drugs (including vaccines and samples), and infant and therapeutic formulas.** • Site has a procedure to check expiration date of all drugs (including vaccines and samples) and infant and therapeutic formula AT LEAST monthly. **IV.C.3) All stored and dispensed prescription drugs are appropriately labeled.** **Prescription Labeling**: • Labels shall be carefully preserved, and all medications shall be stored in their original containers. • Each prescription medication dispensed is in a container that is not cracked, soiled, or without secure closures.[47] • Each commercial container of a controlled substance shall have printed on the label the symbol designating the schedule in which such controlled substance is listed. • Drug container is labeled with the provider's name, patient's name, drug name, dose, frequency, route, quantity dispensed, and manufacturer's name and lot number. • California Pharmacy Law *does not* prohibit furnishing a limited quantity of sample drugs if dispensed to the patient in the package provided by the manufacturer, no charge is made to the patient, and appropriate documentation is made in the patient's medical record.[48]

[46] See the CDC Frequently Asked Questions regarding Multi-dose vials, available at: https://www.cdc.gov/injectionsafety/providers/provider_faqs_multivials.html, and the CDC Vaccine Storage and Handling Toolkit, available at: https://www.cdc.gov/vaccines/hcp/admin/storage/toolkit/storage-handling-toolkit.pdf.

[47] 22 CCR 75037(A)

[48] BPC 4170 and 4171

Criteria	IV. Clinical Services - Pharmaceutical Standards
	<u>Drug Distribution</u>: • Each clinic that provides drug distribution services has written policies and procedures for the safe and effective distribution control, storage, use and disposition of drugs. • In order to prevent inadvertent exposure to out-of-range temperatures, vaccines should never be re-distributed beyond the manufacturer/distributer-to-clinic distribution chain unless during an emergency. • In the event of necessary vaccine transport (emergency/power outage), vaccines must be packaged following CDC recommendations and include temperature monitoring devices during transport (approval is required for VFC providers prior to any vaccine transfer). **<u>IV.C.4) (CE) Only lawfully authorized persons dispense drugs to patients.</u>** **<u>Drug Dispensing</u>:** • Drug dispensing complies with all applicable State and federal laws and regulations. • Drugs are dispensed only by a physician, pharmacist, or other persons (e.g., NP, CNM, RN, PA) lawfully authorized to dispense medications upon the order of a licensed physician or surgeon. • Personnel such as MAs, office managers, and receptionists do not dispense drugs. • Drugs are not offered for sale, charged or billed to Medi-Cal members.[49] • A record of all drugs and formulas dispensed shall be entered in the patient's medical record. **<u>Drug Administration</u>:** • Basic safe practices for medication/vaccine administration, assess and document: 1) Patient's identity 2) Correct medication 3) Correct dose 4) Correct route 5) Appropriate time CMS Manual System;[50] • Proper preparation is critical for maintaining the integrity of the vaccine during transfer from the vial to the syringe.

[49] BPC 4193
[50] 42 CFR 482.23(c)

Criteria	IV. Clinical Services - Pharmaceutical Standards
	• Personnel can demonstrate or verbally explain procedure(s) used on site to confirm correct patient, medication/vaccine, dosage and route and vaccine are prepared and drawn only prior to administration. • Proper vaccine administration is critical to ensure that vaccination is safe and effective. • CDC recommends that all health care personnel who administer vaccines receive comprehensive, competency-based training on vaccine administration policies and procedures before administering vaccines. • Comprehensive, skills-based training should be integrated into existing staff education programs such as new staff orientation and annual education requirements. **IV.C.5) (CE) Drugs and Vaccines are prepared and drawn only prior to administration.** ACIP discourages the routine practice of providers' prefilling syringes. • Vaccines have a similar appearance after being drawn into a syringe, prefilling may result in administration errors. • Unused, provider prefilled syringes must be discarded if not used within the same day that they are filled. • Unused syringes that are prefilled by the manufacturer and activated (i.e., syringe cap removed, or needle attached) should be discarded at the end of the clinic day. In certain circumstances in which a single vaccine type is being used (e.g., in preparation for a community influenza vaccination campaign), filling a small number (10 or fewer) of syringes may be considered (*5*). The doses should be administered as soon as possible after filling, by the same person who filled the syringes. The Center for Biologics Evaluation and Research (CBER) at the FDA offers information concerning the storage and use of temperature-sensitive biological products that have been involved in a temporary electrical power failure or flood conditions.[51] **IV.C.6) Current Vaccine Information Sheets (VIS) for distribution to patients are present on site.** **Vaccine Immunization Statements**:

[51] See the CDC's Vaccine Recommendations and Guidelines of the ACIP, available at: https://www.cdc.gov/vaccines/hcp/acip-recs/general-recs/administration.html.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	• Since 1994, the National Childhood Vaccine Injury Act, Section 2126 of the Public Health Service Act, mandates that parents/guardians or adult patients be informed before vaccinations are administered. • Health care providers must present and offer a VIS to patients prior to any vaccine.[52] As of 2009, CDC allows providers to present a current VIS (such as a laminated copy in a binder, etc.) to the patient/parent/guardian and allow time for the patient to read and ask questions. Staff should also offer a copy each time.[53] • The date the VIS was given (or presented and offered) *and* the publication date of the VIS must be documented in the patient's medical record. • Federal law allows up to 6 months for a new VIS to be used. The most current VIS are available from state and local health departments or can be downloaded from the CDC web site at: http://www.cdc.gov/vaccines/pubs/vis/default.htm or by calling the CDC Immunization Hotline at (800) 232-2522. VFC contains current VIS and provider notifications at: http://www.eziz.org/ **IV.C.7) If there is a pharmacy on site, it is licensed by the CA State Board of Pharmacy.** **Pharmacy:** • If a pharmacy is located on site and owned by the clinic, the license issued by the CA State Board of Pharmacy must be present on site. • Every pharmacy that dispenses a controlled substance must be registered with the DEA and be licensed by the CA State Board of Pharmacy. • A licensed pharmacist monitors drug distribution and policies and procedures for medication dispensing and storage. **Note:** "Dispensing" of drugs means the furnishing of drugs or devices directly to a patient or upon a prescription from a physician, dentist, optometrist, podiatrist, veterinarian, or upon an order to furnish drugs or transmit a prescription from a certified nurse midwife, nurse practitioner, physician assistant or pharmacist acting within the scope of his or her practice. **IV.C.8) Site utilizes California Immunization Registry (CAIR) or the most current version.**

[52] 42 USC 300aa-26(D)(2)
[53] See the CDC's Facts about VIS, which is available at: https://www.cdc.gov/vaccines/hcp/vis/about/facts-vis.html.

Criteria	IV. Clinical Services - Pharmaceutical Standards
	Immunization Registry Utilization: Scoring must be No or Yes. • DHCS requires documentation of immunizations in the California CAIR or the local registry. • If the clinic does not offer vaccines administration, the site staff shall be able to utilize the registry to access the member's immunization record. Contractor shall ensure that member-specific immunization information is periodically reported to an immunization registry (is) established in the Contractor's Service Area(s) as part of the Statewide Immunization Information System. Reports shall be made following the Member's initial health assessment and all other health care visits which result in an immunization being provided. Reporting shall be in accordance with all applicable State and Federal laws. DHCS Contract; CDC Recommendations at: www.cdc.gov/vaccines.

Criteria	IV. Clinical Services – Laboratory Review
D. Site is compliant with Clinical Laboratory Improvement Amendment (CLIA) regulations.	**IV.D.1) Laboratory test procedures are performed according to current site-specific CLIA certificate.** **<u>CLIA Certificates</u>**: • All sites that perform laboratory testing for human health assessment, diagnosis, prevention, or treatment of disease has a current, unrevoked, unsuspended site-specific Clinical Laboratory Improvement Amendment (CLIA) certificate, or evidence of renewal. • Acceptable documentation such as the original certificate, copy of the original certificate, renewal receipt or other evidence of renewal submission is present on site or readily available upon request. The CLIA certificate or evidence of renewal should include the current site/clinic address. **<u>Note</u>:** Per 42 CFR, 493.35(b)(1-3), 493.43(b)(1-3) and 493.55(b)(1-3), laboratories must file a separate application for each laboratory location, with the following *<u>exceptions</u>*: 1) Laboratories that are not at a fixed location, that is, laboratories that move from testing site to testing site, such as mobile units providing laboratory testing, health screening fairs, or other temporary testing locations may be covered under the certificate of the designated primary site or home base, using its address. 2) Not-for-profit or Federal, State, or local government laboratories that engage in limited (not more than a combination of 15 moderately complex or waived tests per certificate) public health testing may file a single application, or 3) Laboratories within a hospital that are located at contiguous buildings on the same campus and under common direction may file a single application or multiple applications for laboratory sites within same physical location or street address. 4) A multi-site CLIA waiver can be used at all affiliated locations. A copy of the CLIA waiver must be at each individual location with the address of the main location on the waiver. A copy of the CLIA application must be reviewed by the CSR to verify the locations included for old and new locations. The CLIA Certificate on site includes one of the following: o Certificate of Waiver: Site can perform only exempt waived tests o Certificate for Provider-Performed Microscopy (PPM): Physicians, dentists, or NPMPs can perform PPM procedures and waived tests

Criteria	IV. Clinical Services – Laboratory Review
	○ Certificate of Registration: Allows moderate and/or high complexity lab testing to be conducted until compliance with CLIA regulations are determined by survey ○ Certificate of Compliance: Lab has been surveyed and found in compliance with all applicable CLIA requirements ○ Certificate of Accreditation: Lab is accredited by an accreditation organization approved by CMS **<u>Waived Tests</u>**: • If only waived tests are performed, site has a current CLIA Certificate of Waiver. • There are no specific CLIA regulations regarding the performance of waived tests. • Site personnel are expected to follow the test manufacturer's instructions. • Laboratories with certificates of waiver may not be routinely inspected by DHCS Laboratory Field Services Division but may be inspected as part of complaint investigations and on a random basis to determine whether only waived tests are being performed. **<u>Moderate and High Complexity Tests</u>:** Tests not listed as waived are divided into one of two categories, moderate complexity or high complexity, based on the complexity of the testing procedure. CLIA regulations for these categories list specific requirements for laboratory proficiency testing, patient test management, quality control, quality assurance, personnel, and inspections. **IV.D.2) Testing personnel performing clinical lab procedures have been trained.** **<u>Personnel Training</u>:** • Prior to testing biological specimens, personnel have been appropriately trained for the type and complexity of the laboratory services performed. • Personnel have demonstrated the ability to perform all testing operations reliably and to report results accurately. • Site personnel that perform CLIA waived tests have access to and can follow test manufacturer's instructions. • When requested, site personnel can provide a step-by-step verbal explanation or demonstration of test procedure and how to determine test results.

Criteria	IV. Clinical Services – Laboratory Review
	• The required training and certification are established by legislation for personnel performing moderate and high complexity tests.[54] Reviewers are not expected to complete an in-depth evaluation of personnel performing moderate and high complexity tests. **IV.D.3) Lab supplies (e.g. vacutainers, vacutainer tubes, culture swabs, test solutions) are inaccessible to unauthorized persons.** **IV.D.4) Lab test supplies are not expired.** Lab supplies are disposed of by manufacturer's expiration date. **IV.D.5) Site has a procedure to check expiration date and a method to dispose of expired lab test supplies.** **Note:** Any site that performs tests or examinations on human biological specimens derived from the human body is, by definition, "laboratories" under State and federal law, and includes locations such as nurses' stations within hospitals, clinics, surgical centers, physician offices, and health fairs. The current listing of waived tests may be obtained at www.cms.gov or www.fda.gov includes an evaluation every two years (or sooner of complaint driven) by CDPH of personnel licenses/training, laboratory site inspection and demonstration of testing proficiency for moderate and high-complexity test sites. **Contact CDPH Laboratory Field Services (510) 620-3800 or LFSrecep@cdph.ca.gov for CLIA certification, laboratory license, or personnel questions.**

[54] BPC 1200-1213

Criteria	IV. Clinical Services – Radiology Review
E. Site meets CDPH Radiological inspection and safety regulations	**IV.E.1) Site has current CA Radiologic Health Branch Inspection Report and Proof of Registration if there is radiological equipment on site.** **CDPH Radiologic Health Branch (RHB) Inspection Report**: If site has ***current*** documentation of one of the following, give the full 9 points and survey items 2-9 will not need to be surveyed. Acceptable documentation is: o Inspection Report and Proof of Registration, ***or*** o Inspection Report and Proof of Registration *and* Short Form Sign-off sheet, ***or*** o Inspection Report and Proof of Registration *and* Notice of Violation form *and* approval letter for corrective action plan from the CA RHB The Radiologic Inspection Report and Proof of Registration (receipt of payment or cancelled check), issued by the RHB, must be present if there is radiology equipment on site. If any violations are found, one of two documents are issued to the site: o "Short Form Sign-off sheet" is issued for minimal problems that are easily corrected. o "Notice of Violation" form, requiring a site corrective action plan, is issued if there are more violations that are serious. All "Notice of Violation" corrective action plans must be accompanied by an approval letter from the CA RHB. **If documents are not available on site, or if reviewer is uncertain about the "status of documents on site, proceed to score all items 1-9.** **The following documents are posted on site:** **IV.E.2) Current copy of Title 17 with a posted notice about availability of Title 17 and its location.** **IV.E.3) "Radiation Safety Operating Procedures" posted in highly visible location.** **IV.E.4) "Notice to Employees Poster" posted in highly visible location.** **IV.E.5) "Caution, X-ray" sign posted on or next to door of each room that has X-ray equipment.** **IV.E.6) Physician Supervisor/Operator certificate posted and within current expiration date.**

Criteria	IV. Clinical Services – Radiology Review
	IV.E.7) Technologist certificate posted and within current expiration date. **The following radiological protective equipment is present on site:** **IV.E.8) Operator protection devices: radiological equipment operator must use lead apron or lead shield.** **IV.E.9) Gonadal shield (0.5 mm or greater lead equivalent): for patient procedures in which gonads are in direct beam.** **<u>Radiological Equipment</u>:** Equipment inspection, based on a "priority" rating system, is established by legislation. https://blink.ucsd.edu/_files/safety-tab/rad/Title-17-CCR.pdf • Mammography equipment is inspected annually, and must have federal FDA Certification on site ***and*** CA Mammography X-ray Equipment and Facility Accreditation Certification posted on the machine.[55] • High Priority equipment (e.g. fluoroscopy, portable X-ray) is inspected every three years. • Medium Priority equipment is inspected every 4-5 years depending on the volume of patients, frequency of x-ray equipment uses, and likelihood of radiation exposure. If reviewer is uncertain about the "status of equipment inspection, call the RHB. **<u>Radiology Personnel</u>:** • All certificates/licenses are posted and show expiration dates. • If there are many technicians, a list of names, license numbers, and expiration dates may be substituted. • The Certified Radiological Technologist (CRT) certificate permits the technologist to perform all radiology films except mammography and fluoroscopy, which require separate certificates. • The "Limited Permit" restricts the technician to one of the ten-(10) x-ray categories specified on the limited certificate: Chest, Dental laboratory, Dermatology, Extremities, Gastrointestinal, Genitourinary, Leg-podiatric, Skull, Torso-skeletal, and X-ray bone densitometry.

[55] 21 CFR 900

Criteria	IV. Clinical Services – Radiology Review
	<u>Note</u>: • Per RHB, dexascanners do not require lead aprons or gonadal shields, however, criteria 1-7 are still required. • RHB uses the ALARA (As Low As Reasonably Achievable) principle, which is the foundation of all radiation safety programs. The ALARA principle means to minimize exposure to radiation doses by employing all *reasonable* methods. • Dexascanners manufacturer guidelines do not require gonadal shielding or lead aprons due to very low radiation output, and potential for the shield to obscure the area being scanned, possibly rendering the scan non-diagnostic. With the focused beam, operators do not need aprons, the amount of exposure of “scattered” beams to an operator seated near the scanner is about the same level as that found in the natural environment. A traditional x-ray machine used for bone density testing, is not a dexascanner, and *may* require shielding/apron. **<u>Note</u>:** The RHB of the Food, Drug, and Radiation Safety Division of CDPH enforces the Radiation Control Laws and Regulations designed to protect both the public and employees against radiation hazards. Enforcement is carried out through licensing, registration and periodic inspection of sources of radiation, such as radiation machines. For questions regarding radiologic safety (e.g. expired or no inspection letters on site), call CDPH RHB at (916) 327-5106. For Radiation Emergency Assistance, call 1-800-*852*-7550. Ref: CCR, Title 17, Chapter 5, Subchapter 4 regulations at https://www.cdph.ca.gov/rhb

<table>
<tr><th>Criteria</th><th>V. Preventive Services Standards</th></tr>
<tr><td>A. Preventive health care services and health appraisal examinations are provided on a periodic basis for the detection of asymptomatic diseases.</td><td>Examination equipment, appropriate for primary care services, is available on site:
V.A.1) Exam tables and lights are in good repair.
<u>Examination Table and Lights</u>:

• Lights and exam tables shall be in good repair. “Good repair” means clean and well maintained in proper working order.
• Examination tables must have a protective barrier such as paper which is changed between patients, to cover the exam surface.

V.A.2) Stethoscope and sphygmomanometer with various size cuffs (e.g. child, adult, obese, thigh).

V.A.3) Thermometer with a numeric reading.

V.A.4) Basic exam equipment: in addition to items mentioned above, offices should have the following:
o Percussion hammer
o Tongue blades
o Patient gowns

V.A.5) Scales: Standing balance beam and infant scales.
<u>Scales:</u>

• Infant scales are marked and accurate to increments of one (1) ounce or less and have a capacity of at least 35 pounds.
• Standing floor scales are marked and accurate to increments of one-fourth (1/4) pound or less and have a capacity of at least 300 pounds.
• Balance beam scales have an adjustment mechanism and zeroing weight to enable routine balancing at zero.
• Electronic or digital scales have automatic zeroing and lock-in weight features.
• Spring balance scales (e.g. bathroom scales) are unsatisfactory for clinical use as, over time, the spring counterbalance mechanism loses its accuracy.</td></tr>
</table>

Criteria	V. Preventive Services Standards
	V.A.6) Measuring devices for stature (height/length) measurement and head circumference measurement. **<u>Measuring Devices</u>:** Equipment on site for measuring stature (length/height) and head circumference includes: ○ Rigid 90º right angle headboard block that is perpendicular to the recumbent measurement surface. ○ Vertical to the wall-mounted standing measurement surface. ○ Flat, paper or plastic non-stretchable tape or yardstick, marked to one-eighth (1/8 in. or 1 mm) or less, attached to a firm, flat surface. The "0" of the tape is exactly at the base of the headboard for recumbent measurement, or exactly at foot level for standing measurement. ○ Moveable, non-flexible footboard at 90º right angle perpendicular to the recumbent measurement surface, or a flat floor surface for standing. ○ A non-stretchable tape measuring device marked to one-eighth (1/8 in. or 1 mm) or less for measuring head circumference (re-usable measuring device must be appropriately cleaned in between use). **V.A.7) Eye charts (literate and illiterate) and occluder for vision testing.** **<u>Vision Testing</u>:**[56] • Site has both literate (e.g., Snellen) and illiterate eye charts • The current preferred optotypes (figures or letters of different sizes) for patients who cannot distinguish letters are the LEA or HOTV symbols (see figures below)

[56] See the Procedures for the Evaluation of the Visual System by Pediatricians, available at: https://pediatrics.aappublications.org/content/137/1/e20153597. Also see the American Association for Pediatric Ophthalmology and Strabismus Vision Screening Committee's Pediatric Screening Guidance during the COVID-19 Pandemic, available at: https://aapos.org/education/allied-health/covid.

Criteria	V. Preventive Services Standards
	• Wall mounted eye charts should be height adjustable and positioned at the eye-level of the patient • Examiners shall stand their patients with their heels to the line unless the eye chart that is being used to screen specifically instructs the patient to be positioned elsewhere. “Heel” lines are aligned with center of eye chart at 10 or 20-feet depending on whether the chart is for the 10-foot or 20-foot distance. • Eye charts are in an area with adequate lighting and at height(s) appropriate to use • Effective occlusion, such as with tape or an occlusive patch of the eye not being tested, is important to eliminate the possibility of peeking. **V.A.8) Ophthalmoscope.** Ophthalmoscope is in good working condition. **V.A.9) Otoscope with adult and pediatric ear speculums.** Otoscope with multi-size ear speculums appropriate to the population served. **V.A.10) A pure tone, air conduction audiometer is located in a quiet location for testing.**

Criteria	V. Preventive Services Standards

	Hearing Testing:[57]
	• The pure tone audiometer must have the minimum ability to:
	  ○ Produce intensities between 0 to 80 dB
	  ○ Have a headset with right and left earphones
	  ○ Be operated manually
	  ○ Produce frequencies at 1000, 2000, 3000, 4000, 6000, and 8000 Hz
	• Offices that provide pediatric preventive services should have a pure tone; air conduction audiometer available, audiometric testing is required at preventive health visits starting at 4 years of age.
	• PCP offices (such as Family Practitioners or General Practitioners) that refer all members to another provider for audiometric testing, must have a system in place that clearly demonstrates that the PCP office verifies that audiometric testing has been completed and that those results are returned to the PCP for review.

B. Health education services are available to Plan members.	**Health Education Services:** Services may include individual instruction, group classes, family counseling and/or other health educational programs and materials provided to members by the provider, health plan, or community sponsored programs. **Health education materials and Plan-specific resource information are:** **V.B.1) Readily accessible on site or are made available upon request.** **V.B.2) Applicable to the practice and population served on site.** **V.B.3) Available in threshold languages identified for county and/or area of site location.** **Health Education Materials:**

[57] See the American Speech-Language-Hearing Association's guidance on Audiograms, available at: https://www.asha.org/public/hearing/audiogram/.

Criteria	V. Preventive Services Standards
	• Must be available in the appropriate threshold languages and may be located in an accessible area on site (e.g., exam room, waiting room, health education room or area), or provided to members by clinic staff and/or by Plan upon request. • Must be available in accessible format which may include written information, audio and/or videotapes, computerized programs, and visual presentation aids for people with disabilities. • Should include general topics for health educational material such as: Immunizations, Pregnancy, Injury Prevention, Smoking Cessation, Dental Health, Nutrition, Physical Activity, STD/HIV Prevention, Family Planning, Asthma, Hypertension, and Diabetes. • Must meet the Medi-Cal Managed Care readability and suitability requirements for educational material distributed to Medi-Cal members.[58] **Plan-Specific Referral Information:** Plan-specific informing materials and/or resources are available on site in languages that are applicable to member population(s) primarily seen on site. ○ For example, if primarily English and Spanish-speaking members are seen on site, then Plan-specific informing materials are available on site in those languages. ○ Although a site may not stock informing materials in each threshold language identified for the county, site personnel has access to contact resource information for locating Plan-specific informing materials in threshold languages not typically seen on site. ○ Interpreter services are provided in all identified threshold and concentration standard languages. **Note:** Threshold languages are the primary languages spoken by Limited English Proficient (LEP) population groups residing in a county. A numeric threshold of 3,000 eligible LEP Medi-Cal beneficiaries or a concentration standard of 1,000 residing in a single ZIP code or 1,500 in two contiguous ZIP codes establishes the threshold languages identified by DHCS for each county.

[58] See All Plan Letter (APL) 18-016, “Readability and Suitability of Written Health Education Materials”. APLs are searchable at: https://www.dhcs.ca.gov/formsandpubs/Pages/AllPlanLetters.aspx.

Criteria	VI. Infection Control Standards
A. Infection control procedures for Standard/Universal precautions are followed. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**Deficiencies:** All deficiencies related to Infection Control must be addressed in a corrective action plan (CAP). **Hand Washing Facilities:**[59] • Hand washing facilities are available in the exam room and/or utility room, and include an adequate supply of running potable water, soap and single use towels or hot air-drying machines. • Sinks with a standard faucet, foot-operated pedals, 4-6-inch wing-type handle, automatic shut-off systems or other types of water flow control mechanism are acceptable. • Staff can demonstrate infection control “barrier” methods used on site to prevent contamination of faucet handle, door handles and other surfaces until hand washing can be performed. • On occasions when running water is not readily available, an antiseptic hand cleanser, alcohol-based hand rub, or antiseptic towelettes is acceptable until running water is available.[60] **VI.A.1) Soap or antiseptic hand cleaner and running water are available in exam and/or treatment areas for hand washing.** **Soap or Antiseptic Hand Cleaner:** Hand washing prevents infection transmission by removing dirt, organic material and transient microorganisms from hands. o Hand washing with plain (non-antimicrobial) soap in any form (e.g., bar, leaflet, liquid, powder, granular) is acceptable for general patient care (Association for Professionals in Infection Control and Epidemiology, Inc., 1995). o Antimicrobial agents or alcohol-based antiseptic hand rubs are used for hand washing when indicated to remove debris and destroy transient microorganisms (e.g., before performing invasive procedures, after contact with potentially infectious materials). o Plain and antiseptic hand wash products are properly maintained and/or dispensed to prevent contamination.

[59] See the World Health Organization’s Hand Hygiene guidelines, available at: https://cdn.who.int/media/docs/default-source/integrated-health-services-(ihs)/infection-prevention-and-control/hand-hygiene-why-how-and-when-brochure.pdf?sfvrsn=dc8a0810_2

[60] 29 CFR 1919.1030

Criteria	VI. Infection Control Standards
	VI.A.2) A waste disposal container is available in exam rooms, procedure/treatment rooms, and restrooms. **<u>Waste Disposal Container</u>:**[61] • Contaminated wastes (e.g. dental drapes, band-aids, sanitary napkins, soiled disposable diapers) are disposed of in regular solid waste (trash) containers, and are maintained to prevent potential contamination of patient/staff areas and/or unsafe access by infants/children. • Closed containers are not required for regular, solid waste trash containers. **VI.A.3) Site has procedure for effectively isolating infectious patients with potential communicable conditions.** **<u>Isolation Procedures</u>**:[62] • Personnel can demonstrate or verbally explain procedure(s) used on site to isolate patients with potentially contagious conditions from other patients. • If personnel are unable to demonstrate or explain site-specific isolation procedures *and* cannot locate written isolation procedure instructions, site is considered deficient. • Isolation procedures may vary from site to site. **<u>Note</u>:** • Infection Control standards are practiced on site to minimize risk of disease transmission. • Site personnel are expected to apply the principles of “Standard Precautions” (CDC, 1996), used for all patients regardless of infection status. • Standard precautions apply to blood, all body fluids, non-intact skin, and mucous membranes, which are treated as potentially infectious for HIV, HBV or HCV, and other bloodborne pathogens. • “Universal precautions” refer to the OSHA mandated program that requires implementation of work practice controls, engineering controls, bloodborne pathogen orientation/education, and record keeping in healthcare facilities.

[61] HSC 118275-118320. Also see the OSHA Standards for Bloodborne Pathogens, available at: https://www.hercenter.org/rmw/osha-bps.php.

[62] See the CDC’s Guidelines for Isolation Precautions, available at: https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html.

Criteria	VI. Infection Control Standards
B. Site is compliant with OSHA Bloodborne Pathogens Standard and Waste Management Act. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**<u>Deficiencies</u>:** All deficiencies related to Infection Control must be addressed in a corrective action plan. **<u>VI.B.1) (CE) Personal Protective Equipment for Standard Precautions is readily available for staff use.</u>** **<u>Personal Protective Equipment (PPE)</u>:** PPE must be readily available.[63] PPE for protection against bloodborne pathogen hazards is available on site and must include: 1) Gloves 2) Water repellent clothing barrier/gown 3) Face/eye protection (e.g., goggles/face shield) 4) Respiratory infection protection (e.g., mask) PPE does not include general work clothes (e.g., uniforms, cloth lab coats) that will permit liquid to soak through. • The storage of PPE should be adequate to protect the PPE from contamination, loss, damage, water or sunlight. • Proper storage often requires a dry and clean place that is not subject to temperature extremes. **<u>VI.B.2) (CE) Blood, other potentially infectious materials, and Regulated Wastes are placed in appropriate leak proof, labeled containers for collection, handling, processing, storage, transport or shipping.</u>** **<u>Blood and Other Potentially Infectious Materials (OPIM)</u>:** • OPIM are all human body fluids, any unfixed tissue or organ (other than intact skin) from a human (living or dead), and HIV or HBV-containing blood, cells, tissue, organs, cultures, medium or solutions. • Containers for blood and OPIM are closable, leak proof, and labeled and/or color-coded. • Double bagging is required only if leakage is possible.

[63] 29 CFR 1910.1030

Criteria	VI. Infection Control Standards
	<u>Labels</u>: • A warning label is affixed to red-bagged regulated wastes, sharps containers, refrigerators/freezers containing blood or OPIM, containers used to store or transport blood or OPIM, and contaminated laundry or equipment for storage or transporting. • The international biohazard symbol with word "BIOHAZARD" *or* the words "Biohazardous Waste" label (fluorescent orange or red orange with contrasting lettering/symbols) is part of, or affixed to, the container. • Sharps containers are labeled with the words "Sharps Waste" or with the international biohazard symbol and the word "BIOHAZARD". • Individual containers of blood or OPIM are exempted from warning labels if placed inside a labeled secondary container for storage, transport, or disposal. • Alternative marking or color coding may be used to label contaminated laundry or specimen containers if the alternative marking permits employees on site to recognize that container requires compliance with Universal Precautions. **<u>VI.B.3) (CE) Needlestick safety precautions are practiced on site.</u>** **<u>Needlestick Safety</u>:**[64] • Contaminated sharps are discarded immediately. • Sharps containers are located close to the immediate area where sharps are used and are inaccessible to unauthorized persons. • Sharps are not bent, removed from a syringe, or recapped. Recapping, bending, or removing contaminated needles is permissible only if there is no feasible alternative or if such actions are required for a specific medical procedure. If recapping, bending, or removal is necessary, employers must ensure that workers use either a mechanical device or a one-handed technique. Needleless systems, needles with Engineered Sharps Injury Protection (ESIP) devices, and non-needle sharps are used (incl. in emergency kits), unless exemptions have been approved by Cal/OSHA.[65] • Security of portable containers in patient care areas is always maintained.

[64] See the OSHA Needlestick Safety Frequently Asked Questions, available at: , and the OSHA Standards for Bloodborne Pathogens, available at: https://www.osha.gov/bloodborne-pathogens
https://www.hercenter.org/rmw/osha-bps.php.

[65] 8 CCR 5193

Criteria	VI. Infection Control Standards
	• Any device capable of cutting or piercing (e.g. syringes, hypodermic needles, needleless devices, blades, broken glass, slides, vials) are placed in a closable, puncture-resistant, labeled, leak-proof container. If these requirements are met, containers made of various materials (e.g., cardboard, plastic) are acceptable. • Containers are not overfilled past the manufacturer's designated fill line, or more than ¾ full. • Supply of containers on hand is adequate to ensure routine change-out when filled. **VI.B.4) All sharp injury incidents are documented.** **<u>Sharps Injury Documentation</u>:**[66] • Site has a method in place to document sharps injuries. • The Sharps Injury Log must contain, at a minimum, information about the injury, the type and brand of device involved in the injury (if known), the department or work area where the exposure occurred, and an explanation of how the incident occurred. • The incident must be recorded in the log within 14 business days of the date the incident is reported to the employer and maintained in such a manner to protect the confidentiality of the injured employee (e.g., removal of personal identifiers) and follow-up care is documented within 14 days of injury incident. • Sites with 10 or fewer employees are exempt from OSHA recordkeeping requirements and are exempt from recording and maintaining a Sharps Injury Log, however, it is recommended to have a method in place to document sharps injuries regardless of the number of employees. **<u>Regulated Waste Storage</u>:** Regulated wastes include: ○ **Biohazardous wastes**, e.g., laboratory wastes, human specimens/tissue, blood/contaminated materials "known" to be infected with highly communicable diseases for humans and/or that require isolation. ○ **Medical wastes**, e.g., liquid/semi-liquid blood or OPIM, items caked with dry blood or OPIM and capable of releasing materials during handling, and contaminated sharps. **VI.B.5) Biohazardous (non-sharp) wastes are contained separate from other trash/waste.**

[66] See 8 CCR 5193, and the National Institute for Occupational Safety and Health's guidance on Preventing Needlesticks and Sharps Injuries, available at: https://www.cdc.gov/niosh/topics/bbp/sharps.html.

Criteria	VI. Infection Control Standards
	VI.B.6) Storage areas for regulated medical wastes are maintained secure and inaccessible to unauthorized persons.[67] • Regulated waste is contained separately from other wastes (e.g., contaminated wastes)* and placed in red biohazardous bags with Biohazard label and stored in a closed container that is not accessible to unauthorized persons. • If stored outside the office, a lock secures the entry door, gate or receptacle lid, and posted warning sign(s) in English and Spanish are visible for 25-feet: "CAUTION-BIOHAZARDOUS WASTE STORAGE AREA- UNAUTHORIZED PERSONS KEEP OUT" and CUIDADO-ZONA DE RESIDUOUS-BIOLOGICOS PELIGOROS-PROHIBIDA LE ENTRADA A PERSONAS NO AUTHORIZADAS". See HSC Sections 117915-117946, 49 CFR, Section 173.6; Core Infection Prevention and Control Practices -Centers for Disease Control and Prevention (CDC) The Healthcare Infection Control Advisory Committee (HICPAC), 2016. **VI.B.7) Contaminated laundry is laundered at the workplace or by a commercial laundry service.** **<u>Contaminated Laundry</u>:** • Contaminated laundry (soiled with blood/OPIM) is laundered by a commercial laundry service, or a washer and dryer on site. • Contaminated laundry should not contain sharps, and when transported, should have the appropriate warning label. • Manufacturer's guidelines are followed to decontaminate and launder reusable protective clothing. • Ensure that laundry areas have handwashing facilities and products and appropriate PPE available for staff. • Laundry requirements are "not applicable" if only disposable patient gowns and PPE are used on site.

[67] HSC 117600-118360, 29 CFR 1910.1030, CDC Guidelines for Isolating Precautions: Preventing Transmission of Infection Agents in Healthcare Settings, available at: https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html.

Criteria	VI. Infection Control Standards
	VI.B.8) Transportation of regulated medical wastes is only by a registered hazardous waste hauler or to a central location of accumulation in limited quantities (up to 35.2 pounds). **Medical Waste Disposal:** California adopted statutes into HSC affecting medical waste transporters in October 1993.[68] • Only medical waste transporters listed with CDPH can transport medical waste. • All medical waste transporters must carry paperwork issued by CDPH in each vehicle while transporting medical waste. • Medical wastes are hauled to a permitted offsite medical waste treatment facility, transfer station, or other registered generator by a registered hazardous waste transporter. • Limited-quantity exemption is not required for Small Quantity Generator (up to 35.2 pounds). However, a medical waste-tracking document that includes the name of the person transporting, number of waste containers (e.g., three sharps containers, or five biohazard bags), types of medical wastes, and date of transportation, is kept a minimum of 3 years for large waste generators and 2 years for small generators. For the CDPH list of current medical waste transporters, visit: https://www.cdph.ca.gov/Programs/CEH/DRSEM/CDPH%20Document%20Library/EMB/MedicalWaste/Haulist_012921.pdf For information on the United States Postal Service mailability standards for medical waste (including sharps) refer to the Domestic Mail Manual, section 601.10.17: https://pe.usps.com/Archive/HTML/DMMArchive20100607/601.htm CDPH Medical Waste Management Program: https://www.cdph.ca.gov/Programs/CEH/DRSEM/Pages/EMB/MedicalWaste/MedicalWaste.aspx CDPH Medical Waste Management Program Transporter Checklist: https://www.cdph.ca.gov/CDPH%20Document%20Library/ControlledForms/cdph8660.pdf CDPH Medical Waste Transporter Annual Verification: https://www.cdph.ca.gov/CDPH%20Document%20Library/ControlledForms/cdph8668.pdf

[68] HSC 117600-11836

Criteria	VI. Infection Control Standards
	CDPH Medical Waste Transfer Stations and Offsite Treatment Facilities: https://www.cdph.ca.gov/Programs/CEH/DRSEM/Pages/EMB/MedicalWaste/Transfer-and-Treatment.aspx CDPH Medical Waste Transporters Data Submission Protocol: https://www.cdph.ca.gov/CDPH%20Document%20Library/ControlledForms/cdph8666.pdf Department of Toxic Substances Control-Managing Hazardous Waste Transporters Registration https://dtsc.ca.gov/transporters/ ***Note**: Contaminated wastes include materials soiled with blood during their use but are not within the scope of regulated wastes. Contaminated waste items need not be disposed as regulated waste in labeled red bags but can be discarded as solid waste in regular trash receptacle.
C. Contaminated surfaces are decontaminated according to Cal-OSHA standards. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**Deficiencies**: All deficiencies related to Infection Control must be addressed in a corrective action plan (CAP). **VI.C.1) Equipment and work surfaces are appropriately cleaned and decontaminated after contact with blood or other potentially infectious material.** **Routine Decontamination:** o Contaminated work surfaces are decontaminated with an appropriate disinfectant.[69] o Written “housekeeping” schedules have been established and are followed for regular routine daily cleaning. o Staff can identify cleaning and disinfection of surfaces and equipment, the disinfectant used and responsible personnel in between patients use. **VI.C.2) Routine cleaning and decontamination of equipment/work surfaces is completed according to site-specific written schedule.** **The written schedule for cleaning and decontamination of the work site as follows:** o **Area cleaned/decontaminated**

[69] 29 CFR 1910.1030

Criteria	VI. Infection Control Standards
	◦ **Frequency of cleaning/decontamination** ◦ **Employee responsible for determining and implementing the written schedule** All equipment and environmental and work surfaces shall be cleaned and decontaminated after contact with blood or OPIM no later than at the end of the shift. Cleaning and decontamination of equipment and work surfaces is required more often as specified below: ◦ Location within the facility ◦ Type of surface or equipment to be treated ◦ Type of soil or contamination present ◦ Tasks or procedures being performed in the area Contaminated work surfaces shall be cleaned and decontaminated with an appropriate disinfectant immediately or as soon as feasible when: ◦ Surfaces become overtly contaminated. ◦ There is a spill of blood or OPIM. ◦ Procedures are completed. ◦ At the end of the work shift if the surface may have become contaminated since the last cleaning. **Spill Procedure:** Personnel can identify procedures for prompt decontamination of blood/body fluid spills, the disinfectant used, and the responsible person(s). **Disinfectant solutions used on site are:** **VI.C.3) Approved by the Environmental Protection Agency (EPA).** **VI.C.4) Effective in killing HIV/HBV/TB.** **VI.C.5) Follow manufacturer instructions.** **Disinfectant Products:** ◦ Products used for decontamination have a current EPA-approved status. ◦ Effectiveness in killing HIV/HBV/TB is stated on the manufacturer's product label. ◦ Decontamination products are used according to manufacturer's guidelines for decontamination and contact times.

Criteria	VI. Infection Control Standards
	<u>10% Bleach Solution</u>: ○ 10% bleach solution that is EPA registered and effective against TB, is changed/reconstituted ***every*** 24 hours (due to instability of bleach once mixed with water). ○ Surface is cleaned prior to disinfecting (due to presence of organic matter (e.g., dirt, blood, excrement) inactivates active ingredient, sodium hypochlorite). ○ Surface is air-dried or allowed appropriate time (stated on label) before drying. ○ Manufacturer's directions, *specific* to every bleach product, are followed carefully. **<u>Note</u>:** "Contamination" means the presence or reasonably anticipated presence of blood or OPIM on any item or surface. "Decontamination" is the use of appropriate physical or chemical means to remove, inactivate or destroy bloodborne pathogens so that a surface or item is no longer capable of transmitting infectious particles and is rendered safe for handling, use or disposal.[70] Current EPA product lists and information is available from the EPA, Antimicrobial Division at (703) 305-1284, or at 29 CFR 1910.1030.
D. Reusable medical instruments are properly sterilized after each use. 🗣 🗁 **RN/NP/CNM/LM/MD/PA**	**<u>Deficiencies</u>:** All deficiencies related to Infection Control must be addressed in a corrective action plan (CAP). **VI.D.1) Written site-specific policy/procedures or manufacturer's instructions for instrument/equipment sterilization are available to staff.** If site uses an autoclave or cold chemical solution to achieve sterilization and/or high level disinfection (HLD) of instruments/equipment, site shall have specific policy/procedures or manufacturer's instructions addressing instrument/equipment pre-treatment, cleaning and preparation, the management of chemical solutions, autoclave loading and operation, safety guidelines and precautions, and other required processes, which are available to staff to follow. **Staff adheres to site-specific policy and/or manufacturer/product label directions for the following procedures:** **VI.D.2) Cleaning reusable instruments/equipment prior to sterilization.** **Cleaning Prior to Sterilization:**

[70] 8 CCR 5193. Also see CalOSHA's Best Practices Approach for Reducing Bloodborne Pathogen Exposure, available at:

https://www.dir.ca.gov/dosh/dosh_publications/BBPBest1.pdf.

Criteria	VI. Infection Control Standards
	• Prior to undergoing the sterilization process, soiled instruments/equipment are thoroughly cleaned using enzymatic detergent, rinsed, dried, and inspected for the presence of dried blood or other debris. **Cold chemical sterilization/high level disinfection:** **VI.D.3a) (CE) Staff demonstrate /verbalize necessary steps/process to ensure sterility and/or high-level disinfection of equipment.** • Personnel can demonstrate or verbally explain procedure(s) used for cleaning prior to sterilization, and to locate written directions on site. • Product efficacy tests (i.e. test strips) shall be performed according to manufacturer's guidelines. **Cold Chemical Sterilization/High Level disinfection:** • Product manufacturer's directions are strictly followed for instrument pre-soaking treatment, solution preparation, solution exposure procedures, safety precautions (e.g., room temperature, area ventilation), and post-sterilization processes. • Sterilization and or high-level disinfection exposure times and solution expiration date and time are available to staff. • Written procedures for cold sterilization and/or high-level disinfection is available on site to staff. **VI.D.3b) Confirmation from manufacturer item(s) is/are heat sensitive.** • Per CDC,[71] the use of liquid chemical germicides to sterilize instruments ("cold sterilization") are limited. Sterility is not verified or assured with cold chemical sterilization. The first choice is always heat sterilization. The CDC refers to heat sterilization as "the method of choice when sterilizing instruments and devices. If an item is heat sensitive, it is preferable to use a heat-stable alternative or disposable item". • The use of a liquid chemical sterilant should be restricted to reprocessing devices that are heat-sensitive and incompatible with other sterilization methods. All other items should be heat sterilized or disposable.

[71] See the CDC Guidelines for Disinfection and Sterilization, available at: https://www.cdc.gov/infectioncontrol/pdf/guidelines/disinfection-guidelines-H.pdf. Also see the CDC's Guidelines on other sterilization methods, available at: https://www.cdc.gov/infectioncontrol/guidelines/disinfection/sterilization/other-methods.html.

Criteria	VI. Infection Control Standards
	<u>VI.D.3c) (CE) Appropriate PPE is available, exposure control plan, Material Safety Data Sheets (MSDS) and clean up instructions in the event of a cold chemical sterilant spill.</u> **<u>Cold Chemical Sterilants Spillage</u>:** The OSHA Hazard Communication Standard requires manufacturers and importers of hazardous chemicals to develop MSDS for each chemical or mixture of chemicals.[72, 73] ○ Employers must have the data sheets for cold chemical sterilants readily available to employees who work with the products to which they could be exposed. ○ Staff should attend training classes in safety awareness about the use and exposure to cold chemical sterilants used on site. ○ Personnel are familiar with and can recognize signs and symptoms of exposure to cold chemical sterilants used on site. ○ Staff must be aware of the procedures for clean up in the event of spillage. ○ Staff can demonstrate or verbally explain procedure(s) used on site for chemical spill cleanup. ○ If personnel are unable to demonstrate or explain site-specific chemical spill cleanup procedures *and* cannot locate written chemical spill cleanup procedure instructions, site is considered deficient. ○ Cleanup procedures may vary from site to site depending on the cold chemical sterilants used. ○ The appropriate PPE for cold chemical sterilants clean up must be readily available. National Institute for Occupational Safety and Health (NIOSH) with the Centers for Disease Control and Prevention. Environmental Health and Safety guidelines for disinfectants and sterilization methods. MSDS for cold chemical sterilants. The American National Standard (ANSI)/Advancing Safety in Medical Technology (AAMI) ST58:2013. <u>Control Methods and Work Practices:</u> are in place to prevent or reduce exposure to the cold chemical sterilants. Cold chemical sterilants have toxic properties and are hazardous.

[72] 29 CFR 1910.1200, 1915.99, 1917.28, 1918.90, 1926.59, and 1928.21.
[73] See CDC guidelines on sterilizing heat sensitive dental instruments, available at: https://www.cdc.gov/infectioncontrol/guidelines/disinfection/healthcare-equipment.html l/ 29 CFR 1910.1030(d)(3)(i), 29 CFR 1910.1030(d)(3)(ii), 29 CFR 1910.1030(d)(4)(ii)(A), 29 CFR 1910.1030(d)(4)(iii)(B), 29 CFR 1910.132, 29 CFR 1910.134. See the CDC Guidelines for Disinfection and Sterilization in Healthcare Facilities, available at: https://www.cdc.gov/infectioncontrol/guidelines/disinfection/sterilization/index.html.

Criteria	VI. Infection Control Standards
	• Cold chemical sterilants must be used strictly in accordance with the manufacturer's directions. Always consult the manufacturer for safety precautions and MSDS information. • The appropriate PPE must be used to avoid inhalation or skin contact exposure to during the cold chemical sterilization/high level disinfection process. Examples of cold chemical sterilants include: ○ Glutaraldehyde (Cidex) ○ Peracetic acid ○ Hydrogen peroxide-based solutions Glutaraldehyde is a common cold chemical sterilants. Exposure to glutaraldehyde can cause the following health effects: throat and lung irritation, breathing difficulty, nose irritation, nosebleed, burning eyes and conjunctivitis, rash, hives, headaches, and nausea. Exposure to glutaraldehyde may be prevented or reduced by using the following control methods and work practices: ○ Use local exhaust ventilation. ○ Keep glutaraldehyde baths under a fume hood where possible.[74] ○ Avoid skin contact (use appropriate PPE-gloves and aprons made of nitrile or butyl rubber wear goggles and face shields). ○ Use only enough sterilants to perform the required sterilization procedure. ○ Seal or cover all containers holding the sterilants. ○ Attend training classes. **Autoclave/Steam Sterilization:** **VI.D.4a) Staff demonstrate/verbalize necessary steps/process to ensure sterility.** • Autoclave manufacturer's directions are strictly followed for instrument pre-cleaning, machine loading, operation safety precautions, minimum time-temperature criteria, and post sterilization processes. • Written operating procedures for autoclave are available on site to staff. • Documentation of sterilization loads include date, time and duration of run cycle, temperature, steam pressure, and operator of each run.

[74] For more information on glutaraldehyde exposure and safety tips, refer to the CDC guidance, available at: https://www.cdc.gov/niosh/docs/2001-115/default.html.

Criteria	VI. Infection Control Standards
	• If instruments/equipment are transported off-site for sterilization, equipment handling, and transport procedures are available on site to staff. • Documentation of instruments and personnel transporting must be maintained. **VI.D.4 b) Autoclave maintenance per manufacturer's guidelines.** **Autoclave Maintenance:** Autoclave is maintained and serviced according to manufacturer's guidelines. Documentation of maintenance should include: o Mechanical problems o Inspection dates o Results/outcome of routine servicing o Calibration o Repairs, etc. **Note:** If the manufacturer's guidelines are not present on site, then the autoclave is serviced annually by a qualified technician. A dated sticker on the autoclave or a service receipt is acceptable documentation of appropriate maintenance. **VI.D.4c) (CE) Spore testing of autoclave/steam sterilizer with documented results (at least monthly).** **Spore Testing:** • Autoclave spore testing is performed *at least monthly*, unless otherwise stated in manufacturer's guidelines. • Documentation of biological spore testing includes: o Date o Results o Types of spore test used o Person performing/documenting test results • Written procedures for performing routine spore testing are available on site to staff **Note: Documentation of monthly spore testing must be maintained onsite even for sterilization that is performed offsite.**

Criteria	VI. Infection Control Standards

	VI.D.4.d) (CE) Management of positive mechanical, chemical, and biological indicators of the sterilization process.
	Autoclave/Steam Sterilization Mechanical, Chemical, and Biological Indicators:[75]
	• Sterilization failure can occur for reasons such as slight variation in the resistance of the spores, improper use of the sterilizer, and laboratory contamination during the culture.
	• Per CDC, the autoclave/steam sterilization procedure should be monitored routinely by using a combination of:
	  o Mechanical Indicator: monitor sterilization process with a daily assessment of cycle time and temperature by examining the temperature record chart and an assessment of pressure via the pressure gauge (e.g., graphs, gauges, printouts)
	  o Chemical Indicator: are usually either heat-or chemical-sensitive inks that change color when one or more sterilization parameters (e.g., steam-time, temperature, and/or saturated steam; ETO-time, temperature, relative humidity and/or ETO concentration) are present.
	  o Biological: spore test – an indicator to evaluate the sterilizing conditions and indirectly the microbiologic status of the processed items
	  o Staff should adhere to site-specific protocol and/or manufacturer/product label for management of positive indicator(s).
	• Written procedures for for handling positive spore test results are available on site to staff.
	• For positive spore tests, the autoclave is removed from service immediately until inspection is completed and a negative retest occurs. Procedures include:
	  o Report problem
	  o Repair autoclave
	  o Retrieve all instruments sterilized since last negative spore test
	  o Re-test autoclave
	  o Re-sterilize retrieved instruments
	• Biologic spore test products vary and are designed for use based on specific autoclave type. Biologic control testing challenges the autoclave sterilization cycle with live, highly resistant, nonpathogenic spores. If spores are killed during processing, it is assumed that all other microorganisms are also killed and that the autoclave load is sterile.

See the CDC Guidelines for Disinfection and Sterilization in Healthcare Facilities, available at: https://www.cdc.gov/infectioncontrol/pdf/guidelines/disinfection-guidelines-H.pdf

Criteria	VI. Infection Control Standards

	VI.D.4.e) Sterilized packages are labeled with sterilization date and load identification information.
	<u>Package and storage of sterilized items</u>:
	• Following the sterilization process, medical and surgical devices must be handled using aseptic technique in order to prevent contamination.
	• Storage areas for sterilized packages are clean, dry and separated from non-sterile items by a functional barrier (e.g., shelf, cabinet door, and drawer).
	• Sterilized package labels include:
	  o Date of sterilization
	  o Load run identification information
	  o Initials of staff member
	  o General contents (e.g. suture set) each item in a sterile package need not be listed on the label if a master list of package contents is available elsewhere on site
	
	VI.D.4.f) Storage of sterilized packages.
	<u>Storage of sterilized packages</u>:[76]
	• Storage areas for sterilized packages are clean, dry and separated from non-sterile items by a functional barrier (e.g., shelf, cabinet door, and drawer).
	• Maintenance of sterility is event related, not time related.
	• Sterilized items are considered sterile until use, unless an event causes contamination.
	• Sterilized items are not considered sterile if package is opened, wet/moist, discolored or damaged, and should be kept removed from sterile package storage area.
	• Site has a process for routine evaluation of sterilized packages.

[76] See the CDC Summary of Recommendations regarding Disinfection and Sterilization, available at: https://www.cdc.gov/infectioncontrol/guidelines/disinfection/index.html, and the CDC Guidelines for Disinfection and Sterilization in Healthcare Facilities, available at: https://www.cdc.gov/infectioncontrol/pdf/guidelines/disinfection-guidelines-H.pdf.

Totals	**170**				

*CE = Critical Elements. Indicate any CEs for easy reference to generate a CAP.

Scoring Procedure

1) Add points given in each section.
2) Add total points given for all six sections.
3) Adjust score for "N/A" criteria (if needed), by subtracting N/A points from 170 total points possible.
4) Divide total points given by "adjusted" total points.
5) Multiply by 100 to get the compliance (percent) rate.

PCP:	
SECTION: Access/Safety	
POLICY AND PROCEDURE: Fire Safety and Prevention and Emergency Non-Medical Procedures	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:
Site shall be maintained in a manner that provides a safe environment for all patients, visitors and personnel. Site shall meet all city, county and state fire safety and prevention ordinances. Site staff shall receive training and information on fire safety & prevention and emergency non-medical procedures.

PROCEDURE:

I. SAFE ENVIRONMENT

A. The provider/designee will ensure the following fire and safety precautions:
   1. Lighting is adequate in all areas.
   2. Exit doors and aisles are unobstructed and egress (escape) accessible.
   3. Exit doors are clearly marked with “Exit” signs.
   4. Clearly diagramed “Evacuation Routes” for emergencies are posted in visible locations.
   5. Electrical cords and outlets are in good working condition.
   6. At least one type of fire fighting/protection equipment is accessible at all times.
   7. Employee Alarm system

B. Staff will be responsible to correct any “unsafe” situation, and/or report the situation to the provider/designee who will make/arrange for correction.

II. INFORMATION AND TRAINING

A. Fire Safety & Prevention and non-medical emergency information will be available on site. Staff will be informed of the location of the information and how to use the information. Staff training on fire safety & prevention and emergency non-medical procedures will be verifiable and may be part of staff education documented in:
   - Informal or formal staff trainings
   - New staff orientation
   - External training courses
   - Employee Alarm System –

B. Training topics will include:
   1. Fire safety and prevention procedures including:
      a. Evacuation routes and exits for the exam rooms, office suite and building.
      b. Evacuation procedures.
      c. Location of fire alarms, extinguishers, sprinklers and smoke detectors.
      d. Emergency phone numbers.
      e. Work place violence procedures including emergency numbers.
      f. Emergency alarm system
         1. Employers must install and maintain an operable employee alarm system that has a distinctive signal to warn employees of fire or other emergencies, unless employees can promptly see or smell a fire or other hazard in time to provide adequate warning to them. (29 CFR 1910. 37) OSHA: For those employers with 10 or fewer employees in a particular workplace, direct voice communication is an acceptable procedure for sounding the alarm provided all employees can hear the alarm. Such workplaces do not need a back-up system.

ATTACHMENTS: Workplace Violence Protocol (Resource)
Emergency Earthquake Plan (Resource)
Emergency Fire Plan (Resource)
Site Evacuation Plan (Sample)

Instructions

Keep freezer in OK range.

-50.0°C OK -15.0°C

Check temperatures twice a day.

1. Fill out month, year, freezer ID, and PIN.
2. Record the time and your initials.
3. Record a check if an alarm went off.
4. Record Current, MIN, and MAX.

If no alarm:

1. Clear MIN/MAX.
2. Ensure data logger is in place and recording.

OK

IF ALARM WENT OFF:

1. Clear MIN/MAX and alarm symbol.
2. Post "Do Not Use Vaccines" sign.
3. Alert your supervisor.
4. Report excursion to SHOTS at MyVFCvaccines.org.
5. Record assigned SHOTS ID.
6. Ensure data logger is in place and recording.

?

Supervisor's Review

When log is complete, check all that apply:

- ☐ Month/year/freezer ID/PIN are recorded.
- ☐ Temperatures were recorded twice daily.
- ☐ I reviewed data files for all the days on this log to find any missed excursions. Date downloaded: ___/___/___
- ☐ Any excursions were reported to SHOTS at MyVFCvaccines.org.
- ☐ We understand that falsifying this log is grounds for vaccine replacement and termination from the VFC Program.

2. Post "Do Not Use Vaccines" sign.
3. Alert your supervisor.
4. Report excursion to SHOTS at MyVFCvaccines.org.
5. Record assigned SHOTS ID.
6. Ensure data logger is in place and recording.

?

Supervisor's Review

When log is complete, check all that apply:

- ☐ Month/year/freezer ID/PIN are recorded.
- ☐ Temperatures were recorded twice daily.
- ☐ I reviewed data files for all the days on this log to find any missed excursions. Date downloaded: ___/___/___
- ☐ Any excursions were reported to SHOTS at MyVFCvaccines.org.
- ☐ We understand that falsifying this log is grounds for vaccine replacement and termination from the VFC Program.

HEPATITIS B VACCINATION DECLINATION

I understand that due to my occupational exposure to blood or other potentially infectious materials I may be at risk of acquiring hepatitis B virus (HBV) infection. I have been given the opportunity to be vaccinated with hepatitis B vaccine, at no charge to myself. However, I decline hepatitis B vaccination at this time. I understand that by declining this vaccine, I continue to be at risk of acquiring hepatitis B, a serious disease. If in the future I continue to have occupational exposure to blood or other potentially infectious materials and I want to be vaccinated with hepatitis B vaccine, I can receive the vaccination series at no charge to me.

Health Net only covers medical and hospital services provided or authorized by your Participating Physician Group (PPG).

To change your PPG or Primary Care Provider (PCP), call Health Net Member Services at 1-800-675-6110 / TTY: 711 or visit www.healthnet.com.

Health Net Community Solutions

Rx BIN 022659 Rx PCN 6334225

SAMPLE

Health Net Member Services is available 24 hours a day, 7 days a week

Member Services & Mental Health Benefits	1-800-675-6110 (TTY: 711)
Nurse Advice Line	1-888-275-8750 (TTY: 711)
Member Portal	www.healthnet.com

If you think you have a medical or psychiatric emergency, call 911 or go to the nearest hospital.

See your PCP for non-emergency health needs like colds, minor infections or illnesses, or treatment for ongoing health needs. Do not go to the emergency room routine health care.

Providers Call for Eligibility and authorization: **1-800-675-6110.**

Medi-Cal RX Help Line: **1-800-977-2273**

Out of area/Emergency Providers Call 1-800-526-8196 for authorization.

To report, or request approval for, inpatient admits, call: 1-800-995-7890

Prior Authorization: Primary Care Physician referral in advance is required for most non-emergency services by contracting providers. Emergency services rendered to the member by non-Health Net providers are reimbursable by Health Net without prior authorization.

This card is for identification only. It does not verify eligibility.

Mail all claims to: Molina Healthcare of California – PO Box 22702, Long Beach, CA. 90801.

Individualized Care Plan (ICP)

Purpose:
To address client's problems/risks/concerns identified during prenatal visits, Prenatal Combined Assessment/Reassessment and/or Postpartum Assessment.

Definition:
The ICP is a document developed by a comprehensive perinatal practitioner(s) in conjunction with the client. The plan includes four components: obstetrical, nutritional, health education, and psychosocial. Each component includes identification of risk conditions, prioritization of needs, proposed intervention(s) including methods, timeframe, outcome goal, proposed referrals, and each health discipline's responsibilities based on the results of the assessments.

Procedure:

Client Information:

Patient:

Write in the client's complete name following the format of first name, middle initial and last name.

Gravida:

Write in the number of times the patient became pregnant including this one. All pregnancies should be counted regardless of whether they resulted in a live birth or not.

Para:

Write in the number of previous deliveries resulting in infants weighing 500 grams or more or having a gestational age of 20 weeks or more whether alive or dead at delivery. A multiple fetal pregnancy (twins, triplets, etc.) counts as only one delivery.

EDC:

Estimated Date of Confinement (EDC) or the due date is the calculated birthdate of the infant using the first day of the patient's last menstrual period. Charts
(Appendix 1) or "OB wheels" can be used for the calculation. Write in the month/day/year.

Provider Name:

Write in the name of the physician or certified nurse midwife in charge of the patients overall OB care.

Case Coordinator:

Write in the full name and title. Example: Susie Doe, CPHW

Column 1

Date:

Write in the date when the problem is identified whether at the initial assessment, reassessment, or a follow-up visit.

Strengths Identified:

Write in any of the patient's strengths that can help change the particular problem(s) or issue(s) identified at this visit. Appendix 2 lists some examples of strengths.

Column 2

Identified Problem/Risk/Concern:

Write in all problems, risks, and concerns related to obstetrical, health education, nutrition, and psychosocial issues. This box should include concerns that the patient wants addressed at this visit as well as issues identified by the CPSP Support Services staff. Number the problems if more than one is being addressed at this visit. List all risk conditions that require follow-up by the support services and medical staff. **Do not** include issues that have been adequately addressed with interventions noted in the Prenatal Combined Assessment/Reassessment Tool itself. Use all the space you need to adequately document the problem/risk/concern. If more than one row is needed, rewrite date and use "same as above" for the strengths identified on column 1. Refer to Appendix 3 for a sample list of obstetrical, health education, nutrition, and psychosocial problem/risk/concern(s).

Column 3

Teaching/Counseling/Referral(s)

Write in all specific actions being performed to remedy the problem/ risk/ concern(s). Make sure the patient agrees with proposed interventions. These actions are based on advice, counseling, resources, and referrals provided by the staff to the patient. If patient is unwilling to follow the plan provided, document your efforts. The referrals to other professionals (RD, SW, etc.) or programs (smoking cessation program, alcohol/drug services, male involvement program, etc.) should be made in accordance with practice protocols or provider recommendation. Use short sentences and do not rewrite the problem. When writing the intervention for the corresponding problem, continue using the same number previously assigned in column 2.

Column 4 & 5

Follow-up/Reassessment Date - Outcome/Plan

Write in the date at the top of the box. Restate the problem with the respective number assigned in column 2. At the follow -up antepartum visit/reassessment, record patient's progress towards resolving the problem. Recheck the previous plan and comment on results obtained. If goals were not achieved, modify the plan and record new interventions. If the problem continues past column 5, rewrite it on an additional care plan sheet. If problem/ risk/concern (s) has been resolved, write a short note and then "resolved." A sample of an Individualized Care Plan is as follows:

Date: 11/13/96 **Strengths Identified**: Motivated Enjoys reading Adequate food Adequate support system Likes to learn	**Identified Problem /Risk/ Concern** 1. Iron deficiency anemia 2. Excessive weight gain	**Teaching/ Counseling/ Referral** 1. Iron supplements prescribed by the provider to be taken 3 times/day with Vit. C rich food/juice. 2. a. Handouts given per protocol b. Low fat foods choices and low fat cooking techniques discussed	**Follow-up Reassessment Date-Outcome/Plan** 12/01/96 1. Iron deficiency anemia: pt took medication for one week and stopped because of severe constipation. a. Provider prescribed a different iron supplement b. Pt was advised to increase fiber and fluid intake	**Follow-up Reassessment Date-Outcome/Plan** 12/23/96 1. Iron deficiency anemia: pt is taking iron supplement as prescribed. a. Handouts on Iron rich foods given
Date: 11/13/96 **Strengths Identified**: Same as above		2. c. Assessment of food frequency utilizing Perinatal Food Frequency Questionnaire d. Counseled to reduce the intake of fruit juices. Documented on Perinatal Food Frequency Questionnaire	12/01/96 2. Excessive weight gain: pt followed all recommendations resolved	
Date: 1/13/97 **Strengths Identified**: Same as above Interested in participating in group classes	1. Iron deficiency anemia 3. Exposure to second hand smoking	1. a. Referred to nutrition group classes 3. a. Techniques for reducing exposure discussed b. Techniques to communicate with family member discussed	1/30/97 1. Iron deficiency anemia: normal blood tests results-resolved 3. Exposure to second hand smoking: pt was unsuccessful in stopping family member from smoking. a. Referred to provider for “prescription” for family member not to smoke around client b. Handouts per protocols	2/28/97 3. Exposure to second hand smoking: the family member moved out of the house - resolved

Appendix 2

Sample Strengths List

Ability to comprehend and make decisions
Ability to cope
Adequate food
Adequate shelter/ clothing
Adequate transportation
Emotionally stable
Employed
Experience/knowledge of delivery
Experience/knowledge of infant care
Experience/knowledge of parenting
Experience/knowledge of pregnancy
Financially stable
Positive compliance
Positive self-esteem
High School Education
Interest/willingness to participate in individual/group classes
Motivated
Refrigerator/stove
Support system
Thinking of the future
Wanted/accepted/planned pregnancy

Appendix 3

Sample of Problem List

Obstetrical

Anemia/hemoglobinopathy
Blood problems
Cardiovascular disorders
Chronic renal disease
Diabetes Type 1
Diabetes Type 2
Dysplasia/GYN malignancy
Gastrointestinal disorders
Genetic risk
Gestational diabetes
Hepatitis
History of abnormal infant
History of C-Section/Uterine Surgery
History of DES exposure
History of gestational diabetes (insulin/diet controlled)
History of hospitalization(s)
History of Incompetent Cervix
History of less than 2500 gram infant
History of more than 4000 gram infant
History of neonatal death
History of preterm birth (less than 36 weeks)
History of stillbirth
HIV risk
Hypertension/chronic
Hypo/hyperthyroid
Kidney problems
Multiple gestation
Pregnancy induced hypertension
Pregnancy interval less than a year
Psychological illness
Pulmonary disease /TB
Rh hemolytic disease
Seizure disorders
STD
Uterine problems
Vaginal bleeding

Nutrition

Abnormal glucose
Anemia
Currently breast feeding
Eating disorders
Excessive wt. Gain during pregnancy
High caffeine consumption
High parity
Hypovolemia
Inadequate wt. Gain during pregnancy
Less than 3 years since first menses
Low income
Moderately overweight (more than 120% desirable wt.)
Previous obstetrical complications
Short interpregnancy interval
Substance use
Underweight (less than 90% desirable wt.)
Very overweight (more than 135% desirable wt.)

Health Education

Age less than 17 or greater than 35 years of age
Cardiovascular problems
Conflict scheduling class times
Diabetes
Economic and housing problems
Extreme anxiety or emotional problems
Low education level
Failed Appointments
Family problems/Abuse
HIV risk status
Inability to read or write or low reading level
Inability to reach decisions or comprehension difficulties
Inadequate nutritional status
Lack of social support structure
Late initiation of prenatal care
Low motivation or interest
Little or no experience with U.S. health care
Negative attitude about pregnancy
Noncompliance with medical advice
Occupational risk
Past negative experience with U.S. health care
Physical disabilities
Preterm labor
Primigravida or multi-gravida with five or more
Substance use
Transportation

Psychosocial

Eating disorders
Excessive difficulty in coping with crisis interfering with self care
Excessive worries/fears regarding body image
Excessive worries/fears related to fetus
Extreme difficulty or resistance to comply with medical recommendations
Fear of dying during labor
Fears of inability to parent
Frequent complaints for which no diagnosis can be found
History or current indication of domestic violence
Lack of resources (financial, transportation, food, clothing, shelter)
Pregnancy complicated by detection of fetal anomaly
Previous pregnancy loss
Previous psychological history of depression, suicide, psychosis
Rejection or denial of pregnancy
Relationship problems or absence of a support person
Severe emotional problems
Unrealistic positive or negative feelings about pregnancy/motherhood/parenthood

Provider Communications

Better Communication, Better Care:

PROVIDER TOOLS TO CARE FOR DIVERSE POPULATIONS

INTRODUCTION FOR HEALTHCARE PROFESSIONALS:

Why was this Cultural and Linguistic Provider Tool Kit created?

This set of materials was produced by a nation-wide team of healthcare professionals who, like you, are dedicated to providing high quality, effective, and compassionate care to their patients. In our awareness of differences in individual belief and behavior, changes in demographics and new legal mandates, we are constantly presented with new challenges in our attempts to deliver adequate and cultural sensitive health care to a diverse patient population. The material in this tool kit will provide you with resources and information to effectively communicate and understand our diverse patient populations. The tool kit also provides many useful instruments and aids to help with specific operational needs that can arise in your office or facility.

The tool kit contents are organized into four sections; each containing helpful background information and tools that can be reproduced and used as needed. Below you will find a list of the section topics and a small sample of their contents:

- **Interaction with a diverse patient base:** encounter tips for providers and their clinical staff, a mnemonic to assist with patient interviews, help in identifying literacy problems, and an interview guide for hiring clinical staff who have an awareness of diversity issues.
- **Communication across language barriers:** tips for locating and working with interpreters, common signs and common sentences in many languages, language identification flashcards, and employee language prescreening tool.
- **Understanding patients from various cultural backgrounds:** tips for talking about sex with a wide range of people, delivering care to lesbian, gay, bisexual or transgender, pain management across cultures, and information about different cultural backgrounds.
- **References and resources:** key legal requirements including 45 CFR 92 – Non Discrimination Rule, a summary of the "Culturally and Linguistically Appropriate Service (CLAS) Standards," which serve as a guide on how to meet legal requirements, Race/Ethnicity/Language categories, a bibliography of print resources, and a list of internet resources.

We consider this tool kit a work in progress. Patient needs and the tools we use to work with those changing needs will continue to evolve. We understand that some portions of this tool kit will be more useful than others for individual practices or service settings, after all, practices vary as much as the places where they are located. We encourage you to use what is helpful, disregard what is not, and, if possible communicate your reaction to the contents to the ICE Cultural and Linguistics Workgroup at: CL_Team@iceforhealth.org.

SECTION A: RESOURCES TO ASSIST COMMUNICATION WITH A DIVERSE PATIENT POPULATION BASE

A GUIDE TO INFORMATION IN SECTION A

RESOURCES TO COMMUNICATE WITH A DIVERSE PATIENT BASE

The communication strategies suggested in this section are intended to minimize patient-provider, and patient-office staff miscommunications, and foster an environment that is non-threatening and comfortable to the patient.

We recognize that every patient encounter is unique. The goal is to eliminate cultural barriers that inhibit effective communication, diagnosis, treatment and care. The suggestions presented are intended to guide providers and build sensitivity to cultural differences and styles. By enhancing your cultural sensitivity and ability to tailor the delivery of care to your patients' needs you will:

- Enhance communication
- Decrease repeat visits
- Decrease unnecessary lab tests
- Increase compliance
- Avoid Civil Rights Act violations

The following materials are available in this section:

Working with Diverse Patients: Tips for Successful Patient Encounters	A tip sheet designed to help providers enhance their patient communication skills.
Partnering with Diverse Patients: Tips for Office Staff to Enhance Communication	A tip sheet designed to help office staff enhance their patient communication skills.
Non-verbal Communication and Patient Care	An overview of the impact of nonverbal communication on patient-provider relations and communication.
"Diverse": A Mnemonic for Patient Encounters Tips for Identifying Health Literacy Issues	A mnemonic to help you individualize care based on cultural/diversity aspects.
Tips for Identifying and Addressing Health Literacy Issues	A tip sheet to help understand and work with patients with Health literacy.
Interview Guide for Hiring Office/Clinic Staff with Diversity Awareness	A list of interview questions to help determine if a job candidate is likely to work well with individuals of diverse backgrounds.
Americans with Disabilities Act (ADA) Sign Language and Alternative Formats Requirements	Tip sheets to help providers better communicate with patients with vision, hearing, or speech disabilities.
Americans with Disabilities Act (ADA) Requirements for Effective Communication How to Implement Language Services	A tip sheet to help providers communicate effectively with their patients.
Supporting Patients with 211 and 711 Community Services	A tip sheet to help providers utilize community services for patients with special needs.

WORKING WITH DIVERSE PATIENTS: TIPS FOR SUCCESSFUL PATIENT ENCOUNTERS

To enhance patient/provider communication and to avoid being unintentionally insulting or patronizing, be aware of the following:

Styles of Speech: *People vary greatly in length of time between comment and response, the speed of their speech, and their willingness to interrupt.*

- Tolerate gaps between questions and answers, impatience can be seen as a sign of disrespect.
- Listen to the volume and speed of the patient's speech as well as the content. Modify your own speech to more closely match that of the patient to make them more comfortable.
- Rapid exchanges, and even interruptions, are a part of some conversational styles. Don't be offended if no offense is intended when a patient interrupts you.
- Stay aware of your own pattern of interruptions, especially if the patient is older than you are.

Eye Contact: *The way people interpret various types of eye contact is tied to cultural background and life experience.*

- Most Euro-Americans expect to look people directly in the eyes and interpret failure to do so as a sign of dishonesty or disrespect.
- For many other cultures direct gazing is considered rude or disrespectful. Never force a patient to make eye contact with you.
- If a patient seems uncomfortable with direct gazes, try sitting next to them instead of across from them.

Body Language: *Sociologists say that 80% of communication is non-verbal. The meaning of body language varies greatly by culture, class, gender, and age.*

- Follow the patient's lead on physical distance and touching. If the patient moves closer to you or touches you, you may do the same. However, stay sensitive to those who do not feel comfortable, and ask permission to touch them.
- Gestures can mean very different things to different people. Be very conservative in your own use of gestures and body language. Ask patients about unknown gestures or reactions.
- Do not interpret a patient's feelings or level of pain just from facial expressions. The way that pain or fear is expressed is closely tied to a person's cultural and personal background.

Gently Guide Patient Conversation: *English predisposes us to a direct communication style; however other languages and cultures differ.*

- Initial greetings can set the tone for the visit. Many older people from traditional societies expect to be addressed more formally, no matter how long they have known their physician. If the patient's preference is not clear, ask how they would like to be addressed.
- Patients from other language or cultural backgrounds may be less likely to ask questions and more likely to answer questions through narrative than with direct responses. Facilitate patient-centered communication by asking open-ended questions whenever possible.
- Avoid questions that can be answered with "yes" or "no." Research indicates that when patients, regardless of cultural background, are asked, "Do you understand," many will answer, "yes" even when they really do not understand. This tends to be more common in teens and older patients.
- Steer the patient back to the topic by asking a question that clearly demonstrates that you are listening.

PARTNERING WITH DIVERSE PATIENTS: TIPS FOR OFFICE STAFF TO ENHANCE COMMUNICATION

1. Build rapport with the patient.

- Address patients by their last name. If the patient's preference is not clear, ask, "How would you like to be addressed?"
- Focus your attention on patients when addressing them.
- Learn basic words in your patient's primary language, like "hello" or "thank you".
- Recognize that patients from diverse backgrounds may have different communication needs.
- Explain the different roles of people who work in the office.

2. Make sure patients know what you do.

- Take a few moments to prepare a handout that explains office hours, how to contact the office when it is closed, and how the PCP arranges for care (i.e. PCP is the first point of contact and refers to specialists).
- Have instructions available in the common language(s) spoken by your patient base.

3. Keep patients' expectations realistic.

- Inform patients of delays or extended waiting times. If the wait is longer than 15 minutes, encourage the patient to make a list of questions for the doctor, review health materials or view waiting room videos.

4. Work to build patients' trust in you.

- Inform patients of office procedures such as when they can expect a call with lab results, how follow-up appointments are scheduled, and routine wait times.

5. Determine if the patient needs an interpreter for the visit.

- Document the patient's preferred language in the patient chart.
- Have an interpreter access plan. An interpreter with a medical background is preferred to family or friends of the patient.
- Assess your bilingual staff for interpreter abilities. (see Employee Language Skills Self-Assessment Tool).
- Possible resources for interpreter services are available from health plans, the state health department, and the Internet. See contracted health plans for applicable payment processes.

6. Give patients the information they need.

- Have topic-specific health education materials in languages that reflect your patient base. (Contact your contracting health plans/contracted medical groups for resources.)
- Offer handouts such as immunization guidelines for adults and children, screening guidelines, and culturally relevant dietary guidelines for diabetes or weight loss.

7. Make sure patients know what to do.

- Review any follow-up procedures with the patient before he or she leaves your office.
- Verify call back numbers, the locations for follow-up services such as labs, X-ray or screening tests, and whether or not a follow-up appointment is necessary.
- Develop pre-printed simple handouts of frequently used instructions, and translate the handouts into the common language(s) spoken by your patient base. (Contact your contracting health plans/contracted medical groups for resources.)

NON- VERBAL COMMUNICATION AND PATIENT CARE

Non-verbal communication is a subtle form of communication that takes place in the **initial three seconds** after meeting someone for the first time and can continue through the entire interaction. Research indicates that non-verbal communication accounts for approximately **70%** of a communication episode. Non-verbal communication can impact the success of communication more acutely than the spoken word. Our culturally informed unconscious framework evaluates gestures, appearance, body language, the face, and how space is used. Yet, we are rarely aware of how persons from other cultures perceive our nonverbal communication or the subtle cues we have used to assess the person.

The following are case studies that provide examples of non-verbal miscommunication that can sabotage a patient-provider encounter. Broad cultural generalizations are used for illustrative purposes. They should not be mistaken for stereotypes. A stereotype and a generalization may appear similar, but they function very differently. A **stereotype** is an ending point; no attempt is made to learn whether the individual in question fits the statement. A **generalization** is a beginning point; it indicates common trends, but further information is needed to ascertain whether the statement is appropriate to a particular individual.

Generalizations can serve as a guide to be accompanied by individualized in-person assessment. As a rule, ask the patient, rather than assume you know the patient's needs and wants. If asked, patients will usually share their personal beliefs, practices and preferences related to prevention, diagnosis and treatment.

Eye Contact

Ellen was trying to teach her Navaho patient, Jim Nez, how to live with his newly diagnosed diabetes. She soon became extremely frustrated because she felt she was not getting through to him. He asked very few questions and never met her eyes. She reasoned from this that he was uninterested and therefore not listening to her.[1]

It is rude to meet and hold eye contact with an elder or someone in a position of authority such as health professionals in most Latino, Asian, American Indian and many Arab countries. It may be also considered a form of social aggression if a male insists on meeting and holding eye contact with a female.

Touch and Use of Space

A physician with a large medical group requested assistance encouraging young female patients to make and keep their first well woman appointment. The physician stated that this group had a high no-show rate and appointments did not go as smoothly as the physician would like.

Talk the patient through each exam so that the need for the physical contact is

---

Hall, E.T. (1985). *Hidden Differences: Studies in International Communication.* Hamburg: Gruner & Jahr.
Hall, E.T. (1990). *Understanding Cultural Differences.* Yarmouth, ME: Intercultural Press.

understood, prior to the initiation of the examination. Ease into the patients' personal space. If there are any concerns, ask before entering the three-foot zone. This will help ease the patient's level of discomfort and avoid any misinterpretation of physical contact. Additionally, physical contact between a male and female is strictly regulated in many cultures. An older female companion may be necessary during the visit.

Gestures

An Anglo patient named James Todd called out to Elena, a Filipino nurse: "Nurse, nurse." Elena came to Mr. Todd's door and politely asked, "May I help you?" Mr. Todd beckoned her to come closer by motioning with his right index finger. Elena remained where she was and responded in an angry voice, "What do you want?" Mr. Todd was confused. Why had Elena's manner suddenly changed?[1]

Gestures may have dramatically different meanings across cultures. It is best to think of gestures as a local dialect that is familiar only to insiders of the culture. Conservative use of hand or body gestures is recommended to avoid misunderstanding. In the case above, Elena took offense to Mr. Todd's innocent hand gesture. In the Philippines (and in Korea) the "come here" hand gesture is used to call animals.

Body Posture and Presentation

Carrie was surprised to see that Mr. Ramirez was dressed very elegantly for his doctor's visit. She was confused by his appearance because she knew that he was receiving services on a sliding fee scale. She thought the front office either made a mistake documenting his ability to pay for service, or that he falsely presented his income.

Many cultures prioritize respect for the family and demonstrate family respect in their manner of dress and presentation in public. Regardless of the economic resources that are available or the physical condition of the individual, going out in public involves creating an image that reflects positively on the family – the clothes are pressed, the hair is combed, and shoes are clean. A person's physical presentation is not an indicator of their economic situation.

Use of Voice

Dr. Moore had three patients waiting and was feeling rushed. He began asking health related questions of his Vietnamese patient Tanya. She looked tense, staring at the ground without volunteering much information. No matter how clearly he asked the question he couldn't get Tanya to take an active part in the visit.

The **use** of voice is perhaps one of the most difficult forms of non-verbal communication to change, as we rarely hear how we sound to others. If you speak too fast, you may be seen as not being interested in the patient. If you speak too loud, or too soft for the space involved, you may be perceived as domineering or lacking confidence. Expectations for the use of voice vary greatly between and within cultures, for male and female, and the young and old. *The best suggestion is to search for non-verbal cues to determine how your voice is affecting your patient.*

"DIVERSE" A MNEMONIC FOR PATIENT ENCOUNTERS

A mnemonic will assist you in developing a personalized care plan based on cultural/diversity aspects. Place in the patient's chart or use the mnemonic when gathering the patient's history on a SOAP progress note.

	Assessment	Sample Questions	Assessment Information/ Recommendations
D	**Demographics-** *Explore regional background, level of –acculturation, age and sex as they influence health care behaviors.*	Where were you born? Where was "home" before coming to the U.S.? How long have you lived in the U.S.? What is the patient's age and sex?	
I	**Ideas-** *ask the patient to explain his/her ideas or concepts of health and illness.*	What do you think keeps you healthy? What do you think makes you sick? What do you think is the cause of your illness? Why do you think the problem started?	
V	**Views of health care treatments-** *ask about treatment preference, use of home remedies, and treatment avoidance practices.*	Are there any health care procedures that might not be acceptable? Do you use any traditional or home health remedies to improve your health? What have you used before? Have you used alternative healers? Which? What kind of treatment do you think will work?	
E	**Expectations**- *ask about what your patient expects from his/her doctor?*	What do you hope to achieve from today's visit? What do you hope to achieve from treatment? Do you find it easier to talk with a male/female? Someone younger/older?	
R	**Religion**- *asks about your patient's religious and spiritual traditions.*	Will religious or spiritual observances affect your ability to follow treatment? How? Do you avoid any particular foods? During the year, do you change your diet in celebration of religious and other holidays?	
S	**Speech-** *identifies your patient's language needs including health literacy levels. Avoid using a family member as an interpreter.*	What language do you prefer to speak? Do you need an interpreter? What language do you prefer to read? Are you satisfied with how well you read? Would you prefer printed or spoken instructions?	
E	**Environment –** *identify patient's home environment and the cultural/diversity aspects that are part of the environment. Home environment includes the patient's daily schedule, support system and level of independence.*	Do you live alone? How many other people live in your house? Do you have transportation? Who gives you emotional support? Who helps you when you are ill or need help? Do you have the ability to shop/cook for yourself? What times of day do you usually eat? What is your largest meal of the day?	

TIPS FOR IDENTIFYING AND ADDRESSING HEALTH LITERACY ISSUES

LOW HEALTH LITERACY CAN PREVENT PATIENTS FROM UNDERSTANDING THEIR HEALTH CARE SERVICES.

Health Literacy is defined by the National Health Education Standards[1] as "*the capacity of an individual to obtain, interpret, and understand basic health information and services and the competence to use such information and services in ways which are health-enhancing.*"

This includes the ability to understand written instructions on prescription drug bottles, appointment slips, medical education brochures, doctor's directions and consent forms, and the ability to negotiate complex health care systems. Health literacy is not the same as the ability to read and is not necessarily related to year of education. A person who functions adequately at home or work may have marginal or inadequate literacy in health care environment.

Possible Signs of Low Health Literacy

Your patients may frequently say:

- I forgot my glasses.
- My eyes are tired.
- I'll take this home for my family to read.
- What does this say? I don't understand this.

Your patients' behaviors may include:

- Not getting their prescriptions filled, or not taking their medications as prescribed.
- Consistently arriving late to appointments.
- Returning forms without completing them.
- Requiring several calls between appointments to clarify instructions.

Barriers to Health Literacy

- The ability to read and comprehend health information is impacted by a range of factors including age, socioeconomic background, education and culture.
- A patient's culture and life experience may have an effect on their health literacy.
- An accent, or a lack of accent, can be misread as an indicator of a person's ability to read English.
- Different family dynamics can play a role in how a patient receives and processes information.
- In some cultures it is inappropriate for people to discuss certain body parts or functions leaving some with a very poor vocabulary for discussing health issues.
- In adults, reading skills in a second language may take 6-12 years to develop.

TIPS FOR DEALING with LOW HEALTH LITERACY[1]

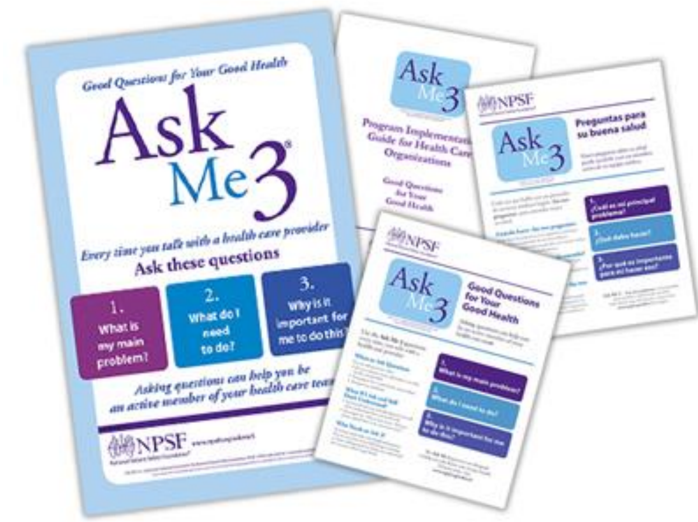
- ✓ Use simple words and avoid jargon.
- ✓ Never use acronyms.
- ✓ Avoid technical language (if possible).
- ✓ Repeat important information – a patient's logic may be different from yours.
- ✓ Ask patients to repeat back to you important information.
- ✓ Ask open-ended questions.
- ✓ Use medically trained interpreters familiar with cultural nuances.
- ✓ Give information in small chunks.
- ✓ Articulate words.
- ✓ "Read" written instructions out load.
- ✓ Speak slowly (don't shout).
- ✓ Use body language to support what you are saying.
- ✓ Draw pictures, use posters, models or physical demonstrations.
- ✓ Use video and audio media as an alternative to written communications.

ADDITIONAL RESOURCES

Use **Ask Me 3®**[2]. Ask Me 3® is a program designed by health literacy experts intended to help patients become more active in their health care. It supports improved communication between patients, families and their health care providers.

Patients who understand their health have better health outcomes. Encourage your patients to ask these three specific questions:

1. What is my main problem?
2. What do I need to do?
3. Why is it important for me to do this?



Asking these questions is proven to help patients better understand their health conditions and what they need to do to stay healthy.

For more information or resources on Ask Me 3® and to view a video on how to use the questions, please visit http://www.npsf.org/?page=askme3. Ask Me 3 is a registered trademark licensed to the National Patient Safety Foundation (NPSF).

American Medical Association (AMA)

The AMA offer multiple publications, tools and resources to improve patient outcomes. For more information, visit: http://www.ama-assn.org/ama/pub/about-ama/ama-foundation.page.

INTERVIEW GUIDE FOR HIRING OFFICE/CLINIC STAFF WITH DIVERSITY AWARENESS

The following set of questions is meant to help you determine whether a job candidate will be sensitive to the cultural and linguistic needs of your patient population. By integrating some or all of these questions into your interview process, you will be more likely to hire staff that will help you create an office/clinic atmosphere of openness, affirmation, and trust between patients and staff. *Remember* that bias and discrimination can be obvious and flagrant or small and subtle. Hiring practices should reflect this understanding.

INTERVIEW QUESTIONS

Q. *What experience do you have in working with people of diverse backgrounds, cultures and ethnicities? The experiences can be in or out of a health care environment.*

The interviewee should demonstrate understanding and willingness to serve diverse communities. Any experience, whether professional or volunteer, is valuable.

Q: *Please share any particular challenges or successes you have experienced in working with people from diverse backgrounds.*

You will want to get a sense that the interviewee has an appreciation for working with people from diverse backgrounds and understands the accompanying complexities and needs in an office setting.

Q. *In the health care field we come across patients of different ages, language preference, sexual orientation, religions, cultures, genders, and immigration status, etc. all with different needs. What skills from your past customer service or community/healthcare work do you think are relevant to this job?*

This question should allow a better understanding of the interviewees approach to customer service across the spectrum of diversity, their previous experience, and if their skills are transferable to the position in question. Look for examples that demonstrate an understanding of varying needs. Answers should demonstrate listening and clear communication skills.

Q. *What would you do to make all patients feel respected? For example, some Medicaid or Medicare recipients may be concerned about receiving substandard care because they lack private insurance.*

The answer should demonstrate an understanding of the behaviors that facilitate respect and the type of prejudices and bias that can result in substandard service and care.

AMERICANS WITH DISABILITIES ACT (ADA) REQUIREMENTS

The following information is excerpts from the U.S. Department of Justice, Civil Rights Division, Disability Rights Section. For complete information, please visit: www.ada.gov/effective-comm.htm.

The Department of Justice published revised final regulations implementing the Americans with Disabilities Act (ADA) for title II (State and local government services) and title III (public accommodations and commercial facilities) on September 15, 2010, in the Federal Register. These requirements, or rules, clarify and refine issues that have arisen over the past 20 years and contain new, and updated, requirements, including the 2010 Standards for Accessible Design (2010 Standards).

EFFECTIVE COMMUNICATION

Overview

People who have vision, hearing, or speech disabilities ("communication disabilities") use different ways to communicate. For example, people who are blind may give and receive information audibly rather than in writing and people who are deaf may give and receive information through writing or sign language rather than through speech.

The ADA requires that title II entities (State and local governments) and title III entities (businesses and nonprofit organizations that serve the public) communicate effectively with people who have communication disabilities. The goal is to ensure that communication with people with these disabilities is equally effective as communication with people without disabilities. This publication is designed to help title II and title III entities ("covered entities") understand how the rules for effective communication, including rules that went into effect on March 15, 2011, apply to them.

- The purpose of the effective communication rules is to ensure that the person with a vision, hearing, or speech disability can communicate with, receive information from, and convey information to, the covered entity.
- Covered entities must provide auxiliary aids and services when needed to communicate effectively with people who have communication disabilities.
- The key to communicating effectively is to consider the nature, length, complexity, and context of the communication and the person's normal method(s) of communication.
- The rules apply to communicating with the person who is receiving the covered entity's goods or services as well as with that person's parent, spouse, or companion in appropriate circumstances.

AUXILIARY AIDS AND SERVICES

The ADA uses the term "auxiliary aids and services" ("aids and services") to refer to the ways to communicate with people who have communication disabilities.

- For people who are blind, have vision loss, or are deaf-blind, this includes providing a qualified reader; information in large print, Braille, or electronically for use with a computer screen-reading program; or an audio recording of printed information. A "qualified" reader means someone who is able to read effectively, accurately, and impartially, using any necessary specialized vocabulary.

- For people who are deaf, have hearing loss, or are deaf-blind, this includes providing a qualified note taker; a qualified sign language interpreter, oral interpreter, cued-speech interpreter, or tactile interpreter; real-time captioning; written materials; or a printed script of a stock speech (such as given on a museum or historic house tour). A "qualified" interpreter means someone who is able to interpret effectively, accurately, and impartially, both receptively (i.e., understanding what the person with the disability is saying) and expressively (i.e., having the skill needed to convey information back to that person) using any necessary specialized vocabulary.
- For people who have speech disabilities, this may include providing a qualified speech-to-speech transliterator (a person trained to recognize unclear speech and repeat it clearly) , especially if the person will be speaking at length, such as giving testimony in court, or just taking more time to communicate with someone who uses a communication board. In some situations, keeping paper and pencil on hand so the person can write out words that staff cannot understand or simply allowing more time to communicate with someone who uses a communication board or device may provide effective communication. Staff should always listen attentively and not be afraid or embarrassed to ask the person to repeat a word or phrase they do not understand.

In addition, aids and services include a wide variety of technologies including:
1) Assistive listening systems and devices;
2) Open captioning, closed captioning, real-time captioning, and closed caption decoders and devices;
3) Telephone handset amplifiers, hearing-aid compatible telephones; text telephones (TTYs), videophones, captioned telephones, and other voice, text, and video-based telecommunications products;
4) Videotext displays;
5) Screen reader software, magnification software, and optical readers;
6) Video description and secondary auditory programming (SAP) devices that pick up video-described audio feeds for television programs;
7) Accessibility features in electronic documents and other electronic and information technology that is accessible (either independently or through assistive technology such as screen readers).

EFFECTIVE COMMUNICATION PROVISIONS

Covered entities must provide aids and services when needed to communicate effectively with people who have communication disabilities. The key to deciding what aid or service is needed to communicate **effectively** is to consider the nature, length, complexity, and context of the communication as well as the person's normal method(s) of communication.

Some easy solutions work in relatively simple and straightforward situations. For example:

- In a lunchroom or restaurant, reading the menu to a person who is blind allows that person to decide what dish to order.
- In a retail setting, pointing to product information or writing notes back and forth to answer simple questions about a product may allow a person who is deaf to decide whether to purchase the product.
- Other solutions may be needed where the information being communicated is more extensive or complex.

For example:
In a law firm, providing an accessible electronic copy of a legal document that is being drafted for a client who is blind allows the client to read the draft at home using a computer screen-reading program.

In a doctor's office, an interpreter generally will be needed for taking the medical history of a patient who uses sign language or for discussing a serious diagnosis and its treatment options.

A person's method(s) of communication are also key.
For example,

- Sign language interpreters are effective only for people who use sign language.
- Other methods of communication, such as those described above, are needed for people who may have lost their hearing later in life and does not use sign language.
- Similarly, Braille is effective only for people who read Braille.
- Other methods are needed for people with vision disabilities who do not read Braille, such as providing accessible electronic text documents, forms, etc. that can be accessed by the person's screen reader program.

Covered entities are also required to accept telephone calls placed through Telecommunication Relay Services (TRS) and Video Relay Services (VRS), and staff that answers the telephone must treat relay calls just like other calls. The communications assistant will explain how the system works if necessary.

Remember, the purpose of the effective communication rules is to ensure that the person with a communication disability can receive information from, and convey information to, the covered entity.

COMPANIONS

In many situations, covered entities communicate with someone other than the person who is receiving their goods or services. For example:

- School staff usually talk to a parent about a child's progress;
- Hospital staff often talks to a patient's spouse, other relative, or friend about the patient's condition or prognosis.

The rules refer to such people as "companions" and require covered entities to provide effective communication for companions who have communication disabilities.

The term "companion" includes any family member, friend, or associate of a person seeking or receiving an entity's goods or services who is an appropriate person with whom the entity should communicate.

USE OF ACCOMPANYING ADULTS OR CHILDREN AS INTERPRETERS

Historically, many covered entities have expected a person who uses sign language to bring a family member or friend to interpret for him or her. These people often lacked the impartiality and specialized vocabulary needed to interpret effectively and accurately. It was particularly problematic to use people's children as interpreters.

The ADA places responsibility for providing effective communication, including the use of interpreters, directly on covered entities. They cannot require a person to bring someone to interpret for him or her. A covered entity can rely on a companion to interpret in only two situations.

(1) In an emergency involving an imminent threat to the safety or welfare of an individual or the public, an adult or minor child accompanying a person who uses sign language may be relied upon to interpret or facilitate communication only when a qualified interpreter is not available.

(2) In situations **not** involving an imminent threat, an adult accompanying someone who uses sign language may be relied upon to interpret or facilitate communication when a) the individual requests this, b) the accompanying adult agrees, and c) reliance on the accompanying adult is appropriate under the circumstances. This exception does **not** apply to minor children.

Even under exception (2), covered entities may **not** rely on an accompanying adult to interpret when there is reason to doubt the person's impartiality or effectiveness. For example:

- It would be inappropriate to rely on a companion to interpret who feels conflicted about communicating bad news to the person or has a personal stake in the outcome of a situation.
- When responding to a call alleging spousal abuse, police should never rely on one spouse to interpret for the other spouse.

WHO DECIDES WHICH AID OR SERVICE IS NEEDED?

When choosing an aid or service, title II entities are required to give primary consideration to the choice of aid or service requested by the person who has a communication disability. The state or local government must honor the person's choice, unless it can demonstrate that another equally effective means of communication is available, or that the use of the means chosen would result in a fundamental alteration or in an undue burden (see limitations below).

If the choice expressed by the person with a disability would result in an undue burden or a fundamental alteration, the public entity still has an obligation to provide an alternative aid or service that provides effective communication if one is available.

Title III entities are **encouraged** to consult with the person with a disability to discuss what aid or service is appropriate. The goal is to provide an aid or service that will be effective, given the nature of what is being communicated and the person's method of communicating.

Covered entities may require reasonable advance notice from people requesting aids or services, based on the length of time needed to acquire the aid or service, but may not impose excessive advance notice requirements. "Walk-in" requests for aids and services must also be honored to the extent possible.

For more information about the ADA, please visit the website or call the toll-free number. www.ADA.gov
ADA Information Line 800-514-0301 (Voice) and 800-514-0383 (TTY)

ADA REQUIREMENTS FOR EFFECTIVE COMMUNICATION

The purpose of the effective communication rules is to ensure that the person with a vision, hearing or speech disability can communicate with, receive information from, and convey information to, the covered entity (physician office, clinic, hospital, nursing home, etc.)
Covered entities must provide auxiliary aids and services when needed to communicate effectively with people who have communication disabilities. The person with the disability can choose the type of aid/service.

Your patient may need assistance because …	These are some options we can provide for you…..
Am blind or have vision impairments that keep me from reading	- Large print materials - Physician can complete form for talking books through National Library Service for the Blind and Physically Handicapped https://www.loc.gov/nls/pdf/application.pdf - Physician can complete form for Vision enabled telephone-- http://www.californiaphones.org/application -Check with health plans to see what they have available (audio recordings of printed materials, etc.)
Am hard of hearing and have trouble hearing and understanding directions, or answering the doorbell	- Amplifier/ Pocket Talker - Written materials - Qualified sign language interpreter - Qualified note taker - Telecommunications Relay Service (TRS) 7-1-1 - Have physician dictate into voice-recognition software and patient can type answers back
Have difficulty speaking clearly and making myself understood	- Allow for extra time and attentive listening - Qualified note taker - Telecommunications Relay Services (TRS) 7-1-1 - Communication board or paper and pencil - Have physician dictate into voice-recognition software and patient can type answers back

* All requirements also apply to individual's companion or caregiver when communication with that person is appropriate. An individual's companion or caregiver should not be relied on to act as the qualified interpreter.

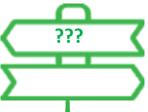
Language Services:
The KEY to Patient Engagement

Where do I start?
Check out the Q&A below to learn more...



Why does my office need a language service plan?

Clear communication is the absolute heart of medical practice. Seven out of ten surveyed physicians indicated that language barriers represent a top priority for the health care field[1]. Unaddressed barriers can:

- Compromise quality of care
- Result in poor outcomes
- Have legal consequences
- Increase litigation risk

Where do I start?

Get Ready:

- Gather your team
- Make a commitment
- Identify needs

Get Set: *identify resources*

Go: *pull it all together, implement, evaluate, plan for the future*

What language service needs should I begin to identify?

Keep it simple and write down:

- *What you know about your patient demographics*
- *What you already do to provide language services*
- *Where you can grow and strengthen your language services*

Where can I find resources?

- Providing Language Services
- Incorporating Interpreter Services
- Self-assessment checklist
- Language Access Assessment and Planning Tool

Get Ready, Get Set, Go!

Get ready!

- Identify a designee or small team and commit to improve your capacity to serve individuals with limited English proficiency (LEP)
- Identify the most common languages of LEP patients you serve
- Create a checklist of what is already in place related to: interpreters, qualified bilingual staff and translated materials
- Document what needs to be enhanced

Get set!

- Review resources and identify those most useful for your office

Go!

- Create plan, implement, evaluate and plan for the future:
- Staff training on language service plan and cultural competency

[1] Wirthlin Worldwide 2002 RWJF Survey

SUPPORTING PATIENTS WITH 211 AND 711 COMMUNITY SERVICES

211 and 711 are free and easy to use services that can be used as resources to support patients with special needs. Each of these services operates in all States and is offered at no cost to the caller 24 hours a day/7 days a week.

211

211 is a free and confidential service that provides a single point of contact for people that are looking for a wide range of health and human services programs. With one call, individuals can speak with a local highly trained service professional to assist them in finding local social services agencies. and guide them through the maze of groups that specialize in housing assistance, food programs, counseling, hospice, substance abuse and other aid.

For more information, look for your local 211.org.

711

711 is a no cost relay service that uses an operator, phone system and a special teletypewriter (TDD or TTY) to help people with hearing or speech impairments have conversations over the phone. The 711 relay service can be used to place a call to a TTY line or receive a call from a TTY line. Both voice and Telecommunications Relay Service (TRS) users can initiate a call from any telephone, anywhere in the United States, without having to remember and dial a seven or ten-digit access number.

Simply dial 711 to be automatically connected to a TRS operator. Once connected the t TRS operator will relay your spoken message in writing and will read responses back to you.

In some areas, 711 offers speech impairment assistance. Special trained speech recognition operators available to help facilitate communication with individuals that may have speech impairments.

For more information, visit http://ddtp.cpuc.ca.gov/homepage.aspx

SECTION B: RESOURCES TO COMMUNICATE ACROSS LANGUAGE BARRIERS

A GUIDE TO INFORMATION IN SECTION B

RESOURCES TO COMMUNICATE ACROSS LANGUAGE BARRIERS

This section offers resources to help health care providers identify the linguistic needs of their Limited English Proficient (LEP) patients and strategies to meet their communication needs.

Research indicates that LEP patients face linguistic barriers when accessing health care services. These barriers have negative impacts on patient satisfaction and knowledge of diagnosis and treatment. Patients with linguistic barriers are less likely to seek treatment and preventive services. This leads to poor health outcomes and longer hospital stays.

This section contains useful tips and ready-to-use tools to help remove the linguistic barriers and improve the linguistic competence of health care providers. The tools are intended to assist health care providers in delivering appropriate and effective linguistic services, which leads to:

- Increased patient health knowledge and compliance with treatment
- Decreased problems with patient-provider encounters and increased patient satisfaction
- Increased **appropriate** utilization of health care services by patients
- Potential reduction in liability from medical errors

The following materials area available in this section:

Tips for Working with LEP Members	Suggestions to help communicate with LEP patients.
Useful Tips for Communicating Across Language Barriers	Suggestions to help identify and document language needs.
Tips for Working with Interpreters	Suggestions to maximize the effectiveness of an interpreter.
Tips for Locating Interpreter Services	Information to know when locating interpreter services.
Common Sentences in Foreign Languages (Spanish & Vietnamese)	Simple phrases that can be used to communicate with LEP patients while waiting for an interpreter.
Common Signs in Foreign Languages (Spanish & Vietnamese)	Simple signs that can be enlarged and posted in your facility.
Language Identification Flashcard	Tool to identify patient languages.
Employee Language Pre-Screening Survey	Pre-screening tool to identify employees that may be eligible for formal language proficiency testing
Request for Proposal (RFP) Questions	Sample screening questions to interview translation vendors

TIPS FOR WORKING WITH LIMITED ENGLISH PROFICIENT MEMBERS

California law requires that health plans and insurers offer free interpreter services to both LEP members and health care providers and also ensure that the interpreters are professionally trained and are versed in medical terminology and health care benefits.

Who is a LEP member?

Individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English, may be considered limited English proficient (LEP).

How to identify a LEP member over the phone

- Member is quiet or does not respond to questions
- Member simply says yes or no, or gives inappropriate or inconsistent
- answers to your questions
- Member may have trouble communicating in English or you may have a
- very difficult time understanding what they are trying to communicate
- Member self identifies as LEP by requesting language assistance

Tips for working with LEP members and how to offer interpreter services

- Member speaks no English and you are unable to discern the language
- Connect with contracted telephonic interpretation vendor to identify language needed.
- Member speaks some English:
- Speak slowly and clearly. Do not speak loudly or shout. Use simple words and short sentences.
- How to offer interpreter services:

"*I think I am having trouble with explaining this to you, and I really want to make sure you understand. Would you mind if we connected with an interpreter to help us? Which language do you speak?*"

OR

"*May I put you on hold? I am going to connect us with an interpreter.*" (If you are having a difficult time communicating with the member)

Best practice to capture language preference

For LEP members it is a best practice to capture the members preferred language and record it in the plan's member data system.

"*In order for me (or Health Plan) to be able to communicate most effectively with you, may I ask what your preferred spoken and written language is?*"

*This universal symbol for interpretive services at the top right of this document is from Hablamos Juntos, a Robert Wood Johnson funded project found at:

http://www.hablamosjuntos.org/signage/symbols/default.using_symbols.asp#bpw

TIPS FOR COMMUNICATING: ACROSS LANGUAGE BARRIERS

Limited English Proficient (LEP) patients are faced with language barriers that undermine their ability to understand information given by healthcare providers as well as instructions on prescriptions and medication bottles, appointment slips, medical education brochures, doctor's directions, and consent forms. They experience more difficulty (than other patients) processing information necessary to care for themselves and others.

Tips to Identify a Patient's Preferred Language

- Ask the patient for their preferred spoken and written language.
- Display a poster of common languages spoken by patients; ask them to point to their language of preference.

Post information relative to the availability of interpreter services.

Make available and encourage patients to carry "I speak…." or "Language ID" cards.

(Note: Many phone interpreter companies provide language posters and cards at no charge.)

Tips to Document Patient Language Needs

For all Limited English Proficient (LEP) patients, document preferred language in paper and/or electronic medical records.

- Post color stickers on the patient's chart to flag when an interpreter is needed.

    (e.g. Orange =Spanish, Yellow=Vietnamese, Green=Russian).

Tips to Assessing which Type of Interpreter to Use

- Telephone interpreter services are easily accessed and available for short conversations or unusual language requests.
- Face-to-face interpreters provide the best communication for sensitive, legal or long communications.
- Trained bilingual staff provides consistent patient interactions for a large number of patients.
- For reliable patient communication, avoid using minors and family members.

Tips to Overcome Language Barriers

Use Simple Words	• Avoid jargon and acronyms • Provide educational material in the languages your patients read • Limit/avoid technical language
Speak Slowly	• Do not shout, articulate words completely • Use pictures, demonstrations, video or audiotapes to increase understanding • Give information in small chunks and verify comprehension before going on.
Repeat Information	• Always confirm patient's understanding of the information - patient's logic may be different from yours

TIPS FOR WORKING WITH INTERPRETERS

TELEPHONIC INTERPRETERS

- Tell the interpreter the purpose of your call. Describe the type of information you are planning to convey. *
- Enunciate your words and try to avoid contractions, which can be easily misunderstood as the opposite of your meaning, e.g., "can't - cannot." *
- Speak in short sentences, expressing one idea at a time.*
- Speak slower than your normal speed of talking, pausing after each phrase.*
- Avoid the use of double negatives, e.g., "If you don't appear in person, you won't get your benefits"*
- Instead, "You must come in person in order to get your benefits."
- Speak in the first person. Avoid the "he said/she said." *
- Avoid using colloquialisms and acronyms, e.g., "MFIP." If you must do so, please explain their meaning.*
- Provide brief explanations of technical terms, or terms of art, e.g., "Spend-down" means the client must use up some of his/her monies or assets in order to be eligible for services." *
- Pause occasionally to ask the interpreter if he or she understands the information that you are providing, or if you need to slow down or speed up in your speech patterns. If the interpreter is confused, so is the client. *
- Ask the interpreter if, in his or her opinion, the client seems to have grasped the information that you are conveying. You may have to repeat or clarify certain information by saying it in a different way.*
- **ABOVE ALL, BE PATIENT** with the interpreter, the client and yourself! Thank the interpreter for performing a difficult and valuable service. *
- The interpreter will wait for you to initiate the closing of the call and will be the last to disconnect from the call.

When working with an interpreter over a speakerphone or with dual head/handsets, many of the principles of on-site interpreting apply. The only additional thing to remember is that the interpreter is "blind" to the visual cues in the room. The following will help the interpreter do a better job. **

When the interpreter comes onto the line let the interpreter know the following: **

- Who you are
- Who else is in the room
- What sort of office practice this is
- What sort of appointment this is

For example, "Hello interpreter, this is Dr. Jameson, I have Mrs. Dominguez and her adult daughter here for Mrs. Dominguez' annual exam." **

- Give the interpreter the opportunity to introduce himself or herself quickly to the patient. **
- If you point to a chart, a drawing, a body part or a piece of equipment, describe what you are pointing to as you do it.**

ON-SITE INTERPRETERS

- Hold a brief meeting with the interpreter beforehand to clarify any items or issues that require special attention, such as translation of complex treatment scenarios, technical terms, acronyms, seating arrangements, lighting or other needs.
- For **face-to-face** interpreting, position the interpreter off to the side and immediately behind the patient so that direct communication and eye contact between the provider and patient is maintained.
- For **American Sign Language (ASL)** interpreting, it is usually best to position the interpreter next to you as the speaker, the hearing person or the person presenting the information, opposite the deaf or hard of hearing person. This makes it easy for the deaf or hard of hearing person to see you and the interpreter in their line of sight.
- **Be aware** of possible gender conflicts that may arise between interpreters and patients. In some cultures, males should not be requested to interpret for females.
- **Be attentive** to cultural biases in the form of preferences or inclinations that may hinder clear communication. For example, in some cultures, especially Asian cultures, "yes" may not always mean "yes." Instead, "yes" might be a polite way of acknowledging a statement or question, a way of politely reserving one's judgment, or simply a polite way of declining to give a definite answer at that juncture.
- **Greet the patient first**, not the interpreter. **
- During the medical interview, speak directly to the patient, not to the interpreter: "Tell me why you came in today" instead of "Ask her why she came in today." **
- A professional interpreter will use the first person in interpreting, reflecting exactly what the patient said: e.g. "My stomach hurts" instead of "She says her stomach hurts." This allows you to hear the patient's "voice" most accurately and deal with the patient directly. **
- Speak at an even pace in relatively short segments; pause often to allow the interpreter to interpret. You do not need to speak especially slowly; this actually makes a competent interpreter's job more difficult. **
- Don't say anything that you don't want interpreted; it is the interpreter's job to interpret everything. **
- If you must address the interpreter about an issue of communication or culture, let the patient know first what you are going to be discussing with the interpreter. **

- Speak in: Standard English (avoid slang) **
    - Layman's terms (avoid medical terminology and jargon)
    - Straightforward sentence structure
    - Complete sentences and ideas
- Ask one question at a time. **
- Ask the interpreter to point out potential cultural misunderstandings that may arise.
  Respect an interpreter's judgment that a particular question is culturally inappropriate and either rephrase the question or ask the interpreter's help in eliciting the information in a more appropriate way. **
- Do not hold the interpreter responsible for what the patient says or doesn't say. The interpreter is the medium, not the source, of the message. **
- Avoid interrupting the interpretation. Many concepts you express have no linguistic or conceptual equivalent in other languages. The interpreter may have to paint word pictures of many terms you use.
- This may take longer than your original speech. **
- Don't make assumptions about the patient's education level. An inability to speak English does not necessarily indicate a lack of education. **
- Acknowledge the interpreter as a professional in communication. Respect his or her role. **

** "Addressing Language Access Issues in Your Practice - A Toolkit for Physicians and Their Staff Members," California Endowment website.
* "Limited English Proficiency Plan," Minnesota Department of Human Services: Helpful hints for using telephone interpreters (page 6).

TIPS FOR LOCATING INTERPRETER SERVICES

Steps I need to take to locate interpreter services:

1) Identify the languages spoken by your patients, and
2) Identify the language services available to meet these needs

For example:

Language spoken by my patients	Resources to help me communicate with patients
Spanish	Certified bilingual staff
Armenian	Telephone interpreter or in person interpreter

Identify the language capability of your staff (See Employee Language Skills Self-Assessment)
• Keep a list of available certified bilingual staff that can assist with LEP patients on-site.
• Ensure the competence of individuals providing language assistance by formally testing with a qualified bilingual proficiency testing vendor. Certified interpreters are HIPAA compliant.
• Do Not: Rely on staff other than certified bilingual/multilingual staff to communicate directly with individuals with limited English proficiency
• Do Not: Rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available. ***IF you use a minor, document the reason a minor was used.***

Identify services available do not require an individual with limited English proficiency to provide his/her own interpreter
• **Ask all health plans you work with if and when they provide interpreter services, including American Sign Language interpreters, as a covered benefit for their members.**
• **Identify community based qualified interpreter resources**
• **Create and provide to your staff policies and procedures to access interpreter services.**
• **Keep an updated list of specific telephone numbers and health plan contacts for language services.**
• **If you are coordinating interpreter services directly, ask the agency providing the interpreter how they determine interpreter quality.**
• **711 relay services are available to assist in basic communication with deaf or hard of hearing patients. In some areas services to communicate with speech impaired individuals may also be available.**

For further information, you may contact the National Council on Interpretation in Health Care, the Society of American Interpreters, the Translators & Interpreters Guild, the American Translators Association, or any local Health Care Interpreters association in your area.

LANGUAGE IDENTIFICATION FLASHCARDS

The sheets on the following page can be used as a tool to assist the office staff or physician in identifying the language that your patient is speaking. Pass the sheets to the patient and point to the English statement. Motion to have the patient read the other languages and to point to the language that the patient prefers. (Conservative gestures can communicate this.) Record the patient's language preference in their medical record.

The **Language Identification Flashcard** was developed by the U.S. Census Department and can be used to identify most languages that are spoken in the United States.

Printer friendly version of the Language Assistance Flashcard is on next page.

Interpreting Services Available

English Translation: Point to your language. An interpreter will be called. The interpreter is provided at no cost to you.

EMPLOYEE LANGUAGE PRE-SCREENING TOOL

Dear Physician:

The attached prescreening tool is provided as a resource to assist you in identifying employees that may be eligible for formal language proficiency testing. Those who self-assess at 3 or above are candidates that are more likely to pass a professional language assessment.

This screening tool is not meant to serve as an assessment for qualified medical interpreters or meet the CA Language Assistance Program law or any other regulatory requirements.

Thank you

Printer friendly version of the EMPLOYEE LANGUAGE PRE SCREENING TOOL KIT provided on next page.

EMPLOYEE LANGUAGE PRE SCREENING TOOK KEY

Key	Spoken Language
(1)	Satisfies elementary needs and minimum courtesy requirements. Able to understand and respond to 2-3 word entry-level questions. May require slow speech and repetition.
(2)	Meets basic conversational needs. Able to understand and respond to simple questions. Can handle casual conversation about work, school, and family. Has difficulty with vocabulary and grammar.
(3)	Able to speak the language with sufficient accuracy and vocabulary to have effective formal and informal conversations on most familiar topics related to health care.
(4)	Able to use the language fluently and accurately on all levels related to health care work needs. Can understand and participate in any conversation within the range of his/her experience with a high degree of fluency and precision of vocabulary. Unaffected by rate of speech.
(5)	Speaks proficiently equivalent to that of an educated native speaker. Has complete fluency in the language, including health care topics, such that speech in all levels is fully accepted by educated native speakers in all its features, including breadth of vocabulary and idioms, colloquialisms, and pertinent cultural preferences. Usually has received formal education in target language.
Key	**Reading**
(1)	No functional ability to read. Able to understand and read only a few key words.
(2)	Limited to simple vocabulary and sentence structure.
(3)	Understands conventional topics, non-technical terms and heath care terms.
(4)	Understands materials that contain idioms and specialized health care terminology; understands a broad range of literature.
(5)	Understands sophisticated materials, including those related to academic, medical and technical vocabulary.
Key	**Writing**
(1)	No functional ability to write the language and is only able to write single elementary words.
(2)	Able to write simple sentences. Requires major editing.
(3)	Writes on conventional and simple health care topics with few errors in spelling and structure. Requires minor editing.
(4)	Writes on academic, technical, and most health care and medical topics with few errors in structure and spelling.
(5)	Writes proficiently equivalent to that of an educated native speaker/writer. Writes with idiomatic ease of expression and feeling for the style of language. Proficient in medical, healthcare, academic and technical vocabulary.

Interpretation vs. Translation	
Interpretation vs. Translation	**Interpretation:** Involves spoken communication between two parties, such as between a patient and a pharmacist, or between a family member and doctor. **Translation:** Involves very different skills from interpretation. A translator takes a written document in one language and changes it into a document in another language, preserving the tone and meaning of the original. *Source: University of Washington Medical Center*

EMPLOYEE LANGUAGE PRESCREENING TOOL (FOR CLINICAL AND NON-CLINICAL EMPLOYEES)

This prescreening tool is intended for clinical and non-clinical employees who are bilingual and are being considered for formal language proficiency testing.

Employee's Name: ______________________________ **Department/Job Title:** ____________________
____

Work Days: **Mon / Tues/ Wed/ Thurs/ Fri/ Sat/ Sun** **Work Hours (Please Specify):** _______________
____

Directions: (1) List any/all language(s) or dialects you know.
(2) Indicate how fluently you speak, read and/or write each language

Language	Dialect, region, or country	Fluency: see attached key (Circle)			I would like to use my language skills to speak with patients (Circle)	I would like to use my reading language skills to communicate with patients (Circle)	I would like to use my language skills to write patient communications (Circle)
		Speaking	Reading	Writing			
1.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
2.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
3.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
4.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No

TO BE SIGNED BY THE PERSON COMPLETING THIS FORM

I, ____, attest that the information provided above is accurate.

SCREENING QUESTIONS FOR INTERVIEWING TRANSLATION VENDORS

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
General Business Requirements Questions
1. What geographic areas do you currently serve?
2. Please indicate your areas of expertise (i.e. Medical/Health, Education, Law, etc.).
3. Is your company aware and automatically follow special certifications for states you provide services in/for?
4. Please list all languages currently available. List only languages that have at least one active translator currently and regularly available. Also list whether the translators available are native speakers and if so, where they are from.
5. Please list the 3-5 most common languages your organization translates.
6. Describe your process for translating documents based on regional dialects for one language. For example, how do you facilitate translating a document into Spanish for Southern California and New York?
7. Describe how your translation staff is knowledgeable in the sensitivities, norms, and regional dialects of various cultural groups?
8. Please list all national states and global countries you provide Services in.
9. What differentiates your company from your competition as it relates to the services outlined in this RFP?
10. Are you able to customize your services at the client level? Please provide an example of how you may customize other programs in place.
11. Is your company able to assign dedicated resource team to support services?
12. What percent of your current business is providing services within the health care industry?
13. Please define the language proficiency of medical terminology and use of health care industry language for employees providing services.
14. Do you use validated test instruments to assess your medical or health care terminology translators?
15. Do you support the most recent version of InDesign?
16. What is your process for ensuring software capabilities are up-to-date while still maintaining support for older file formats?
17. Can you produce translations on any day of the year?
18. What are your company's top three measures of a successful relationship between your company's organization and your clients? State how your company would measure and report each.
19. Please demonstrate how your company was flexible with an unusual client request.
20. What is your process to work with document owners to fine tune translations to match their specific target audience?

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
21. Do you maintain a translation glossary for each of your clients? (Glossary- a set of terms and their preferred translation)
22. Are you open to the total translation memory being provided to us (health plan) upon request?
23. Can you provide Spanish translations and translations into traditional Chinese characters within 24 hours?
Administration Questions
1. What are your standard hours of operation?
2. Do you have a privacy and confidentiality policy? If yes, please describe.
3. What are your policies regarding direct contact between a translator and the client?
4. What is the average amount of time to complete a translated document from receipt to delivery?
5. How much advance notice is needed to request translation services?
Customer Service Questions
1. Please describe your Customer Service model for these services.
2. Please describe the grievance and complaint escalation process and resolution of service issues?
3. What is the experience level of project management team with localization and cultural adaptation?
4. What is the coverage of services for different time zones?
5. Do you provide full or partial services on holidays and weekends?
6. Describe new hire onboarding and ongoing training and specialized health care industry training provided to staff and/or contracted individuals.
7. Please explain your capabilities to ensure cultural adaptation.
Service Level Questions
1. Please list and describe your standard Service Levels. You may attach them separately.
2. Do you offer service guarantees? If yes, please provide.
Translation Services Questions
1. How long has your company been providing Translation Services as part of its offering?
2. Process - Please provide an overview of your full Translation Services process from initial engagement from customer to completion.
3. Please translate the provided document labeled "XXXX"
Quality Assurance Practices/Proficiencies Questions
1. Please describe the process for screening potential interpreters and translators.
2. What are the educational credentials of your translators? Do your credentialed translators do all the translation work or do they merely supervise the work of others?
3. Are your translator's employees of the company or are they contracted employees? What percentage belongs to each group (% employees and % contracted)?

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
4. Please indicate which of the following skills are evaluated in an initial screening or translators: ___Basic Language Skills ___Industry Specific Terminology ___Cultural Awareness ___Ethics ___Written Translation Skills ___Others (Please explain)
5. What training program is provided to translators once they have been hired? Please include details of any in-house or outsourced training including number of hours, topics covered, etc.
6. Is continuing education required? If yes, how many hours per year?
7. What percentage of your translators are certified by: ___Internal Process ___State Process ___Federal Court ___Private External Organization (please list)
8. Describe your internal quality control or monitoring process.
9. What system do you have in place to resolve complaints?
10. Please describe your accuracy standards. What guarantees do you provide? Would you be willing to put 20 percent of your fees at risk contingent upon meeting agreed-upon guaranteed standards? Would you consider a Service Level Agreement (SLA)? If so, what standards do you customarily include in an SLA?
11. Do you provide an attestation or Certificate of Authenticity or equivalent document? If so, please provide a sample.
12. Please list all certifications and all other QM certifications your company holds/maintains.
13. Please describe your Quality Assurance program.
14. How often does your company review and revise the quality program?
15. How does your company ensure quality of services, including linguists and document translations, and actions for substandard performance?
16. Do you have a process to guarantee consistency between translations from multiple linguists? Please define this process and describe the process to ensure localization, terminology consistency, accuracy and appropriate literacy.
17. Describe your quality control processes. What do you have in place to assure that structure and format are precisely the same as the English original
18. How long has your company been providing Proficiency and Certification Services as part of its offering?
19. Please provide an overview of your Proficiency and Certification Service program.
20. Does your program include examination of general language usage in formal and professional context? Please Define.
21. Does your program include examination of fluency in the assessment language?
22. Describe industry experience and Supplier ability to use terminology and phrases in the assessment language that is specific to the healthcare industry
23. What type of reporting/scoring system does your program use to determine examinees proficiency level in the assessment language. The proficiency level describes the examinee's performance in several areas of oral language proficiency. If applicable, please include sample scorecard.

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
Experience Questions
1. How long have you been in business?
2. Please provide at least three references.
3. Please list current health care organization clients for whom you have provided written translation services. Please list the types of documents that have been translated for health care clients.
4. Can your organization guarantee that translators working on <<client's name>> documents will have had experience translating health care documents?
5. How do you address the uniqueness of some terminology that occurs in health care, particularly complementary health care?
6. Please describe your experience in translating health web sites and images. If applicable, please provide the names of client for which you have provided this service.
7. Do you currently or have you furnished translation services to any federal, state or local agency? If yes, list the organization and type of service provided.
8. Describe your range of graphic design/desktop publishing services that you provide, including both print and Web. Please indicate the number of staffed designers you have and the design software (PC/Mac Quark, InDesign, PageMaker, Illustrator, Freehand, Photoshop, Dream weaver, etc.) your staff uses to create brochures, flyers, and other marketing/education materials. Please provide a breakdown of the additional costs and average turnaround times associated with your graphic design services, including making changes or edits.
9. Describe whether or not your services include the review of culturally sensitive images and text. For example, do your services include the review of images within a graphic document in order to determine whether they are culturally sensitive and appropriate?
Reporting Questions
1. Do you offer a standard reporting package? If yes, please attach.
2. Do you provide reports confirming language proficiency of employees or contractors that provide services?
Fee Questions
1. Please describe your pricing practices and fee schedule.
2. Do you provide estimates for work to be performed? If so, please provide a quote to translate the attached documents into Spanish?
3. What kind of volume discounts do you offer?
4. Do you offer services on a single use basis?
5. What information is provided on billing statements? Please include a sample.

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
6. What is your pricing/billing policy for making edits or changes to documents translated? For a document that is 40 pages in length, what would the cost be to translate into 6 languages by in-country translators: ___Simplified Chinese for China ___Japanese ___Canadian French ___Russian ___Brazilian Portuguese ___Argentine Spanish
7. What is your pricing/billing policy for making edits or changes to documents translated? For a document that is 40 pages in length, what would the cost be to translate into 6 languages by in-country translators: ___Simplified Chinese for China ___Japanese ___Canadian French ___Russian ___Brazilian Portuguese ___Argentine Spanish
8. What guarantees are available if the work produced does not meet our expectations?
9. What is your flexibility and cost implication of translating a document into different dialects of one language? Are multiple dialects the same cost as multiple languages?
10. Are your prices the same for all languages; common and rarely spoken?
11. <<Client's name>> generally remits payment within 45 days of invoice date. Please indicate if this is not acceptable? What are your standard payment terms?
12. Please list and describe any fees associated with your program(s) and please list all rates associated with different languages, countries, processes, e.g. project management, engineering, translation or telephonic per minute rates, etc.
13. Do you provide pricing for leveraged (previously translated) words?
14. Are all translations priced per word or is there a minimum charge per document? For example if the content to be translated is 50 words, is the pricing per word or based on a minimum word count?
15. Do you charge for attestations, desk top publishing, rush jobs or providing documents in many different programs such as providing the same document in Word, PDF and In-Design or Quark?
Technology Questions
1. Do you use a submission portal? If so, is all communication via the submission portal?
2. What technology is used to manage translation memory?

SECTION C: RESOURCES TO INCREASE AWARENESS OF CULTURAL BACKGROUNDS AND ITS IMPACT ON HEALTH CARE DELIVERY

A GUIDE TO INFORMATION IN SECTION C

Resources to Increase Awareness of Cultural Background and its Impact on Health Care Delivery

Everyone approaches illness as a result of their own experiences, including education, social conditions, economic factors, cultural background, and spiritual traditions, among others. In our increasingly diverse society, patients may experience illness in ways that are different from their health professional's experience. Sensitivity to a patient's view of the world enhances the ability to seek and reach mutually desirable outcomes. If these differences are ignored, unintended outcomes could result, such as misunderstanding instructions and poor compliance.

The following tools are intended to help you review and consider important factors that may have an impact on health care. Always remember that even within a specific tradition, local and personal variations in belief and behavior exist. Unconscious stereotyping and untested generalizations can lead to disparities in access to service and quality of care. The bottom line is: if you don't know your patient well, ask respectful questions. Most people will appreciate your openness and respond in kind.

The following materials are available in this section:

What is Health Disparities/Health Equity?	A detained description of Health Disparities
Let's Talk About Sex	A guide to help you understand and discuss gender roles, modesty, and privacy preferences that vary widely among different people when taking sexual health history information.
Delivering Care to Lesbian, Gay, bisexual or Transgender (LGBT)	A guide to the Lesbian, Gay, Bisexual or Transgender communities.
Cultural Background – Information on Special Topics	Points of reference to become familiar with diverse cultural backgrounds.
Effectively Communicating with the Elderly	A tip sheet on how to better communicate with elderly patients.
Pain Management Across Cultures	A guide to help you understand the ways people may use to describe pain and approach to treatment options.

HEALTH EQUITY, HEALTH EQUALITY AND HEALTH DISPARITIES

What does health equity mean?
Health Equity is attainment of the highest level of health for all people.

Achieving health equity requires valuing everyone equally with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities.

Source: http://minorityhealth.hhs.gov/npa/files/Plans/NSS/NSS_05_Section1.pdf

What are health disparities and why do they matter to all of us?
A health disparity is a particular type of health difference that is closely linked with social or economic disadvantage.

Health disparities adversely affect groups of people who have systematically experienced greater social and/or economic obstacles to health and/or a clean environment based on:

- Racial or ethnic group
- Religion
- Socioeconomic status
- Gender
- Age
- Mental health
- Cognitive, sensory, or physical disability
- Sexual orientation
- Geographic location
- Other characteristics historically linked to discrimination or exclusion

Source: http://minorityhealth.hhs.gov/npa

Health disparities matter to all of us. Here are just 2 examples of what can happen when there are disparities…

Example 1: *A man who speaks only Spanish is not keeping his blood sugar under control because he does not understand how to take his medication. As a result, he suffers permanent vision loss in one eye.*

Example 2: *A gay man is treated differently after telling office staff that he is married to a man, and feels so uncomfortable that he does not tell the doctor his serious health concerns. As a result, he does not get the tests that he needs, his cancer goes untreated, and by the time he is diagnosed his tumor is stage 4.*

The Difference between Health Equality and Health Equity
Why treating everyone the same, without acknowledgement of diversity and the need for differentiation, may be clinically counterproductive

Equality denotes that everyone is at the same level. **Equity** refers to the qualities of justness, fairness, impartiality and evenhandedness, while equality is about equal sharing and exact division. Source: http://www.differencebetween.net/language/difference-between-equity-and-equality

Health equity is different from health equality. The term refers specifically to the **absence of disparities in controllable areas** of health. It may not be possible to achieve complete health equality, as some factors are beyond human control. Source: World Health Organization, http://www.who.int.healthsystems/topics/equity

An example of **health inequality** is when one population dies younger than another because of genetic differences that cannot be controlled. An example of **health inequity** is when one population dies younger than another because of poor access to medications, which is something that could be controlled. Source: Kawachi I., Subramanian S., Almeida-Filho N. "A glossary for health inequalities. *J Epidemiol Community Health* 2002; 56:647-652.

Health Equity and Culturally and Linguistically Appropriate Services (CLAS)
How are they connected?

Health inequities in our nation are well documented. The provision of culturally and linguistically appropriate services (CLAS) is one strategy to help eliminate health inequities.

By tailoring services to an individual's culture and language preference, you can help bring about **positive health outcomes** for diverse populations.

The provision of health care services that **are respectful of and responsive to the health beliefs, practices and needs of diverse patients** can help close the gap in health care outcomes.

The pursuit of health equity must remain at the forefront of our efforts. We must always remember that dignity and quality of care are rights of all and not the privileges of a few.

For more background and information on CLAS, visit https://www.thinkculturalhealth.hhs.gov

Plans for Achieving Health Equity and What You Can Do

With growing concerns about health inequities and the need for health care systems to reach increasingly diverse patient populations, cultural competence has become more and more a matter of national concern.

As a health care provider, you can take the first step to improve the quality of health care services given to diverse populations.

By learning to be more **aware of your own cultural beliefs** and more responsive to those of your patients, you and your office staff can think in ways you might not have before. That can lead to self-awareness and, over time, changed beliefs and attitudes that will translate into **better health care**.

Knowing your patients and making sure that you **collect and protect specific data**, for example their preferred spoken and written languages, can have a major impact on their care.

The website https://www.thinkculturalhealth.hhs.gov , sponsored by the Office of Minority Health, offers the latest resources and tools to promote cultural and linguistic competency in health care.

You may access free and accredited continuing education programs as well as tools to help you and your organization provide respectful, understandable and effective services.

Source: Think Cultural Health (TCH), https://www.thinkculturalhealth.hhs.gov **Think Cultural Health** *is the flagship initiative of the OMH Center for Linguistic and Cultural Competence in Health Care. The goal of* **Think Cultural Health** *is to Advance Health Equity at Every Point of Contact through the development and promotion of culturally and linguistically appropriate services*

Who else is addressing Health Disparities?

Many groups are working to address health disparities, including community health workers, patient advocates, hospitals, and health plans as well as government organizations.

The Affordable Care Act (ACA) required the establishment of Offices of Minority Health within six agencies of the Department of Health and Human Services (HHS):

- Agency for Healthcare Research and Quality (AHRQ)
- Centers for Disease Control and Prevention (CDC)
- Centers for Medicare & Medicaid Services (CMS)
- Food and Drug Administration (FDA)
- Health Resources and Services Administration (HRSA)
- Substance Abuse and Mental Health Services Administration (SAMHSA)

These offices join the HHS Office of Minority Health and NIH National Institute on Minority Health and Health Disparities to lead and coordinate activities that improve the health of racial and ethnic minority populations and eliminate health disparities. Source: Offices of Minority http://minorityhealth.hhs.gov

LET'S TALK ABOUT SEX

Consider the following strategies when navigating the cultural issues surrounding the collection of sexual health histories.

Areas of Cultural Variation	Points To Consider	Suggestions
Gender Roles	• Gender roles vary and change as the person ages (i.e. women may have much more freedom to openly discuss sexual issues as they age). • A patient may not be permitted to visit providers of the opposite sex unaccompanied (i.e. a woman's husband or mother-in-law will accompany her to an appointment with a male provider). • Some cultures prohibit the use of sexual terms in front of someone of the opposite sex or an older person. • Several family members may accompany an older patient to a medical appointment as a sign of respect and family support.	• Before entering the exam room, tell the patient and their companion exactly what the examination will include and what needs to be discussed. Offer the option of calling the companion(s) back into the exam room immediately following the physical exam. • As you invite the companion or guardian to leave the exam room, have a health professional of the same gender as the patient standing by and re-assure the companion or guardian that the person will be in the room at all times. • Use same sex non-family members as interpreters.
Sexual Health and Patient Cultural Background	• If a sexual history is requested during a non-related illness appointment, patients may conclude that the two issues – for example, blood pressure and sexual health are related. • In many health belief systems there are connections between sexual performance and physical health that are different from the Western tradition. • Example: Chinese males may discuss sexual performance problems in terms of a "weak liver. • Be aware that young adults may not be collecting sexual history information is part of preventive care and is not based on an assumption that sexual behaviors are taking place. • Printed materials on topics of sexual health may be considered inappropriate reading materials.	• Explain to the patient why you are requesting sexually related information at that time. • For young adults, clarify the need for collecting sexual history information and consider explaining how you will protect the confidentiality of their information. • Offer sexual health education verbally. Whenever possible, provide sexual health education by a health care professional who is the same t. gender as the patient

Areas of Cultural Variation	Points To Consider	Suggestions
Confidentiality Preferences	• Patients may not tell you about their preferences and customs surrounding the discussion of sexual issues. You must watch their body language for signals or discomfort, or ask directly how they would like to proceed. • A patient may be required to bring family members to their appointment as companions or guardians. Printed materials on topics of sexual health may be considered inappropriate reading materials. • Be attentive to a patient's body language or comments that may indicate that they are uncomfortable discussing sexual health with a companion or guardian in the room.	• It may help to apologize for the need to ask sexual or personal questions. Apologize and explain the necessity. • Try to offer the patient a culturally acceptable way to have a confidential conversation. For example: "To provide complete care, I prefer one-on-one discussions with my patients. However, if you prefer, you may speak with a female/male nurse to complete the initial information." • Inform the patient and the accompanying companion(s) of any applicable legal requirements regarding the collection and protection of personal health information.

LESBIAN, GAY, BISEXUAL OR TRANSGENDER (LGBT)

Communities are made up of many diverse cultures, sexual orientations, and gender identities. Individuals who identify as lesbian, gay, bisexual or transgender (LGBT)[1] may have unmet health and health care needs resulting in health disparities. In fact, the LGBT community is subject to a disproportionate number of health disparities and is at higher risk for poor health outcomes.

According to Healthy People 2020[2], LGBT health disparities include:

Psychosocial Considerations

- Youth are 2 to 3 times more likely to attempt suicide and are more likely to be homeless.
- LGBT populations have the highest rates of tobacco, alcohol, and other drug use.
- Elderly LGBT individuals face additional barriers to health because of isolation and a lack of social services and culturally competent providers.

Clinical Considerations

- Lesbians are less likely to get preventive services for cancer; along with bisexual females are more likely to be overweight or obese.
- Gay men are at higher risk of HIV and other STDs, especially among communities of color.
- Transgender individuals have a high prevalence of HIV/STDs, victimization, mental health issues, and suicide and are less likely to have health insurance than straight or LGB individuals.

Visit glma.org for more information about:

- Creating a welcoming environment,
- General guidelines (including referral resources),
- Confidentiality, and
- Sensitivity training.

Visit glaad.org for additional resources on how to fairly and accurately report on transgender people

[1] The term LGBT is used as an umbrella term to describe a person's sexual orientation or gender identity/expression including (but not limited to) lesbian, gay, bisexual, transgender, queer, questioning, intersex, and asexual. Transgender is an umbrella term for a person who's gender identity or expression does not match their sex assigned at birth.
[2] https://www.healthypeople.gov/2020/topics-objectives/topic/lesbian-gay-bisexual-and-transgender-health

Do not use any gender or sexual orientation terms to identify your patient without verifying how they specifically self-identify.

CULTURAL BACKGROUND INFORMATION ON SPECIAL TOPICS

Use of Alternative or Herbal Medications

- People who have lived in poverty, or come from places where medical treatment is difficult to get, will often come to the doctor only after trying many traditional or home treatments. Usually patients are very willing to share what has been used if asked in an accepting, nonjudgmental way. This information is important for the accuracy of the clinical assessment.

- Many of these treatments are effective for treating the symptoms of illnesses. However, some patients may not be aware of the difference between treating symptoms and treating the disease.
- Some treatments and "medicines" that are considered "folk" medicine or "herbal" medications in the United States are part of standard medical care in other countries. Asking about the use of medicines that are "hard to find" or that are purchased "at special stores" may get you a more accurate understanding of what people are using than asking about **"alternative," "traditional," "folk," or "herbal" medicine.**

Pregnancy and Breastfeeding

- Preferred and acceptable ages for a first pregnancy vary from culture to culture. Latinos are more accepting of teen pregnancy; in fact it is quite common in many of the countries of origin. Russians tend to prefer to have children when they are older. It is important to understand the cultural context of any particular pregnancy. Determine the level of social support for the pregnant women, which may not be a function of age.

- Acceptance of pregnancy outside of marriage also varies from culture to culture and from family to family. In many Asian cultures there is often a profound stigma associated with pregnancy outside of marriage. However, it is important to avoid making assumptions about how welcome any pregnancy may be.
- Some Vietnamese and Latino women believe that colostrum is not good for a baby. An explanation from the doctor about why the milk changes can be the best tool to counter any negative traditional beliefs.
- The belief that breastfeeding works as a form of birth control is very strongly held by many new immigrants. It is important to explain to them that breastfeeding does not work as well for birth control if the mother gets plenty of good food, as they are more able to do here than in other parts of the world.

Weight

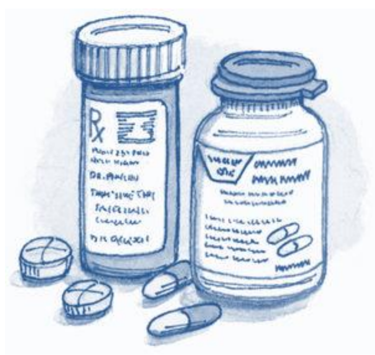
- In many poor countries, and among people who come from them, "chubby" children are viewed as healthy children because historically they have been better able to survive childhood diseases. Remind parents that sanitary conditions and medical treatment here protect children better than extra weight.
- In many of the countries that immigrants come from, weight is seen as a sign of wealth and prosperity. It has the same cultural value as extreme thinness has in our culture – treat it as a cultural as well as a medical issue for better success.

Infant Health

- It is very important to avoid making too many positive comments about a baby's general health.
    - Among traditional Hmong, saying a baby is "pretty" or "cute" may be seen as a threat because of fears that spirits will be attracted to the child and take it away
    - Some traditional Latinos will avoid praise to avoid attracting the "evil eye"
    - Some Vietnamese consider profuse praise as mockery
- It is often better to focus on the quality of the mother's care – "the baby looks like you take care of him well."
- Talking about a new baby is an excellent time to introduce the idea that preventive medicine should be a regular part of the new child's experience. Well-baby visits may be an entirely new concept to some new mothers from other countries. Protective immunizations are often the most accepted form of preventive medicine. It may be helpful to explain well-baby visits and check-ups as a kind of extension of the immunization process.

Substance Abuse

- When asking question regarding issues of substance (or physical) abuse, concerns about family honor and privacy may come into play. For example, in Vietnamese and Chinese cultures family loyalty, hierarchy, and filial piety are of the utmost importance and may therefore have a direct effect on how a patient responds to questioning, especially if family members are in the same room. Separating family members, even if there is some resistance to the idea, may be the only way to accurately assess some of these problems.



- Gender roles are often expressed in the use or avoidance of many substances, especially alcohol and cigarettes. When discussing and treating these issues the social component of the abuse needs to be considered in the context of the patient's culture.
- Alcohol is considered part of the meal in many societies, and should be discussed together with eating and other dietary issues.

Physical Abuse

- Ideas about acceptable forms of discipline vary from culture to culture. In particular, various forms of corporal punishment are accepted in many places. Emphasis must be placed on what is acceptable ***here***, and what may cause physical harm.
- Women may have been raised with different standards of personal control and autonomy than we expect in the United States. They may be accepting physical abuse *not* because of feelings of low self-esteem, but because it is socially accepted among their peers, or because they have nobody they can go to with their concerns. It is important to treat these cases as social rather than psychological problems.
- Immigrants learn quickly that abuse is reported and will lead to intervention by police and social workers. Even victims may not trust doctors, social workers, or police. It may take time and repeated visits to win the trust of patients. Remind patients that they do not have to answer questions (silence may tell you more than misleading answers). Using depersonalized conversational methods will increase success in reaching reluctant patients.
- Families may have members with conflicting values and rules for acceptable behavior that may result in conflicting reports about suspected physical abuse. This does not necessarily mean that anyone is being deceptive, just seeing things differently. This may cause special difficulties for teens who may have adopted new cultural values common to Western society, but must live in families that have different standards and behaviors.
- Behavioral indicators of abuse are different in different cultures. Many people are not very emotionally and physically expressive of physical and mental pain. Learn about the cultural norms of your patient populations to avoid overlooking or misinterpreting unknown signs of trauma.
- Do not confuse physical evidence of traditional treatments with physical abuse. Acceptable traditional treatments, such as coin rubbing or cupping, may leave marks on the skin, which look like physical abuse. Always consider this possibility if you know the family uses traditional home remedies.

Communicating with the Elderly

- Always address older patients using formal terms of address unless you are directly told that you may use personal names. Also remind staff that they should do the same.
- Stay aware of how the physical setting may be affecting the patient. Background noise, glaring or reflecting light, and small print forms are examples of things that may interfere with communication. The patients may not say anything, or even be aware that something physical is interfering with their understanding.
- Stay aware that many people believe that giving a patient a terminal prognosis is unlucky or will bring death sooner and families may not want the patient to know exactly what is expected to happen. If the family has strong beliefs along these lines the patient probably shares them. Follow ethical and legal requirements, but stay cognizant of the patient's cultural perspective. Offer the opportunity to learn the truth, at whatever level of detail desired by the patient.
- It is important to explain the specific needs for having an advance directive before talking about the treatment choices and instructions. This will help alleviate concerns that an advance directive is for the benefit of the medical staff rather than the patient.
- Elderly, low-literacy patients may be very skilled at disguising their lack of reading skills and may feel stigmatized by their inability to read. If you suspect this is the case you should not draw attention to this issue but seek out other methods of communication.

EFFECTIVELY COMMUNICATING WITH THE ELDERLY

Older Adult Communication from Your Patients Perspective	
I Wish You Knew…	**I Wish You Would Do…**
I want to be respected and addressed formally. I appreciate empathy.	Introduce yourself and greet me with Mr., Mrs. or Ms. Avoid using overly friendly terms, patronizing speech such as "honey, dear" and baby talk. Be empathetic and try to see through my lens.
I want to be spoken to directly, even if my caregiver is with me. I want to participate in the conversation and in making decisions.	Don't assume I cannot understand or make decisions. Include me in the conversation. Speak to me directly and check for understanding.
I can't hear well with lots of background noise and it is hard to see with glaring or reflecting light.	When possible, try to find a quiet place when speaking to hard of hearing patients. If there is unavoidable noise, speak clearly, slower and with shorter phrases as needed. Adjust glare or reflecting light as much as possible
I may have language barrier and cultural beliefs that may affect adherence to the treatment plan.	Offer language assistance to help us better understand each other. Ask about cultural beliefs that may impact my adherence to the treatment plan. (See Kleinman's Questions)
Medical jargon and acronyms confuse me.	Use layperson language, not acronyms or popular slang terms.
I respect my doctor and am not always comfortable asking questions. I don't like to be rushed.	Encourage questions. Avoid interrupting or rushing me. Don't make me feel like you do not have time to hear me out. Give me time to ask questions and express myself. After you ask a question, allow time for responses. Do not jump quickly from one topic to another without an obvious transition.
Nodding my head doesn't always mean I understand,	Focus on what is most important for me to know. Watch for cues to guide communication and information sharing. Ask questions to see if I truly comprehend. Check for understanding using Teach-Back.
I need instructions to take home with me. I may be very skilled at disguising my lack of reading skills and may be embarrassed to tell you.	Explain what will happen next. Watch for cues that indicate vision or literacy issues to inform you about the best way to communicate with me. Don't draw too much attention to my reading skills. Seek appropriate methods to effectively communicate with me, including large font and demonstration.
Some topics such as advance directives or a terminal prognosis are very sensitive for me.	Explain the specific need of having an advance directive before talking about treatment choices to help me alleviate my concern that this advance directive is for the benefit of the medical staff and not me. Related to a terminal prognosis, follow ethical and legal requirements, but be aware of my cultural perspective. Offer me the opportunity to learn the truth, at whatever level of detail that I desire. My culture may be one that believes that giving a terminal prognosis is unlucky or will bring death sooner and my family and I may not want you to tell me directly.

PAIN MANAGEMENT ACROSS CULTURES

Your ability to provide adequate pain management to some patients can be improved with a better understanding of the differences in the way people deal with pain. Here is some important information about the cultural variations you may encounter when you treat patients for pain management.

These tips are generalizations only. It is important to remember that each patient should be treated as an individual.

Areas of Cultural Variation	Points to Consider	Suggestions
Reaction to pain and expression of pain	• Cultures vary in what is considered acceptable expression of pain. As a result, expression of pain will vary from stoic to extremely expressive for the same level of pain. • Some men may not verbalize or express pain because they believe their masculinity will be questioned.	• Do not mistake lack of verbal or facial expression for lack of pain. Under-treatment of pain is a problem in populations where stoicism is a cultural norm. • Because the expression of pain varies, ***ask*** the patient what level, or how much, pain relief they think they need. • Do not be judgmental about the way someone is expressing their pain, even if it seems excessive or inappropriate to you. The way a person in pain behaves is socially learned.
Spiritual and religious beliefs about using pain medication	• Members of several faiths will not take pain relief medications on religious fast days, such as Yom Kippur or daylight hours of Ramadan. For these patients, religious observance may be more important than pain relief. • Other religious traditions forbid the use of narcotics. • Spiritual or religious traditions may affect a patient's preference for the form of medication delivery, oral, IV, or IM.	• Consultation with the family and Spiritual Counselor will help you assess what is appropriate and acceptable. Variation from standard treatment regimens may be necessary to accommodate religious practices. • Accommodating religious preferences, when possible, will improve the effectiveness of the pain relief treatment. • Offer a choice of medication delivery. If the choice is less than optimal, ask why the patient has that preference and negotiate treatment for best results.
Beliefs About Drug Addiction	• Recent research has shown that people from different genetic backgrounds react to pain medication differently. Family history and community tradition may contain evidence about specific medication effects in the population. • Past negative experience with pain medication shapes current community beliefs, even if the	• Be aware of potential differences in the way medication acts in different populations. A patient's belief that they are more easily addicted may have a basis in fact. • Explain how the determination of type and amount of medication is made. Explain changes from past practices.

		what the patient may be using. There may be some reluctance to tell you about alternative therapies until they feel it is "safe" to talk about them. • Accommodate or integrate your treatments with alternative treatments when possible.
Methods Needed to Assess pain	• Most patients are able to describe their pain using a progressive scale, but others are not comfortable using a numerical scale, and the scale of facial expressions (smile to grimace) may be more useful.	• Ask the patient specifically how they can best describe their pain. • Use multiple methods of assessing pain-scales and analogies, if you feel the assessment of pain is producing ambiguous or incorrect results. • Once the severity of the pain can be assessed, explain in detail the expected result of the use of the pain medication in terms of whatever descriptive tools the patient has used. Check comprehension with teach-back techniques. • Instead of using scales, which might not be known to the patient, asking for comparative analogies, such as "like a burn from a stove," "cutting with a knife," or "stepping on a stone," may produce a more accurate description.

* **Note: Avoid** using family members as interpreters. **Minors** are **prohibited** from being used as interpreters. Find an interpreter with a health care background. **Document** in the patient's medical chart the request for or refusal of an interpreter.

SECTION D: REFERENCE RESOURCES FOR CULTURALLY AND LINGUISTIC SERVICES

A GUIDE TO INFORMATION IN SECTION D

Reference Resources for Culturally and Linguistic Services

Cultural and linguistic services have been mandated for federally funded program recipients in response to the growing evidence of health care disparities and as partial compliance with Title VI of the Civil Rights Act of 1964. The major requirements for the provision of cultural and linguistic services for patients in federally funded programs are included in this section.

Eliminate Health Disparities

Culturally and linguistically appropriate services are increasingly recognized as a key strategy to eliminating disparities in health and health care (e.g., Betancourt, 2004; 2006; Brach & Fraser, 2000; HRET, 2011). Among several other factors, lack of cultural competence and sensitivity among health and health care professionals has been associated with the perpetuation of health disparities (e.g., Geiger, 2001; Johnson, Saha, Arbelaez, Beach, & Cooper, 2004). This is often the result of miscommunication and incongruence between the patient or consumer's cultural and linguistic needs and the services the health or health care professional is providing (Zambrana, Molnar, Munoz, & Lopez, 2004). The provision of culturally and linguistically appropriate services can help providers address these issues by providing knowledge and skills to manage the provider-level, individual-level, and system-level factors referenced in the Institute of Medicine's seminal report Unequal Treatment that intersect to perpetuate health disparities (IOM, 2003).[1]

Health Equity & Culturally and Linguistically Appropriate Services are Connected

Culturally and linguistically appropriate services (CLAS) are one strategy to help eliminate health inequities. By tailoring services to an individual's culture and language preference, providers can help bring about positive health outcomes for diverse populations. The provision of health care services that are respectful of and responsive to the health beliefs, practices and needs of diverse patients can help close the gap in health care outcomes.1

This section includes:

- Current cultural and linguistic requirements for federally funded programs.
- Guidelines for cultural and linguistic services.
- Purpose of the enhanced National CLAS Standards.
- Web based resources for more information related diversity and the delivery of cultural and linguistic services.

45 CFR 92, NON DISCRIMINATION RULE

§ 92.201 Meaningful access for individuals with limited English proficiency. (a) General requirement. A covered entity shall take reasonable steps to provide meaningful access to each individual with limited English proficiency eligible to be served or likely to be encountered in its health programs and activities. (b) Evaluation of compliance. In evaluating whether a covered entity has met its obligation under paragraph (a) of this section, the Director shall: (1) Evaluate, and give substantial weight to, the nature and importance of the health program or activity and the particular communication at issue, to the individual with limited English proficiency; and (2) Take into account other relevant factors, including whether a covered entity has developed and implemented an effective written language access plan, that is appropriate to its particular circumstances, to be prepared to meet its obligations in § 92.201(a). (c) Language assistance services requirements.

Language assistance services required under paragraph (a) of this section must be provided free of charge, be accurate and timely, and protect the privacy and independence of the individual with limited English proficiency. (d) Specific requirements for interpreter and translation services. Subject to paragraph (a) of this section: (1) A covered entity shall offer a qualified interpreter to an individual with limited English proficiency when oral interpretation is a reasonable step to provide meaningful access for that individual with limited English proficiency; and (2) A covered entity shall use a qualified translator when translating written content in paper or electronic form. (e) Restricted use of certain persons to interpret or facilitate communication.

A covered entity shall not: (1) Require an individual with limited English proficiency to provide his or her own interpreter; (2) Rely on an adult accompanying an individual with limited English proficiency to interpret or facilitate communication, except: (i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available; or (ii) Where the individual with limited English proficiency specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances; (3) Rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available; or (4) Rely on staff other than qualified bilingual/multilingual staff to communicate directly with individuals with limited English proficiency. (f) Video remote interpreting services.

A covered entity that provides a qualified interpreter for an individual with limited English proficiency through video remote interpreting services in the covered entity's health programs and activities shall provide: (1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication; (2) A sharply delineated image that is large enough to display the interpreter's face and the participating individual's face regardless of the individual's body position; (3) A clear, audible transmission of voices; and (4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the video remote interpreting. (g) Acceptance of language assistance services is not required. Nothing in this section shall be construed to require an individual with limited English proficiency to accept language assistance service.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

"No person in the United States shall, on the ground of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance."

Under Title IV, any agency, program, or activity that receives funding from the federal government may not discriminate on the basis of race, color or national origin. This is the oldest and most basic of the many federal and state laws requiring "meaningful access" to healthcare, and "equal care" for all patients. Other federal and state legislation protecting the right to "equal care" outline how this principle will be operationalized.

State and Federal courts have been interpreting Title VI, and the legislation that it generated, ever since 1964. The nature and degree of enforcement of the equal access laws has varied from place to place and from time to time. Recently, however, both the Office of Civil Rights and the Office of Minority Health have become more active in interpreting and enforcing Title VI.

Additionally, in August 2000, the U.S. Department of Health and Human Services Office of Civil Rights issued "Policy Guidance on the Prohibition against National Origin Discrimination As it Affects Persons with Limited English Proficiency." This policy established 'national origin' as applying to limited English-speaking recipients of federally funded programs.

NATIONAL STANDARDS TO PROVIDE "CLAS" CULTURALLY AND LINGUISTICALLY APPROPRIATE SERVICES

The purpose of the enhanced National CLAS Standards is to provide a blueprint for health and health care organizations to implement CLAS that will advance health equity, improve quality, and help eliminate health care disparities. All 15 Standards are necessary to advance health equity, improve quality, and help eliminate health care disparities.

Principal Standard:

1. Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

Governance, Leadership, and Workforce:

2. Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices, and allocated resources.

3. Recruit, promote, and support a culturally and linguistically diverse governance, leadership, and workforce that are responsive to the population in the service area.

4. Educate and train governance, leadership, and workforce in culturally and linguistically **appropriate policies and practices on an ongoing basis.**

Communication and Language Assistance:

5. Offer language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services.

6. Inform all individuals of the availability of language assistance services clearly and in their preferred language, verbally and in writing.

7. Ensure the competence of individuals providing language assistance, recognizing that the use of untrained individuals and/or minors as interpreters should be avoided.

8. Provide easy-to-understand print and multimedia materials and signage in the languages commonly used by the populations in the service area.

Engagement, Continuous Improvement, and Accountability:

9. Establish culturally and linguistically appropriate goals, policies, and management accountability, and infuse them throughout the organization's planning and operations.

10. Conduct ongoing assessments of the organization's CLAS-related activities and integrate CLAS-related measures into measurement and continuous quality improvement activities.

11. Collect and maintain accurate and reliable demographic data to monitor and evaluate the impact of CLAS on health equity and outcomes and to inform service delivery.

12. Conduct regular assessments of community health assets and needs and use the results to plan and implement services that respond to the cultural and linguistic diversity of populations in the service area.
13. Partner with the community to design, implement, and evaluate policies, practices, and services to ensure cultural and linguistic appropriateness.

14. Create conflict and grievance resolution processes that are culturally and linguistically appropriate to identify, prevent, and resolve conflicts or complaints.

15. Communicate the organization's progress in implementing and sustaining CLAS to all stakeholders, constituents, and the general public.

EXECUTIVE ORDER 13166, AUGUST 2000

Improving Access to Services for Persons with Limited English Proficiency (Verbatim)

By the authority vested in me as President by the Constitution and the laws of the United States of America, and to improve access to federally conducted and federally assisted programs and activities for persons who, as a result of national origin, are limited in their English proficiency (LEP), it is hereby ordered as follows:

Section 1. Goals.

The Federal Government provides and funds an array of services that can be made accessible to otherwise eligible persons who are not proficient in the English language. The Federal Government is committed to improving the accessibility of these services to eligible LEP persons, a goal that reinforces its equally important commitment to promoting programs and activities designed to help individuals learn English. To this end, each Federal agency shall examine the services it provides and develop and implement a system by which LEP persons can meaningfully access those services consistent with, and without unduly burdening, the fundamental mission of the agency. Each Federal agency shall also work to ensure that recipients of Federal financial assistance (recipients) provide meaningful access to their LEP applicants and beneficiaries. To assist the agencies with this endeavor, the Department of Justice has today issued a general guidance document (LEP Guidance), which sets forth the compliance standards that recipients must follow to ensure that the programs and activities they normally provide in English are accessible to LEP persons and thus do not discriminate on the basis of national origin in violation of title VI of the Civil Rights Act of 1964, as amended, and its implementing regulations. As described in the LEP Guidance, recipients must take reasonable steps to ensure meaningful access to their programs and activities by LEP persons.

Sec. 2. Federally Conducted Programs and Activities.

Each Federal agency shall prepare a plan to improve access to its federally conducted programs and activities by eligible LEP persons. Each plan shall be consistent with the standards set forth in the LEP Guidance, and shall include the steps the agency will take to ensure that eligible LEP persons can meaningfully access the agency's programs and activities. Agencies shall develop and begin to implement these plans within 120 days of the date of this order, and shall send copies of their plans to the Department of Justice, which shall serve as the central repository of the agencies' plans.

Sec. 3. Federally Assisted Programs and Activities.

Each agency providing Federal financial assistance shall draft title VI guidance specifically tailored to its recipients that is consistent with the LEP Guidance issued by the Department of Justice. This agency-specific guidance shall detail how the general standards established in the LEP Guidance will be applied to the agency's recipients. The agency-specific guidance shall take into account the types of services provided by the recipients, the individuals served by the recipients, and other factors set out in the LEP Guidance. Agencies that already have developed title VI guidance that the Department of Justice determines is consistent with the LEP Guidance shall examine their existing guidance, as well as their programs and activities, to determine if additional guidance is necessary to comply with this order.

The Department of Justice shall consult with the agencies in creating their guidance and, within 120 days of the date of this order, each agency shall submit its specific guidance to the Department of Justice for review and approval. Following approval by the Department of Justice, each agency shall publish its guidance document in the Federal Register for public comment.

Sec. 4. Consultations.

In carrying out this order, agencies shall ensure that stakeholders, such as LEP persons and their representative organizations, recipients, and other appropriate individuals or entities, have an adequate opportunity to provide input. Agencies will evaluate the particular needs of the LEP persons they and their recipients serve and the burdens of compliance on the agency and its recipients. This input from stakeholders will assist the agencies in developing an approach to ensuring meaningful access by LEP persons that is practical and effective, fiscally responsible, responsive to the particular circumstances of each agency, and can be readily implemented.

Sec. 5. Judicial Review.

This order is intended only to improve the internal management of the executive branch and does not create any right or benefit, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers or employees, or any person.

WILLIAM J. CLINTON

THE WHITE HOUSE

Office of the Press Secretary

(Aboard Air Force One)

RACE/ETHNICITY/LANGUAGE (REL) CATEGORIES IMPORTANCE OF COLLECTING REL AND APPROPRIATE USE

Collecting REL information helps providers to administer better care for patients. Access to accurate data is essential for successfully identifying inequalities in health that could be attributed to race, ethnicity or language barriers and to improve the quality of care and treatment outcomes.
The health plans collect this data and can make this data available to providers upon request. Provider must collect member spoken language preference and document this on the member's record. Below is the listing of the basic race and ethnicity categories used by health plans.

Office of Management and Budget (OMB) Ethnicity Categories:

- Hispanic or Latino: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- Non-Hispanic or Latino: Patient is not of Hispanic or Latino ethnicity.
- Declined: A person who is unwilling to provide an answer to the question of Hispanic or Latino ethnicity.
- Unavailable: Select this category if the patient is unable to physically respond, there is no available family member or caregiver to respond for the patient, or if for any reason, the demographic portion of the medical record cannot be completed. Hospital systems may call this field "Unknown", "Unable to Complete," or "Other

Office of Management and Budget (OMB) Race Categories:

- American Indian or Alaska Native: A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.
- Asian: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- Black or African American: A person having origins in any of the black racial groups of Africa.
- Native Hawaiian or Other Pacific Islander: A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands
- White: A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- Some Other Race: A person who does not self-identify with any of the OMB race categories. *OMB-Mod
- Declined: A person who is unwilling to choose/provide a race category or cannot identify him/herself with one of the listed races.
- *Unavailable: Select this category if the patient is unable to physically respond, there is no available family member or caregiver to respond for the patient, or if for any reason, the demographic portion of the medical record cannot be completed. Hospital systems complete," or "Other. "may call this field "Unknown," "Unable to*

GLOSSARY OF TERMS

Auxiliary Aid

services or devices that enable persons with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency.

American Sign Language Auxiliary Aid

services or devices that enable persons with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency.

American Sign Language (ASL)

a nonverbal method of communicating by deaf or speech-impaired people in which the hands and fingers are used to indicate words and concepts.

Barrier

an obstacle, impediment, obstruction, boundary, or separation.

Braille

a system of reading and printing that enables the blind to read by using the sense of touch. Raised dots arranged in patterns represent numerals and letters of the alphabet and can be identified by the fingers.

Body Language

the revelation of attitude or mood through physical gestures, posture, or proximity; nonverbal communication.

Communication

the sending of data, messaged, or other forms of information from one entity to another.

Communication, Impaired Verbal

the state in which a person experiences a decreased, delayed, or absent ability to receive, process, transmit, and use a system of symbols or anything that conveys meaning.

Communication, Nonverbal

in interpersonal relationships, the use of communication techniques that do not involve words.

Cultural Competence

sensitivity to the cultural, philosophical, religious, and social preferences of people of varying ethnicities or nationalities. Professional skill in the use of such sensitivities facilitates the giving of optimal patient care.

Culture

shared human artifacts, attitudes, beliefs, customs, entertainment, ideas, language, laws, learning, and moral conduct.

Demographics

of or related to the study of changes that occur in the large groups of people over a period of time.

Disability

any physical, mental, or functional impairment that limits a major activity. It may be partial or complete.

Discrimination

the process of distinguishing or differentiating. **2.** Unequal and unfair treatment or denial of rights or privileges without reasonable cause.

Diverse

of a different kind, form, character, etc.; unlike. **2.** including representatives from more than one social, cultural, or economic group, especially members of ethnic or religious minority groups.

Engagement

in the behavioral sciences, a term often used to denote active involvement in everyday activities that have personal meaning.

Gender Identity

ones self-concept with respect to being male or female: a person's sense of his or her true sexual identity.

Health Disparities

is often interpreted to mean racial or ethnic disparities, many dimensions of disparity exist in the United States, particularly in health. If a health outcome is seen to a greater or lesser extent between populations, there is disparity. Race or ethnicity, sex, sexual identity, age, disability, socioeconomic status, and geographic location all contribute to an individual's ability to achieve good health.

Health Equity

an avoidable and unfair difference in health status between segments of the population.

Health Literacy

the ability to understand the causes, prevention, and treatment of disease. **2.** the degree of communication that enhances people's related information.

Interpretation

In psychotherapy, the analysis of the meaning of what the patient says or does. It is explained to the patient to help provide insight.

Interpreter

one who translates orally for parties conversing in different languages.

Language

the spoken or written words or symbols used by a population for communication.

Limited English Proficient (LEP)

is a term used in the United States that refers to a person who is not fluent in the English language, often because it is not their native language.

Mnemonic

Anything intended to aid memory.

Race

the descendants of a genetically cohesive ancestral group. **2.** A political or social designation for a group of people thought to share a common ancestry or common ethnicity.

Resource

an asset valuable commodity or service.

Service

help or assistance.

Speech

the oral expression of one's thoughts. **2.** the utterance of articulate words or sounds.

Speech transliterator

a person trained to recognize unclear speech and repeat it clearly

Teletypewriter

a telegraphic apparatus by which signals are sent by striking the letters and symbols of the keyboard of an instrument resembling a typewriter and are received by a similar instrument that automatically prints them in type corresponding to the keys struck.

Transgender

an umbrella term for people whose gender identity and/or gender expression differs from what is typically associated with the sex they were assigned at birth.

Revised_08.22.18

Language Proficiency Assessment Resources

The bilingual assessment vendors included on this list are suggestions that providers might consider if they choose to use a bilingual assessment vendor to help ensure that they are using qualified bilingual staff to provide patient care, as these organizations have self-attested that they meet the required criteria. However, that should not be considered an endorsement for any language service vendor by ICE. The ICE C&L Team has not in the past and does not now endorse any language service vendors.

Language Proficiency Assessment Resources						
		Description & Types of Services				
Organization	Website / Contact Information	# of Offered Languages	Custom to Medical Specialty	Assessments	Certification &/or Experience	Cost
Berkeley Language Institute (BLI) Supports the client's efforts to adhere to Federal, Department of Health & Human Services Standards for CLAS, and State laws and regulations (DMC and Joint Commission).	http://www.berkeleylanguageinstitute.com/index.html 1-510-655-9469 Marci Valdivieso marci@berkeleylanguageinstitute.com	**8 languages offered**: Arabic, Chinese (Mandarin, Cantonese, and Taishanese/ Toisan), French, Korean, Russian, Spanish, Tagalog, Vietnamese	Yes	• Professional language assessments for interpreters, translators, & bilingual speakers • Language Proficiency Oral Assessment – ideal for current & pre-employment bilingual employees • Language Proficiency Written Assessment • Medical Staff Oral Assessment • Healthcare Interpreter Assessments	Evaluators are experienced linguists that have: • At least five years interpreter & translator experience • Have shown an aptitude to be language evaluators. • They are generally certified by/with the National Board or CCHI if the language pair is an option, or • They are otherwise assessed and trained prior to being given evaluation assignments	Cost will vary depending on language pair and type of assessment $115 - $190/ person

COMMUNICATIONS TOOL KIT

Industry Collaboration Effort

This document will help you in the design of written materials to be both inclusive, sensitive, and compliant with the National Culturally and Linguistically Appropriate Service (CLAS) Standards and Section 1557 of the Affordable Care Act (ACA).

We do not want to be exclusionary, insensitive, or contribute to people feeling they are not welcome. Using gender neutral and culturally sensitive wording when creating any documents-whether for staff, members, providers, or the community is best practice, aligns with regulations and it fosters inclusivity. We need to be aware of the language we use. Utilize the below list when writing or reviewing documents. The list includes either offensive or non-inclusive phrases or words that have been found in materials, written as indicated. When reviewing documents, perform a search for the words as written below in the various ways (utilize the "find" function – select "Control F") and replace them with sensitive terms as applicable:

Exclusionary	***Inclusive***
his, her, his or her, his/her	their, the members
he, she, he or she, he/she	they, the members
him, her, him or her, him/her	them
himself, herself, himself or herself	themselves
woman, man, men or women	the member or the individual, members or individuals
gender specific screenings – well-woman etc.	take out the gender term and leave as "preventative screening" or "annual well-check". In general we need to use medical terms – do not "gender" services. Documents often reference "women should have a mammogram…" and instead should say "members should have a mammogram" etc.
pregnant women, pregnant woman	pregnant individuals, child-bearers, child-bearer
mother, father , mom, dad	parent as applicable
maternity	excluding any formal contract/program language requirement or information-change to "pregnancy", "childbirth", "pregnancy and childbirth" "prenatal", "postnatal" etc. as applicable
Gender-Male, Female - Sex and Gender/Gender Identity are different. Stay away from using them synonymously because it can be exclusionary; sex should reference medical terminology and gender/gender identity should reference the social construct of gender/gender identity…gender identities.	When need to know sex – include sex terms: male, female, or intersex When need to know gender – include gender/gender identity terms: woman, man, transgender, boy, girl, nonbinary, gender fluid, two-spirit, etc.- many more terms available. Consider asking "sex assigned at birth" and "gender identity" to be more inclusive.
both sexes	for sex there is male, female, intersex if inferring gender/gender identity there are many terms (based on context change to "individuals" or just say "sex" of member or "gender identity of member")

Offensive/Insensitive	***Sensitive***
hearing impaired	deaf or hard of hearing
visual impairment	blind or low vision
LEP members	members with limited English proficiency
gender reassignment surgery, sex change	gender affirming surgery, transition
sexual preference	sexual orientation
hermaphrodite, hermaphroditism	"intersex" if applicable or if actually referencing gender affirming procedures, use "gender affirming treatment"
transgenders, a transgender, transgendered	Transgender should be used as an adjective, not a noun. For example, "Tony is a transgender man". Adding "ed" is insensitive-being transgender is a part of someone's identity, nothing happened to make someone transgender as the "ed" may suggest.

For additional questions on creating culturally sensitive materials:

Provider Communications

Better Communication, Better Care:

PROVIDER TOOLS TO CARE FOR DIVERSE POPULATIONS

INTRODUCTION FOR HEALTHCARE PROFESSIONALS:

Why was this Cultural and Linguistic Provider Tool Kit created?

This set of materials was produced by a nation-wide team of healthcare professionals who, like you, are dedicated to providing high quality, effective, and compassionate care to their patients. In our awareness of differences in individual belief and behavior, changes in demographics and new legal mandates, we are constantly presented with new challenges in our attempts to deliver adequate and cultural sensitive health care to a diverse patient population. The material in this tool kit will provide you with resources and information to effectively communicate and understand our diverse patient populations. The tool kit also provides many useful instruments and aids to help with specific operational needs that can arise in your office or facility.

The tool kit contents are organized into four sections; each containing helpful background information and tools that can be reproduced and used as needed. Below you will find a list of the section topics and a small sample of their contents:

- **Interaction with a diverse patient base:** encounter tips for providers and their clinical staff, a mnemonic to assist with patient interviews, help in identifying literacy problems, and an interview guide for hiring clinical staff who have an awareness of diversity issues.
- **Communication across language barriers:** tips for locating and working with interpreters, common signs and common sentences in many languages, language identification flashcards, and employee language prescreening tool.
- **Understanding patients from various cultural backgrounds:** tips for talking about sex with a wide range of people, delivering care to lesbian, gay, bisexual or transgender, pain management across cultures, and information about different cultural backgrounds.
- **References and resources:** key legal requirements including 45 CFR 92 – Non Discrimination Rule, a summary of the "Culturally and Linguistically Appropriate Service (CLAS) Standards," which serve as a guide on how to meet legal requirements, Race/Ethnicity/Language categories, a bibliography of print resources, and a list of internet resources.

We consider this tool kit a work in progress. Patient needs and the tools we use to work with those changing needs will continue to evolve. We understand that some portions of this tool kit will be more useful than others for individual practices or service settings, after all, practices vary as much as the places where they are located. We encourage you to use what is helpful, disregard what is not, and, if possible communicate your reaction to the contents to the ICE Cultural and Linguistics Workgroup at: CL_Team@iceforhealth.org.

SECTION A: RESOURCES TO ASSIST COMMUNICATION WITH A DIVERSE PATIENT POPULATION BASE

A GUIDE TO INFORMATION IN SECTION A

RESOURCES TO COMMUNICATE WITH A DIVERSE PATIENT BASE

The communication strategies suggested in this section are intended to minimize patient-provider, and patient-office staff miscommunications, and foster an environment that is non-threatening and comfortable to the patient.

We recognize that every patient encounter is unique. The goal is to eliminate cultural barriers that inhibit effective communication, diagnosis, treatment and care. The suggestions presented are intended to guide providers and build sensitivity to cultural differences and styles. By enhancing your cultural sensitivity and ability to tailor the delivery of care to your patients' needs you will:

- Enhance communication
- Decrease repeat visits
- Decrease unnecessary lab tests
- Increase compliance
- Avoid Civil Rights Act violations

The following materials are available in this section:

Working with Diverse Patients: Tips for Successful Patient Encounters	A tip sheet designed to help providers enhance their patient communication skills.
Partnering with Diverse Patients: Tips for Office Staff to Enhance Communication	A tip sheet designed to help office staff enhance their patient communication skills.
Non-verbal Communication and Patient Care	An overview of the impact of nonverbal communication on patient-provider relations and communication.
"Diverse": A Mnemonic for Patient Encounters Tips for Identifying Health Literacy Issues	A mnemonic to help you individualize care based on cultural/diversity aspects.
Tips for Identifying and Addressing Health Literacy Issues	A tip sheet to help understand and work with patients with Health literacy.
Interview Guide for Hiring Office/Clinic Staff with Diversity Awareness	A list of interview questions to help determine if a job candidate is likely to work well with individuals of diverse backgrounds.
Americans with Disabilities Act (ADA) Sign Language and Alternative Formats Requirements	Tip sheets to help providers better communicate with patients with vision, hearing, or speech disabilities.
Americans with Disabilities Act (ADA) Requirements for Effective Communication How to Implement Language Services	A tip sheet to help providers communicate effectively with their patients.
Supporting Patients with 211 and 711 Community Services	A tip sheet to help providers utilize community services for patients with special needs.

WORKING WITH DIVERSE PATIENTS: TIPS FOR SUCCESSFUL PATIENT ENCOUNTERS

To enhance patient/provider communication and to avoid being unintentionally insulting or patronizing, be aware of the following:

Styles of Speech: *People vary greatly in length of time between comment and response, the speed of their speech, and their willingness to interrupt.*

- Tolerate gaps between questions and answers, impatience can be seen as a sign of disrespect.
- Listen to the volume and speed of the patient's speech as well as the content. Modify your own speech to more closely match that of the patient to make them more comfortable.
- Rapid exchanges, and even interruptions, are a part of some conversational styles. Don't be offended if no offense is intended when a patient interrupts you.
- Stay aware of your own pattern of interruptions, especially if the patient is older than you are.

Eye Contact: *The way people interpret various types of eye contact is tied to cultural background and life experience.*

- Most Euro-Americans expect to look people directly in the eyes and interpret failure to do so as a sign of dishonesty or disrespect.
- For many other cultures direct gazing is considered rude or disrespectful. Never force a patient to make eye contact with you.
- If a patient seems uncomfortable with direct gazes, try sitting next to them instead of across from them.

Body Language: *Sociologists say that 80% of communication is non-verbal. The meaning of body language varies greatly by culture, class, gender, and age.*

- Follow the patient's lead on physical distance and touching. If the patient moves closer to you or touches you, you may do the same. However, stay sensitive to those who do not feel comfortable, and ask permission to touch them.
- Gestures can mean very different things to different people. Be very conservative in your own use of gestures and body language. Ask patients about unknown gestures or reactions.
- Do not interpret a patient's feelings or level of pain just from facial expressions. The way that pain or fear is expressed is closely tied to a person's cultural and personal background.

Gently Guide Patient Conversation: *English predisposes us to a direct communication style; however other languages and cultures differ.*

- Initial greetings can set the tone for the visit. Many older people from traditional societies expect to be addressed more formally, no matter how long they have known their physician. If the patient's preference is not clear, ask how they would like to be addressed.
- Patients from other language or cultural backgrounds may be less likely to ask questions and more likely to answer questions through narrative than with direct responses. Facilitate patient-centered communication by asking open-ended questions whenever possible.
- Avoid questions that can be answered with "yes" or "no." Research indicates that when patients, regardless of cultural background, are asked, "Do you understand," many will answer, "yes" even when they really do not understand. This tends to be more common in teens and older patients.
- Steer the patient back to the topic by asking a question that clearly demonstrates that you are listening.

PARTNERING WITH DIVERSE PATIENTS: TIPS FOR OFFICE STAFF TO ENHANCE COMMUNICATION

1. Build rapport with the patient.

- Address patients by their last name. If the patient's preference is not clear, ask, "How would you like to be addressed?"
- Focus your attention on patients when addressing them.
- Learn basic words in your patient's primary language, like "hello" or "thank you".
- Recognize that patients from diverse backgrounds may have different communication needs.
- Explain the different roles of people who work in the office.

2. Make sure patients know what you do.

- Take a few moments to prepare a handout that explains office hours, how to contact the office when it is closed, and how the PCP arranges for care (i.e. PCP is the first point of contact and refers to specialists).
- Have instructions available in the common language(s) spoken by your patient base.

3. Keep patients' expectations realistic.

- Inform patients of delays or extended waiting times. If the wait is longer than 15 minutes, encourage the patient to make a list of questions for the doctor, review health materials or view waiting room videos.

4. Work to build patients' trust in you.

- Inform patients of office procedures such as when they can expect a call with lab results, how follow-up appointments are scheduled, and routine wait times.

5. Determine if the patient needs an interpreter for the visit.

- Document the patient's preferred language in the patient chart.
- Have an interpreter access plan. An interpreter with a medical background is preferred to family or friends of the patient.
- Assess your bilingual staff for interpreter abilities. (see Employee Language Skills Self-Assessment Tool).
- Possible resources for interpreter services are available from health plans, the state health department, and the Internet. See contracted health plans for applicable payment processes.

6. Give patients the information they need.

- Have topic-specific health education materials in languages that reflect your patient base. (Contact your contracting health plans/contracted medical groups for resources.)
- Offer handouts such as immunization guidelines for adults and children, screening guidelines, and culturally relevant dietary guidelines for diabetes or weight loss.

7. Make sure patients know what to do.

- Review any follow-up procedures with the patient before he or she leaves your office.
- Verify call back numbers, the locations for follow-up services such as labs, X-ray or screening tests, and whether or not a follow-up appointment is necessary.
- Develop pre-printed simple handouts of frequently used instructions, and translate the handouts into the common language(s) spoken by your patient base. (Contact your contracting health plans/contracted medical groups for resources.)

NON- VERBAL COMMUNICATION AND PATIENT CARE

Non-verbal communication is a subtle form of communication that takes place in the **initial three seconds** after meeting someone for the first time and can continue through the entire interaction. Research indicates that non-verbal communication accounts for approximately **70%** of a communication episode. Non-verbal communication can impact the success of communication more acutely than the spoken word. Our culturally informed unconscious framework evaluates gestures, appearance, body language, the face, and how space is used. Yet, we are rarely aware of how persons from other cultures perceive our nonverbal communication or the subtle cues we have used to assess the person.

The following are case studies that provide examples of non-verbal miscommunication that can sabotage a patient-provider encounter. Broad cultural generalizations are used for illustrative purposes. They should not be mistaken for stereotypes. A stereotype and a generalization may appear similar, but they function very differently. A **stereotype** is an ending point; no attempt is made to learn whether the individual in question fits the statement. A **generalization** is a beginning point; it indicates common trends, but further information is needed to ascertain whether the statement is appropriate to a particular individual.

Generalizations can serve as a guide to be accompanied by individualized in-person assessment. As a rule, ask the patient, rather than assume you know the patient's needs and wants. If asked, patients will usually share their personal beliefs, practices and preferences related to prevention, diagnosis and treatment.

Eye Contact

Ellen was trying to teach her Navaho patient, Jim Nez, how to live with his newly diagnosed diabetes. She soon became extremely frustrated because she felt she was not getting through to him. He asked very few questions and never met her eyes. She reasoned from this that he was uninterested and therefore not listening to her.[1]

It is rude to meet and hold eye contact with an elder or someone in a position of authority such as health professionals in most Latino, Asian, American Indian and many Arab countries. It may be also considered a form of social aggression if a male insists on meeting and holding eye contact with a female.

Touch and Use of Space

A physician with a large medical group requested assistance encouraging young female patients to make and keep their first well woman appointment. The physician stated that this group had a high no-show rate and appointments did not go as smoothly as the physician would like.

Talk the patient through each exam so that the need for the physical contact is

---

1, 2 Galanti, G. (1997). *Caring for Patients from Different Cultures*. University of Pennsylvania Press.
Hall, E.T. (1985). *Hidden Differences: Studies in International Communication.* Hamburg: Gruner & Jahr.
Hall, E.T. (1990). *Understanding Cultural Differences.* Yarmouth, ME: Intercultural Press.

understood, prior to the initiation of the examination. Ease into the patients' personal space. If there are any concerns, ask before entering the three-foot zone. This will help ease the patient's level of discomfort and avoid any misinterpretation of physical contact. Additionally, physical contact between a male and female is strictly regulated in many cultures. An older female companion may be necessary during the visit.

Gestures
An Anglo patient named James Todd called out to Elena, a Filipino nurse: "Nurse, nurse." Elena came to Mr. Todd's door and politely asked, "May I help you?" Mr. Todd beckoned her to come closer by motioning with his right index finger. Elena remained where she was and responded in an angry voice, "What do you want?" Mr. Todd was confused. Why had Elena's manner suddenly changed?[1]

Gestures may have dramatically different meanings across cultures. It is best to think of gestures as a local dialect that is familiar only to insiders of the culture. Conservative use of hand or body gestures is recommended to avoid misunderstanding. In the case above, Elena took offense to Mr. Todd's innocent hand gesture. In the Philippines (and in Korea) the "come here" hand gesture is used to call animals.

Body Posture and Presentation
Carrie was surprised to see that Mr. Ramirez was dressed very elegantly for his doctor's visit. She was confused by his appearance because she knew that he was receiving services on a sliding fee scale. She thought the front office either made a mistake documenting his ability to pay for service, or that he falsely presented his income.

Many cultures prioritize respect for the family and demonstrate family respect in their manner of dress and presentation in public. Regardless of the economic resources that are available or the physical condition of the individual, going out in public involves creating an image that reflects positively on the family – the clothes are pressed, the hair is combed, and shoes are clean. A person's physical presentation is not an indicator of their economic situation.

Use of Voice
Dr. Moore had three patients waiting and was feeling rushed. He began asking health related questions of his Vietnamese patient Tanya. She looked tense, staring at the ground without volunteering much information. No matter how clearly he asked the question he couldn't get Tanya to take an active part in the visit.

The **use** of voice is perhaps one of the most difficult forms of non-verbal communication to change, as we rarely hear how we sound to others. If you speak too fast, you may be seen as not being interested in the patient. If you speak too loud, or too soft for the space involved, you may be perceived as domineering or lacking confidence. Expectations for the use of voice vary greatly between and within cultures, for male and female, and the young and old. *The best suggestion is to search for non-verbal cues to determine how your voice is affecting your patient.*

"DIVERSE" A MNEMONIC FOR PATIENT ENCOUNTERS

A mnemonic will assist you in developing a personalized care plan based on cultural/diversity aspects. Place in the patient's chart or use the mnemonic when gathering the patient's history on a SOAP progress note.

	Assessment	Sample Questions	Assessment Information/ Recommendations
D	**Demographics-** *Explore regional background, level of –acculturation, age and sex as they influence health care behaviors.*	Where were you born? Where was "home" before coming to the U.S.? How long have you lived in the U.S.? What is the patient's age and sex?	
I	**Ideas-** *ask the patient to explain his/her ideas or concepts of health and illness.*	What do you think keeps you healthy? What do you think makes you sick? What do you think is the cause of your illness? Why do you think the problem started?	
V	**Views of health care treatments-** *ask about treatment preference, use of home remedies, and treatment avoidance practices.*	Are there any health care procedures that might not be acceptable? Do you use any traditional or home health remedies to improve your health? What have you used before? Have you used alternative healers? Which? What kind of treatment do you think will work?	
E	**Expectations**- *ask about what your patient expects from his/her doctor?*	What do you hope to achieve from today's visit? What do you hope to achieve from treatment? Do you find it easier to talk with a male/female? Someone younger/older?	
R	**Religion**- *asks about your patient's religious and spiritual traditions.*	Will religious or spiritual observances affect your ability to follow treatment? How? Do you avoid any particular foods? During the year, do you change your diet in celebration of religious and other holidays?	
S	**Speech-** *identifies your patient's language needs including health literacy levels. Avoid using a family member as an interpreter.*	What language do you prefer to speak? Do you need an interpreter? What language do you prefer to read? Are you satisfied with how well you read? Would you prefer printed or spoken instructions?	
E	**Environment –** *identify patient's home environment and the cultural/diversity aspects that are part of the environment. Home environment includes the patient's daily schedule, support system and level of independence.*	Do you live alone? How many other people live in your house? Do you have transportation? Who gives you emotional support? Who helps you when you are ill or need help? Do you have the ability to shop/cook for yourself? What times of day do you usually eat? What is your largest meal of the day?	

TIPS FOR IDENTIFYING AND ADDRESSING HEALTH LITERACY ISSUES

LOW HEALTH LITERACY CAN PREVENT PATIENTS FROM UNDERSTANDING THEIR HEALTH CARE SERVICES.

Health Literacy is defined by the National Health Education Standards[1] as "*the capacity of an individual to obtain, interpret, and understand basic health information and services and the competence to use such information and services in ways which are health-enhancing.*"

This includes the ability to understand written instructions on prescription drug bottles, appointment slips, medical education brochures, doctor's directions and consent forms, and the ability to negotiate complex health care systems. Health literacy is not the same as the ability to read and is not necessarily related to year of education. A person who functions adequately at home or work may have marginal or inadequate literacy in health care environment.

Possible Signs of Low Health Literacy

Your patients may frequently say:

- I forgot my glasses.
- My eyes are tired.
- I'll take this home for my family to read.
- What does this say? I don't understand this.

Your patients' behaviors may include:

- Not getting their prescriptions filled, or not taking their medications as prescribed.
- Consistently arriving late to appointments.
- Returning forms without completing them.
- Requiring several calls between appointments to clarify instructions.

Barriers to Health Literacy

- The ability to read and comprehend health information is impacted by a range of factors including age, socioeconomic background, education and culture.
- A patient's culture and life experience may have an effect on their health literacy.
- An accent, or a lack of accent, can be misread as an indicator of a person's ability to read English.
- Different family dynamics can play a role in how a patient receives and processes information.
- In some cultures it is inappropriate for people to discuss certain body parts or functions leaving some with a very poor vocabulary for discussing health issues.
- In adults, reading skills in a second language may take 6-12 years to develop.

TIPS FOR DEALING with LOW HEALTH LITERACY[1]

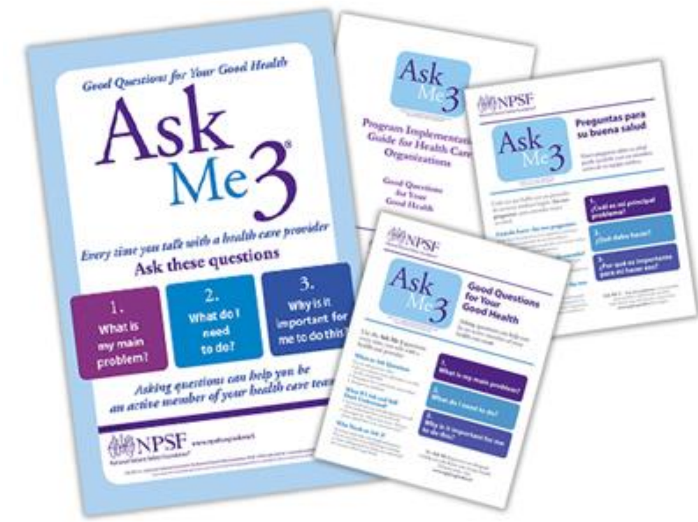
✓ Use simple words and avoid jargon. ✓ Never use acronyms. ✓ Avoid technical language (if possible). ✓ Repeat important information – a patient's logic may be different from yours. ✓ Ask patients to repeat back to you important information. ✓ Ask open-ended questions. ✓ Use medically trained interpreters familiar with cultural nuances.	✓ Give information in small chunks. ✓ Articulate words. ✓ "Read" written instructions out load. ✓ Speak slowly (don't shout). ✓ Use body language to support what you are saying. ✓ Draw pictures, use posters, models or physical demonstrations. ✓ Use video and audio media as an alternative to written communications.

ADDITIONAL RESOURCES

Use **Ask Me 3®**[2]. Ask Me 3® is a program designed by health literacy experts intended to help patients become more active in their health care. It supports improved communication between patients, families and their health care providers.

Patients who understand their health have better health outcomes. Encourage your patients to ask these three specific questions:

1. What is my main problem?
2. What do I need to do?
3. Why is it important for me to do this?



Asking these questions is proven to help patients better understand their health conditions and what they need to do to stay healthy.

For more information or resources on Ask Me 3® and to view a video on how to use the questions, please visit http://www.npsf.org/?page=askme3. Ask Me 3 is a registered trademark licensed to the National Patient Safety Foundation (NPSF).

American Medical Association (AMA)

The AMA offer multiple publications, tools and resources to improve patient outcomes. For more information, visit: http://www.ama-assn.org/ama/pub/about-ama/ama-foundation.page.

INTERVIEW GUIDE FOR HIRING OFFICE/CLINIC STAFF WITH DIVERSITY AWARENESS

The following set of questions is meant to help you determine whether a job candidate will be sensitive to the cultural and linguistic needs of your patient population. By integrating some or all of these questions into your interview process, you will be more likely to hire staff that will help you create an office/clinic atmosphere of openness, affirmation, and trust between patients and staff. *Remember* that bias and discrimination can be obvious and flagrant or small and subtle. Hiring practices should reflect this understanding.

INTERVIEW QUESTIONS

Q. ***What experience do you have in working with people of diverse backgrounds, cultures and ethnicities? The experiences can be in or out of a health care environment.***

The interviewee should demonstrate understanding and willingness to serve diverse communities. Any experience, whether professional or volunteer, is valuable.

Q: ***Please share any particular challenges or successes you have experienced in working with people from diverse backgrounds.***

You will want to get a sense that the interviewee has an appreciation for working with people from diverse backgrounds and understands the accompanying complexities and needs in an office setting.

Q. ***In the health care field we come across patients of different ages, language preference, sexual orientation, religions, cultures, genders, and immigration status, etc. all with different needs. What skills from your past customer service or community/healthcare work do you think are relevant to this job?***

This question should allow a better understanding of the interviewees approach to customer service across the spectrum of diversity, their previous experience, and if their skills are transferable to the position in question. Look for examples that demonstrate an understanding of varying needs. Answers should demonstrate listening and clear communication skills.

Q. ***What would you do to make all patients feel respected? For example, some Medicaid or Medicare recipients may be concerned about receiving substandard care because they lack private insurance.***

The answer should demonstrate an understanding of the behaviors that facilitate respect and the type of prejudices and bias that can result in substandard service and care.

AMERICANS WITH DISABILITIES ACT (ADA) REQUIREMENTS

The following information is excerpts from the U.S. Department of Justice, Civil Rights Division, Disability Rights Section. For complete information, please visit: www.ada.gov/effective-comm.htm.

The Department of Justice published revised final regulations implementing the Americans with Disabilities Act (ADA) for title II (State and local government services) and title III (public accommodations and commercial facilities) on September 15, 2010, in the Federal Register. These requirements, or rules, clarify and refine issues that have arisen over the past 20 years and contain new, and updated, requirements, including the 2010 Standards for Accessible Design (2010 Standards).

EFFECTIVE COMMUNICATION

Overview

People who have vision, hearing, or speech disabilities ("communication disabilities") use different ways to communicate. For example, people who are blind may give and receive information audibly rather than in writing and people who are deaf may give and receive information through writing or sign language rather than through speech.

The ADA requires that title II entities (State and local governments) and title III entities (businesses and nonprofit organizations that serve the public) communicate effectively with people who have communication disabilities. The goal is to ensure that communication with people with these disabilities is equally effective as communication with people without disabilities. This publication is designed to help title II and title III entities ("covered entities") understand how the rules for effective communication, including rules that went into effect on March 15, 2011, apply to them.

- The purpose of the effective communication rules is to ensure that the person with a vision, hearing, or speech disability can communicate with, receive information from, and convey information to, the covered entity.
- Covered entities must provide auxiliary aids and services when needed to communicate effectively with people who have communication disabilities.
- The key to communicating effectively is to consider the nature, length, complexity, and context of the communication and the person's normal method(s) of communication.
- The rules apply to communicating with the person who is receiving the covered entity's goods or services as well as with that person's parent, spouse, or companion in appropriate circumstances.

AUXILIARY AIDS AND SERVICES

The ADA uses the term "auxiliary aids and services" ("aids and services") to refer to the ways to communicate with people who have communication disabilities.

- For people who are blind, have vision loss, or are deaf-blind, this includes providing a qualified reader; information in large print, Braille, or electronically for use with a computer screen-reading program; or an audio recording of printed information. A "qualified" reader means someone who is able to read effectively, accurately, and impartially, using any necessary specialized vocabulary.

- For people who are deaf, have hearing loss, or are deaf-blind, this includes providing a qualified note taker; a qualified sign language interpreter, oral interpreter, cued-speech interpreter, or tactile interpreter; real-time captioning; written materials; or a printed script of a stock speech (such as given on a museum or historic house tour). A "qualified" interpreter means someone who is able to interpret effectively, accurately, and impartially, both receptively (i.e., understanding what the person with the disability is saying) and expressively (i.e., having the skill needed to convey information back to that person) using any necessary specialized vocabulary.
- For people who have speech disabilities, this may include providing a qualified speech-to-speech transliterator (a person trained to recognize unclear speech and repeat it clearly) , especially if the person will be speaking at length, such as giving testimony in court, or just taking more time to communicate with someone who uses a communication board. In some situations, keeping paper and pencil on hand so the person can write out words that staff cannot understand or simply allowing more time to communicate with someone who uses a communication board or device may provide effective communication. Staff should always listen attentively and not be afraid or embarrassed to ask the person to repeat a word or phrase they do not understand.

In addition, aids and services include a wide variety of technologies including:
1) Assistive listening systems and devices;
2) Open captioning, closed captioning, real-time captioning, and closed caption decoders and devices;
3) Telephone handset amplifiers, hearing-aid compatible telephones; text telephones (TTYs), videophones, captioned telephones, and other voice, text, and video-based telecommunications products;
4) Videotext displays;
5) Screen reader software, magnification software, and optical readers;
6) Video description and secondary auditory programming (SAP) devices that pick up video-described audio feeds for television programs;
7) Accessibility features in electronic documents and other electronic and information technology that is accessible (either independently or through assistive technology such as screen readers).

EFFECTIVE COMMUNICATION PROVISIONS

Covered entities must provide aids and services when needed to communicate effectively with people who have communication disabilities. The key to deciding what aid or service is needed to communicate **effectively** is to consider the nature, length, complexity, and context of the communication as well as the person's normal method(s) of communication.

Some easy solutions work in relatively simple and straightforward situations. For example:

- In a lunchroom or restaurant, reading the menu to a person who is blind allows that person to decide what dish to order.
- In a retail setting, pointing to product information or writing notes back and forth to answer simple questions about a product may allow a person who is deaf to decide whether to purchase the product.
- Other solutions may be needed where the information being communicated is more extensive or complex.

For example:
In a law firm, providing an accessible electronic copy of a legal document that is being drafted for a client who is blind allows the client to read the draft at home using a computer screen-reading program.

In a doctor's office, an interpreter generally will be needed for taking the medical history of a patient who uses sign language or for discussing a serious diagnosis and its treatment options.

A person's method(s) of communication are also key.
For example,

- Sign language interpreters are effective only for people who use sign language.
- Other methods of communication, such as those described above, are needed for people who may have lost their hearing later in life and does not use sign language.
- Similarly, Braille is effective only for people who read Braille.
- Other methods are needed for people with vision disabilities who do not read Braille, such as providing accessible electronic text documents, forms, etc. that can be accessed by the person's screen reader program.

Covered entities are also required to accept telephone calls placed through Telecommunication Relay Services (TRS) and Video Relay Services (VRS), and staff that answers the telephone must treat relay calls just like other calls. The communications assistant will explain how the system works if necessary.

Remember, the purpose of the effective communication rules is to ensure that the person with a communication disability can receive information from, and convey information to, the covered entity.

COMPANIONS

In many situations, covered entities communicate with someone other than the person who is receiving their goods or services. For example:

- School staff usually talk to a parent about a child's progress;
- Hospital staff often talks to a patient's spouse, other relative, or friend about the patient's condition or prognosis.

The rules refer to such people as "companions" and require covered entities to provide effective communication for companions who have communication disabilities.

The term "companion" includes any family member, friend, or associate of a person seeking or receiving an entity's goods or services who is an appropriate person with whom the entity should communicate.

USE OF ACCOMPANYING ADULTS OR CHILDREN AS INTERPRETERS

Historically, many covered entities have expected a person who uses sign language to bring a family member or friend to interpret for him or her. These people often lacked the impartiality and specialized vocabulary needed to interpret effectively and accurately. It was particularly problematic to use people's children as interpreters.

The ADA places responsibility for providing effective communication, including the use of interpreters, directly on covered entities. They cannot require a person to bring someone to interpret for him or her. A covered entity can rely on a companion to interpret in only two situations.

(1) In an emergency involving an imminent threat to the safety or welfare of an individual or the public, an adult or minor child accompanying a person who uses sign language may be relied upon to interpret or facilitate communication only when a qualified interpreter is not available.

(2) In situations **not** involving an imminent threat, an adult accompanying someone who uses sign language may be relied upon to interpret or facilitate communication when a) the individual requests this, b) the accompanying adult agrees, and c) reliance on the accompanying adult is appropriate under the circumstances. This exception does **not** apply to minor children.

Even under exception (2), covered entities may **not** rely on an accompanying adult to interpret when there is reason to doubt the person's impartiality or effectiveness. For example:

- It would be inappropriate to rely on a companion to interpret who feels conflicted about communicating bad news to the person or has a personal stake in the outcome of a situation.
- When responding to a call alleging spousal abuse, police should never rely on one spouse to interpret for the other spouse.

WHO DECIDES WHICH AID OR SERVICE IS NEEDED?

When choosing an aid or service, title II entities are required to give primary consideration to the choice of aid or service requested by the person who has a communication disability. The state or local government must honor the person's choice, unless it can demonstrate that another equally effective means of communication is available, or that the use of the means chosen would result in a fundamental alteration or in an undue burden (see limitations below).

If the choice expressed by the person with a disability would result in an undue burden or a fundamental alteration, the public entity still has an obligation to provide an alternative aid or service that provides effective communication if one is available.

Title III entities are **encouraged** to consult with the person with a disability to discuss what aid or service is appropriate. The goal is to provide an aid or service that will be effective, given the nature of what is being communicated and the person's method of communicating.

Covered entities may require reasonable advance notice from people requesting aids or services, based on the length of time needed to acquire the aid or service, but may not impose excessive advance notice requirements. "Walk-in" requests for aids and services must also be honored to the extent possible.

For more information about the ADA, please visit the website or call the toll-free number. www.ADA.gov
ADA Information Line 800-514-0301 (Voice) and 800-514-0383 (TTY)

ADA REQUIREMENTS FOR EFFECTIVE COMMUNICATION

The purpose of the effective communication rules is to ensure that the person with a vision, hearing or speech disability can communicate with, receive information from, and convey information to, the covered entity (physician office, clinic, hospital, nursing home, etc.)
Covered entities must provide auxiliary aids and services when needed to communicate effectively with people who have communication disabilities. The person with the disability can choose the type of aid/service.

Your patient may need assistance because …	These are some options we can provide for you…..
Am blind or have vision impairments that keep me from reading	- Large print materials - Physician can complete form for talking books through National Library Service for the Blind and Physically Handicapped https://www.loc.gov/nls/pdf/application.pdf - Physician can complete form for Vision enabled telephone-- http://www.californiaphones.org/application -Check with health plans to see what they have available (audio recordings of printed materials, etc.)
Am hard of hearing and have trouble hearing and understanding directions, or answering the doorbell	- Amplifier/ Pocket Talker - Written materials - Qualified sign language interpreter - Qualified note taker - Telecommunications Relay Service (TRS) 7-1-1 - Have physician dictate into voice-recognition software and patient can type answers back
Have difficulty speaking clearly and making myself understood	- Allow for extra time and attentive listening - Qualified note taker - Telecommunications Relay Services (TRS) 7-1-1 - Communication board or paper and pencil - Have physician dictate into voice-recognition software and patient can type answers back

* All requirements also apply to individual's companion or caregiver when communication with that person is appropriate. An individual's companion or caregiver should not be relied on to act as the qualified interpreter.

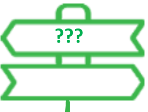
Language Services:
The KEY to Patient Engagement

Where do I start?
Check out the Q&A below to learn more...



Why does my office need a language service plan?

Clear communication is the absolute heart of medical practice. Seven out of ten surveyed physicians indicated that language barriers represent a top priority for the health care field[1]. Unaddressed barriers can:

- Compromise quality of care
- Result in poor outcomes
- Have legal consequences
- Increase litigation risk

Where do I start?

Get Ready:

- Gather your team
- Make a commitment
- Identify needs

Get Set: *identify resources*

Go: *pull it all together, implement, evaluate, plan for the future*

What language service needs should I begin to identify?

Keep it simple and write down:

- *What you know about your patient demographics*
- *What you already do to provide language services*
- *Where you can grow and strengthen your language services*

Where can I find resources?

- Providing Language Services
- Incorporating Interpreter Services
- Self-assessment checklist
- Language Access Assessment and Planning Tool

Get Ready, Get Set, Go!

Get ready!

- Identify a designee or small team and commit to improve your capacity to serve individuals with limited English proficiency (LEP)
- Identify the most common languages of LEP patients you serve
- Create a checklist of what is already in place related to: interpreters, qualified bilingual staff and translated materials
- Document what needs to be enhanced

Get set!

- Review resources and identify those most useful for your office

Go!

- Create plan, implement, evaluate and plan for the future:
- Staff training on language service plan and cultural competency

[1] Wirthlin Worldwide 2002 RWJF Survey

SUPPORTING PATIENTS WITH 211 AND 711 COMMUNITY SERVICES

211 and 711 are free and easy to use services that can be used as resources to support patients with special needs. Each of these services operates in all States and is offered at no cost to the caller 24 hours a day/7 days a week.

211

211 is a free and confidential service that provides a single point of contact for people that are looking for a wide range of health and human services programs. With one call, individuals can speak with a local highly trained service professional to assist them in finding local social services agencies. and guide them through the maze of groups that specialize in housing assistance, food programs, counseling, hospice, substance abuse and other aid.

For more information, look for your local 211.org.

711

711 is a no cost relay service that uses an operator, phone system and a special teletypewriter (TDD or TTY) to help people with hearing or speech impairments have conversations over the phone. The 711 relay service can be used to place a call to a TTY line or receive a call from a TTY line. Both voice and Telecommunications Relay Service (TRS) users can initiate a call from any telephone, anywhere in the United States, without having to remember and dial a seven or ten-digit access number.

Simply dial 711 to be automatically connected to a TRS operator. Once connected the t TRS operator will relay your spoken message in writing and will read responses back to you.

In some areas, 711 offers speech impairment assistance. Special trained speech recognition operators available to help facilitate communication with individuals that may have speech impairments.

For more information, visit http://ddtp.cpuc.ca.gov/homepage.aspx

SECTION B: RESOURCES TO COMMUNICATE ACROSS LANGUAGE BARRIERS

A GUIDE TO INFORMATION IN SECTION B

RESOURCES TO COMMUNICATE ACROSS LANGUAGE BARRIERS

This section offers resources to help health care providers identify the linguistic needs of their Limited English Proficient (LEP) patients and strategies to meet their communication needs.

Research indicates that LEP patients face linguistic barriers when accessing health care services. These barriers have negative impacts on patient satisfaction and knowledge of diagnosis and treatment. Patients with linguistic barriers are less likely to seek treatment and preventive services. This leads to poor health outcomes and longer hospital stays.

This section contains useful tips and ready-to-use tools to help remove the linguistic barriers and improve the linguistic competence of health care providers. The tools are intended to assist health care providers in delivering appropriate and effective linguistic services, which leads to:

- Increased patient health knowledge and compliance with treatment
- Decreased problems with patient-provider encounters and increased patient satisfaction
- Increased **appropriate** utilization of health care services by patients
- Potential reduction in liability from medical errors

The following materials area available in this section:

Tips for Working with LEP Members	Suggestions to help communicate with LEP patients.
Useful Tips for Communicating Across Language Barriers	Suggestions to help identify and document language needs.
Tips for Working with Interpreters	Suggestions to maximize the effectiveness of an interpreter.
Tips for Locating Interpreter Services	Information to know when locating interpreter services.
Common Sentences in Foreign Languages (Spanish & Vietnamese)	Simple phrases that can be used to communicate with LEP patients while waiting for an interpreter.
Common Signs in Foreign Languages (Spanish & Vietnamese)	Simple signs that can be enlarged and posted in your facility.
Language Identification Flashcard	Tool to identify patient languages.
Employee Language Pre-Screening Survey	Pre-screening tool to identify employees that may be eligible for formal language proficiency testing
Request for Proposal (RFP) Questions	Sample screening questions to interview translation vendors

TIPS FOR WORKING WITH LIMITED ENGLISH PROFICIENT MEMBERS

California law requires that health plans and insurers offer free interpreter services to both LEP members and health care providers and also ensure that the interpreters are professionally trained and are versed in medical terminology and health care benefits.

Who is a LEP member?

Individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English, may be considered limited English proficient (LEP).

How to identify a LEP member over the phone

- Member is quiet or does not respond to questions
- Member simply says yes or no, or gives inappropriate or inconsistent
- answers to your questions
- Member may have trouble communicating in English or you may have a
- very difficult time understanding what they are trying to communicate
- Member self identifies as LEP by requesting language assistance

Tips for working with LEP members and how to offer interpreter services

- Member speaks no English and you are unable to discern the language
- Connect with contracted telephonic interpretation vendor to identify language needed.
- Member speaks some English:
- Speak slowly and clearly. Do not speak loudly or shout. Use simple words and short sentences.
- How to offer interpreter services:

"*I think I am having trouble with explaining this to you, and I really want to make sure you understand. Would you mind if we connected with an interpreter to help us? Which language do you speak?*"

OR

"*May I put you on hold? I am going to connect us with an interpreter.*" (If you are having a difficult time communicating with the member)

Best practice to capture language preference

For LEP members it is a best practice to capture the members preferred language and record it in the plan's member data system.

"*In order for me (or Health Plan) to be able to communicate most effectively with you, may I ask what your preferred spoken and written language is?*"

*This universal symbol for interpretive services at the top right of this document is from Hablamos Juntos, a Robert Wood Johnson funded project found at:

http://www.hablamosjuntos.org/signage/symbols/default.using_symbols.asp#bpw

TIPS FOR COMMUNICATING: ACROSS LANGUAGE BARRIERS

Limited English Proficient (LEP) patients are faced with language barriers that undermine their ability to understand information given by healthcare providers as well as instructions on prescriptions and medication bottles, appointment slips, medical education brochures, doctor's directions, and consent forms. They experience more difficulty (than other patients) processing information necessary to care for themselves and others.

Tips to Identify a Patient's Preferred Language

- Ask the patient for their preferred spoken and written language.
- Display a poster of common languages spoken by patients; ask them to point to their language of preference.

Post information relative to the availability of interpreter services.

Make available and encourage patients to carry "I speak…." or "Language ID" cards.

(Note: Many phone interpreter companies provide language posters and cards at no charge.)

Tips to Document Patient Language Needs

For all Limited English Proficient (LEP) patients, document preferred language in paper and/or electronic medical records.

- Post color stickers on the patient's chart to flag when an interpreter is needed.

  (e.g. Orange =Spanish, Yellow=Vietnamese, Green=Russian).

Tips to Assessing which Type of Interpreter to Use

- Telephone interpreter services are easily accessed and available for short conversations or unusual language requests.
- Face-to-face interpreters provide the best communication for sensitive, legal or long communications.
- Trained bilingual staff provides consistent patient interactions for a large number of patients.
- For reliable patient communication, avoid using minors and family members.

Tips to Overcome Language Barriers

Use Simple Words	• Avoid jargon and acronyms • Provide educational material in the languages your patients read • Limit/avoid technical language
Speak Slowly	• Do not shout, articulate words completely • Use pictures, demonstrations, video or audiotapes to increase understanding • Give information in small chunks and verify comprehension before going on.
Repeat Information	• Always confirm patient's understanding of the information - patient's logic may be different from yours

TIPS FOR WORKING WITH INTERPRETERS

TELEPHONIC INTERPRETERS

- Tell the interpreter the purpose of your call. Describe the type of information you are planning to convey. *
- Enunciate your words and try to avoid contractions, which can be easily misunderstood as the opposite of your meaning, e.g., "can't - cannot." *
- Speak in short sentences, expressing one idea at a time.*
- Speak slower than your normal speed of talking, pausing after each phrase.*
- Avoid the use of double negatives, e.g., "If you don't appear in person, you won't get your benefits"*
- Instead, "You must come in person in order to get your benefits."
- Speak in the first person. Avoid the "he said/she said." *
- Avoid using colloquialisms and acronyms, e.g., "MFIP." If you must do so, please explain their meaning.*
- Provide brief explanations of technical terms, or terms of art, e.g., "Spend-down" means the client must use up some of his/her monies or assets in order to be eligible for services." *
- Pause occasionally to ask the interpreter if he or she understands the information that you are providing, or if you need to slow down or speed up in your speech patterns. If the interpreter is confused, so is the client. *
- Ask the interpreter if, in his or her opinion, the client seems to have grasped the information that you are conveying. You may have to repeat or clarify certain information by saying it in a different way.*
- **ABOVE ALL, BE PATIENT** with the interpreter, the client and yourself! Thank the interpreter for performing a difficult and valuable service. *
- The interpreter will wait for you to initiate the closing of the call and will be the last to disconnect from the call.

When working with an interpreter over a speakerphone or with dual head/handsets, many of the principles of on-site interpreting apply. The only additional thing to remember is that the interpreter is "blind" to the visual cues in the room. The following will help the interpreter do a better job. **

When the interpreter comes onto the line let the interpreter know the following: **

- Who you are
- Who else is in the room
- What sort of office practice this is
- What sort of appointment this is

For example, "Hello interpreter, this is Dr. Jameson, I have Mrs. Dominguez and her adult daughter here for Mrs. Dominguez' annual exam." **

- Give the interpreter the opportunity to introduce himself or herself quickly to the patient. **
- If you point to a chart, a drawing, a body part or a piece of equipment, describe what you are pointing to as you do it.**

ON-SITE INTERPRETERS

- Hold a brief meeting with the interpreter beforehand to clarify any items or issues that require special attention, such as translation of complex treatment scenarios, technical terms, acronyms, seating arrangements, lighting or other needs.
- For **face-to-face** interpreting, position the interpreter off to the side and immediately behind the patient so that direct communication and eye contact between the provider and patient is maintained.
- For **American Sign Language (ASL)** interpreting, it is usually best to position the interpreter next to you as the speaker, the hearing person or the person presenting the information, opposite the deaf or hard of hearing person. This makes it easy for the deaf or hard of hearing person to see you and the interpreter in their line of sight.
- **Be aware** of possible gender conflicts that may arise between interpreters and patients. In some cultures, males should not be requested to interpret for females.
- **Be attentive** to cultural biases in the form of preferences or inclinations that may hinder clear communication. For example, in some cultures, especially Asian cultures, "yes" may not always mean "yes." Instead, "yes" might be a polite way of acknowledging a statement or question, a way of politely reserving one's judgment, or simply a polite way of declining to give a definite answer at that juncture.
- **Greet the patient first**, not the interpreter. **
- During the medical interview, speak directly to the patient, not to the interpreter: "Tell me why you came in today" instead of "Ask her why she came in today." **
- A professional interpreter will use the first person in interpreting, reflecting exactly what the patient said: e.g. "My stomach hurts" instead of "She says her stomach hurts." This allows you to hear the patient's "voice" most accurately and deal with the patient directly. **
- Speak at an even pace in relatively short segments; pause often to allow the interpreter to interpret. You do not need to speak especially slowly; this actually makes a competent interpreter's job more difficult. **
- Don't say anything that you don't want interpreted; it is the interpreter's job to interpret everything. **
- If you must address the interpreter about an issue of communication or culture, let the patient know first what you are going to be discussing with the interpreter. **

- Speak in: Standard English (avoid slang) **
  - Layman's terms (avoid medical terminology and jargon)
  - Straightforward sentence structure
  - Complete sentences and ideas
- Ask one question at a time. **
- Ask the interpreter to point out potential cultural misunderstandings that may arise.
  Respect an interpreter's judgment that a particular question is culturally inappropriate and either rephrase the question or ask the interpreter's help in eliciting the information in a more appropriate way. **
- Do not hold the interpreter responsible for what the patient says or doesn't say. The interpreter is the medium, not the source, of the message. **
- Avoid interrupting the interpretation. Many concepts you express have no linguistic or conceptual equivalent in other languages. The interpreter may have to paint word pictures of many terms you use.
- This may take longer than your original speech. **
- Don't make assumptions about the patient's education level. An inability to speak English does not necessarily indicate a lack of education. **
- Acknowledge the interpreter as a professional in communication. Respect his or her role. **

** "Addressing Language Access Issues in Your Practice - A Toolkit for Physicians and Their Staff Members," California Endowment website.
* "Limited English Proficiency Plan," Minnesota Department of Human Services: Helpful hints for using telephone interpreters (page 6).

TIPS FOR LOCATING INTERPRETER SERVICES

Steps I need to take to locate interpreter services:

1) Identify the languages spoken by your patients, and
2) Identify the language services available to meet these needs

For example:

Language spoken by my patients	Resources to help me communicate with patients
Spanish	Certified bilingual staff
Armenian	Telephone interpreter or in person interpreter

Identify the language capability of your staff (See Employee Language Skills Self-Assessment)
• Keep a list of available certified bilingual staff that can assist with LEP patients on-site.
• Ensure the competence of individuals providing language assistance by formally testing with a qualified bilingual proficiency testing vendor. Certified interpreters are HIPAA compliant.
• Do Not: Rely on staff other than certified bilingual/multilingual staff to communicate directly with individuals with limited English proficiency
• Do Not: Rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available. ***IF you use a minor, document the reason a minor was used.***

Identify services available do not require an individual with limited English proficiency to provide his/her own interpreter
• **Ask all health plans you work with if and when they provide interpreter services, including American Sign Language interpreters, as a covered benefit for their members.**
• **Identify community based qualified interpreter resources**
• **Create and provide to your staff policies and procedures to access interpreter services.**
• **Keep an updated list of specific telephone numbers and health plan contacts for language services.**
• **If you are coordinating interpreter services directly, ask the agency providing the interpreter how they determine interpreter quality.**
• **711 relay services are available to assist in basic communication with deaf or hard of hearing patients. In some areas services to communicate with speech impaired individuals may also be available.**

For further information, you may contact the National Council on Interpretation in Health Care, the Society of American Interpreters, the Translators & Interpreters Guild, the American Translators Association, or any local Health Care Interpreters association in your area.

LANGUAGE IDENTIFICATION FLASHCARDS

The sheets on the following page can be used as a tool to assist the office staff or physician in identifying the language that your patient is speaking. Pass the sheets to the patient and point to the English statement. Motion to have the patient read the other languages and to point to the language that the patient prefers. (Conservative gestures can communicate this.) Record the patient's language preference in their medical record.

The **Language Identification Flashcard** was developed by the U.S. Census Department and can be used to identify most languages that are spoken in the United States.

Printer friendly version of the Language Assistance Flashcard is on next page.

Interpreting Services Available

English Translation: Point to your language. An interpreter will be called. The interpreter is provided at no cost to you.

EMPLOYEE LANGUAGE PRE-SCREENING TOOL

Dear Physician:

The attached prescreening tool is provided as a resource to assist you in identifying employees that may be eligible for formal language proficiency testing. Those who self-assess at 3 or above are candidates that are more likely to pass a professional language assessment.

This screening tool is not meant to serve as an assessment for qualified medical interpreters or meet the CA Language Assistance Program law or any other regulatory requirements.

Thank you

Printer friendly version of the EMPLOYEE LANGUAGE PRE SCREENING TOOL KIT provided on next page.

EMPLOYEE LANGUAGE PRE SCREENING TOOK KEY

Key	Spoken Language
(1)	Satisfies elementary needs and minimum courtesy requirements. Able to understand and respond to 2-3 word entry-level questions. May require slow speech and repetition.
(2)	Meets basic conversational needs. Able to understand and respond to simple questions. Can handle casual conversation about work, school, and family. Has difficulty with vocabulary and grammar.
(3)	Able to speak the language with sufficient accuracy and vocabulary to have effective formal and informal conversations on most familiar topics related to health care.
(4)	Able to use the language fluently and accurately on all levels related to health care work needs. Can understand and participate in any conversation within the range of his/her experience with a high degree of fluency and precision of vocabulary. Unaffected by rate of speech.
(5)	Speaks proficiently equivalent to that of an educated native speaker. Has complete fluency in the language, including health care topics, such that speech in all levels is fully accepted by educated native speakers in all its features, including breadth of vocabulary and idioms, colloquialisms, and pertinent cultural preferences. Usually has received formal education in target language.
Key	**Reading**
(1)	No functional ability to read. Able to understand and read only a few key words.
(2)	Limited to simple vocabulary and sentence structure.
(3)	Understands conventional topics, non-technical terms and heath care terms.
(4)	Understands materials that contain idioms and specialized health care terminology; understands a broad range of literature.
(5)	Understands sophisticated materials, including those related to academic, medical and technical vocabulary.
Key	**Writing**
(1)	No functional ability to write the language and is only able to write single elementary words.
(2)	Able to write simple sentences. Requires major editing.
(3)	Writes on conventional and simple health care topics with few errors in spelling and structure. Requires minor editing.
(4)	Writes on academic, technical, and most health care and medical topics with few errors in structure and spelling.
(5)	Writes proficiently equivalent to that of an educated native speaker/writer. Writes with idiomatic ease of expression and feeling for the style of language. Proficient in medical, healthcare, academic and technical vocabulary.

Interpretation vs. Translation	**Interpretation:** Involves spoken communication between two parties, such as between a patient and a pharmacist, or between a family member and doctor. **Translation:** Involves very different skills from interpretation. A translator takes a written document in one language and changes it into a document in another language, preserving the tone and meaning of the original. *Source: University of Washington Medical Center*

EMPLOYEE LANGUAGE PRESCREENING TOOL (FOR CLINICAL AND NON-CLINICAL EMPLOYEES)

This prescreening tool is intended for clinical and non-clinical employees who are bilingual and are being considered for formal language proficiency testing.

Employee's Name: ______________________________ **Department/Job Title:** _____________________ ___________________________

Work Days: **Mon / Tues/ Wed/ Thurs/ Fri/ Sat/ Sun** **Work Hours (Please Specify):** _______________ __________________________________

Directions: (1) List any/all language(s) or dialects you know.
(2) Indicate how fluently you speak, read and/or write each language

Language	Dialect, region, or country	Fluency: see attached key (Circle)			I would like to use my language skills to speak with patients (Circle)	I would like to use my reading language skills to communicate with patients (Circle)	I would like to use my language skills to write patient communications (Circle)
		Speaking	Reading	Writing			
1.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
2.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
3.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No
4.		1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	Yes No	Yes No	Yes No

TO BE SIGNED BY THE PERSON COMPLETING THIS FORM

I, ____, attest that the information provided above is accurate.

Date: _______________

SCREENING QUESTIONS FOR INTERVIEWING TRANSLATION VENDORS

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
General Business Requirements Questions
1. What geographic areas do you currently serve?
2. Please indicate your areas of expertise (i.e. Medical/Health, Education, Law, etc.).
3. Is your company aware and automatically follow special certifications for states you provide services in/for?
4. Please list all languages currently available. List only languages that have at least one active translator currently and regularly available. Also list whether the translators available are native speakers and if so, where they are from.
5. Please list the 3-5 most common languages your organization translates.
6. Describe your process for translating documents based on regional dialects for one language. For example, how do you facilitate translating a document into Spanish for Southern California and New York?
7. Describe how your translation staff is knowledgeable in the sensitivities, norms, and regional dialects of various cultural groups?
8. Please list all national states and global countries you provide Services in.
9. What differentiates your company from your competition as it relates to the services outlined in this RFP?
10. Are you able to customize your services at the client level? Please provide an example of how you may customize other programs in place.
11. Is your company able to assign dedicated resource team to support services?
12. What percent of your current business is providing services within the health care industry?
13. Please define the language proficiency of medical terminology and use of health care industry language for employees providing services.
14. Do you use validated test instruments to assess your medical or health care terminology translators?
15. Do you support the most recent version of InDesign?
16. What is your process for ensuring software capabilities are up-to-date while still maintaining support for older file formats?
17. Can you produce translations on any day of the year?
18. What are your company's top three measures of a successful relationship between your company's organization and your clients? State how your company would measure and report each.
19. Please demonstrate how your company was flexible with an unusual client request.
20. What is your process to work with document owners to fine tune translations to match their specific target audience?

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
21. Do you maintain a translation glossary for each of your clients? (Glossary- a set of terms and their preferred translation)
22. Are you open to the total translation memory being provided to us (health plan) upon request?
23. Can you provide Spanish translations and translations into traditional Chinese characters within 24 hours?
Administration Questions
1. What are your standard hours of operation?
2. Do you have a privacy and confidentiality policy? If yes, please describe.
3. What are your policies regarding direct contact between a translator and the client?
4. What is the average amount of time to complete a translated document from receipt to delivery?
5. How much advance notice is needed to request translation services?
Customer Service Questions
1. Please describe your Customer Service model for these services.
2. Please describe the grievance and complaint escalation process and resolution of service issues?
3. What is the experience level of project management team with localization and cultural adaptation?
4. What is the coverage of services for different time zones?
5. Do you provide full or partial services on holidays and weekends?
6. Describe new hire onboarding and ongoing training and specialized health care industry training provided to staff and/or contracted individuals.
7. Please explain your capabilities to ensure cultural adaptation.
Service Level Questions
1. Please list and describe your standard Service Levels. You may attach them separately.
2. Do you offer service guarantees? If yes, please provide.
Translation Services Questions
1. How long has your company been providing Translation Services as part of its offering?
2. Process - Please provide an overview of your full Translation Services process from initial engagement from customer to completion.
3. Please translate the provided document labeled "XXXX"
Quality Assurance Practices/Proficiencies Questions
1. Please describe the process for screening potential interpreters and translators.
2. What are the educational credentials of your translators? Do your credentialed translators do all the translation work or do they merely supervise the work of others?
3. Are your translator's employees of the company or are they contracted employees? What percentage belongs to each group (% employees and % contracted)?

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
4. Please indicate which of the following skills are evaluated in an initial screening or translators: ___Basic Language Skills ___Industry Specific Terminology ___Cultural Awareness ___Ethics ___Written Translation Skills ___Others (Please explain)
5. What training program is provided to translators once they have been hired? Please include details of any in-house or outsourced training including number of hours, topics covered, etc.
6. Is continuing education required? If yes, how many hours per year?
7. What percentage of your translators are certified by: ___Internal Process ___State Process ___Federal Court ___Private External Organization (please list)
8. Describe your internal quality control or monitoring process.
9. What system do you have in place to resolve complaints?
10. Please describe your accuracy standards. What guarantees do you provide? Would you be willing to put 20 percent of your fees at risk contingent upon meeting agreed-upon guaranteed standards? Would you consider a Service Level Agreement (SLA)? If so, what standards do you customarily include in an SLA?
11. Do you provide an attestation or Certificate of Authenticity or equivalent document? If so, please provide a sample.
12. Please list all certifications and all other QM certifications your company holds/maintains.
13. Please describe your Quality Assurance program.
14. How often does your company review and revise the quality program?
15. How does your company ensure quality of services, including linguists and document translations, and actions for substandard performance?
16. Do you have a process to guarantee consistency between translations from multiple linguists? Please define this process and describe the process to ensure localization, terminology consistency, accuracy and appropriate literacy.
17. Describe your quality control processes. What do you have in place to assure that structure and format are precisely the same as the English original
18. How long has your company been providing Proficiency and Certification Services as part of its offering?
19. Please provide an overview of your Proficiency and Certification Service program.
20. Does your program include examination of general language usage in formal and professional context? Please Define.
21. Does your program include examination of fluency in the assessment language?
22. Describe industry experience and Supplier ability to use terminology and phrases in the assessment language that is specific to the healthcare industry
23. What type of reporting/scoring system does your program use to determine examinees proficiency level in the assessment language. The proficiency level describes the examinee's performance in several areas of oral language proficiency. If applicable, please include sample scorecard.

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors
Experience Questions
1. How long have you been in business?
2. Please provide at least three references.
3. Please list current health care organization clients for whom you have provided written translation services. Please list the types of documents that have been translated for health care clients.
4. Can your organization guarantee that translators working on <<client's name>> documents will have had experience translating health care documents?
5. How do you address the uniqueness of some terminology that occurs in health care, particularly complementary health care?
6. Please describe your experience in translating health web sites and images. If applicable, please provide the names of client for which you have provided this service.
7. Do you currently or have you furnished translation services to any federal, state or local agency? If yes, list the organization and type of service provided.
8. Describe your range of graphic design/desktop publishing services that you provide, including both print and Web. Please indicate the number of staffed designers you have and the design software (PC/Mac Quark, InDesign, PageMaker, Illustrator, Freehand, Photoshop, Dream weaver, etc.) your staff uses to create brochures, flyers, and other marketing/education materials. Please provide a breakdown of the additional costs and average turnaround times associated with your graphic design services, including making changes or edits.
9. Describe whether or not your services include the review of culturally sensitive images and text. For example, do your services include the review of images within a graphic document in order to determine whether they are culturally sensitive and appropriate?
Reporting Questions
1. Do you offer a standard reporting package? If yes, please attach.
2. Do you provide reports confirming language proficiency of employees or contractors that provide services?
Fee Questions
1. Please describe your pricing practices and fee schedule.
2. Do you provide estimates for work to be performed? If so, please provide a quote to translate the attached documents into Spanish?
3. What kind of volume discounts do you offer?
4. Do you offer services on a single use basis?
5. What information is provided on billing statements? Please include a sample.

Request for Proposal (RFP) Questionnaire Screening questions for interviewing Translation Vendors

6. What is your pricing/billing policy for making edits or changes to documents translated? For a document that is 40 pages in length, what would the cost be to translate into 6 languages by in-country translators:

___Simplified Chinese for China	___Japanese
___Canadian French	___Russian
___Brazilian Portuguese	___Argentine Spanish

7. What is your pricing/billing policy for making edits or changes to documents translated? For a document that is 40 pages in length, what would the cost be to translate into 6 languages by in-country translators:

___Simplified Chinese for China	___Japanese
___Canadian French	___Russian
___Brazilian Portuguese	___Argentine Spanish

8. What guarantees are available if the work produced does not meet our expectations?
9. What is your flexibility and cost implication of translating a document into different dialects of one language? Are multiple dialects the same cost as multiple languages?
10. Are your prices the same for all languages; common and rarely spoken?
11. <<Client's name>> generally remits payment within 45 days of invoice date. Please indicate if this is not acceptable? What are your standard payment terms?
12. Please list and describe any fees associated with your program(s) and please list all rates associated with different languages, countries, processes, e.g. project management, engineering, translation or telephonic per minute rates, etc.
13. Do you provide pricing for leveraged (previously translated) words?
14. Are all translations priced per word or is there a minimum charge per document? For example if the content to be translated is 50 words, is the pricing per word or based on a minimum word count?
15. Do you charge for attestations, desk top publishing, rush jobs or providing documents in many different programs such as providing the same document in Word, PDF and In-Design or Quark?

Technology Questions

1. Do you use a submission portal? If so, is all communication via the submission portal?
2. What technology is used to manage translation memory?

SECTION C: RESOURCES TO INCREASE AWARENESS OF CULTURAL BACKGROUNDS AND ITS IMPACT ON HEALTH CARE DELIVERY

A GUIDE TO INFORMATION IN SECTION C

Resources to Increase Awareness of Cultural Background and its Impact on Health Care Delivery

Everyone approaches illness as a result of their own experiences, including education, social conditions, economic factors, cultural background, and spiritual traditions, among others. In our increasingly diverse society, patients may experience illness in ways that are different from their health professional's experience. Sensitivity to a patient's view of the world enhances the ability to seek and reach mutually desirable outcomes. If these differences are ignored, unintended outcomes could result, such as misunderstanding instructions and poor compliance.

The following tools are intended to help you review and consider important factors that may have an impact on health care. Always remember that even within a specific tradition, local and personal variations in belief and behavior exist. Unconscious stereotyping and untested generalizations can lead to disparities in access to service and quality of care. The bottom line is: if you don't know your patient well, ask respectful questions. Most people will appreciate your openness and respond in kind.

The following materials are available in this section:

What is Health Disparities/Health Equity?	A detained description of Health Disparities
Let's Talk About Sex	A guide to help you understand and discuss gender roles, modesty, and privacy preferences that vary widely among different people when taking sexual health history information.
Delivering Care to Lesbian, Gay, bisexual or Transgender (LGBT)	A guide to the Lesbian, Gay, Bisexual or Transgender communities.
Cultural Background – Information on Special Topics	Points of reference to become familiar with diverse cultural backgrounds.
Effectively Communicating with the Elderly	A tip sheet on how to better communicate with elderly patients.
Pain Management Across Cultures	A guide to help you understand the ways people may use to describe pain and approach to treatment options.

HEALTH EQUITY, HEALTH EQUALITY AND HEALTH DISPARITIES

What does health equity mean?
Health Equity is attainment of the highest level of health for all people.

Achieving health equity requires valuing everyone equally with focused and ongoing societal efforts to address avoidable inequalities, historical and contemporary injustices, and the elimination of health and health care disparities.

Source: http://minorityhealth.hhs.gov/npa/files/Plans/NSS/NSS_05_Section1.pdf

What are health disparities and why do they matter to all of us?
A health disparity is a particular type of health difference that is closely linked with social or economic disadvantage.

Health disparities adversely affect groups of people who have systematically experienced greater social and/or economic obstacles to health and/or a clean environment based on:

- Racial or ethnic group
- Religion
- Socioeconomic status
- Gender
- Age
- Mental health
- Cognitive, sensory, or physical disability
- Sexual orientation
- Geographic location
- Other characteristics historically linked to discrimination or exclusion

Source: http://minorityhealth.hhs.gov/npa

Health disparities matter to all of us. Here are just 2 examples of what can happen when there are disparities…

Example 1: *A man who speaks only Spanish is not keeping his blood sugar under control because he does not understand how to take his medication. As a result, he suffers permanent vision loss in one eye.*

Example 2: *A gay man is treated differently after telling office staff that he is married to a man, and feels so uncomfortable that he does not tell the doctor his serious health concerns. As a result, he does not get the tests that he needs, his cancer goes untreated, and by the time he is diagnosed his tumor is stage 4.*

The Difference between Health Equality and Health Equity

Why treating everyone the same, without acknowledgement of diversity and the need for differentiation, may be clinically counterproductive

Equality denotes that everyone is at the same level. **Equity** refers to the qualities of justness, fairness, impartiality and evenhandedness, while equality is about equal sharing and exact division. Source: http://www.differencebetween.net/language/difference-between-equity-and-equality

Health equity is different from health equality. The term refers specifically to the **absence of disparities in controllable areas** of health. It may not be possible to achieve complete health equality, as some factors are beyond human control. Source: World Health Organization, http://www.who.int.healthsystems/topics/equity

An example of **health inequality** is when one population dies younger than another because of genetic differences that cannot be controlled. An example of **health inequity** is when one population dies younger than another because of poor access to medications, which is something that could be controlled. Source: Kawachi I., Subramanian S., Almeida-Filho N. "A glossary for health inequalities. *J Epidemiol Community Health* 2002; 56:647-652.

Health Equity and Culturally and Linguistically Appropriate Services (CLAS)
How are they connected?

Health inequities in our nation are well documented. The provision of culturally and linguistically appropriate services (CLAS) is one strategy to help eliminate health inequities.

By tailoring services to an individual's culture and language preference, you can help bring about **positive health outcomes** for diverse populations.

The provision of health care services that **are respectful of and responsive to the health beliefs, practices and needs of diverse patients** can help close the gap in health care outcomes.

The pursuit of health equity must remain at the forefront of our efforts. We must always remember that dignity and quality of care are rights of all and not the privileges of a few.

For more background and information on CLAS, visit https://www.thinkculturalhealth.hhs.gov

Plans for Achieving Health Equity and What You Can Do

With growing concerns about health inequities and the need for health care systems to reach increasingly diverse patient populations, cultural competence has become more and more a matter of national concern.

As a health care provider, you can take the first step to improve the quality of health care services given to diverse populations.

By learning to be more **aware of your own cultural beliefs** and more responsive to those of your patients, you and your office staff can think in ways you might not have before. That can lead to self-awareness and, over time, changed beliefs and attitudes that will translate into **better health care**.

Knowing your patients and making sure that you **collect and protect specific data**, for example their preferred spoken and written languages, can have a major impact on their care.

The website https://www.thinkculturalhealth.hhs.gov , sponsored by the Office of Minority Health, offers the latest resources and tools to promote cultural and linguistic competency in health care.

You may access free and accredited continuing education programs as well as tools to help you and your organization provide respectful, understandable and effective services.

Source: Think Cultural Health (TCH), https://www.thinkculturalhealth.hhs.gov **Think Cultural Health** *is the flagship initiative of the OMH Center for Linguistic and Cultural Competence in Health Care. The goal of* **Think Cultural Health** *is to Advance Health Equity at Every Point of Contact through the development and promotion of culturally and linguistically appropriate services*

Who else is addressing Health Disparities?

Many groups are working to address health disparities, including community health workers, patient advocates, hospitals, and health plans as well as government organizations.

The Affordable Care Act (ACA) required the establishment of Offices of Minority Health within six agencies of the Department of Health and Human Services (HHS):

- Agency for Healthcare Research and Quality (AHRQ)
- Centers for Disease Control and Prevention (CDC)
- Centers for Medicare & Medicaid Services (CMS)
- Food and Drug Administration (FDA)
- Health Resources and Services Administration (HRSA)
- Substance Abuse and Mental Health Services Administration (SAMHSA)

These offices join the HHS Office of Minority Health and NIH National Institute on Minority Health and Health Disparities to lead and coordinate activities that improve the health of racial and ethnic minority populations and eliminate health disparities. Source: Offices of Minority http://minorityhealth.hhs.gov

LET'S TALK ABOUT SEX

Consider the following strategies when navigating the cultural issues surrounding the collection of sexual health histories.

Areas of Cultural Variation	Points To Consider	Suggestions
Gender Roles	• Gender roles vary and change as the person ages (i.e. women may have much more freedom to openly discuss sexual issues as they age). • A patient may not be permitted to visit providers of the opposite sex unaccompanied (i.e. a woman's husband or mother-in-law will accompany her to an appointment with a male provider). • Some cultures prohibit the use of sexual terms in front of someone of the opposite sex or an older person. • Several family members may accompany an older patient to a medical appointment as a sign of respect and family support.	• Before entering the exam room, tell the patient and their companion exactly what the examination will include and what needs to be discussed. Offer the option of calling the companion(s) back into the exam room immediately following the physical exam. • As you invite the companion or guardian to leave the exam room, have a health professional of the same gender as the patient standing by and re-assure the companion or guardian that the person will be in the room at all times. • Use same sex non-family members as interpreters.
Sexual Health and Patient Cultural Background	• If a sexual history is requested during a non-related illness appointment, patients may conclude that the two issues – for example, blood pressure and sexual health are related. • In many health belief systems there are connections between sexual performance and physical health that are different from the Western tradition. • Example: Chinese males may discuss sexual performance problems in terms of a "weak liver. • Be aware that young adults may not be collecting sexual history information is part of preventive care and is not based on an assumption that sexual behaviors are taking place. • Printed materials on topics of sexual health may be considered inappropriate reading materials.	• Explain to the patient why you are requesting sexually related information at that time. • For young adults, clarify the need for collecting sexual history information and consider explaining how you will protect the confidentiality of their information. • Offer sexual health education verbally. Whenever possible, provide sexual health education by a health care professional who is the same t. gender as the patient

Areas of Cultural Variation	Points To Consider	Suggestions
Confidentiality Preferences	• Patients may not tell you about their preferences and customs surrounding the discussion of sexual issues. You must watch their body language for signals or discomfort, or ask directly how they would like to proceed. • A patient may be required to bring family members to their appointment as companions or guardians. Printed materials on topics of sexual health may be considered inappropriate reading materials. • Be attentive to a patient's body language or comments that may indicate that they are uncomfortable discussing sexual health with a companion or guardian in the room.	• It may help to apologize for the need to ask sexual or personal questions. Apologize and explain the necessity. • Try to offer the patient a culturally acceptable way to have a confidential conversation. For example: "To provide complete care, I prefer one-on-one discussions with my patients. However, if you prefer, you may speak with a female/male nurse to complete the initial information." • Inform the patient and the accompanying companion(s) of any applicable legal requirements regarding the collection and protection of personal health information.

LESBIAN, GAY, BISEXUAL OR TRANSGENDER (LGBT)

Communities are made up of many diverse cultures, sexual orientations, and gender identities. Individuals who identify as lesbian, gay, bisexual or transgender (LGBT)[1] may have unmet health and health care needs resulting in health disparities. In fact, the LGBT community is subject to a disproportionate number of health disparities and is at higher risk for poor health outcomes.

According to Healthy People 2020[2], LGBT health disparities include:

Psychosocial Considerations

- Youth are 2 to 3 times more likely to attempt suicide and are more likely to be homeless.
- LGBT populations have the highest rates of tobacco, alcohol, and other drug use.
- Elderly LGBT individuals face additional barriers to health because of isolation and a lack of social services and culturally competent providers.

Clinical Considerations

- Lesbians are less likely to get preventive services for cancer; along with bisexual females are more likely to be overweight or obese.
- Gay men are at higher risk of HIV and other STDs, especially among communities of color.
- Transgender individuals have a high prevalence of HIV/STDs, victimization, mental health issues, and suicide and are less likely to have health insurance than straight or LGB individuals.

Visit glma.org for more information about:

- Creating a welcoming environment,
- General guidelines (including referral resources),
- Confidentiality, and
- Sensitivity training.

Visit glaad.org for additional resources on how to fairly and accurately report on transgender people

[1] The term LGBT is used as an umbrella term to describe a person's sexual orientation or gender identity/expression including (but not limited to) lesbian, gay, bisexual, transgender, queer, questioning, intersex, and asexual. Transgender is an umbrella term for a person who's gender identity or expression does not match their sex assigned at birth.
[2] https://www.healthypeople.gov/2020/topics-objectives/topic/lesbian-gay-bisexual-and-transgender-health

Do not use any gender or sexual orientation terms to identify your patient without verifying how they specifically self-identify.

CULTURAL BACKGROUND INFORMATION ON SPECIAL TOPICS

Use of Alternative or Herbal Medications

- People who have lived in poverty, or come from places where medical treatment is difficult to get, will often come to the doctor only after trying many traditional or home treatments. Usually patients are very willing to share what has been used if asked in an accepting, nonjudgmental way. This information is important for the accuracy of the clinical assessment.

- Many of these treatments are effective for treating the symptoms of illnesses. However, some patients may not be aware of the difference between treating symptoms and treating the disease.
- Some treatments and "medicines" that are considered "folk" medicine or "herbal" medications in the United States are part of standard medical care in other countries. Asking about the use of medicines that are "hard to find" or that are purchased "at special stores" may get you a more accurate understanding of what people are using than asking about **"alternative," "traditional," "folk," or "herbal" medicine.**

Pregnancy and Breastfeeding

- Preferred and acceptable ages for a first pregnancy vary from culture to culture. Latinos are more accepting of teen pregnancy; in fact it is quite common in many of the countries of origin. Russians tend to prefer to have children when they are older. It is important to understand the cultural context of any particular pregnancy. Determine the level of social support for the pregnant women, which may not be a function of age.

- Acceptance of pregnancy outside of marriage also varies from culture to culture and from family to family. In many Asian cultures there is often a profound stigma associated with pregnancy outside of marriage. However, it is important to avoid making assumptions about how welcome any pregnancy may be.
- Some Vietnamese and Latino women believe that colostrum is not good for a baby. An explanation from the doctor about why the milk changes can be the best tool to counter any negative traditional beliefs.
- The belief that breastfeeding works as a form of birth control is very strongly held by many new immigrants. It is important to explain to them that breastfeeding does not work as well for birth control if the mother gets plenty of good food, as they are more able to do here than in other parts of the world.

Weight

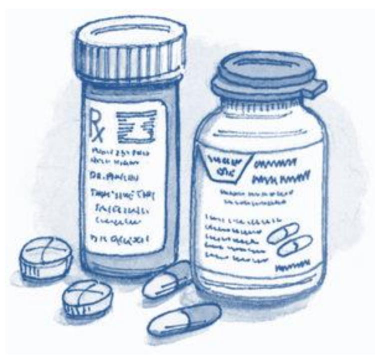
- In many poor countries, and among people who come from them, "chubby" children are viewed as healthy children because historically they have been better able to survive childhood diseases. Remind parents that sanitary conditions and medical treatment here protect children better than extra weight.
- In many of the countries that immigrants come from, weight is seen as a sign of wealth and prosperity. It has the same cultural value as extreme thinness has in our culture – treat it as a cultural as well as a medical issue for better success.

Infant Health

- It is very important to avoid making too many positive comments about a baby's general health.
    - Among traditional Hmong, saying a baby is "pretty" or "cute" may be seen as a threat because of fears that spirits will be attracted to the child and take it away
    - Some traditional Latinos will avoid praise to avoid attracting the "evil eye"
    - Some Vietnamese consider profuse praise as mockery
- It is often better to focus on the quality of the mother's care – "the baby looks like you take care of him well."
- Talking about a new baby is an excellent time to introduce the idea that preventive medicine should be a regular part of the new child's experience. Well-baby visits may be an entirely new concept to some new mothers from other countries. Protective immunizations are often the most accepted form of preventive medicine. It may be helpful to explain well-baby visits and check-ups as a kind of extension of the immunization process.

Substance Abuse

- When asking question regarding issues of substance (or physical) abuse, concerns about family honor and privacy may come into play. For example, in Vietnamese and Chinese cultures family loyalty, hierarchy, and filial piety are of the utmost importance and may therefore have a direct effect on how a patient responds to questioning, especially if family members are in the same room. Separating family members, even if there is some resistance to the idea, may be the only way to accurately assess some of these problems.



- Gender roles are often expressed in the use or avoidance of many substances, especially alcohol and cigarettes. When discussing and treating these issues the social component of the abuse needs to be considered in the context of the patient's culture.
- Alcohol is considered part of the meal in many societies, and should be discussed together with eating and other dietary issues.

Physical Abuse

- Ideas about acceptable forms of discipline vary from culture to culture. In particular, various forms of corporal punishment are accepted in many places. Emphasis must be placed on what is acceptable ***here***, and what may cause physical harm.
- Women may have been raised with different standards of personal control and autonomy than we expect in the United States. They may be accepting physical abuse *not* because of feelings of low self-esteem, but because it is socially accepted among their peers, or because they have nobody they can go to with their concerns. It is important to treat these cases as social rather than psychological problems.
- Immigrants learn quickly that abuse is reported and will lead to intervention by police and social workers. Even victims may not trust doctors, social workers, or police. It may take time and repeated visits to win the trust of patients. Remind patients that they do not have to answer questions (silence may tell you more than misleading answers). Using depersonalized conversational methods will increase success in reaching reluctant patients.
- Families may have members with conflicting values and rules for acceptable behavior that may result in conflicting reports about suspected physical abuse. This does not necessarily mean that anyone is being deceptive, just seeing things differently. This may cause special difficulties for teens who may have adopted new cultural values common to Western society, but must live in families that have different standards and behaviors.
- Behavioral indicators of abuse are different in different cultures. Many people are not very emotionally and physically expressive of physical and mental pain. Learn about the cultural norms of your patient populations to avoid overlooking or misinterpreting unknown signs of trauma.
- Do not confuse physical evidence of traditional treatments with physical abuse. Acceptable traditional treatments, such as coin rubbing or cupping, may leave marks on the skin, which look like physical abuse. Always consider this possibility if you know the family uses traditional home remedies.

Communicating with the Elderly

- Always address older patients using formal terms of address unless you are directly told that you may use personal names. Also remind staff that they should do the same.
- Stay aware of how the physical setting may be affecting the patient. Background noise, glaring or reflecting light, and small print forms are examples of things that may interfere with communication. The patients may not say anything, or even be aware that something physical is interfering with their understanding.
- Stay aware that many people believe that giving a patient a terminal prognosis is unlucky or will bring death sooner and families may not want the patient to know exactly what is expected to happen. If the family has strong beliefs along these lines the patient probably shares them. Follow ethical and legal requirements, but stay cognizant of the patient's cultural perspective. Offer the opportunity to learn the truth, at whatever level of detail desired by the patient.
- It is important to explain the specific needs for having an advance directive before talking about the treatment choices and instructions. This will help alleviate concerns that an advance directive is for the benefit of the medical staff rather than the patient.
- Elderly, low-literacy patients may be very skilled at disguising their lack of reading skills and may feel stigmatized by their inability to read. If you suspect this is the case you should not draw attention to this issue but seek out other methods of communication.

EFFECTIVELY COMMUNICATING WITH THE ELDERLY

Older Adult Communication from Your Patients Perspective	
I Wish You Knew…	**I Wish You Would Do…**
I want to be respected and addressed formally. I appreciate empathy.	Introduce yourself and greet me with Mr., Mrs. or Ms. Avoid using overly friendly terms, patronizing speech such as "honey, dear" and baby talk. Be empathetic and try to see through my lens.
I want to be spoken to directly, even if my caregiver is with me. I want to participate in the conversation and in making decisions.	Don't assume I cannot understand or make decisions. Include me in the conversation. Speak to me directly and check for understanding.
I can't hear well with lots of background noise and it is hard to see with glaring or reflecting light.	When possible, try to find a quiet place when speaking to hard of hearing patients. If there is unavoidable noise, speak clearly, slower and with shorter phrases as needed. Adjust glare or reflecting light as much as possible
I may have language barrier and cultural beliefs that may affect adherence to the treatment plan.	Offer language assistance to help us better understand each other. Ask about cultural beliefs that may impact my adherence to the treatment plan. (See Kleinman's Questions)
Medical jargon and acronyms confuse me.	Use layperson language, not acronyms or popular slang terms.
I respect my doctor and am not always comfortable asking questions. I don't like to be rushed.	Encourage questions. Avoid interrupting or rushing me. Don't make me feel like you do not have time to hear me out. Give me time to ask questions and express myself. After you ask a question, allow time for responses. Do not jump quickly from one topic to another without an obvious transition.
Nodding my head doesn't always mean I understand,	Focus on what is most important for me to know. Watch for cues to guide communication and information sharing. Ask questions to see if I truly comprehend. Check for understanding using Teach-Back.
I need instructions to take home with me. I may be very skilled at disguising my lack of reading skills and may be embarrassed to tell you.	Explain what will happen next. Watch for cues that indicate vision or literacy issues to inform you about the best way to communicate with me. Don't draw too much attention to my reading skills. Seek appropriate methods to effectively communicate with me, including large font and demonstration.
Some topics such as advance directives or a terminal prognosis are very sensitive for me.	Explain the specific need of having an advance directive before talking about treatment choices to help me alleviate my concern that this advance directive is for the benefit of the medical staff and not me. Related to a terminal prognosis, follow ethical and legal requirements, but be aware of my cultural perspective. Offer me the opportunity to learn the truth, at whatever level of detail that I desire. My culture may be one that believes that giving a terminal prognosis is unlucky or will bring death sooner and my family and I may not want you to tell me directly.

PAIN MANAGEMENT ACROSS CULTURES

Your ability to provide adequate pain management to some patients can be improved with a better understanding of the differences in the way people deal with pain. Here is some important information about the cultural variations you may encounter when you treat patients for pain management.

These tips are generalizations only. It is important to remember that each patient should be treated as an individual.

Areas of Cultural Variation	Points to Consider	Suggestions
Reaction to pain and expression of pain	• Cultures vary in what is considered acceptable expression of pain. As a result, expression of pain will vary from stoic to extremely expressive for the same level of pain. • Some men may not verbalize or express pain because they believe their masculinity will be questioned.	• Do not mistake lack of verbal or facial expression for lack of pain. Under-treatment of pain is a problem in populations where stoicism is a cultural norm. • Because the expression of pain varies, ***ask*** the patient what level, or how much, pain relief they think they need. • Do not be judgmental about the way someone is expressing their pain, even if it seems excessive or inappropriate to you. The way a person in pain behaves is socially learned.
Spiritual and religious beliefs about using pain medication	• Members of several faiths will not take pain relief medications on religious fast days, such as Yom Kippur or daylight hours of Ramadan. For these patients, religious observance may be more important than pain relief. • Other religious traditions forbid the use of narcotics. • Spiritual or religious traditions may affect a patient's preference for the form of medication delivery, oral, IV, or IM.	• Consultation with the family and Spiritual Counselor will help you assess what is appropriate and acceptable. Variation from standard treatment regimens may be necessary to accommodate religious practices. • Accommodating religious preferences, when possible, will improve the effectiveness of the pain relief treatment. • Offer a choice of medication delivery. If the choice is less than optimal, ask why the patient has that preference and negotiate treatment for best results.
Beliefs About Drug Addiction	• Recent research has shown that people from different genetic backgrounds react to pain medication differently. Family history and community tradition may contain evidence about specific medication effects in the population. • Past negative experience with pain medication shapes current community beliefs, even if the	• Be aware of potential differences in the way medication acts in different populations. A patient's belief that they are more easily addicted may have a basis in fact. • Explain how the determination of type and amount of medication is made. Explain changes from past practices.

		traditions for pain management to provide hints about what the patient may be using. There may be some reluctance to tell you about alternative therapies until they feel it is "safe" to talk about them. • Accommodate or integrate your treatments with alternative treatments when possible.
Methods Needed to Assess pain	• Most patients are able to describe their pain using a progressive scale, but others are not comfortable using a numerical scale, and the scale of facial expressions (smile to grimace) may be more useful.	• Ask the patient specifically how they can best describe their pain. • Use multiple methods of assessing pain-scales and analogies, if you feel the assessment of pain is producing ambiguous or incorrect results. • Once the severity of the pain can be assessed, explain in detail the expected result of the use of the pain medication in terms of whatever descriptive tools the patient has used. Check comprehension with teach-back techniques. • Instead of using scales, which might not be known to the patient, asking for comparative analogies, such as "like a burn from a stove," "cutting with a knife," or "stepping on a stone," may produce a more accurate description.

* **Note: Avoid** using family members as interpreters. **Minors** are **prohibited** from being used as interpreters. Find an interpreter with a health care background. **Document** in the patient's medical chart the request for or refusal of an interpreter.

SECTION D: REFERENCE RESOURCES FOR CULTURALLY AND LINGUISTIC SERVICES

A GUIDE TO INFORMATION IN SECTION D

Reference Resources for Culturally and Linguistic Services

Cultural and linguistic services have been mandated for federally funded program recipients in response to the growing evidence of health care disparities and as partial compliance with Title VI of the Civil Rights Act of 1964. The major requirements for the provision of cultural and linguistic services for patients in federally funded programs are included in this section.

Eliminate Health Disparities

Culturally and linguistically appropriate services are increasingly recognized as a key strategy to eliminating disparities in health and health care (e.g., Betancourt, 2004; 2006; Brach & Fraser, 2000; HRET, 2011). Among several other factors, lack of cultural competence and sensitivity among health and health care professionals has been associated with the perpetuation of health disparities (e.g., Geiger, 2001; Johnson, Saha, Arbelaez, Beach, & Cooper, 2004). This is often the result of miscommunication and incongruence between the patient or consumer's cultural and linguistic needs and the services the health or health care professional is providing (Zambrana, Molnar, Munoz, & Lopez, 2004). The provision of culturally and linguistically appropriate services can help providers address these issues by providing knowledge and skills to manage the provider-level, individual-level, and system-level factors referenced in the Institute of Medicine's seminal report Unequal Treatment that intersect to perpetuate health disparities (IOM, 2003).[1]

Health Equity & Culturally and Linguistically Appropriate Services are Connected

Culturally and linguistically appropriate services (CLAS) are one strategy to help eliminate health inequities. By tailoring services to an individual's culture and language preference, providers can help bring about positive health outcomes for diverse populations. The provision of health care services that are respectful of and responsive to the health beliefs, practices and needs of diverse patients can help close the gap in health care outcomes.1

This section includes:

- Current cultural and linguistic requirements for federally funded programs.
- Guidelines for cultural and linguistic services.
- Purpose of the enhanced National CLAS Standards.
- Web based resources for more information related diversity and the delivery of cultural and linguistic services.

45 CFR 92, NON DISCRIMINATION RULE

§ 92.201 Meaningful access for individuals with limited English proficiency. (a) General requirement. A covered entity shall take reasonable steps to provide meaningful access to each individual with limited English proficiency eligible to be served or likely to be encountered in its health programs and activities. (b) Evaluation of compliance. In evaluating whether a covered entity has met its obligation under paragraph (a) of this section, the Director shall: (1) Evaluate, and give substantial weight to, the nature and importance of the health program or activity and the particular communication at issue, to the individual with limited English proficiency; and (2) Take into account other relevant factors, including whether a covered entity has developed and implemented an effective written language access plan, that is appropriate to its particular circumstances, to be prepared to meet its obligations in § 92.201(a). (c) Language assistance services requirements.

Language assistance services required under paragraph (a) of this section must be provided free of charge, be accurate and timely, and protect the privacy and independence of the individual with limited English proficiency. (d) Specific requirements for interpreter and translation services. Subject to paragraph (a) of this section: (1) A covered entity shall offer a qualified interpreter to an individual with limited English proficiency when oral interpretation is a reasonable step to provide meaningful access for that individual with limited English proficiency; and (2) A covered entity shall use a qualified translator when translating written content in paper or electronic form. (e) Restricted use of certain persons to interpret or facilitate communication.

A covered entity shall not: (1) Require an individual with limited English proficiency to provide his or her own interpreter; (2) Rely on an adult accompanying an individual with limited English proficiency to interpret or facilitate communication, except: (i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available; or (ii) Where the individual with limited English proficiency specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances; (3) Rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no qualified interpreter for the individual with limited English proficiency immediately available; or (4) Rely on staff other than qualified bilingual/multilingual staff to communicate directly with individuals with limited English proficiency. (f) Video remote interpreting services.

A covered entity that provides a qualified interpreter for an individual with limited English proficiency through video remote interpreting services in the covered entity's health programs and activities shall provide: (1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication; (2) A sharply delineated image that is large enough to display the interpreter's face and the participating individual's face regardless of the individual's body position; (3) A clear, audible transmission of voices; and (4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the video remote interpreting. (g) Acceptance of language assistance services is not required. Nothing in this section shall be construed to require an individual with limited English proficiency to accept language assistance service.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

"No person in the United States shall, on the ground of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance."

Under Title IV, any agency, program, or activity that receives funding from the federal government may not discriminate on the basis of race, color or national origin. This is the oldest and most basic of the many federal and state laws requiring "meaningful access" to healthcare, and "equal care" for all patients. Other federal and state legislation protecting the right to "equal care" outline how this principle will be operationalized.

State and Federal courts have been interpreting Title VI, and the legislation that it generated, ever since 1964. The nature and degree of enforcement of the equal access laws has varied from place to place and from time to time. Recently, however, both the Office of Civil Rights and the Office of Minority Health have become more active in interpreting and enforcing Title VI.

Additionally, in August 2000, the U.S. Department of Health and Human Services Office of Civil Rights issued "Policy Guidance on the Prohibition against National Origin Discrimination As it Affects Persons with Limited English Proficiency." This policy established 'national origin' as applying to limited English-speaking recipients of federally funded programs.

NATIONAL STANDARDS TO PROVIDE "CLAS" CULTURALLY AND LINGUISTICALLY APPROPRIATE SERVICES

The purpose of the enhanced National CLAS Standards is to provide a blueprint for health and health care organizations to implement CLAS that will advance health equity, improve quality, and help eliminate health care disparities. All 15 Standards are necessary to advance health equity, improve quality, and help eliminate health care disparities.

Principal Standard:

1. Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

Governance, Leadership, and Workforce:

2. Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices, and allocated resources.

3. Recruit, promote, and support a culturally and linguistically diverse governance, leadership, and workforce that are responsive to the population in the service area.

4. Educate and train governance, leadership, and workforce in culturally and linguistically **appropriate policies and practices on an ongoing basis.**

Communication and Language Assistance:

5. Offer language assistance to individuals who have limited English proficiency and/or other communication needs, at no cost to them, to facilitate timely access to all health care and services.

6. Inform all individuals of the availability of language assistance services clearly and in their preferred language, verbally and in writing.

7. Ensure the competence of individuals providing language assistance, recognizing that the use of untrained individuals and/or minors as interpreters should be avoided.

8. Provide easy-to-understand print and multimedia materials and signage in the languages commonly used by the populations in the service area.

Engagement, Continuous Improvement, and Accountability:

9. Establish culturally and linguistically appropriate goals, policies, and management accountability, and infuse them throughout the organization's planning and operations.

10. Conduct ongoing assessments of the organization's CLAS-related activities and integrate CLAS-related measures into measurement and continuous quality improvement activities.

11. Collect and maintain accurate and reliable demographic data to monitor and evaluate the impact of CLAS on health equity and outcomes and to inform service delivery.

12. Conduct regular assessments of community health assets and needs and use the results to plan and implement services that respond to the cultural and linguistic diversity of populations in the service area.
13. Partner with the community to design, implement, and evaluate policies, practices, and services to ensure cultural and linguistic appropriateness.

14. Create conflict and grievance resolution processes that are culturally and linguistically appropriate to identify, prevent, and resolve conflicts or complaints.

15. Communicate the organization's progress in implementing and sustaining CLAS to all stakeholders, constituents, and the general public.

EXECUTIVE ORDER 13166, AUGUST 2000

Improving Access to Services for Persons with Limited English Proficiency (Verbatim)

By the authority vested in me as President by the Constitution and the laws of the United States of America, and to improve access to federally conducted and federally assisted programs and activities for persons who, as a result of national origin, are limited in their English proficiency (LEP), it is hereby ordered as follows:

Section 1. Goals.

The Federal Government provides and funds an array of services that can be made accessible to otherwise eligible persons who are not proficient in the English language. The Federal Government is committed to improving the accessibility of these services to eligible LEP persons, a goal that reinforces its equally important commitment to promoting programs and activities designed to help individuals learn English. To this end, each Federal agency shall examine the services it provides and develop and implement a system by which LEP persons can meaningfully access those services consistent with, and without unduly burdening, the fundamental mission of the agency. Each Federal agency shall also work to ensure that recipients of Federal financial assistance (recipients) provide meaningful access to their LEP applicants and beneficiaries. To assist the agencies with this endeavor, the Department of Justice has today issued a general guidance document (LEP Guidance), which sets forth the compliance standards that recipients must follow to ensure that the programs and activities they normally provide in English are accessible to LEP persons and thus do not discriminate on the basis of national origin in violation of title VI of the Civil Rights Act of 1964, as amended, and its implementing regulations. As described in the LEP Guidance, recipients must take reasonable steps to ensure meaningful access to their programs and activities by LEP persons.

Sec. 2. Federally Conducted Programs and Activities.

Each Federal agency shall prepare a plan to improve access to its federally conducted programs and activities by eligible LEP persons. Each plan shall be consistent with the standards set forth in the LEP Guidance, and shall include the steps the agency will take to ensure that eligible LEP persons can meaningfully access the agency's programs and activities. Agencies shall develop and begin to implement these plans within 120 days of the date of this order, and shall send copies of their plans to the Department of Justice, which shall serve as the central repository of the agencies' plans.

Sec. 3. Federally Assisted Programs and Activities.

Each agency providing Federal financial assistance shall draft title VI guidance specifically tailored to its recipients that is consistent with the LEP Guidance issued by the Department of Justice. This agency-specific guidance shall detail how the general standards established in the LEP Guidance will be applied to the agency's recipients. The agency-specific guidance shall take into account the types of services provided by the recipients, the individuals served by the recipients, and other factors set out in the LEP Guidance. Agencies that already have developed title VI guidance that the Department of Justice determines is consistent with the LEP Guidance shall examine their existing guidance, as well as their programs and activities, to determine if additional guidance is necessary to comply with this order.

The Department of Justice shall consult with the agencies in creating their guidance and, within 120 days of the date of this order, each agency shall submit its specific guidance to the Department of Justice for review and approval. Following approval by the Department of Justice, each agency shall publish its guidance document in the Federal Register for public comment.

Sec. 4. Consultations.

In carrying out this order, agencies shall ensure that stakeholders, such as LEP persons and their representative organizations, recipients, and other appropriate individuals or entities, have an adequate opportunity to provide input. Agencies will evaluate the particular needs of the LEP persons they and their recipients serve and the burdens of compliance on the agency and its recipients. This input from stakeholders will assist the agencies in developing an approach to ensuring meaningful access by LEP persons that is practical and effective, fiscally responsible, responsive to the particular circumstances of each agency, and can be readily implemented.

Sec. 5. Judicial Review.

This order is intended only to improve the internal management of the executive branch and does not create any right or benefit, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers or employees, or any person.

WILLIAM J. CLINTON

THE WHITE HOUSE

Office of the Press Secretary

(Aboard Air Force One)

RACE/ETHNICITY/LANGUAGE (REL) CATEGORIES IMPORTANCE OF COLLECTING REL AND APPROPRIATE USE

Collecting REL information helps providers to administer better care for patients. Access to accurate data is essential for successfully identifying inequalities in health that could be attributed to race, ethnicity or language barriers and to improve the quality of care and treatment outcomes.
The health plans collect this data and can make this data available to providers upon request. Provider must collect member spoken language preference and document this on the member's record. Below is the listing of the basic race and ethnicity categories used by health plans.

Office of Management and Budget (OMB) Ethnicity Categories:

- Hispanic or Latino: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- Non-Hispanic or Latino: Patient is not of Hispanic or Latino ethnicity.
- Declined: A person who is unwilling to provide an answer to the question of Hispanic or Latino ethnicity.
- Unavailable: Select this category if the patient is unable to physically respond, there is no available family member or caregiver to respond for the patient, or if for any reason, the demographic portion of the medical record cannot be completed. Hospital systems may call this field "Unknown", "Unable to Complete," or "Other

Office of Management and Budget (OMB) Race Categories:

- American Indian or Alaska Native: A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.
- Asian: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- Black or African American: A person having origins in any of the black racial groups of Africa.
- Native Hawaiian or Other Pacific Islander: A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands
- White: A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- Some Other Race: A person who does not self-identify with any of the OMB race categories. *OMB-Mod
- Declined: A person who is unwilling to choose/provide a race category or cannot identify him/herself with one of the listed races.
- *Unavailable: Select this category if the patient is unable to physically respond, there is no available family member or caregiver to respond for the patient, or if for any reason, the demographic portion of the medical record cannot be completed. Hospital systems complete," or "Other. "may call this field "Unknown," "Unable to*

GLOSSARY OF TERMS

Auxiliary Aid

services or devices that enable persons with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency.

American Sign Language Auxiliary Aid

services or devices that enable persons with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, programs or activities conducted by the agency.

American Sign Language (ASL)

a nonverbal method of communicating by deaf or speech-impaired people in which the hands and fingers are used to indicate words and concepts.

Barrier

an obstacle, impediment, obstruction, boundary, or separation.

Braille

a system of reading and printing that enables the blind to read by using the sense of touch. Raised dots arranged in patterns represent numerals and letters of the alphabet and can be identified by the fingers.

Body Language

the revelation of attitude or mood through physical gestures, posture, or proximity; nonverbal communication.

Communication

the sending of data, messaged, or other forms of information from one entity to another.

Communication, Impaired Verbal

the state in which a person experiences a decreased, delayed, or absent ability to receive, process, transmit, and use a system of symbols or anything that conveys meaning.

Communication, Nonverbal

in interpersonal relationships, the use of communication techniques that do not involve words.

Cultural Competence

sensitivity to the cultural, philosophical, religious, and social preferences of people of varying ethnicities or nationalities. Professional skill in the use of such sensitivities facilitates the giving of optimal patient care.

Culture

shared human artifacts, attitudes, beliefs, customs, entertainment, ideas, language, laws, learning, and moral conduct.

Demographics

of or related to the study of changes that occur in the large groups of people over a period of time.

Disability

any physical, mental, or functional impairment that limits a major activity. It may be partial or complete.

Discrimination

the process of distinguishing or differentiating. **2.** Unequal and unfair treatment or denial of rights or privileges without reasonable cause.

Diverse

of a different kind, form, character, etc.; unlike. **2.** including representatives from more than one social, cultural, or economic group, especially members of ethnic or religious minority groups.

Engagement

in the behavioral sciences, a term often used to denote active involvement in everyday activities that have personal meaning.

Gender Identity

ones self-concept with respect to being male or female: a person's sense of his or her true sexual identity.

Health Disparities

is often interpreted to mean racial or ethnic disparities, many dimensions of disparity exist in the United States, particularly in health. If a health outcome is seen to a greater or lesser extent between populations, there is disparity. Race or ethnicity, sex, sexual identity, age, disability, socioeconomic status, and geographic location all contribute to an individual's ability to achieve good health.

Health Equity

an avoidable and unfair difference in health status between segments of the population.

Health Literacy

the ability to understand the causes, prevention, and treatment of disease. **2.** the degree of communication that enhances people's related information.

Interpretation

In psychotherapy, the analysis of the meaning of what the patient says or does. It is explained to the patient to help provide insight.

Interpreter

one who translates orally for parties conversing in different languages.

Language

the spoken or written words or symbols used by a population for communication.

Limited English Proficient (LEP)

is a term used in the United States that refers to a person who is not fluent in the English language, often because it is not their native language.

Mnemonic

Anything intended to aid memory.

Race

the descendants of a genetically cohesive ancestral group. **2.** A political or social designation for a group of people thought to share a common ancestry or common ethnicity.

Resource

an asset valuable commodity or service.

Service

help or assistance.

Speech

the oral expression of one's thoughts. **2.** the utterance of articulate words or sounds.

Speech transliterator

a person trained to recognize unclear speech and repeat it clearly

Teletypewriter

a telegraphic apparatus by which signals are sent by striking the letters and symbols of the keyboard of an instrument resembling a typewriter and are received by a similar instrument that automatically prints them in type corresponding to the keys struck.

Transgender

an umbrella term for people whose gender identity and/or gender expression differs from what is typically associated with the sex they were assigned at birth.

Revised_08.22.18

Language Proficiency Assessment Resources

The bilingual assessment vendors included on this list are suggestions that providers might consider if they choose to use a bilingual assessment vendor to help ensure that they are using qualified bilingual staff to provide patient care, as these organizations have self-attested that they meet the required criteria. However, that should not be considered an endorsement for any language service vendor by ICE. The ICE C&L Team has not in the past and does not now endorse any language service vendors.

COMMUNICATIONS TOOL KIT

Industry Collaboration Effort

This document will help you in the design of written materials to be both inclusive, sensitive, and compliant with the National Culturally and Linguistically Appropriate Service (CLAS) Standards and Section 1557 of the Affordable Care Act (ACA).

We do not want to be exclusionary, insensitive, or contribute to people feeling they are not welcome. Using gender neutral and culturally sensitive wording when creating any documents-whether for staff, members, providers, or the community is best practice, aligns with regulations and it fosters inclusivity. We need to be aware of the language we use. Utilize the below list when writing or reviewing documents. The list includes either offensive or non-inclusive phrases or words that have been found in materials, written as indicated. When reviewing documents, perform a search for the words as written below in the various ways (utilize the "find" function – select "Control F") and replace them with sensitive terms as applicable:

Exclusionary	***Inclusive***
his, her, his or her, his/her	their, the members
he, she, he or she, he/she	they, the members
him, her, him or her, him/her	them
himself, herself, himself or herself	themselves
woman, man, men or women	the member or the individual, members or individuals
gender specific screenings – well-woman etc.	take out the gender term and leave as "preventative screening" or "annual well-check". In general we need to use medical terms – do not "gender" services. Documents often reference "women should have a mammogram…" and instead should say "members should have a mammogram" etc.
pregnant women, pregnant woman	pregnant individuals, child-bearers, child-bearer
mother, father , mom, dad	parent as applicable
maternity	excluding any formal contract/program language requirement or information-change to "pregnancy", "childbirth", "pregnancy and childbirth" "prenatal", "postnatal" etc. as applicable
Gender-Male, Female - Sex and Gender/Gender Identity are different. Stay away from using them synonymously because it can be exclusionary; sex should reference medical terminology and gender/gender identity should reference the social construct of gender/gender identity…gender identities.	When need to know sex – include sex terms: male, female, or intersex When need to know gender – include gender/gender identity terms: woman, man, transgender, boy, girl, nonbinary, gender fluid, two-spirit, etc.- many more terms available. Consider asking "sex assigned at birth" and "gender identity" to be more inclusive.
both sexes	for sex there is male, female, intersex if inferring gender/gender identity there are many terms (based on context change to "individuals" or just say "sex" of member or "gender identity of member")

Offensive/Insensitive	***Sensitive***
hearing impaired	deaf or hard of hearing
visual impairment	blind or low vision
LEP members	members with limited English proficiency
gender reassignment surgery, sex change	gender affirming surgery, transition
sexual preference	sexual orientation
hermaphrodite, hermaphroditism	"intersex" if applicable or if actually referencing gender affirming procedures, use "gender affirming treatment"
transgenders, a transgender, transgendered	Transgender should be used as an adjective, not a noun. For example, "Tony is a transgender man". Adding "ed" is insensitive-being transgender is a part of someone's identity, nothing happened to make someone transgender as the "ed" may suggest.

For additional questions on creating culturally sensitive materials:
email Ivy Diaz at ivy.diaz@healthnet.com or Peggy Payne, ICE Co-Chair at peggy.payne@cigna.com

CalViva Health is a licensed health plan in California that provides services to Medi-Cal enrollees in Fresno, Kings and Madera counties. CalViva Health contracts with Health Net Community Solutions, Inc. to provide and arrange for network services. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Revised date: ____________________</td></tr>
</table>

POLICY:
Site personnel receive training and/or information on member rights that include informed consent and human sterilization consent.

PROCEDURE:

1. **Written Member Rights** should be available at the office site. Staff should be able to locate the written Member Rights list and explain how to use the information.

2. Staff trainings regarding member rights may be part of office staff education documented in:
   - Informal or formal in-services
   - New staff orientation
   - External training courses

3. Topics included in the trainings must include:
   a. Informed Consent for Human Sterilization

   Patients shall be informed about any proposed treatment or procedure that includes medically significant risks, alternate courses of treatment or non-treatment and the risks involved in each and the name of the person who will carry out the procedure or treatment. Documentation of this discussion and the signed consent shall be written and included in the member's medical record.

   Note: patient rights incorporate the requirements of the Joint Commission on Accreditation of Healthcare Organizations, Title 22, California Code of Regulations, Section 70707 and Medicare Conditions of Participation.

   Requirements include be are not limited to:

   - Conducted by physician or physician designee.
   - Offered booklet published by the DHCS and copy of consent form must be given to the member.
   - Provided answers to any question the member may have.

- Inform the member, that they may refuse or withhold consent to procedure at any time before the sterilization.

- Describe fully the available alternatives of family planning and birth control.
- Advise that the sterilization procedure is considered irreversible.
- Explain fully the description of discomforts and risks and benefits of the procedure.
- Utilize the PM330 sterilization consent form.
  Forms may be downloaded (English and Spanish) from the following Medi-Cal web site:
  http://files.medi-cal.ca.gov/pubsdoco/forms/PM-330_Eng-SP.pdf

** When administered by a nurse in a home setting

HCPCS	DRUG NAME	GENERIC NAME	PRIMARY CATEGORY	SECONDARY CATEGORY
90651	GARDASIL 9	Human Papillomavirus vaccine types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent (HPV), 3 dose schedule, for intramuscular use (Gardasil 9 is only indicated for females from 9 through 26 years of age and males from 9 through 15 years of age)	THERAPEUTIC INJ	IMMUNIZATION
J3490/C9399	GATTEX 5 MG KIT	Teduglutide [rDNA origin], for Injection, for subcutaneous use	SELF-INJECTABLE	
J9301	GAZYVA	Obinutuzumab Injection 10 MG	THERAPEUTIC INJ	CHEMOTHERAPY*
J7326	GEL-ONE	Hyaluronan or derivative, Gel-One, for intra-articular injection	THERAPEUTIC INJ	
J7328	GEL-SYN	Hyaluronan or derivative for intra-articular injection, 0.1 mg	THERAPEUTIC INJ	
J9196	Gemcitabine	Injection, gemcitabine hydrochloride (Accord), not therapeutically equivalent to J9201, 200 mg	THERAPEUTIC INJ	CHEMOTHERAPY*
J9201	GEMZAR	Gemcitabine HCl, 200 mg	THERAPEUTIC INJ	CHEMOTHERAPY*
J0395	GENESA	Arbutamine hcl injection	THERAPEUTIC INJ	
J2941	GENOTROPIN	Somatropin, 1 mg	SELF-INJECTABLE	GROWTH HORMONE
J1580	GENTAMICIN SULFATE	Gentamicin injection	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J7100	GENTRAN 40 IN D5W	Dextran 40 infusion	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J7100	GENTRAN 40 IN NACL	Dextran 40 infusion	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J7320	GENVISC 850	Hyaluronan or derivative, for intra-articular injection	THERAPEUTIC INJ	
J3486	GEODON	Ziprasidone mesylate	THERAPEUTIC INJ	
J3490	GIAPREZA	Angiotensin II Injection for Intravenous Infusion	THERAPEUTIC INJ	
J0223	GIVLAARI	Givosiran injection, for Subcutaneous use	THERAPEUTIC INJ	
J0257	GLASSIA	Alpha 1 proteinase inhibitor	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1595	GLATOPA	Glatiramer acetate, 20 mg	SELF-INJECTABLE	
J1610	GLUCAGEN	Glucagon hydrochloride, per 1mg	SELF-INJECTABLE	
J1610	GLUCAGON	Glucagon hydrochloride, per 1mg	SELF-INJECTABLE	
J1611	GLUCAGON	Injection, glucagon HCl (Fresenius Kabi), not therapeutically equivalent to J1610, per 1 mg	SELF-INJECTABLE	
J1610	GLUCAGON EMERGENCY	Glucagon hydrochloride, per 1mg	SELF-INJECTABLE	
J1596	Glycopyrrolate	Injection, glycopyrrolate, 0.1 mg	THERAPEUTIC INJ	
J1600	GOLD SODIUM THIOMALATE	Gold sodium thiomaleate injection	THERAPEUTIC INJ	
S0126	GONAL-F	Follitropin alfa 75 iu	SELF-INJECTABLE	INFERTILITY
J1447	GRANIX	tbo-filgrastim, 1 microgram	SELF-INJECTABLE	CHEMO ADJUNCT*
J1447	GRANIX	tbo-filgrastim, 1 microgram	THERAPEUTIC INJ	TRANSPLANT DRUGS-IF USED WITH (G-CSF WITH MOZOBIL)
J1610	GVOKE	Glucagon hydrochloride, per 1mg	SELF-INJECTABLE	

* If associated with a cancer diagnosis- ICD-10 codes between C00.0-C79.9, C7A.00-C7B.8, C80.0-C96.9, D00.0-D09.9
** When administered by a nurse in a home setting

HCPCS	DRUG NAME	GENERIC NAME	PRIMARY CATEGORY	SECONDARY CATEGORY
J0599	HAEGARDA	C1 esterase inhibitor (human) for subcutaneous inj	SELF-INJECTABLE	
J9179	HALAVEN	Eribulin mesylate Injecton	THERAPEUTIC INJ	CHEMOTHERAPY*
J1630	HALDOL	Haloperidol injection	THERAPEUTIC INJ	
J1631	HALDOL DECANOATE	Haloperidol decanoate injection	THERAPEUTIC INJ	
J1630	HALOPERIDOL LACTATE	Haloperidol injection	THERAPEUTIC INJ	
90632	HAVRIX	Hepatitis A vaccine, adult dosage, for intramuscular use	THERAPEUTIC INJ	IMMUNIZATION
90633	HAVRIX	Hepatitis A vaccine, pediatric/adolescent dosage (2-dose schedule), for intramuscular use	THERAPEUTIC INJ	IMMUNIZATION
90371	H-BIG	Hepatitis B Immune Globulin (HBIg), human, for intramuscular use (Price is per 1 mL)	THERAPEUTIC INJ	
J1270	HECTOROL	Doxercalciferol	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J7192	HELIXATE FS	Factor VIII (antihemophilic factor, recombinant) per IU, not otherwise specified	THERAPEUTIC INJ	BLOOD/BLOOD PRODUCTS FOR HEMOPHILIA
J1411	HEMGENIX®	Etranacogene dezaparvovec-drlb) suspension, for intravenous infusion	THERAPEUTIC INJ	
J7170	HEMLIBRA	Emicizumab-kxwh injection, for subcutaneous use	SELF-INJECTABLE	BLOOD/BLOOD PRODUCTS FOR HEMOPHILIA
J7190	HEMOFIL M	Factor VIII (antihemophilic Factor [human]) per IU	THERAPEUTIC INJ	BLOOD/BLOOD PRODUCTS FOR HEMOPHILIA
90748	HEP B/HIB VACCINE	Hepatitis B and Hemophilus influenza b vaccine (HepB-Hib), for intramuscular use (Price is per 0.5 mL dose)	THERAPEUTIC INJ	IMMUNIZATION
J1642	HEP FLUSH-10	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1571	HEPAGAM B - IM	Hepatitis B immune globulin (Hepagam B), intramuscular, 0.5 mL (see J1573 for IV use)	THERAPEUTIC INJ	
J1573	HEPAGAM B - IV	Hepatitis B immune globulin (Hepagam B), intravenous, 0.5 mL (see J1571 for IM use)	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1643	HEPARIN	Injection, heparin sodium (Pfizer), not therapeutically equivalent to J1644, per 1000 units	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1644	HEPARIN (PORCINE) IN D5W	Heparin sodium per 1000u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN (PORCINE) IN NACL	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1644	HEPARIN (PORCINE) IN NACL	Heparin sodium per 1000u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN (PORCINE) LOCK FLUSH	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN COMBINATION	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN LOCK FLUSH	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1644	HEPARIN SODIUM (BOVINE)	Heparin sodium per 1000u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1644	HEPARIN SODIUM (PORCINE)	Heparin sodium per 1000u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN SODIUM FLUSH	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1644	HEPARIN SODIUM IN NACL	Heparin sodium per 1000u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEPARIN SODIUM LOCK FLUSH	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**

* If associated with a cancer diagnosis- ICD-10 codes between C00.0-C79.9, C7A.00-C7B.8, C80.0-C96.9, D00.0-D09.9
** When administered by a nurse in a home setting

HCPCS	DRUG NAME	GENERIC NAME	PRIMARY CATEGORY	SECONDARY CATEGORY
90739	HEPLISAV-B	Hepatitis B vaccine (HepB), adult dosage, 2 dose schedule, for intramuscular use	THERAPEUTIC INJ	IMMUNIZATION
J1642	HEP-LOCK	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**
J1642	HEP-LOCK FLUSH	Heparin sodium per 10 u	THERAPEUTIC INJ	HOME HEALTH / INFUSION**

Rev. *06092021*
XC-PAF-6082

PCP:	Page 1 of 3
SECTION: Infection Control	
POLICY AND PROCEDURE: Instrument Sterilization	Approved date: ________________ Approved by: ___________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:

This site will ensure that all reusable medical instruments are properly sterilized after each use.

PROCEDURE:

I. CLEANING PRIOR TO STERILIZATION

A. Prior to undergoing the sterilization process, soiled instruments/equipment are thoroughly cleaned, rinsed, dried and inspected for the presence of dried blood or other debris. Trained personnel will be able to demonstrate or verbally explain procedure(s) used for cleaning prior to sterilization, according to site-specific policy and/or manufacturer/product label directions.

II. COLD/CHEMICAL STERILIZATION

A. Product manufacturer's directions are strictly followed for instrument pre-soaking treatment, solution preparation, solution exposure procedures, safety precautions (e.g., room temperature, area ventilation), and post-sterilization processes. Sterilization exposure times and solution expiration date/time is communicated to staff. Written site-specific policy/procedures or Manufacturer's Instructions for cold sterilization are available on site for staff reference. (See FDA Cleared Sterilants and High Level Disinfectant list attached.)

III. AUTOCLAVE/STEAM STERILIZATION

A. The autoclave manufacturer's directions are strictly followed for instrument pre-cleaning, machine loading, operation safety precautions, minimum time-temperature criteria, and post sterilization processes. Written operating procedures for autoclave are available on site to staff. If instruments/equipment are transported off-site for sterilization, equipment-handling and transport procedures are available on site to staff.

IV. AUTOCLAVE MAINTENANCE

A. The autoclave is maintained and serviced according to manufacturer's guidelines. The autoclave is serviced annually by a qualified technician, if the manufacturer's guidelines are not available. A dated sticker indicating the maintenance date will be placed on the autoclave or a service receipt will be kept on file to indicate documentation of mechanical problems, results/outcome of routine servicing, calibration, and repairs.

B. An autoclave log will be kept on file and will include the following:
- date
- time
- duration of run cycle
- temperature
- steam pressure
- load identification information
- operator of each run

V. SPORE TESTING

A. Autoclave spore testing is performed *at least monthly*, unless otherwise stated in the manufacturer's guidelines. Spore testing reports will be maintained on file and will include the following:
- date
- results
- types of spore test used
- person performing/documenting test results

B. For positive spore tests, the autoclave is removed from service immediately until inspection is completed and a negative retest occurs. The following procedures will be followed with a positive spore test:

VI. (REPORT/REPAIR/RETRIEVE/RETEST/RE-STERILIZE)
- ***report*** problem to Office Manager or Doctor
- ***repair*** autoclave
- ***retrieve*** all instruments sterilized since last negative spore test
- ***re-test*** autoclave
- ***re-sterilize*** retrieved instruments

VII. STERILE PACKAGES

A. Storage areas for sterilized packages are maintained clean, dry and separated from non-sterile items by a functional barrier (e.g., shelf, cabinet door, drawer).

B. Sterilized package labels include:
   - date of sterilization
   - load run identification information
   - general contents (e.g. suture set)

C. Each item in a sterile package will not be listed on the label if a master list of package contents is available elsewhere on site. It is understood that maintenance of sterility is event related, not time related. Sterilized items are considered sterile until use, unless an event causes contamination. Sterilized items are not considered sterile if package is opened, wet/moist, discolored or damaged, and should be kept removed from sterile package storage area. This site has a process for routine evaluation of sterilized packages.

Guidance to Comply with New Interpreter Quality Standards Requirements on the use of Bilingual/Multilingual Staff as Interpreters

Summary of Requirements and Documentation		
Requirement	**Potential Evidence**	**Provider Office to Note Documentation of Qualification**
Office has a documented policy to offer interpreter support to LEP patients	☐ Local office written policy; or ☐ Local office policy that defers and adheres to the policy distributed by medical group Note: Policy includes documentation of patient language needs in medical record	Written policy available for viewing by an auditor Policy title:
Adheres to generally accepted interpreter ethics principles, including client confidentiality	Signed attestation of understanding of interpreter ethics and patient confidentiality. Must include a review of National Code of Ethics for Interpreters in Health Care published at: http://www.ncihc.org/assets/documents/publications/NCIHC%20National%20Standards%20of%20Practice.pdf	Signed attestations are available. ☐ Yes ☐ No
Has *demonstrated* proficiency in speaking and understanding both spoken English and at least one other spoken language	☐Formal assessment of proficiency; or ☐Annual job performance evaluations that document proficiency in speaking and communicating in English and one other language	☐Yes, assessment results are available for viewing; or ☐Yes, documentation from an annual job performance evaluation for proficiency in speaking and communicating in English and one other language is available
Is able to interpret effectively, accurately, and impartially, both receptively and expressly, to and from such language(s) and English, using any necessary specialized vocabulary terminology and phraseology	☐Formal assessment of proficiency; or Annual performance evaluations document ☐Ability to interpret effectively, ☐Ability to interpret accurately, ☐Ability to interpret impartially, ☐Ability to interpret receptively and expressly, ☐Ability to interpret to and from English and another language using any **necessary specialized vocabulary terminology and phraseology** Note: see NCIHC Interpreter Code of Ethics for description of above.	☐Yes, assessment results are available for viewing; or ☐Yes, documentation from an annual job performance evaluation for proficiency in speaking and communicating in English and one other language is available
For more information on Interpreter Quality Standards, please see the Industry Collaboration Effort (ICE) Better Communication, Better Care: Provider Tools to Care for Diverse Populations, Section D. **http://www.iceforhealth.org/library/documents/Better_Communication,_Better_Care_-_Provider_Tools_to_Care_for_Diverse_Populations.pdf**		

Revised_08.22.18

PCP:	
SECTION: Office Management	
POLICY AND PROCEDURE: Interpreter Services	Approved date: ____________________ Approved by: ____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:
The site has twenty-four hour access to Interpreter services for non/limited English proficient (LEP) members.

PROCEDURE:

A. Staff will ensure that Interpreter services are made available in identified threshold languages specified for location of site.

B. The PCP will ensure that all personnel providing language interpreter services on site are qualified in medical interpretation.

C. Interpreter skills and capabilities will be documented as follows:

   1. Office has a documented policy to offer interpreter support to LEP patients.
   2. Signed attestation of adherence to generally accepted interpreter ethics principles, including client confidentiality.
   3. Has demonstrated proficiency in speaking and understanding both spoken English and at least one other spoken language (formal assessment of proficiency; or annual job performance evaluations).
   4. Is able to interpret effectively, accurately, and impartially, both receptively and expressly, to and from such language(s) and English, using any necessary specialized vocabulary terminology and phraseology (formal assessment of proficiency; or annual job performance evaluations).

D. Staff will document in the medical record any request for, or refusal of language/interpreter services; staff will document primary language for the member. Provider/staff must document in patient's medical record, name or identifier of interpreter used for each visit.

E. The PCP will ensure that 24-hour interpreter services are available for all members either through telephone language services or interpreters on site.

No-cost Interpreter Services

USE TO HELP PROVIDE CARE FOR HEALTH NET* MEMBERS

No-cost interpreter services are available 24 hours a day, seven days a week.

Phone interpreters are available in over 150 languages for immediate needs.

Request in-person or video interpreters a minimum of five business days before the appointment during regular business hours. Allow 10 business days for sign language interpreter requests.

Phone interpreters in over 150 languages!

Ask for no-cost interpreter services to help you effectively communicate with your Health Net patients.

When asking for an interpreter, all you need are:

The member's Health Net identification (ID) number

The appointment date, time and place

Language needed

Please allow for a phone interpreter if that is the only interpreter available for the language, date and time of the appointment.

To request interpreter services for members, contact the Provider Services Center at:

Line of business	Phone number	Hours of availability
Large Employer Group	**800-641-7761**	Monday through Friday, 8 a.m. to 5 p.m., Pacific time (see below for after hours)
Small Employer Group (off exchange)	**800-361-3366**	
Small Employer Group (on exchange)	**888-926-5133**	Monday through Friday, 8 a.m. to 5 p.m., Pacific time (see below for after hours)
Individual & Family Plans (off exchange)	**877-857-0701**	
Individual & Family Plans (on exchange)	**888-926-2164**

PCP:	
SECTION: Clinical Services	
POLICY AND PROCEDURE: Laboratory Services	Approved date: __________________ Approved by: ____________________ Effective date: ___________________ Revised date: ___________________ Revised date: ___________________

POLICY:
The site will operate in compliance with Clinical Laboratory Improvement Amendment (CLIA) regulations. Therefore, the site shall meet all quality standards to ensure accuracy, reliability and timeliness of patient test results. All lab results are to be communicated to the provider and member in a timely manner.

PROCEDURE:

A. Laboratory test procedures are performed according to current site-specific CLIA certificate.

1. All sites that perform laboratory testing for human health assessment, diagnosis, prevention, or treatment of disease, have a current, unrevoked, unsuspended site-specific Clinical Laboratory Improvement Amendment (CLIA) certificate, or evidence of renewal.
   - The CLIA Certificate on site includes one of the following:
     a. Certificate of Waiver: Site is able to perform only exempt waived tests, so therefore, has a current CLIA Certificate or Waiver. The current listing of waived tests may be obtained at www.fda.gov/cdrh/clia/testswaived.html.
        - There are no specific CLIA regulations regarding the performance of waived tests. Therefore, site personnel are expected to follow the manufacturer's instructions.
        - Laboratories with Certificates of Waiver may not be routinely inspected by DHCS Laboratory Field Services Division, but may be inspected as part of complaint investigations and/or on a random basis to determine whether only waived tests are being performed.

     b. Certificate for Provider-Performed Microscopy (PPM): Physicians, dentists or mid-level practitioners are able to perform PPM procedures and waived tests.
     c. Certificate of Registration: Allows moderate and/or high complexity lab testing to be conducted until compliance with CLIA regulations is determined by survey.
        - For moderate and/or high complexity lab testing, the CLIA regulations list specific requirements for laboratory proficiency testing, patient test management, quality control, quality assurance, personnel and inspections.

d. Certificate of Compliance: Lab has been surveyed and found to be in compliance with all applicable CLIA requirements.
e. Certificate of Accreditation: Lab is accredited by an accreditation organization approved by the Centers for Medicare & Medicaid Services (CMS).

2. CLIA certification/re-certification includes an evaluation every two years (or sooner, if complaint driven) by DHCS of personnel licenses/training, laboratory site inspection and demonstration of testing proficiency for moderate and high-complexity test sites.

B. Testing personnel performing clinical lab procedures have been trained.

1. Prior to testing biological specimens, personnel are appropriately trained for the type and complexity of the laboratory services performed. Personnel have demonstrated the ability to perform all testing operations reliably and to report results accurately.
2. Site personnel that perform CLIA waived tests have access to and are able to follow test manufacturer's instructions.
3. When requested, site personnel are able to provide a step-by-step verbal explanation or demonstration of test procedure and how to determine test results.
4. The required training and certification is established by legislation (CA B&P Codes, §1200-1213) for personnel performing moderate and high complexity tests. Reviewers are not expected to complete an in-depth evaluation of personnel performing moderate and high complexity tests.

C. Lab supplies are inaccessible to unauthorized persons.

D. Lab test supplies (e.g., vacutainers, culture swabs, test solutions) are not expired. Site has procedure to check expiration date and a method to dispose of expired lab test supplies.

E. The provider will review, initial and date the original copy of each laboratory report, which is then filed in member's medical record.

Version 3.1

Marketing Guidelines for Providers Serving CalViva Health Medi-Cal Members

Providers are responsible for making sure member-facing materials meet the below guidelines.

Follow these guidelines to create marketing materials, presentations and displays that mention Health Net* or CalViva Health.

You can:	Example
Educate patients about all available plan options and discuss Medi-Cal benefits.	Inform a patient that *"We participate in Medi-Cal and accept [name(s) of accepted insurance plans]."* Help a patient by talking about plan choices for people with Medi-Cal.[1] (Allowed, per California Code of Regulations, Title 22)
List all of the Medi-Cal plans you accept on materials you create.	Display a complete list of all Medi-Cal insurance plans you accept.

You cannot:	Example
Sway a patient's decision to sign up or enroll with any specific Medi-Cal plan in materials.	Inform a patient that *"CalViva Health and/or Health Net is the best plan for people with Medi-Cal."*
Use Health Net and/or CalViva Health's logo or cobrand materials using such logo(s) without the health plan's approval.	Create a flyer with the health plan's logo on it.
Send materials that mention Health Net or CalViva Health without their approval.	Send a letter to patients advertising a new relationship with the health plan.

(continued)

Coverage for every stage of life™

PROVIDER COMMUNICATIONS

MEMBER-FACING MATERIALS YOU CREATE FOR MEDI-CAL PATIENTS MUST BE:

- 12-point font or larger.
- At or below a sixth-grade reading level.

MEMBER-FACING MATERIALS FOR CALVIVA HEALTH MEDI-CAL PATIENTS MUST INCLUDE:

- CalViva Health's Notice of Language Assistance.
- CalViva Health's Non-Discrimination Notice.

Can I use the health plan's logo or mention the plan in materials?

You cannot use the Health Net logo or mention Health Net's name in materials that are provided to CalViva Health members. You must obtain Health Net and CalViva Health's approval if you wish to use the plan's logo(s) or mention Health Net and/or CalViva Health in patient-facing materials or advertising. For more information, please contact the health plan.

What rules apply to the plan's marketing activities and marketing materials for Medi-Cal recipients?

Department of Health Care Services (DHCS) All Plan Letter (APL) 13-015 (Revised) describes how managed care health plans (MCPs) can market to people eligible for Medi-Cal. Medi-Cal MCPs and their marketing contractors who perform outreach activities to people eligible for Medi-Cal are subject to certain requirements. These include, but are not limited to:

- MCPs are prohibited from conducting door-to-door, cold call and telephone marketing activities for the purposes of enrolling current or potential Medi-Cal beneficiaries.
- All marketing materials, including printed materials, need to be approved in writing by DHCS prior to distribution.
- All marketing materials, presentations and displays need to conform to the cultural and linguistic requirements prescribed in the MCP's health plan contract.

All provider-created marketing materials that mention the plan and require DHCS review and approval should be forwarded to the health plan for submission to DHCS for review and approval as needed.

How can I learn more?

For more information about Medi-Cal marketing guidelines, **view All Plan Letter 13-015 (Revised) (PDF)** online at www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2013/APL13-015.pdf.

For other questions about marketing guidelines, contact **CalViva Health** at **1-888-893-1569.**

[1]The MCP is required to adhere to the marketing requirements contained in its respective DHCS health plan contract and act in accordance with the marketing requirements contained in Title 22 California Code of Regulations (CCR) 53880 and 53881 and Welfare and Institutions Code Sections 10850(b), 14407.1, 14408, 14409, 14410, and 14411.

CalViva Health is a licensed health plan in California that provides services to Medi-Cal enrollees in Fresno, Kings and Madera counties. CalViva Health contracts with Health Net Community Solutions, Inc. to provide and arrange for network services. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

Marketing Guidelines for Providers Serving CHPIV Medi-Cal Members

Providers are responsible for making sure member-facing materials meet the below guidelines.

Follow these guidelines to create marketing materials, presentations and displays that mention Health Net* or Community Health Plan of Imperial Valley (CHPIV).

You can:	Example
Educate patients about all available plan options and discuss Medi-Cal benefits.	Inform a patient that *"We participate in Medi-Cal and accept [name(s) of accepted insurance plans]."* Help a patient by talking about plan choices for people with Medi-Cal.[1] (Allowed, per California Code of Regulations, Title 22)
List all of the Medi-Cal plans you accept on materials you create.	Display a complete list of all Medi-Cal insurance plans you accept.

You cannot:	Example
Sway a patient's decision to sign up or enroll with any specific Medi-Cal plan in materials.	Inform a patient that *"CHPIV and/or Health Net is the best plan for people with Medi-Cal."*
Use Health Net and/or CHPIV's logo or cobrand materials using such logo(s) without the Health Plan's approval.	Create a flyer with the Health Plan's logo on it.
Send materials that mention Health Net or CHPIV without their approval.	Send a letter to patients advertising a new relationship with the Health Plan.

(continued)

Member-facing materials you create for Medi-Cal patients must be:

- 12-point font or larger.
- At or below a sixth-grade reading level.

Member-facing materials for CHPIV patients must include:

- CHPIV's Notice of Language Assistance.
- CHPIV's Non-Discrimination Notice.

Can I use the Health Plan logo or mention the Plan in materials?

You cannot use the Health Net logo or mention Health Net's name in materials that are provided to CHPIV members. You must obtain Health Net and CHPIV's approval if you wish to use the Plan's logo(s) or mention Health Net and/or CHPIV in patient-facing materials or advertising. For more information, please contact the Health Plan.

What rules apply to the Plan's marketing activities and marketing materials for Medi-Cal recipients?

Department of Health Care Services (DHCS) All Plan Letter (APL) 13-015 (Revised) describes how managed care health plans (MCPs) can market to people eligible for Medi-Cal. Medi-Cal MCPs and their marketing contractors who perform outreach activities to people eligible for Medi-Cal are subject to certain requirements. These include, but are not limited to:

- MCPs are prohibited from conducting door-to-door, cold call and telephone marketing activities for the purposes of enrolling current or potential Medi-Cal beneficiaries.
- All marketing materials, including printed materials, need to be approved in writing by DHCS prior to distribution.
- All marketing materials, presentations and displays need to conform to the cultural and linguistic requirements prescribed in the MCP's health plan contract.

All provider-created marketing materials that mention the Plan and require DHCS review and approval should be forwarded to the Health Plan for submission to DHCS for review and approval as needed.

How can I learn more?

For more information about Medi-Cal marketing guidelines, view All Plan Letter 13-015 (Revised) (PDF) online at www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2013/APL13-015.pdf.

For other questions about marketing guidelines, contact CHPIV at 833-236-4141.

[1]The MCP is required to adhere to the marketing requirements contained in its respective DHCS health plan contract and act in accordance with the marketing requirements contained in Title 22 California Code of Regulations (CCR) 53880 and 53881 and Welfare and Institutions Code Sections 10850(b), 14407.1, 14408, 14409, 14410, and 14411.

Community Health Plan of Imperial Valley ("CHPIV") is the Local Health Authority (LHA) in Imperial County, providing services to Medi-Cal enrollees in Imperial County. CHPIV contracts with Health Net Community Solutions, Inc. to arrange health care services to CHPIV members. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

PCP:	
SECTION: Access/Safety	
POLICY AND PROCEDURE: Medical and Lab Equipment Maintenance	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:
Medical and Laboratory equipment used for patient care shall be properly maintained.

PROCEDURE:

I. MAINTENANCE OF MEDICAL EQUIPMENT

A. Operating manuals for medical and lab equipment will be maintained on site.

B. Operating manuals will be the reference for planning routine maintenance schedules for equipment.

C. If operating manuals are not available, an annual cycle for safety/calibration service will be adopted.

D. Documented proof of servicing will be maintained on site and may be in the following form:

1. A receipt listing all equipment serviced and date of service.
2. Stickers applied to equipment noting the date of service.
3. Work orders/receipts for repair of equipment.
4. A handwritten log with dates and results of calibration (such as for a hemacue).

II. MALFUNCTIONING EQUIPMENT

A. Staff shall inform provider/designee of any equipment found to be malfunctioning or out of service.

1. Provider/designee will arrange for repair or replacement of malfunctioning equipment.
2. Documented proof of repair will be maintained on site.

III. QUALIFIED PERSONNEL

A. Qualified staff assigned to operate equipment will be trained on appropriate use and maintenance.

Medical Assistant Certificate

This is to certify that _________________________________has demonstrated and completed on-the-job training as a Medical Assistant under the auspices of the undersigned as follows and in compliance with California Code of regulations, Title 16, Chapter 14, Sections 1366. 1366.1. 1366.1, 1366.3 and 1366.4

*Please **initial** the areas of training:*

____ Preparing patients for and assisting in exams, procedures, positioning, draping, shaving and disinfection treatment sites.

____ Performing, collecting, and recording vital signs including pulse, respiration rate, blood pressure and basic information about the presenting and previous conditions.

____ Performing simple lab and screening tests, customarily performed in a medical office.

____ Non-Invasive collecting and preserving specimens for testing, including urine, sputum, semen, and stool.

____ Assisting patients in ambulation and transfers.

____ Performing ear lavage to remove impacted cerumen.

____ Removing sutures or staples from superficial incisions or lacerations.

____ Applying and removing bandages, dressings, orthopedic appliances, removing casts, splints, and other internal devices.

____ Administering medications orally, sublingually, topically, vaginally, rectally or by providing a single dose to a patient for immediate self-administration. In every instance, prior to administration of medication by the medical assistant, a licensed provider shall verify the correct medication and dosage.

____ Performing electrocardiogram.

____ Other:
____

____

Pediatric preventive care screenings for ages 0 to 20 years based on the American Academy of Pediatrics requirements. Training modules are available at the DHCS website: https://www.dhcs.ca.gov/services/chdp/Pages/Training.aspx.

____ Anthropometric Measurements: Collecting and recording patients' data, including head circumference, height, weight, BMI and plotting values on WHO and CDC growth charts.

____ Hearing Screening: Performing audiometric testing, not requiring interpretation by the medical assistant to obtain test results.

____ Vision Screening: Performing visual field testing, simple or automated ophthalmic testing, not requiring interpretation by the medical assistant to obtain test results.

____ Dental Services: Documenting the last oral assessment and fluoride screening. Identify dental home and ensure referral to a dentist is provided at least annually. Apply fluoride varnish under provider's prescription and supervision.

Clinic Name: ____

Provider Name: ____

To whom it may concern:

This is to certify that ____ has demonstrated and completed On-the-job training as a "MEDICAL ASSISTANT" under the auspices of the undersigned as follows and in compliance with California Code of Regulations, Title 16, Chapter 13, Sections 1366, 1366.1, 1366.2, 1366.3 and 1366.4:

A. Ten clock hours of training in administering injections and performing skin tests.

B. Ten clock hours of training in venipuncture and skin puncture for the purpose of withdrawing blood.

C. Satisfactory performance of at least ten each of intramuscular, subcutaneous, and intra-dermal injections, and ten skin fests, and/or at least ten venipunctures and ten skin punctures.

D. For those only administering medication by inhalation, ten clock hours of training in administering medication by inhalation.

E. Training in A through D above has included instruction and demonstration in:

1. Pertinent anatomy and physiology appropriate to the procedures
2. Choice of equipment
3. Proper techniques including sterile technique
4. Hazards and complications
5. Patient care following treatment or test
6. Emergency procedures
7. California law and regulations for medical assistants

F. Trained and has demonstrated to the satisfaction of instructor, understanding of purposes and techniques of infection control following CDC's "Guidelines for Infection Control in hospital Personnel" (July 1983).

Sincerely Yours,

Provider's Signature ____

Provider's Status___________________________________

Venipuncture, Injection, and Skin Test Certification

This is to certify that ___________________________ has demonstrated and completed on the job training as a “Medical Assistant” here at ________________under the auspices of the undersigned as follows and in compliance with business and Professions Code section 20696 and 2070.

A. Ten clock hours of training in venipuncture and skin puncture for the purpose of drawing blood.

B. Ten clock hours of training in administering injections and performing skin tests.

C. Satisfactory performance by the trainee of at least ten of each of the following procedures: intramuscular injections, subcutaneous injections, skin tests, venipunctures and other skin punctures performed in the office

D. Training A through C above, shall include knowledge of the following:

1. Pertinent anatomy and physiology appropriate to the procedure.
2. Choice of equipment
3. Proper technique including sterile technique.
4. Hazards and complications.
5. Post treatment and test patient care
6. Emergency procedure
7. California law and regulations for medical assistants

_____________________________ _____________________

Physician’s Signature Date

Provider Name: ___________________________________

Office Address: ___________________________________

____

Office Phone Number: ___________________________________

PCP:	
SUBJECT: Office Management	
POLICY AND PROCEDURE: Medical Records	Approved date: ________________ Approved by: _________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:
The medical record shall be maintained to serve the patient/member and healthcare provider in compliance with legal, accrediting and regulatory agency requirements. All member information is regarded as confidential and obtainable only to authorized persons. Medical Records shall be maintained in accordance with medical legal documentation standards including but not limited to health plan operation manual medical record documentation and medical record keeping standards.

PROCEDURE:

I. The provider/designee will ensure that there is a system for the following:
   A. Medical records are available at each encounter and include outpatient, inpatient, referral services, and significant consultations. There must be a separate medical record for each patient

   B. Medical records are accessible within the facility, or an approved health record storage facility on the facility premises.

II. Confidentiality

   A. Staff will ensure that exam rooms and dressing areas safeguard patients' right to privacy.

   B. Staff maintains confidentiality of individual patient information. Individual patient conditions or information is not discussed in front of other patients or visitors, displayed or left unattended in reception and/or patient flow areas. Computer monitors should utilize privacy screens, as appropriate, to prevent unauthorized viewing of patient information.

   C. Where applicable, electronic record-keeping system procedures are established to ensure patient confidentiality, prevent unauthorized access, authenticate electronic signatures, and maintain upkeep of computer systems. Security protection includes an off-site backup storage system, an image mechanism with the ability to copy documents, a mechanism to

ensure that recorded input is unalterable, and file recovery procedures. Confidentiality protection may also include use of encryption, detailed user access controls, transaction logs, and blinded files.

D. The PCP will ensure that medical records are not released without written, signed consent from the patient or patient's representative, identifying the specific medical information to be released. The release will indicate to whom released and for what purpose. This does not prevent release of statistical or summary data, or exchange of individual identifiable medical information between individuals or institutions providing care, fiscal intermediaries, research entities and State or local official agencies.

E. Fax forms contain the confidentiality statement

~~F.~~ The PCP will ensure that medical records are maintained for a minimum of 10 years following patient discharge

III. Documentation

A. Format Section of the Medical Record Documentation Standards

a. Member identification is on each page
b. The medical record includes biographical personal data that is easily located.

c. Emergency contact phone number is noted in medical record.

d. Each member has an organized individual medical record. Hard copy medical records are securely fastened.

e. Member's assigned and/or rendering primary care physician (PCP) is identified.

f. Primary language and linguistic service needs of non-or limited-English proficient (LEP) or hearing-impaired persons are prominently noted

g. Person or entity providing medical interpretation is identified and documented each visit, regardless if done by provider, staff or external vendor. (Note: all forms given in language other than English, must have the English version in member's medical record also)

h. Signed Copy of the Notice of Privacy is included in medical record

B. Documentation Section of the Medical Record Documentation Standards

1. The medication allergies (or no known allergies) are documented in a prominent location.

2. Chronic medical problems and/or significant conditions are consistently documented and can be easily identified.

3. Current continuous medications are consistently documented and can be easily identified.

4. Appropriate consents are present and signed:

   a. Consent for treatment
   b. Release of medical records
   c. Informed Consents are present when any invasive procedure is performed.

5. Advanced Health Care Directive information is offered, and date documented. (Adults, 18 years/older and emancipated minors only). (Note: reviewed every 5 years or as appropriate)

6. All entries are signed, dated and legible.

7. Errors are corrected according to legal medical documentation standards

C. Coordination of Care Section of the Medical Record Documentation Standards

1. History of present illness or reason for visit is documented.

2. Working diagnoses are consistent with findings.

3. Treatment plans are consistent with diagnoses.

4. Instruction for follow up care is documented.

5. Unresolved/continuing problems are addressed in subsequent visit(s)

6. The practitioner instructions for follow-up care, (e.g. when a return office visit is needed), is documented.

7. There is evidence documented of practitioner review of consult/referral reports and diagnostic tests results.

8. There is evidence documented of follow up specialty referrals made and results/reports of diagnostic tests, as appropriate

9. Missed primary care appointments and outreach efforts/follow-up contacts are documented.

D. Preventive Care Section of the Medical Record Documentation Standards

1. Pediatric Preventive Care

   A. Initial Health Assessment (IHA) includes comprehensive History and Physical that includes Individual Health Education Behavioral Assessment using the DHCS required Staying Healthy Assessment (SHA) tool according to the appropriate age. (see SHA P&P.)

   B. Subsequent Comprehensive History and Physical exam completed as age appropriate frequency and SHAs to be reviewed annually and reapplied at age appropriate intervals.

   C. Pediatric well visits annually according to AAP guidelines.

      1. Alcohol/Drug Misuse: Screening and Behavioral Counselling
      2. Anemia Screening
      3. Anthropometric measurements
      4. Anticipatory guidance
      5. Autism Spectrum Disorder Screening
      6. Blood Lead Testing
      7. Blood Pressure Screening
      8. Dental Assessment
         a. Dental home
         b. Flouride supplementation
         c. Flouride varnish
      9. Depression Screening
         a. Maternal Depression Screening
      10. Developmental Disorder Screening
      11. Developmental Surveillance
      12. Dyslipidemia Screening
      13. Folic acid supplementation
      14. Hearing Screening
      15. Hepatitis B Screening
      16. HIV Screening
      17. Intimate Partner Violence Screening
      18. Nutrition assessment/Breast Feeding support
      19. Obesity Screening
      20. Psychosocial/Behavioral Assessment
      21. Sexual Activity Assessment
         a. Contraceptive Care
         b. STI screening on all sexually active adolescents, including chlamydia, Gonorrhea, and Syphilis
      22. Skin Cancer Behavior Counselling

23. Tobacco Products Use: Screening and Prevention and Cessation Services
24. Tuberculosis Screening
25. Vision Screening

D. Childhood Immunizations

1, Pediatric Immunizations are given according to ACIP guidelines.

2.Vaccine administration documentation (Vaccine administration documentation to include lot number, manufacturer dose, site, VIS publication date)

3.Vaccine Information Statement (VIS) documentation (Vaccine Information Sheet (VIS) given and publication date documented)

2. Adult Preventive Care

A. Initial Health Assessment (IHA) and Comprehensive History and Physical that includes Individual Health Education Behavioral Assessment using the DHCS required Staying Healthy Assessment (SHA) tool according to the appropriate age. (see SHA P&P.)

B. Periodic Health Evaluation according to most recent USPSTF Guidelines

C. Subsequent SHAs to be reviewed annually and reapplied at age appropriate intervals.

D. Adult Preventive Care Screenings

1. Abdominal Aneurysm Screening
2. Alcohol Misuse: Screening and Behavioral Counseling
3. Breast Cancer Screening
4. Cervical Cancer Screening
5. Colorectal Cancer Screening
6. Depression Screening
7. Diabetic Screening
    a. Comprehensive Diabetic Care
8. Dyslipidemia Screening
9. Folic Acid Supplementation
10. Hepatitis B Screening
11. Hepatitis C Screening
12. High Blood Pressure Screening
13. HIV Screening
14. Intimate Partner Violence Screening
15. Lung Cancer Screening

16. Obesity Screening
17. Osteoporosis Screening
18. Sexually Transmitted Infection (STI) Screening including Chlamydia, Gonorrhea and Syphilis
    a. Sexually Transmitted Infections Counseling
19. Skin cancer Behavioral Counseling
20. Tobacco Use Counseling and Interventions
21. Tuberculosis Screening

E. Adult immunizations
1. Given according to ACIP guidelines.(Flu, tetanus, and/or pneumovax if over age 65 or high risk)
2. Vaccine administration documentation to include lot number, manufacturer dose, site, VIS publication date.
3. Vaccine Information Sheet (VIS) given and publication date documentation

3 OB/CPSP Preventive Criteria

A. Initial Comprehensive Prenatal Assessment (ICA)
1. Initial prenatal visit is completed within 4 weeks of entry into prenatal care.
2. Obstetrical and Medical History
3. Physical Exam
4. Dental Assessment
5. Lab Tests
    a. Bacteriuria Screening
    b. Rh Incompatibility Screening
    c. Diabetes Screening
    d. Hepatitis B Virus Screening
    e. Chlamydia Infection Screening
    f. Syphilis Infection Screening
    g. Gonorrhea Infection Screening

B. First Trimester Comprehensive Assessment
1. Individualized Care Plan
2. Nutrition Assessment
3. Psychosocial Assessment
    a. Maternal Mental Health Screening
    b. Social Needs Assessment
    c. Substance Use/Abuse Assessment
4. Health Education
5. Preeclampsia Screening
6. Intimate Partner Violence Screening

C. Second Trimester Comprehensive Re-assessment
   1. Individualized Care Plan
   2. Nutrition Assessment
   3. Psychosocial Assessment
      a. Maternal Mental Health Screening
      b. Social Needs Assessment
      c. Substance Use/Abuse Assessment
   4. Health Education
   5. Preeclampsia Screening
   6. Intimate Partner Violence Screening

D. Third Trimester Comprehensive Re-assessment
   1. Individualized Care Plan
   2. Nutrition Assessment
   3. Psychosocial Assessment
      a. Maternal Mental Health Screening
      b. Social Needs Assessment
      c. Substance Use/Abuse Assessment
   4. Health Education
   5. Preeclampsia Screening
   6. Intimate Partner Violence Screening
   7. Screening for Strep B
   8. TDAP Immunization

E. Prenatal care visit periodicity according to most recent ACOG Standards

F. Influenza Vaccine

G. Referral to WIC and assessment of Infant Feeding status

H. HIV-related services *offered*

I. AFP/Genetic screening *offered*

J. Family Planning Evaluation

K. Postpartum Comprehensive Assessment (within 21-56 days after delivery)

   1. Individualized Care Plan
   2. Nutrition Assessment
   3. Psychosocial Assessment
      a. Maternal Mental Health/Postpartum Depression Screening
      b. Social Needs Assessment
      c. Substance Use/Abuse Assessment
   4. Health Education
   5. Comprehensive Physical Exam

HISTORIA MEDICA

Marque con una palomita (✓) e indique la edad en la que tuvo cualquiera de los siguientes síntomas o enfermedades. MARQUE con una equis (X) los problemas actuales.

PROBLEMAS PRINCIPALES 1) ______________ 2) ______________ 3) ______________

❑ Oído disminuido
❑ Zumbido en el oído
❑ Infecciones de oído - *frecuentes*
❑ Mareos
❑ Falla de la vista ❑ Dolor del ojo
❑ Visión doble o borrosa
❑ Infecciones del ojo - *frecuentes*
❑ Sangrado de la nariz - *recurrentes*
❑ Problema del seno
❑ Dolores de garganta - *frecuentes*
❑ Asma del heno / Alergias
❑ Ronquera - *prolongada*
❑ Neumonía / Pleuresía
❑ Bronquitis / Tos crónica
❑ Asma / Jadeo
Falta de aliento:
❑ Haciendo esfuerzo
❑ Estando acostado
❑ Dolor del pecho
❑ Presión sanguínea alta
❑ Soplo cardíaco
❑ Pulso irregular
❑ Palpitaciones
❑ Tobillos hinchados
❑ Desmayos
❑ Dolor de pierna - *caminando*
❑ Venas varicosas / Flebitis
❑ Pérdida del apetito - *reciente*
❑ Dificultad para tragar

❑ Indigestión o acidez estomacal
❑ Ulceras pépticas
❑ Dolor abdominal - *crónico*
❑ Problema de vesícula biliar
❑ Ictericia / Hepatitis
❑ Cambio de hábitos de evacuación intestinal
❑ Diarrea ❑ Estreñimiento
❑ Diverticulosis
❑ Enfermedad de Crohn / Colitis
❑ Excrementos sanguinolentos o alquitranados
❑ Hemorroides
❑ Hernia
❑ Infecciones urinarias - frecuentes
❑ Sangre en la orina
❑ Emisión de orina ❑ Durante la noche más de dos veces
❑ Dolorosa
❑ Pérdida del control
❑ Disminución de la Fuerza/Flujo
❑ Cálculos renales
❑ Enfermedad venérea
❑ Derrame uretral
❑ Fatiga crónica
❑ Pérdida de peso - *reciente*
❑ Anemia
❑ Se magulla fácilmente

❑ Cancer
❑ Diabetes
❑ Enfermedad de tiroides
❑ Convulsiones / Ataques epiléptico□s
❑ Apoplejía
❑ Temblor / Manos temblantes
❑ Debilidad muscular
❑ Adormecimiento / Sensaciones de hormigueo
❑ Dolores de cabeza - *frecuentes*
❑ Artritis / Reumatismo
❑ Dolor de Espalda - *recurrente*
❑ Fracturas óseas / Lesión de articulaciones
❑ Gota
❑ Osteoporosis
❑ Dolor de pie
❑ Pies fríos y adormecidos
❑ Sarpullido
❑ Ronchas
❑ Psoriasis
❑ Eczema
❑ Sueño - *dificultad*
❑ Nerviosismo
❑ Depresión
❑ Pérdida de la memoria
❑ Mal humor - *excesivo*
❑ Fobias

❑ Enfermedad mental
❑ Varicela
❑ Poliomielitis
❑ Paperas
❑ Sarampión
❑ Rubéola
❑ Fiebre reumática
❑ Escarlatina
❑ Tuberculosis
❑ Herpes
❑ Contacto con sangre o fluidos corporales
❑ Alcohol _____ onzas por semana
❑ Fuma _____ cig. por día
Número de años_____
❑ Café / Té
Nº de tazas por día _____
❑ Directivas con adelanto

HOMBRES - Favor de completar
Fecha del último examen de próstata
❑ Normal ❑ Anormal
Fecha de la última PSA _____

MUJERES - Favor de completar
Flujo Menstrual:
❑ Reg. ❑ Irreg.
❑ Dolor / Cólico
Días de flujo _____
Duraciones del ciclo _____
Fecha del último período _____
❑ Dolor / Sangramiento durante o después del coito
Número de:
Embarazos _____
Abortos provocados _____
Abortos espontáneos _____
Nacimientos con vida _____
Método de control de la natalidad ___________
Píldora de control de la natalidad (nombre) _______________
❑ Calores súbitos / Menopausia

Medical Record Scores

Note: Score "R" for Documented Member Refusal (due to member non-compliance with evidence showing provider outreach, referrals, lab orders, awaiting results.)
When scoring for OB/CPSP Preventive, score the Adult or Pediatric Preventive criteria for the same record.

	Points possible	Yes Pts. Given	R Pts. Given	No's	N/A's	Section Score %
I. Format	**(8) x 10 = 80**					
II. Documentation	**(8) x 10 = 80**					
III. Coordination of Care	**(8) x 10 = 80**					
IV. Pediatric Preventive	**(34) x # of records**					
V. Adult Preventive	**(30) x # of records**					
VI. OB/CPSP Preventive	**(59) x # of records**					
	Points Possible	**Yes Pts. Given**	**R Pts. Given**	**No's**	**N/A's**	

Scoring Procedure

Scoring is based on 10 medical records.

1) Add points given in each section.
2) Add points given for all six (6) sections.
3) Subtract "N/A" points (if any) from total points possible to get "adjusted" total points possible.
4) Divide total points given by "adjusted" total points possible.
5) Multiply by 100 to determine compliance rate as a percentage.

_____ ÷ _____ = _____ x 100 = ______%

Points Given | Total/ Adjusted Pts. Poss. | Decimal Score | Compliance Rate

Note:
Since Preventive Criteria have different points possible per type (Ped-34, Adult-30, OB/CPSP-59, the total points possible will differ from site to site, depending on the number of *types* of records that are selected. The "No's" column *may* be used to help double-check math. The far-right Section Score % column may be used to determine if section is <80%.

Compliance Rate

Note: Any section score of < 80% requires a CAP for the entire MRR, regardless of the Total MRR score.

____ **Exempted Pass: 90% or above:**
(Total score is ≥ 90% ***and*** all section scores are 80% or above)

____ **Conditional Pass: 80-89%:**
(Total MRR is 80-89% ***OR*** *Any* section(s) score is < 80%)

____ **Fail: 79% and Below**

____ CAP Required

____ Other follow-up

I. Format Criteria

RN/NP/MD/PA/CNM/LM

Criteria met: Give one (1) point Documented Member Refusal: R Give (1) point and score "R" for instances of member non-compliance. (Evidence showing provider outreach, order, referral, pending results.) Criteria not met: 0 points Criteria not applicable: N/A	Wt.	MR #1	MR #2	MR #3	MR #4	MR #5	MR #6	MR #7	MR #8	MR #9	MR #10	Score
Individual Medical Record is established for each member.												
A. Member identification is on each page.	1											
B. Individual personal biographical information is documented.	1											
C. Emergency "contact" is identified.	1											
D. Medical records are maintained and organized.	1											
E. Member's assigned and/or rendering primary care physician (PCP) is identified.	1											
F. Primary language and linguistic service needs of non-or limited-English proficient (LEP) or hearing/speech-impaired persons are prominently noted.	1											
G. Person or entity providing medical interpretation is identified.	1											
H. Signed Copy of the Notice of Privacy.	1											
Comments:	**Yes**											
	R											
	No											
	NA											

II. Documentation Criteria

RN/NP/MD/PA/CNM/LM

Criteria met: Give one (1) point **Documented Member Refusal: R Give (1) point and score "R" for instances of member non-compliance. (Evidence showing provider outreach, order, referral, pending results.)** **Criteria not met: 0 points** **Criteria not applicable: N/A**	**Wt.**	MR #1	MR #2	MR #3	MR #4	MR #5	MR #6	MR #7	MR #8	MR #9	MR #10	**Score**
A. Allergies are prominently noted.	**1**											
B. Chronic problems and/or significant conditions are listed.	**1**											
C. Current *continuous* medications are listed.	**1**											
D. **Appropriate consents are present:**												
1) Release of Medical Records	**1**											
2) Informed Consent for invasive procedures	**1**											
E. Advance Health Care Directive Information is offered.	**1**											
F. All entries are signed, dated, and legible.	**1**											
G. Errors are corrected according to legal medical documentation standards.	**1**											
Comments:	**Yes**											
	R											
	No											
	N/A											

III. Coordination of Care Criteria RN/NP/MD/PA/CNM/LM											
Criteria met: Give one (1) point **Documented Member Refusal: R Give (1) point and score "R" for instances of member non-compliance. (Evidence showing provider outreach, order, referral, pending results.)** **Criteria not met: 0 points** **Criteria not applicable: N/A**	**Wt.**	MR #1	MR #2	MR #3	MR #4	MR #5	MR #6	MR #7	MR #8	MR #9	MR #10	**Score**
A. History of present illness or reason for visit is documented.	**1**											
B. Working diagnoses are consistent with findings.	**1**											
C. Treatment plans are consistent with diagnoses.	**1**											
D. Instruction for follow-up care is documented.	**1**											
E. Unresolved/continuing problems are addressed in subsequent visit(s).	**1**											
F. There is evidence of practitioner *review* of specialty/consult/referral reports and diagnostic test results.	**1**											
G. There is evidence of *follow-up* of specialty consult/referrals made, and results/reports of diagnostic tests, when appropriate.	**1**											
H. Missed primary care appointments and outreach efforts/follow-up contacts are documented.	**1**											
Comments:	**Yes**											
	R											
	No											
	N/A

Primary Care Provider-Medical Record Review Standards

Purpose: The Medical Record Review (MRR) Standards provide instructions, rules, regulations, parameters, and indicators for conducting medical record reviews using the MRR Tool. The site reviewer must use these Standards for measuring, evaluating, assessing, and making decisions.

Medical Record Selection: Medical records shall be randomly selected using methodology decided upon by the reviewer. Ten (10) medical records are reviewed for each primary care physician (PCP) site. For sites with *only* adult or *only* pediatric patient members, all ten records reviewed will be in *only* one preventive care criteria. For sites with adult and pediatric members, five (5) adults and five (5) pediatrics preventive criteria will be reviewed. For PCP sites where the OB-GYN providers both specialty and preventive services, based on the age of the patient, reviewer must review either adult or pediatric preventive criteria as well as OB Comprehensive Perinatal Services Program (CPSP) criteria.

PCP sites that document patient care performed by multiple PCPs in the same medical record are considered "shared." The MCP must consider shared medical records as those that are not identifiable as "separate" records belonging to any specific PCP. Scores calculated on shared medical records apply only to PCPs sharing the records. A minimum of ten shared records shall be reviewed for 2-3 PCPs, 20 records for 4-6 PCPs, and 30 records for 7 or more PCPs based on specialty and/or population served.

Example for determining the number of medical records to review:

> A site that has three (3) providers, two (2) providers see only adults and share records, and one (1) only see pediatrics and does not share records, 10 medical records on the two providers who share medical records and 10 medical records on the provider who does not share records will be conducted and scored separately. A total of 20 medical records shall be reviewed for this site. Two (2) scores will be reported for this site.

Reviewers are expected to determine the most appropriate method(s) on each site to ascertain information needed to complete the review. Review criteria that shall be reviewed *only* by a registered nurse (RN), nurse practitioner (NP), physician (MD), physician assistant (PA), Certified Nurse Midwife (CNM), or Licensed Midwife is labeled "🗣🗁 **RN/NP/MD/PA/CNM/LM".**

Reviewers must ensure confidentiality on Protected Health Information (PHI) or Personally Identifiable Information (PII).

Scoring: The review score is based on a review standard of 10 records per individual primary care provider (PCP). Documented evidence found in the hard copy (paper) medical records and/or electronic medical records, including immunization registries, are used for review criteria determinations. Compliance levels are:
An Exempted Pass is 90%.
Conditional Pass is 80-89%.
Failure is below 80%.

The minimum passing score is 80%. A corrective action plan (CAP) is required for a total MRR score below 90%. Also, any section score of less than 80% requires a CAP for the entire MRR, regardless of the total MRR score.

Directions: Score one point if criterion is met. . Score "R" for documented member refusal, Provider outreach, referral or member non-compliance*. Score zero points if criterion is not met. Not Applicable (N/A) applies to any criterion that does not apply to the medical record being reviewed and must be explained in the comment section. Do not score partial points for any criterion.

When to use "Documented member refusal"
1. When there is documentation in the record that the site/provider addressed the preventive service and ordered/offered/referred, there was adequate follow up, the member was noncompliant/no-show/nonresponsive and/or the member refused.i.e mammogram ordered, referral given and follow up during the next visit to remind member to get mammogram or ii.mammogram ordered but member declined

2. When there is documentation of the site requesting information, signature/completion of a form or questionnaire and "member refused" or evidence of request/offering is documented. i.e. Requested emergency contact information and member didn't provide it, "refusal" is documented in the record; Requested completion of privacy notice and member refused to sign, "refusal" is documented in the record

When to use "N/A"
1. When the member is out of the age range or not the same gender for preventive services ie. Blood lead for 8 year old or mammogram for a male

2. When the preventive service is not indicated due to their medical history, 45 year old female with total abdominal hysterectomy or 50 year old male with total colectomyi.e. reviewers may add medical reason in the comment:

If 10 shared records are reviewed, score calculation shall be the same as for 10 records reviewed for a single PCP.
If 20 records are reviewed, divide total points given by the "adjusted" total points possible.
If 30 records are reviewed, divide total points given by the "adjusted" total points possible.
Multiply by 100 to calculate percentage rate.

Reviewers have the option to request additional records to review but must calculate scores accordingly.

Scoring Example:

Step 1: Add the points given in each section.
Step 2: Add the points given (Yes + R) for all six sections.
(Format points given)
(Documentation points given)
(Coordination of Care points given)
(Pediatric Preventive points given)
(Adult Preventive points given)
+ (OB/CPSP Preventive points given)
= (Total points given)

Step 3: Subtract the "N/A" points from total points possible.
(Total points possible)
– (N/A points)
= ("Adjusted" total points possible)

Step 4: Divide total points given by the "adjusted" points possible, then multiply by 100 to calculate percentage rate.

Total points given / "Adjusted" total points possible

Example: 267 / 305 = 0.875 X 100 = 88%

Rationale: A well-organized medical record keeping system supports effective patient care, information confidentiality and quality review processes.

I. Format Criteria	
An individual medical record is established for each member.	Practitioners are able to readily identify each individual treated. A medical record is started upon the initial visit.[1] "Family charts" are not acceptable.
A. **Member identification is on each Page.**	• Member identification includes first and last name, and a unique identifier established for use on clinical site. • Electronically maintained records and printed records from electronic systems must contain member identification.
B. **Individual personal biographical information is documented.**	Personal biographical information includes: ○ Date of birth ○ Current address ○ Home/work phone numbers ○ Name of parent(s)/legal guardian if member is a minor If member refused to provide information, "refused" is documented in the medical record. Do not deduct points if member has refused to provide all personal information requested by the practitioner.
C. **Emergency "contact" is identified.**	The name and phone number of an "emergency contact" person is identified for all members. Listed emergency contacts may include: ○ Spouse, relative or friend, and must include at least one of the following: ○ Home, work, pager, cellular, or message phone number. • If the member is a minor, the primary (first) emergency contact person must be a parent or legal guardian and then other persons may be listed as additional emergency contacts. • Adults and emancipated minors may list anyone of their choosing. • If a member refuses to provide an emergency contact, "refused" is noted in the record. Do not deduct points if member has refused to provide personal information requested by the practitioner.

[1] See the U.S. Department of Health and Human Services Summary of the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule, available at: https://www.hhs.gov/hipaa/for-professionals/privacy/laws-regulations/index.html.

I. Format Criteria	
	• Next of kin category is not considered as an emergency contact. The member's emergency contact may be different from the next of kin.
D. Medical records are maintained and organized	• Contents and format of printed and/or electronic records within the practice site are uniformly organized, securely fastened, attached or bound to prevent medical record loss. • Hard copy printed documents shall belong to the medical record established for each member (e.g., reusing the blank side of printed documents from another member is not acceptable and should be scored a "0"). • Medical Record information should be readily available.
E. Member's assigned and/or rendering PCP is identified.	• The assigned and/or rendering PCP is ***always*** identified when there is more than one PCP on site and/or when the member has selected health care from a non-physician medical practitioner. • Various methods can be used to identify the assigned PCP, reviewers must identify specific method(s) used at each individual site such as Health Plan ID Card, practitioner stamp, etc. • If there is only one PCP/Practitioner onsite and is not identified, reviewer may score "N/A".
F. Primary language and linguistic service needs of non-or of limited-English proficiency (LEP) or hearing/speech-impaired persons are prominently noted.	• The primary language is prominently documented at least once in the medical record. • Language documentation is not necessary, score "N/A," if English is the primary language. However, if "English" is documented, the point may be given. **Note:** Title VI of the Civil Rights Act of 1964 prohibits recipients of federal funds from providing services to LEP persons that are limited in scope or lower in quality than those provided to others. Since Medi-Cal is partially funded by federal funds, ***all*** Plans with Medi-Cal LEP members must ensure that these members have equal access to all health care services.[2]

[2] See All Plan Letter (APL) 21-004: Standards for Determining Threshold Languages, Nondiscrimination Requirements, and Language assistance Services, or any superseding APL. APLs are searchable at: https://www.dhcs.ca.gov/formsandpubs/Pages/AllPlanLetters.aspx

I. Format Criteria	
G. Person or entity providing medical interpretation is identified.	• Requests for language and/or interpretation services by a non-or limited-English proficient member are documented. • Member refusal of interpreter services may be documented at least once and be accepted throughout the member's care unless otherwise specified. • If bilingual staff are asked to interpret or translate, they should be qualified to do so. Assessment of ability, training on interpreter ethics and standards, and clear policies that delineate appropriate use of bilingual staff, staff or contract interpreters and translators, will help ensure quality and effective use of resources. • Those utilizing the services of interpreters and translators should request information about certification, assessments taken, qualifications, experience, and training. Quality of interpretation should be a focus of concern for all recipients. • Family or friends should not be used as interpreters, unless specifically requested by the member and documented in the member's chart. • Minors (under 18 years old) accompanying member shall not be used as an interpreter. • The Affordable Care Act (ACA) 2010 section 1557: prohibits from using low-quality video remote interpreting services or relying on unqualified staff, translators when providing language assistance services. • Sign language interpreter services may be utilized for medically necessary health care services and related services such as obtaining medical history and health assessments, obtaining informed consents and permission for treatments, medical procedures, providing instructions regarding medications, explaining diagnoses, treatment and prognoses of an illness, providing mental health assessment, therapy or counseling. Various documents can be accepted to document linguistic service needs such as intake form, demographic form, Electronic Medical Record (EMR) fields, consent forms, etc. **Note:** See Commonly Asked Questions and Answers Regarding LEP Individuals, available at: https://www.lep.gov/faq/faqs-rights-lep-individuals/commonly-asked-questions-and-answers-regarding-limited-english. See also Title 22 California Code

I. Format Criteria	
	of Regulations (CCR) Section 51309.5. The CCR is searchable at: https://govt.westlaw.com/calregs/Search/Index.
H. Signed Copy of the Notice of Privacy	The HIPAA Privacy Rule establishes national standards to protect individuals' medical records and other personal health information and applies to health plans, health care clearinghouses, and those health care providers that conduct certain health care transactions electronically. The right to inspect, review and receive a copy of the medical records is covered by the Privacy Rule.[3]

[3] See the U.S. Department of Health and Human Services Understanding of Some of HIPAA's Permitted Uses and Disclosures, available at: https://www.hhs.gov/hipaa/for-professionals/privacy/guidance/permitted-uses/index.html.

Rationale: Well-documented records facilitate communication and coordination and promote efficiency and effectiveness of treatment.

RN/NP/MD/PA/CNM/LM

II. Documentation Criteria	
A. Allergies are prominently noted.	• Allergies and adverse reactions are listed in a prominent, easily identified, and consistent location in the medical record. • If member has no allergies or adverse reactions, "No Known Allergies" (NKA), "No known Drug Allergies" (NKDA), or ∅ is documented.[4]
B. Chronic problems and/or significant conditions are listed.	• Documentation may be on a separate "problem list," or a clearly identifiable problem list in the progress notes. • All chronic or significant problems are considered current if no "end date" is documented. **Note:** Chronic conditions are current long-term, on-going conditions with slow or little progress.[5]
C. Current continuous medications are listed.	• Documentation may be on a separate "medication list," or a clearly identifiable medication list in the progress notes. • List of current, on-going medications identifies the medication name, strength, dosage, route (if other than oral), and frequency. • Discontinued medications are noted on the medication list or in progress notes.[6]
D. Appropriate Consents are present.	1) Consent must be obtained prior to release of patient information.[7] 2) Adults, parents/legal guardians of a minor or emancipated minor may sign consent forms for operative and invasive procedures.[8] Persons under 18 years

[4] 22 CCR 70527 and 28 CCR 1300.80
[5] 22 CCR 70527 and 28 CCR 1300.80
[6] 22 CCR 70527 and 28 CCR 1300.80
[7] 22 CCR 73524, 22 CCR 51009, and Title 45, Code of Federal Regulations Section 164.524. The CFR is searchable at: https://www.ecfr.gov.
[8] An invasive procedure is a medical procedure that invades (enters) the body, usually by cutting or puncturing the skin or by inserting instruments into the body. Very minor procedures such as drawing blood testing, umbilical cord blood donations and a few other very specific

II. Documentation Criteria	
	of age are emancipated if they have entered into a valid marriage, are on military active duty, or have received a court declaration of emancipation under the CA Family Code, Section 7122.[9] **Note:** Human sterilization requires the Department of Health Care Services (DHCS) Consent Form PM 330 if services are performed at the site.
E. Advance Health Care Directive information is offered. (Adults 18 years of age or older; emancipated minors).	• Adult medical records include documentation of whether the member has been *offered* information or has executed an Advance Health Care Directive.[10] The Physician Orders for Life-Sustaining Treatment (POLST) form and Five Wishes are acceptable if appropriately completed and signed by necessary parties.[11] **Note:** Advance Health Care Directive Information is reviewed with the member at least every 5 years and as appropriate to the member's circumstance.
F. All entries are signed, dated and legible.	**Signature** includes: • First initial, last name, and title of health care personnel providing care, including Medical Assistants. • Initials and titles may be used only if signatures are specifically identified elsewhere in the medical record (e.g. signature page). • Stamped signatures are acceptable, but must be authenticated, meaning the stamped signature can be verified, validated, confirmed, and is countersigned or initialed. **Dated entries** include: • Month/day/year. • Entries are in reasonably consecutive order by date.

tests are not considered invasive and do not require a consent. Consent is implied by entering the provider's office or lab and allowing blood to be drawn. (Ref: National Institutes of Health; American Cancer Society)

[9] California Law is searchable at: https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml.

[10] See Probate Code, Section 4701, 42 CFR 422.128, 42 CFR 489.100, and APL 05-010.

[11] See AB 3000, Chapter 266, Statutes of 2008, available at: https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=200720080AB3000.

II. Documentation Criteria	
	• Handwritten documentation does not contain skipped lines or empty spaces where information can be added. Entries are not backdated or inserted into spaces above previous entries. • Omissions are charted as a new entry. • Late entries are explained in the medical record, signed and dated. **Legibility** means the record entry is readable by a person other than the writer. Handwritten documentation, signatures, and initials are entered in ink that can be readily/clearly copied. Only standard abbreviations are used. All medical record documentation must be in English.[12] **Note:** • In EMR, methods to document signatures (and/or authenticate initials) will vary and must be individually evaluated. • Signature page may be in the member's medical record or available elsewhere onsite and all previous and current employees who document in medical records need to be included on the signature page. • Reviewers should assess the log-in process and may need to request printouts of entries. See the Centers for Medicare and Medicaid Services' (CMS) Guidance on Medicaid Documentation for Medical Office Staff, available at: https://www.cms.gov/Medicare-Medicaid-Coordination/Fraud-Prevention/Medicaid-Integrity-Education/Downloads/docmatters-officestaff-factsheet.pdf.
G. Errors are corrected according to legal medical documentation standards.	• The person that makes the documentation error corrects the error. Example correction methods: • Single line drawn through the error, with the writer's initial and date written above or near the lined-through entry. • Single line and initial.

[12] ACA Section 1557

II. Documentation Criteria	
	• The corrected information is written as a separate entry and includes date of the entry, signature (or initials), and title. There are no unexplained cross-outs, erased entries or use of correction fluid. Both the original entry and corrected entry are clearly preserved. **Note:** Reviewers must determine the method used for error corrections for EMR on a case by case basis. This should include the log-in process and whether the EMR allows for corrections to be made after entries are made.

Rationale: Medical records support coordination and continuity-of-care with documentation of past and present health status, medical treatment and future plans of care.

RN/NP/MD/PA/CNM/LM

III. Coordination Criteria	
A. **History of present illness or reason for visit is documented.**	Each focused visit (e.g., primary care, follow-up ER/urgent care, hospital discharge, etc.) includes a documented history of present illness or reason for visit.
B. **Working diagnoses are consistent with findings.**	Each visit has a documented "working" diagnosis/impression derived from a physical exam, and/or "Subjective" information such as chief complaint or reason for the visit as stated by member/parent. The documented "Objective" information (such as assessment, findings and conclusion) relate to the working diagnoses. **Note:** For scoring purposes, reviewers shall ***not make determinations*** about the "*rightfulness or wrongfulness*" of documented information but shall initiate the peer review process or internal investigation per health plan policy as appropriate.
C. **Treatment plans are consistent with diagnoses.**	A plan of treatment, care and/or education related to the stated diagnosis is documented for each diagnosis. **Note:** For scoring purposes, reviewers shall ***not make determinations*** about the "*rightfulness or wrongfulness*" of treatment rendered or care plan but shall initiate the peer review process or internal investigation per health plan policy as appropriate.
D. **Instruction for follow-up care is documented.**	• Specific follow-up instructions and a definite time for return visit or other follow-up care is documented. • Time period for return visits or other follow-up care is definitively stated in number of days, weeks, months, or PRN (as needed). • Every visit with the provider shall have follow-up instructions.
E. **Unresolved continuing problems are addressed in subsequent visit(s).**	• Previous complaints and unresolved or chronic problems are addressed in subsequent notes until problems are resolved or a diagnosis is made.

III. Coordination Criteria	
	• Each problem need not be addressed at every visit as long as the provider documents a reason for deferring the unresolved problem(s) for subsequent visits. • Documentation demonstrates that the practitioner follows up with members about treatment regimens, recommendations, and counseling.
F. **There is evidence of practitioner review of specialty/consult/referral reports and diagnostic test results.**	• There is documented evidence of practitioner review of records such as diagnostic studies, lab tests, X-ray reports, consultation summaries, inpatient/discharge records, emergency and urgent care reports, and all abnormal and/or “STAT” reports. • Evidence of review may include the practitioner’s initials or signature on the report, notation in the progress notes, or other site-specific method of documenting practitioner review. **Note:** Electronically maintained medical reports must also show evidence of practitioner review and may differ from site to site. Evidence of practitioner review on any page of the report(s) or diagnostic result(s) that have multiple pages is acceptable.
G. **There is evidence of follow-up of specialty/consult/referrals made, and results/reports of diagnostic tests, when appropriate.**	Documentation includes: • Consultation reports and diagnostic test results for ordered requests. • Abnormal test results/diagnostic reports have explicit notation in the medical record or separate system, including attempts to contact the member/guardian, follow-up treatment, instructions, return office visits, referrals and/or other pertinent information. • Missed/broken appointments for diagnostic procedures, lab tests, specialty appointments and/or other referrals are noted, and include attempts to contact the member/parent and results of follow-up actions. If diagnostic appointments or referrals are documented in a separate system from medical records, they must be readily accessible and meet the medical retention requirements. **Note:**

III. Coordination Criteria	
	• Abnormal test results/diagnostic reports without follow-up documentation for specific pediatric or adult preventive screening criteria/diagnostic tests will be scored under this criterion. • If results are normal and there are no missing reports, then the reviewer may score “N/A” for this criterion. • If specific pediatric or adult preventive screenings are ordered and there is no documentation of normal results and/or follow-up, the reviewer shall score this under the appropriate preventive services criteria. • If the provider/staff does not follow up or attempt outreach to the member regarding a missed specialty referral, give a zero “0” score. Reviewer must assess the process of outreach efforts/follow-up contacts and documentation of attempts. The process must include at least one attempt for outreach/follow-up contact.
H. **Missed primary care appointments and outreach efforts/follow-up contacts are documented.**	Documentation includes: • Incidents of missed/broken appointments, cancellations or “No shows” with the PCP office. • Attempts to contact the member or parent/guardian and the results of follow-up actions. Missed and/or canceled appointments and contact attempts must be documented in the patient’s medical record. **Note:** Reviewer must assess the process of outreach efforts/follow-up contacts and documentation of attempts. The process must include at least one attempt for outreach/follow-up contact.

Rationale: Pediatric preventive services are provided to members under 21 years of age in accordance with current American Academy of Pediatrics (AAP) bright future and US Preventive Task Force (USPSTF) recommendations. See the DHCS Boilerplate contract, available at: https://www.dhcs.ca.gov/provgovpart/Documents/2-Plan-Non-CCI-Boilerplate-Final-Rule-Amendment.pdf.

RN/NP/MD/PA/CNM/LM

IV. Pediatric Preventive Criteria	
A. Initial Health Appointment (IHA) includes H&P and Risk Assessment	**New Members** IHA must be completed within 120 days of plan enrollment or PCP effective date (whichever is more recent) or documented within the 12 months prior to Plan enrollment/PCP effective date. The IHA include a history of the member's physical and behavioral health, an identification of risks, an assessment of need for preventive screens or services and health education, and the diagnosis and plan for treatment of any diseases. A complete IHA enables the PCP to assess current acute, chronic, and preventive needs and to identify those Members whose health needs require coordinated services with appropriate community resources/other agencies not covered by the Plan. References: https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Policy-Guide.pdf https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2022/APL22-030.pdf or current version
1) Comprehensive History and Physical	**New members** The history must be comprehensive to assess and diagnose acute and chronic conditions it includes: o History of present illness o Past medical history o Social history o Review of Organ Systems (ROS) If an H&P is not found in the medical record, the reasons (e.g., member/parent refusal, missed appointment) and contact attempts to reschedule are documented.

IV. Pediatric Preventive Criteria	

~~2)~~ Member Risk Assessment	**New members**
	Initial Member Risk Assessments related to health and social needs of members, including cultural, linguistic, and health education needs; health disparities and inequities; lack of coverage/access to care; and social drivers of health (SDOH) shall be conducted. An assessment of <u>at least one (1)</u> of the following risk assessment domains within 120 days of the effective date of enrollment into the Plan or PCP effective date (whichever is more recent), or within the 12 months prior to Plan enrollment/PCP effective date meets the standard:
	
	• Health Risk Assessment: MCPs will not be required to retain the use of their existing HRA tools. If MCPs decide to retain existing HRA tools, they are encouraged to adapt them to allow delegation to providers
	
	• <u>SDOH</u>: The conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks. Examples of SDOH includes housing instability, food insecurity, transportation needs, utility needs, interpersonal safety, etc. Documented assessments of SDOH in the progress notes or use of the following examples of SDOH screening tools meet the standard:
	  o Social Needs Screening Tool
	
	• <u>Adverse Childhood Experiences (ACEs)</u> (birth to 64 years old): Potentially traumatic experiences, such as neglect, experiencing or witnessing violence, having a family member attempt or die by suicide, household with substance use problems, mental health problems and other experiences that occur in childhood that can affect individuals for years and impact their life opportunities. Examples of validated screening tools that meet the standards are as follows:
	  o The Pediatric ACEs and Related Life-Events Screener (PEARLS) is used to screen children and adolescents ages 0-19 for ACEs.
	  o The ACE Questionnaire for Adults is used to screen adults 18 years and older for ACEs.

	https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2021/APL21-009.pdf
	https://www.cdc.gov/about/sdoh/index.html

IV. Pediatric Preventive Criteria	
	https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2023/APL23-017.pdf https://www.cdc.gov/violenceprevention/aces/fastfact.html
B. Subsequent Comprehensive Health Assessment	**Existing/Current Members** The examination must be comprehensive, focus on specific assessments that are appropriate for the child's or adolescent's age, developmental phase, and needs building on the history gathered earlier. The physical examination provides opportunities to identify silent or subtle illnesses or conditions and time for the health care professional to educate children and their parents about the body and its growth and development. See the AAP/Bright Futures Recommendations for Preventive Pediatric Health Care, available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf
1) Comprehensive History and Physical Exam completed at age-appropriate frequency	• Health assessments containing age-appropriate requirements are provided per the most recent AAP periodicity schedule. • Assessments and identified problems are documented in the progress notes. • Follow-up care or referral is provided for identified physical health problems as appropriate. **Note:** The AAP periodicity exam schedule is more frequent than the Child Health and Disability Prevention Program (CHDP) periodicity examination schedule. The AAP scheduled visit must include all assessment components required by the CHDP program for the lower age nearest to the current age of the child.[13]
2) Subsequent Risk Assessment	• Subsequent Member Risk Assessments shall be completed annually or more frequently if any significant changes in health status are identified. An assessment of at least one (1) of the above risk assessment domains (HRA, SDOH and ACEs) meets the standard. • https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Policy-Guide.pdf

[13] See the AAP/Bright Futures Recommendations for Preventive Pediatric Health Care, available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf

IV. Pediatric Preventive Criteria	
C. Well-child Visit	The Bright Futures/AAP developed a set of comprehensive health guidelines for well-childcare, known as the "periodicity schedule."[14] It is a schedule of screenings and assessments recommended at each well-child visit from infancy through adolescence. **Screening** pertains to an assessment of the eligible population for presence of risk factors. • If the patient is positive for risk factors, (e.g., obesity, menstrual status, etc.) age and gender parameters of the criterion the provider shall offer and document appropriate follow-up intervention(s) (e.g., diagnostic testing, counseling, referral to specialist, documentation of patient refusal, etc.). • Providers who fail to document the presence or absence of risk factors shall receive zero points since the patient's risk status could not be determined and the preventive care criterion was not addressed. • Evidence of risk assessments and screenings for other preventive care criteria may be found in the progress notes, comprehensive history forms, or elsewhere in the medical record. **Note:** The AAP does not approve nor endorse any specific tool for screening purposes. Examples of screening tools are available at: https://www.aap.org/en/patient-care/screening-technical-assistance-and-resource-center/screening-tool-finder/?page=1 https://www.healthychildren.org/English/family-life/health-management/Pages/Well-Child-Care-A-Check-Up-for-Success.aspx
1) **Alcohol Use Disorder Screening and Behavioral Counseling**	Per AAP recommendations, alcohol use disorder screening and behavioral counseling should begin at 11 years of age. If the patient is positive for risk factors, provider shall offer and document appropriate follow-up intervention(s). Brief Assessment and Screening

[14] The Bright Futures/AAP periodicity schedule is available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf.

IV. Pediatric Preventive Criteria	
	When a screening is positive, validated assessment tools should be used to determine if unhealthy alcohol use is present. Validated assessment tools may be used without first using validated screening tools. The AAP recommended assessment tool is available at: http://crafft.org. Brief Interventions and Referral to Treatment When brief assessments reveal unhealthy alcohol use, brief misuse counseling with appropriate referral for additional evaluation and treatment options, referrals, or services must be offered. Brief interventions must include the following: • Providing feedback to the patient regarding screening and assessment results; • Discussing negative consequences that have occurred and the overall severity of the problem; • Supporting the patient in making behavioral changes; and • Discussing and agreeing on plans for follow-up with the patient, including referral to other treatment if indicated. The AAP/Bright Futures periodicity schedule is available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf For details on Alcohol and Drug Screening, Assessment, Brief Interventions and Referral to Treatment, refer to APL 21-014 or any superseding APL. Please refer to the link below to The Medi-Cal Provider Manual: https://www.dhcs.ca.gov/formsandpubs/publications/Pages/Manuals.aspx
2) **Anemia Screening**	Per AAP, perform risk assessment or screening at 4, 15, 18, 24, and 30 months, 3 years old, and then annually thereafter. Test serum hemoglobin at 12 months old. If the patient is positive for risk factors, provider shall offer and document appropriate follow-up intervention(s). Acceptable evidence of anemia screening: evaluate patient's diet, nutrition supplement intake, menstrual status, medical history for chronic conditions, etc.

	Chronic conditions to assess that are associated with anemia: o A diet consistently low in iron, vitamin B-12 and folate o Heavy Menstruation. See link for signs of heavy menstrual bleeding: https://www.acog.org/womens-health/faqs/heavy-menstrual-bleeding o Pregnancy o Slow, chronic blood loss from an ulcer; Crohn's disease, celiac disease, cancer, kidney failure, diabetes, etc. The Bright Futures/AAP periodicity schedule is available at: https://www.aap.org/en-us/documents/periodicity_schedule.pdf. See the National Institutes of Health information on Anemia, available at: https://www.nhlbi.nih.gov/health-topics/anemia#:~:text=Some%20people%20are%20at%20a,such%20as%20chemotherapy%20for%20cancer. See the Center for Disease Control and Prevention's (CDC) information on heavy menstrual bleeding, available at: https://www.cdc.gov/ncbddd/blooddisorders/women/menorrhagia.html.
3) **Anthropometric measurements**	For each well exam: • Infants up to 24 months old: assess for length/height and head circumference (HC). Measurements are plotted in a World Health Organization (WHO) growth chart. • 2-21 years old: assess for height, weight, and body mass index (BMI) measurements are plotted in a CDC growth chart. • Provider should measure and track BMI to identify patient at risk for being overweight, obese, or underweight. Patients identified as overweight and/or obese are provided counseling for nutrition to promote healthy eating habits and regular physical activity. For additional information on anthropometric measurements, refer to the following link: https://www.dhcs.ca.gov/services/chdp/Documents/HAG/4AnthropometricMeasure.pdf

IV. Pediatric Preventive Criteria	
	Note: Site is deficient if anthropometric measurements are not plotted on the appropriate growth chart.[15]
4) **Anticipatory Guidance**	• Must be documented at each well child visit. • Is given by the health care provider to assist parents or guardians in the understanding of the expected growth and development of their children. • Specific to the age of the patient, includes information about the benefits of healthy lifestyles and practices that promote injury and disease prevention https://brightfutures.aap.org/Bright%20Futures%20Documents/BF_PreventiveServices_Tipsheet.pdf#search=document%20anticipatory%20document
5) **Autism Spectrum Disorder (ASD) Screening**	ASD screening must be performed at 18 months and 24 months of age based on AAP periodicity "Bright Futures". If the patient is positive for risk factors, provider shall offer and document appropriate follow-up intervention(s). ASD screening tools examples: ○ Ages and Stages Questionnaires (ASQ) ○ Communication and Symbolic Behavior Scales (CSBS) ○ Parents' Evaluation of Developmental Status (PEDS) ○ Modified Checklist for Autism in Toddlers (MCHAT) ○ Screening Tool for Autism in Toddlers and Young Children (STAT) ○ Survey of Well-being of Young Children (SWYC) screening tools (assess three domains of child functioning: developmental domain, emotional/behavioral domain, and family context) Refer to APL 19-014, Responsibilities for Behavioral Health Treatment Coverage for Members Under the Age of 21, and APL 19-010, Requirements for Coverage of Early and Periodic Screening, Diagnostic, and Treatment Services for Medi-Cal Members Under the Age of 21, or any superseding APLs for more information on ASD. Screening should occur per "Identification, Evaluation, and Management of Children With Autism Spectrum Disorder"

[15] CDC growth charts are available at: https://www.cdc.gov/growthcharts/.

	Screening should occur per "Promoting Optimal Development: Identifying Infants and Young Children With Developmental Disorders Through Developmental Surveillance and Screening", available at: https://pediatrics.aappublications.org/content/145/1/e20193449. See the AAP publication regarding Identification, Evaluation, and Management of Children with ASD, available at: https://pediatrics.aappublications.org/content/145/1/e20193447. See the Tufts Children's Hospital Survey of Well-being of Young Children, available at: https://www.tuftschildrenshospital.org/The-Survey-of-Wellbeing-of-Young-Children/Overview. See the AAP Screening Tools, available at: https://screeningtime.org/star-center/#/screening-tools
6) **Blood Lead Screening**	• Children receiving health services through publicly funded programs must receive anticipatory guidance on lead poisoning prevention at each periodic health assessment, starting at 6 months of age and continuing until 72 months of age. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screen reveals elevated Blood Lead Levels. Medi-Cal managed care health plans (MCPs) must ensure that the providers provide oral or written anticipatory guidance to the parent(s) or guardian(s) of a child member that, at a minimum, includes information that children can be harmed by exposure to lead, especially deteriorating or disturbed lead-based paint and the dust from it, and are particularly at risk of lead poisoning from the time the child begins to crawl until 72 months of age. Childhood Lead Poisoning Prevention Branch (CLPPB) anticipatory guidance includes information about other common sources of lead exposure for children.[16]

[16] The CLPPB Guidance is available at: https://vchca.org/images/public_health/VCCHDP/Chapter6.pdf.

	Spanish version: https://www.cdph.ca.gov/Programs/CCDPHP/DEODC/CLPPB/CDPH%20Document%20Library/CLPPB-antguid(S).pdf. Order or perform blood lead screening tests on all child members in accordance with the following: • At 12 months and at 24 months of age. • When the network provider performing a PHA becomes aware that a child member who is 12 to 24 months of age has no documented evidence of a blood lead screening test taken at 12 months of age or thereafter. • When the network provider performing a PHA becomes aware that a child member who is 24 to 72 months of age has no documented evidence of a blood lead screening test taken. • At any time, a change in circumstances has, in the professional judgement of the network provider, put the child member at risk. • If requested by the parent or guardian. Follow the CDC Recommendations for Post-Arrival Lead Screening of Refugees contained in the CLPPB issued guidelines.[17] **<u>Note</u>:** Network providers are not required to perform a blood lead screening test if either of the following applies: • In the professional judgment of the network provider, the risk of screening poses a greater risk to the child member's health than the risk of lead poisoning. • If a parent, guardian, or other person with legal authority to withhold consent for the child refuses to consent to the screening. Evidence of provider compliance of blood lead screening test if not performed: • The provider must document the reason(s) for not performing the blood lead screening test in the child member's medical record. • In cases where consent has been withheld, the provider must obtain a signed statement of voluntary refusal by parent or guardian.

[17] The CDC Recommendations are available at: https://www.cdc.gov/immigrantrefugeehealth/guidelines/lead-guidelines.html.

IV. Pediatric Preventive Criteria	
	If the provider is unable to obtain a signed statement of voluntary refusal because the party that withheld consent, refuses or declines to sign it, or is unable to sign it (e.g., when services are provided via telehealth modality), it is acceptable for the provider to document the refusal. See APL 20-016, Blood Lead Screening of Young Children, or any superseding APL for more information. Please refer to California Department of Public Health (CDPH) CLPPB and the CDC for recommended actions based on BLL levels: • Information on how to report blood lead screening test results to CLPPB can be found at: https://www.cdph.ca.gov/Programs/CCDPHP/DEODC/CLPPB/Pages/report_results.aspx. • Health care providers using a point-of-care device are considered laboratories and must report.[18] • See the CDC Guidance on Childhood Lead Poisoning Prevention, available at: https://www.cdc.gov/nceh/lead. • See the California Management Guidelines on Childhood Lead Poisoning for Health Care Providers publication, available at: https://www.cdph.ca.gov/Programs/CCDPHP/DEODC/CLPPB/Pages/prov.aspx • For children at risk of lead exposure, see "Prevention of Childhood Lead Toxicity", available at: https://publications.aap.org/pediatrics/article-pdf/138/1/e20161493/929122/peds_20161493.pdf, and "Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention", available at: https://www.cdc.gov/nceh/lead/acclpp/final_document_030712.pdf

[18] See Health and Safety Code Section 124130. State law is searchable at: https://leginfo.legislature.ca.gov/faces/home.xhtml.

IV. Pediatric Preventive Criteria	
7) Blood Pressure Screening	• Per AAP, blood pressure screening starts at 3 years old. • In infants and children with specific risk conditions, blood pressure measurements should be performed at visits before age 3 years. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveals elevated blood pressure. In persons aged 3-18 years, the prevalence of hypertension is 3.6 %. Evidence suggests that elevated blood pressure in childhood increases the risk for adult Hypertension and Metabolic Syndrome. Screening should occur per "Clinical Practice Guideline for Screening and Management of High Blood Pressure in Children and Adolescents", available at: http://pediatrics.aappublications.org/content/140/3/e20171904 See the Bright Futures Medical Screening Reference Table, available at: https://brightfutures.aap.org/Bright%20Futures%20Documents/MSRTable_InfancyVisits_BF4.pdf. See the AAP guidance on Clinical Practice Guidelines for Screening and Management of High Blood Pressure in Children and Adolescents, available at: https://publications.aap.org/pediatrics/article/140/3/e20171904/38358/Clinical-Practice-Guideline-for-Screening-and
8) Dental/Oral Health Assessment	• Per DHCS contracts, the provider is responsible for ensuring that dental screening/oral health assessment for all members are included as part of the IHA.[19] • Inspection of the mouth, teeth, and gums is performed at every health assessment visit and refer to a dentist if a dental problem is detected or suspected. • Per AAP, referral to a dental home begins at 12 months. If patients do not have an established dental home after 12 months, continue performing an oral health risk assessment and refer to a dental home.[20]

[19] For additional information, see the MCP Contract, Exhibit A, Attachment 11, Provision 15.
[20] See the AAP Oral Health Practice Tools, available at: https://www.aap.org/en/patient-care/oral-health/oral-health-practice-tools/.

IV. Pediatric Preventive Criteria	
	• Documentation of "HEENT" is acceptable. See the Caries-risk Assessment and Management for Infants, Children, and Adolescents, available at: https://www.aapd.org/media/Policies_Guidelines/BP_CariesRiskAssessment.pdf See the AAP guidance on Fluoride Use in Caries Prevention in the Primary Care Setting, available at: http://pediatrics.aappublications.org/content/134/3/626.
a. Fluoride Supplementation	• The AAP and USPSTF recommends that primary care clinicians prescribe oral fluoride supplementation starting at age 6 months for children whose water supply is deficient in fluoride. • Parents or legal guardian should be encouraged to check with local water utility agency if water has fluoride. • If local water does not contain fluoride, provider may recommend the purchase of fluoridated water or give prescription for fluoride drops or tablets. • Per AAP, fluoride supplementation for all children ages 6 months until their fifth-year birthday (age range according to the most current AAP periodicity schedule) whose daily exposure to systemic fluoride is deficient. For the fluoridation status of a community water supply, contact the local water department or the link for "My Water's Fluoride", available at: https://nccd.cdc.gov/doh_mwf/default/default.aspx See the AAP's guidance on Maintaining and Improving the Oral Health of Young Children, available at: http://pediatrics.aappublications.org/content/134/6/1224. See the USPSTF guidance on Dental Caries in Children Younger Than 5 Years, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/prevention-of-dental-caries-in-children-younger-than-age-5-years-screening-and-interventions1 Comment: USPSTF changed their recommendation as of 12/7/21 which is what AAP is referencing in the AAP periodicity schedule footnote 35 and 36.

	See guidance on fluoride supplementation, available at: https://publichealth.nc.gov/oralhealth/library/includes/IMBresources/2020-FluorideSupplementation.pdf#:~:text=Pediatric%20Dentistry%20%28AAPD%29%20recommend%20the%20daily%20administration%20of,years%20of%20age%20to%20provide%20the%20maximum%20benefits.
b. Fluoride Varnish	• Fluoride varnish is a dental treatment that can help prevent tooth decay, slow it down, or stop it from getting worse by strengthening the tooth enamel (outer coating on teeth). • AAP recommends that fluoride varnish be applied to the teeth of infants and children starting at tooth eruption until their fifth-year birthdate (age range according to the most current AAP periodicity schedule). All children in this category should receive fluoride varnish application at least once every 3-6 months in the primary care or dental office. **Note:** Documentation of "seeing a dentist" without specific notation that fluoride varnish was applied at the dentist office does not meet the criterion. Not all dentists routinely apply fluoride varnish during routine dental visits. See the USPSTF guidance on Dental Caries in Children Younger Than age 5 Years, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/prevention-of-dental-caries-in-children-younger-than-age-5-years-screening-and-interventions1. See APL 19-010, Requirements for Coverage of Early and Periodic Screening, Diagnostic, and Treatment Services for Medi-Cal Members Under the Age of 21, for additional guidance on fluoride varnish. See the AAP publication on Maintaining and Improving the Oral Health of Young Children, available at: https://publications.aap.org/pediatrics/article/134/6/1224/33112/Maintaining-and-Improving-the-Oral-Health-of-Young.

IV. Pediatric Preventive Criteria	
9) Depression Screening	• AAP recommends screening for major depressive disorder (MDD) in adolescents aged 12 to 20 years. • Screening should be implemented with adequate systems in place to ensure accurate diagnosis, effective treatment, and appropriate follow-up if screening is positive and a follow up plan is documented. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening is positive for depression. • Depression screening must be done using a validated screening tool. Per AAP, screen using the Patient Health Questionnaire (PHQ)-2 or other tools available in the GLAD-PC toolkit, and available at: https://downloads.aap.org/AAP/PDF/Mental_Health_Tools_for_Pediatrics.pdf and https://www.aap.org/en/patient-care/screening-technical-assistance-and-resource-center/screening-tool-finder/?page=1
a) Suicide Risk Screening	Anyone who screens positive on a suicide risk screening tool should be followed up with a brief suicide safety assessment. Age Recommendations for Screening: • Universal Screening for children 12 years and older • Patients ages 8-11 should be screened for suicide risk when they are presenting with behavioral health chief complaints, if the patient or parent raises a concern, if there is a reported history of suicidal ideation or behavior, or if the patient displays warning signs of suicide. • Youth under age 8: Screening not indicated. Assess for suicidal thoughts/behaviors if warning signs are present o Warning signs of suicide risk that requires further evaluation in children under age 8 include (but not limited to): o Talking about wanting to die or wanting to kill oneself o Actions such as grabbing their throat in a “choking” motion, or placing their hands in the shape of a gun pointed toward their head o Engaging in self-harming behaviors o Acting with impulsive aggression o Giving away treasured toys or possessions

IV. Pediatric Preventive Criteria	
	Examples of Screening Tools: • Ask Suicide-Screening Questions (ASQ) • Suicide Behavior Questionnaire-Revised (SBQ-R) • Other publicly available tools that are commonly used in primary care settings: • Columbia Suicide Severity Rating Scale (C-SSRS) – Triage Version • Patient Health Questionnaire – 9 Adolescent Version (PHQ-9A) • Patient Safety Screener – 3 (PSS-3) References: • https://www.aap.org/en/patient-care/blueprint-for-youth-suicide-prevention/strategies-for-clinical-settings-for-youth-suicide-prevention/screening-for-suicide-risk-in-clinical-practice/ • https://www.aap.org/en/patient-care/blueprint-for-youth-suicide-prevention/strategies-for-clinical-settings-for-youth-suicide-prevention/conducting-a-brief-suicide-safety-assessment/
b) Maternal Depression Screening	• Maternal mental health condition is defined as a mental health condition that occurs during pregnancy or during the postpartum period and includes, but is not limited to, postpartum depression. • Maternal depression screen at 1-, 2-, 4-, and 6-month visits. • Maternal depression screening must be done using a validated screening tool, such as the Edinburgh Postnatal Depression Scale (EPDS), Postpartum Depression Screening Scale, or Patient Health Questionnaire (PHQ) 9.[21] • As with any screening test, results should be interpreted within the clinical context and when appropriate referral to the PCP and/or to mental health care providers for follow up.[22] • Provider shall offer and document appropriate follow-up intervention(s) for women whose screening is positive for maternal depression.

[21] See the American College of Obstetricians and Gynecologists (ACOG) guidance on Screening for Perinatal Depression, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/11/screening-for-perinatal-depression.
[22] For additional resources on perinatal depression, see: http://www.acog.org/More-Info/PerinatalDepression.

IV. Pediatric Preventive Criteria	
	Assembly Bill (AB) 2193 requires provider who provides prenatal or postpartum care for a patient to offer to screen or appropriately screen a mother for maternal mental health conditions.[23] It also requires interpregnancy care providers to do the same when the patient has experienced a stillbirth or miscarriage. (Health and Safety Code, section 123640 (https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?sectionNum=123640.&lawCode=HSC), with the most recent version effective 1/1/2022, as amended by AB 1477. Per AAP, "screening should occur per 'Incorporating Recognition and Management of Perinatal and Postpartum Depression into Pediatric Practice', available at: https://pediatrics.aappublications.org/content/143/1/e20183259 See the ACOG Frequently Asked Questions on Postpartum Depression, available at: https://www.acog.org/Patients/FAQs/Postpartum-Depression. See the USPSTF recommendation on Screening Depression in Adults, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/RecommendationStatementFinal/depression-in-adults-screening1 See the U.S. Department of Health and Human Services guidance on Postpartum Depression, available at: https://www.womenshealth.gov/mental-health/mental-health-conditions/postpartum-depression.
10) Developmental Disorder Screening	• Screen for developmental disorders at the 9th, 18th, and 30th month visits. • 30th month screening can be done at 24 months. • Providers must use an AAP validated screening tool that must also be a global, not domain specific, consistent with criteria set forth in the CMS Technical Specifications. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening is positive for developmental disorder.

[23] AB 2193 (Chapter 755, Statutes of 2018) is available at: https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201720180AB2193.

IV. Pediatric Preventive Criteria	
	• The CMS Technical Specifications are consistent with age recommendations and use of a validated screening tool; however, tech spec excludes MCHAT tool which AAP allows. CMS determined that the ASQ: SE and M-CHAT screening tools were too specific because they screen for a domain-specific condition (social emotional development or autism, respectively), rather than a full, general assessment of developmental delays. For detailed information on the CMS Technical Specifications please refer to the link: https://www.medicaid.gov/license/form/6466/4391. The developmental screening measure starts on page 65. Screening should occur per "Promoting Optimal Development: Identifying Infants and Young Children with Developmental Disorders Through Developmental Surveillance and Screening", available at: https://pediatrics.aappublications.org/content/145/1/e20193449.
11) Developmental Surveillance	Developmental surveillance is a component of every well care visit. If the patient is positive for potential delays, provider shall offer and document appropriate follow-up intervention(s).
12) Drug Use Disorder Screening and Behavioral Counseling	Per AAP recommendations, drug use screening and behavioral counseling should begin at 11 years of age. Provider shall offer and document appropriate follow-up interventions for patient whose screening reveals unhealthy drug use. Brief Assessment and Screening When a screening is positive, validated assessment tools should be used to determine if unhealthy drug use is present. Validated drug assessment tools may be used without first using validated screening tools. The AAP recommended assessment tool is available at: http://crafft.org. Brief Interventions and Referral to Treatment When brief assessments reveal unhealthy drug use, brief misuse counseling with appropriate referral for additional evaluation and treatment options, referrals, or services must be offered.

IV. Pediatric Preventive Criteria	
	Brief interventions must include the following: • Providing feedback to the patient regarding screening and assessment results; • Discussing negative consequences that have occurred and the overall severity of the problem; • Supporting the patient in making behavioral changes; and • Discussing and agreeing on plans for follow-up with the patient, including referral to other treatment if indicated. See APL 21-014 or any superseding APL for details on Alcohol and Drug Screening, Assessment, Brief Interventions and Referral to Treatment. See the AAP guidance on Substance Use Screening, Brief Intervention, and Referral to Treatment, available at: https://pediatrics.aappublications.org/content/138/1/e20161211.
13) Dyslipidemia Screening	Family history of obesity, diabetes, hypertension, and heart disease is commonly associated with a combined dyslipidemia. Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveals dyslipidemia. Per AAP perform a risk assessment at: ○ 2, 4, 6, and 8 years old, then annually thereafter. ○ Order one lipid panel between 9 and 11. ○ Perform again between 17 and 21 years old to identify children with genetic dyslipidemia or more lifestyle-related dyslipidemia. For more information see “Integrated Guidelines for Cardiovascular Health and Risk Reduction in Children and Adolescents”, available at: https://www.nhlbi.nih.gov/health-topics/integrated-guidelines-for-cardiovascular-health-and-risk-reduction-in-children-and-adolescents For more information on Integrated Guidelines for Cardiovascular Health and Risk Reduction in Children and Adolescents, see: https://www.nhlbi.nih.gov/node/80308 https://brightfutures.aap.org/Pages/default.aspx

IV. Pediatric Preventive Criteria	
14) Hearing Screening	Per AAP audiometric screenings are performed at: ○ Birth to 2 months old, 4, 5, 8, and 10 years old ○ Once between 11-14 years old ○ Once between 15-17 years old ○ Once between 18-21 years old Per AAP, clinicians must confirm initial screen was completed, verify results, and follow up, as appropriate. Newborns should be screened, per "Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs", available at: http://pediatrics.aappublications.org/content/120/4/898.full. A failed audiometric screening is followed-up with a repeat screening at least two weeks and no later than 6 weeks after the initial screening. If the second screening also fails, the primary care provider must make a referral to a specialist. • Non-audiometric assessments shall be performed at each health assessment visit until the child reaches 21 years old and includes an assessment of birth/family history (hearing loss in the family), history of ear infection and the signs and symptoms of hearing loss (i.e. does not startle at loud noises, does not turn to the source of a sound after 6 months of age, speech is delayed and unclear, often says, "Huh?", turns the TV volume up too high, etc.). • Audiometric testing is performed using a newborn hearing screening test (e.g. Automated Auditory Brainstem Response [AABR] or Otoacoustic Emission [OAE] technology) at the birth hospital or specialty facility; or a Behavioral Audiometry Evaluation with an audiometer at the primary care facility starting at 4 years old and includes follow-up care as appropriate. See the AAP periodicity schedule, available at: www.aap.org/periodicityschedule. See the CDC recommendations and guidelines on Hearing Loss in Children, available at: https://www.cdc.gov/ncbddd/hearingloss/recommendations.html. See the CDC guidance on Hearing Screenings for Children, available at: https://www.cdc.gov/ncbddd/hearingloss/screening.html.

IV. Pediatric Preventive Criteria	
	For more information on Hearing Loss in Children, see: https://www.cdc.gov/ncbddd/hearingloss/facts.html.
15) Hepatitis B Virus Infection Screening	Chronic HBV infection in children is typically asymptomatic and blood tests for liver enzymes may be normal. Appropriate screening, postexposure, prophylaxis and vaccination are the keys to prevention. • Evidence of serum HBsAg, along with anti-HBs, which is the most effective screening tool for HBV infection. A lack of anti-HBs identifies susceptible children who need vaccination. Children found to be HBsAg-positive should be retested 6 months later to document chronic infection • The CDC recommends: o children born in the United States to immigrant parents from endemic areas be screened o children born to HBsAg-positive mothers should be tested (generally at 1 year of age) o children who live in a household with a known HBsAg-positive person(s) should be screened References: https://www.cdc.gov/hepatitis/hbv/testingchronic.htm https://publications.aap.org/pediatrics/article/124/5/e1007/72122/Recommendations-for-Screening-Monitoring-and https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/Immunization/PerinatalHepB-PediatricProviderQuicksheet.pdf
14)Hepatitis C Virus Infection Screening	• Per AAP, all individuals 18 and older should be assessed for risk of hepatitis C virus (HCV) infection. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveal potential for Hepatitis C Virus infection. • Per USPSTF and CDC, test at least once between the ages of 18 and 79. Persons with increased risk of HCV infection, including those who are persons with past or

	current injection drug use, should be tested for HCV infection and reassessed annually.[24] . For more information refer to Hepatitis C Virus Infection in Adolescents and Adults: Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/hepatitis-c-screening.
15) Human Immunodeficiency Virus (HIV) Infection Screening	• Per AAP, risk assessment for HIV shall be completed at each well child visit starting at 11 years old. • Adolescents should be tested for HIV according to the USPSTF recommendations once between the ages of 15 and 18, making every effort to preserve confidentiality of the adolescent.[25] • Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually. If the patient is positive for risk factors, provider shall offer and document appropriate follow-up intervention(s). Recommendations for STD screening are listed in Box 3 at: https://www.cdc.gov/mmwr/volumes/68/rr/rr6805a1.htm#B3_down. Additional information on screening recommendations is available at: https://www.cdc.gov/std/treatment-guidelines/screening-recommendations.htm; https://stacks.cdc.gov/view/cdc/82088. The CDC Recommendations for Providing Quality STD Clinical Services is available at: https://www.cdc.gov/mmwr/volumes/68/rr/rr6805a1.htm. For additional information on clinical considerations for risk assessment, screening intervals, treatment, and prevention, see: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/human-immunodeficiency-virus-hiv-infection-screening

[24] See the USPSTF recommendations on HCV screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/hepatitis-c-screening, and the CDC recommendations on HCV screening, available at: https://www.cdc.gov/mmwr/volumes/69/rr/rr6902a1.htm.
[25] See the USPSTF recommendation on HIV screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/human-immunodeficiency-virus-hiv-infection-screening

IV. Pediatric Preventive Criteria	
	The AAP periodicity schedule is available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf For those at risk, look for documented evidence that pre-exposure prophylaxis (PrEP) was offered.
16) Psychosocial/Behavioral Assessment	• Psychosocial/Behavior Assessment should be done at each well child visit. • This assessment should be family centered and may include an assessment of child social-emotional health, caregiver depression, and social determinants of health. • **Note: Social Determinants Of Health (SDOH)** • Per AAP, social determinants of health (SDOH) are the web of interpersonal and community relationships experienced by children, parents, and families. • Per CDC, social determinants of health (SDOH) are conditions in the places where people live, learn, work, and play that affect a wide range of health and quality of life risks and outcomes. https://brightfutures.aap.org/Bright%20Futures%20Documents/BF_IntegrateSDoH_Tipsheet.pdf https://www.cdc.gov/socialdeterminants/about.html See the AAP publication titled "Promoting Optimal Development: Screening for Behavioral and Emotional Problems", available at: http://pediatrics.aappublications.org/content/135/2/384. See the AAP publication titled "Poverty and Child Health in the United States", available at: http://pediatrics.aappublications.org/content/137/4/e20160339 https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf.
17) Sexually Transmitted Infection (STI) Screening and Counseling	Per AAP, adolescents should be screened for STIs per recommendations in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases. • Sexual activity shall be assessed at every well child visit starting at 11 years old.

	• If adolescents are identified as sexually active the provider shall offer and provide contraceptive care with the goals of helping teens reduce risks and negative health consequences associated with adolescent sexual behaviors, including unintended pregnancies and STIs. • For adolescents that have been pregnant, provider should engage in a discussion of counseling on inter-pregnancy intervals and contraceptive care, such as moderately and most effective contraceptive options. Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveals STI.AAP refers to CDC for full list of STIs, available at: https://www.cdc.gov/std/treatment-guidelines/screening-recommendations.htm https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/California-STI-Treatment-Guidelines.aspx • **Risk assessments for Adolescents and 24 years and younger:** Annual chlamydia and gonorrhea screenings should be done for sexually active women under age 25 as well as older women who are at risk. Screening for syphilis, HIV, chlamydia, and Hepatitis B should be given to all pregnant women, and gonorrhea screening for all pregnant women.[26] • **Men Who Have Sex with Men** (MSM): These men have higher rates of STIs, such as HIV and syphilis and should be tested for these as well as chlamydia, and gonorrhea. • **Men Who Have Sex with Women**: There is insufficient evidence for screening among heterosexual men who are at low risk for infection, however, screening young men can be considered in high prevalence clinical settings (adolescent clinics, correctional facilities, and STI/sexual health clinic). • **Sex Workers**: This population is at higher risk for HIV and other STIs than others, and should be tested at least annually for HIV. • **Transgender and Gender Diverse Persons**: Screening recommendations should be adapted based on anatomy, (i.e., annual, routine screening for Chlamydia in cis-gender women < 25 years old should be extended to all transgender men and

[26] See the AAP guidance on Screening and Nonviral STIs in Adolescents and Young Adults: https://publications.aap.org/pediatrics/article/134/1/e302/62344/Screening-for-Nonviral-Sexually-Transmitted, the AAP periodicity schedule, available at: https://downloads.aap.org/AAP/PDF/periodicity_schedule.pdf, and the AAP guidance on Adolescent Sexual Health, available at: https://www.aap.org/en/patient-care/adolescent-sexual-health/.

	gender diverse people with a cervix. Consider screening at the rectal site based on reported sexual behaviors and exposure. **Persons with HIV**: For sexually active individuals, screen at first HIV evaluation, and at least annually thereafter. More frequent screening might be appropriate depending on individual risk behaviors and the local epidemiology. **Syphilis** • People who are pregnant • Male adolescents and young adults in settings with high prevalence rates (e.g. jails or juvenile correction facilities) • MSM at least annually (every 3 to 6 months if high risk because of multiple or anonymous partners, sex in conjunction with illicit drug use, or having sex partners who participated in these activities) See the AAP guidance on Adolescent Sexual Health, available at: https://www.aap.org/en-us/advocacy-and-policy/aap-health-initiatives/adolescent-sexual-health/Pages/default.aspx See the DHCS webpage on the Staying Healthy Assessment, available at: https://www.dhcs.ca.gov/formsandpubs/forms/Pages/StayingHealthy.aspx. For information on chlamydia and gonorrhea screening. see: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/chlamydia-and-gonorrhea-screening. For USPSTF information on syphilis screening, see: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/syphilis-infection-in-nonpregnant-adults-and-adolescents. Senate Bill (SB) 306 (Pan, Chapter 486, Statutes of 2021) https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220SB306 https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?sectionNum=120685&lawCode=HSC
18) Sudden Cardiac Arrest and Sudden Cardiac Death Screening	SCA and SCD screening should be performed for all children (athlete or not) at the same time as the Pediatric Physical Examination or at a minimum of every 3 years or on entry into middle or junior high school and into high school. AAP recommended 4

	questions directed toward SCA and SCD detection for which a positive response suggested an increased risk for SCA and SCD • Have you ever fainted, passed out, or had an unexplained seizure suddenly and without warning, especially during exercise or in response to sudden loud noises, such as doorbells, alarm clocks, and ringing telephones? • Have you ever had exercise-related chest pain or shortness of breath? • Has anyone in your immediate family (parents, grandparents, siblings) or other, more distant relatives (aunts, uncles, cousins) died of heart problems or had an unexpected sudden death before age 50? This would include unexpected drownings, unexplained auto crashes in which the relative was driving, or SIDS • Are you related to anyone with HCM or hypertrophic obstructive cardiomyopathy, Marfan syndrome, ACM, LQTS, short QT syndrome, BrS, or CPVT or anyone younger than 50 years with a pacemaker or implantable defibrillator? A positive response from the 4 questions above or an abnormal ECG should prompt further investigation that may include referral to a pediatric cardiologist or pediatric electrophysiologist. https://www.aap.org/en/news-room/news-releases/aap/2021/american-academy-of-pediatrics-all-children-should-be-screened-for-potential-heart-related-issues/ https://publications.aap.org/pediatrics/article/148/1/e2021052044/179969/Sudden-Death-in-the-Young-Information-for-the
19) Tobacco Use Screening, Prevention, and Cessation Services	Tobacco Use Screening, Prevention, and Cessation Services • Screen all children 11 years and older at each well child visit for tobacco products use.

IV. Pediatric Preventive Criteria	
	• Tobacco products include but not limited to smoked cigarettes, chewed tobacco, electronic cigarette, and vaping products use, and/or exposure to secondhand smoke. • At any time the PCP identifies a potential tobacco use problem, then the provider shall document prevention and/or cessation services to potential/active tobacco users. • Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveal tobacco use. Tobacco cessation services must be documented in the patient's medical record as follows: 1) Initial and annual assessment of tobacco (e-cigarette, vaping products, and/or secondhand smoke) use for each adolescent (11-21 years of age). 2) FDA-approved tobacco cessation medications (for non-pregnant adults of any age). 3) Individual, group, and telephone counseling for members of any age who use tobacco products. 4) Services for pregnant tobacco users. 5) Prevention of tobacco use in children and adolescents (including counseling and pharmacotherapy). For information on comprehensive tobacco prevention and cessation services for Medi-Cal beneficiaries is available at, see APL 16-014, Comprehensive Tobacco Prevention and Cessation Services for Medi-Cal Beneficiaries, or any superseding APL. The AAP recommended assessment tool is available at: http://crafft.org.
20) Tuberculosis Screening	• Per AAP, Committee on Infectious Diseases, published in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases, testing should be performed on recognition of high-risk factors. • All children are assessed for risk of exposure to tuberculosis (TB) at 1, 6, and 12-months old and annually thereafter.

IV. Pediatric Preventive Criteria	
	• Provider shall offer and document appropriate follow-up intervention(s) for patient whose screening reveals positive risk factors for TB. • Two tests that are used to detect TB bacteria in the body: the TB skin test (TST) (Mantoux) and TB blood tests QuantiFERON-TB Gold Plus. A positive TB skin test or TB blood test only tells that a person has been infected with TB bacteria. TB infection screening test is administered to children *identified at risk,* if there has not been a test in the previous year. The Mantoux is not given if a previously positive Mantoux is documented. Documentation of a positive test includes follow-up care (e.g. further medical evaluation, chest x-ray, diagnostic laboratory studies and/or referral to specialist). • Providers are required to follow current CDC and American Thoracic Society guidelines for TB diagnosis and treatment. The California Pediatric Tuberculosis Risk Assessment tool is available at: https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/TBCB-CA-Pediatric-TB-Risk-Assessment.pdf. CDC guidance on TB testing and diagnosis is available at: https://www.cdc.gov/tb/topic/testing/default.htm.
21)Vision Screening	• Age-appropriate visual screening occurs at each health assessment visit, with referral to optometrist/ophthalmologist as appropriate. • Per AAP, visual acuity screenings using optotypes (figures or letters of different sizes used for vision screening) are to be performed at ages 3 (if cooperative), 4, 5, 6, 8, 10, 12, and 15 years old. • Instrument-based screening may be used to assess risk at ages 12 and 24 months, in addition to the well visits at 3 through 5 years of age. • Documentation of “PERRLA” is acceptable for children below the age of 3 years. • If the patient is positive for risk factors, provider shall offer and document appropriate follow-up intervention(s). • AAP recommended eye charts are: ○ LEA Symbols (3-5 years old)

	○ HOTV Chart (3-5 years old) ○ Sloan Letters (preferred) or Snellen Letters (over 5 years old) See the AAP publications titled "Visual System Assessment in Infants, Children, and Young Adults by Pediatricians" available at: http://pediatrics.aappublications.org/content/137/1/e20153596 and "Procedures for the Evaluation of the Visual System by Pediatricians", available at: http://pediatrics.aappublications.org/content/137/1/e20153597. **Note:** Although specific screening details are not generally documented in the medical record, screening for infants and children (birth to 3 years) may consist of evaluations Such as external eye inspection, ophthalmoscopy red reflex examination, or corneal penlight evaluation. Visual acuity screening usually begins at age 3 years. AAP guidance on Visual System Assessment in Infants, Children, and Young Adults by Pediatricians is available at: https://pediatrics.aappublications.org/content/137/1/e20153596.
D) Childhood Immunizations	Every visit should be an opportunity to update and complete a child's immunizations. Childhood Immunizations Schedules, per the AAP Committee on Infectious Diseases, are available at: https://redbook.solutions.aap.org/SS/immunization_Schedules.aspx. For reference, see the CDC's ACIP webpage, available at: https://www.cdc.gov/vaccines/acip/index.html, also see APL 18-004, Immunization Requirements, or any superseding APL For details on Immunization Requirements.
1) Given according to ACIP guidelines	Immunization status is assessed at each health assessment visit. Practitioners are required to ensure the provision of immunizations according to CDC's most recent ACIP guidelines, unless medically contraindicated, vaccine shortage or refused by the parent. Refer to the following link for more information on ACIP Vaccine Recommendations and Guidelines: https://www.cdc.gov/vaccines/hcp/acip-recs/index.html.

IV. Pediatric Preventive Criteria	
2) **Vaccine administration documentation**	The name, manufacturer, date of administration, and lot number of each vaccine given is recorded in the medical/electronic record or on medication logs, including immunization registries, in accordance with the National Childhood Vaccine Injury Act. For additional details on the National Childhood Vaccine Injury Act, refer to: https://www.congress.gov/bill/99th-congress/house-bill/5546
3) **Vaccine Information Statement (VIS) documentation**	• VISs are information sheets produced by the CDC that explain both the benefits and risks of a vaccine to the vaccine recipients. • Federal law requires that healthcare staff provide a VIS to a patient, parent, or legal representative before each dose of certain vaccines. VIS documentation in the medical/electronic record, medication logs, or immunization registries include the date the VIS was given or presented/offered *and* the VIS publication date. Refer to the following link from the CDC for the current VISs: https://www.cdc.gov/vaccines/hcp/vis/current-vis.html. **Note:** Federal law allows up to 6 months for the updated VIS to be distributed.

Rationale: Current Guide to Clinical Preventive Services, U.S. Preventive Services Task Force (USPSTF) Report is the minimum standard for adult preventive health services.

RN/NP/MD/PA/CNM/LM

V. Adult Preventive Criteria	
A. **Initial Health Appointment (IHA): Includes H&P and Risk Assessment**	**New Members** IHA must be completed within 120 days of plan enrollment or PCP effective date (whichever is more recent) or documented within the 12 months prior to Plan enrollment/PCP effective date. The IHA include a history of the member's physical and behavioral health, an identification of risks, an assessment of need for preventive screens or services and health education, and the diagnosis and plan for treatment of any diseases. https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Policy-Guide.pdf https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL 2022/APL22-030.pdf or current version
1) **Comprehensive History and Physical**	**New members**: The history must be comprehensive to assess and diagnose acute and chronic conditions it includes: o History of present illness o Past medical history o Social history o Review of Organ Systems (ROS) including dental assessment Referrals for any abnormal findings must be documented. If an H&P is not found in the medical record, the reasons (e.g., member/parent refusal, missed appointment) and contact attempts to reschedule are documented. A review of the organ systems that include documentation of "inspection of the mouth" or "seeing dentist" meets the criteria for dental assessment during a comprehensive history and physical.
	New members:

V. Adult Preventive Criteria	
-2)-**Member Risk Assessment**	Initial Member Risk Assessments related to health and social needs of members, including cultural, linguistic, and health education needs; health disparities and inequities; lack of coverage/access to care; and social drivers of health (SDOH) shall be conducted. An assessment of at least one (1) of the following risk assessment domains within 120 days of the effective date of enrollment into the Plan or PCP effective date (whichever is more recent), or within the 12 months prior to Plan enrollment/PCP effective date meets the standard: • Health Risk Assessment: MCPs will not be required to retain the use of their existing HRA tools. If MCPs decide to retain existing HRA tools, they are encouraged to adapt them to allow delegation to providers • SDOH: The conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks. Examples of SDOH includes housing instability, food insecurity, transportation needs, utility needs, interpersonal safety, etc. Documented assessments of SDOH in the progress notes or use of the following examples of SDOH screening tools meet the standard: o Social Needs Screening Tool • Cognitive Health Assessment (65 years and older): Annual cognitive assessment for Medi-Cal members to identify whether the patient has signs of Alzheimer's disease or related dementias. Examples of validated screening tools that meet the standard are as follows: o General Practitioner Assessment of Cognition (GPCOG) o Mini-Cog o Eight-item Informant Interview to Differentiate Aging and Dementia • Adverse Childhood Experiences (ACEs) (birth to 64 years old): Potentially traumatic experiences, such as neglect, experiencing or witnessing violence, having a family member attempt or die by suicide, household with substance use problems, mental health problems and other experiences that occur in childhood that can affect individuals for years and impact their life opportunities. Examples of validated screening tools: o The ACE Questionnaire for Adults is used to screen adults 18 years and older for ACEs. References: https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Policy-Guide.pdf

	https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2022/APL22-025.pdf https://mini-cog.com/wp-content/uploads/2022/03/Standardized-English-Mini-Cog-1-19-16-EN_v1-low-1.pdf https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2021/APL21-009.pdf https://www.cdc.gov/about/sdoh/index.html https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2022/APL22-025.pdf https://www.alz.org/media/documents/gpcog-screening-test-english.pdf
B. **Periodic Health Evaluation according to most recent USPSTF guidelines**	The type, quantity, and frequency of preventive services is based on the most recent USPSTF recommendations.
1) **Comprehensive History and Physical Exam completed at age-appropriate frequency.**	• Periodic health evaluations occur in accordance with the frequency that is appropriate for individual risk factors. • In addition to USPSTF recommendations, periodic health evaluations are scheduled as indicated by the member's needs and according to the clinical judgment of the practitioner. Example: A patient with elevated cholesterol levels and other risk factors for coronary heart disease (CHD) may be evaluated more frequently than other persons of the same age without similar risk factors.
2) Subsequent Risk Assessment	• Risk Assessment including social, cultural and health education needs, is completed by the member or parent/guardian must be completed annually or any significant change of health status. An assessment of at least one (1) of the above risk assessment domains (HRA, SDOH, CHA and ACEs) meets the standard. •https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Program-Guide-a11y.pdf •https://www.dhcs.ca.gov/CalAIM/Documents/2023-PHM-Policy-Guide.pdf • https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2022/APL22-030.pdf or current version

V. Adult Preventive Criteria	
C. Adult Preventive Care Screenings	The following adult preventive care screenings are based on USPTSF Grade A and B recommendations. • If the patient falls within the eligible condition (e.g. obesity, post-menopausal, etc.), age and gender parameters of the criterion, the provider shall assess for risk factors. • If the patient is positive for risk factors, the provider shall offer and document follow-up intervention(s). • Providers who fail to document the presence or absence of risk factors shall receive zero (0) points. • An "NA" score is warranted if the patient falls outside of the eligible condition, age and gender parameters of the specific criterion. If specific preventive care screening tests are ordered, but results are not found in the member's record, and no documentation of follow-up is documented, these deficiencies will be cited under the appropriate preventive care criteria. The Follow-up of Specialty Referrals criteria pertain to referrals/lab tests that are not specified under preventive care criteria (i.e. ophthalmology, nephrology, etc.).
1) Abdominal Aneurysm Screening	Assess all individuals during well adult visits for past and current tobacco use. USPSTF recommends that medical providers should perform a one-time screening for abdominal aortic aneurysm by ultrasonography in men ages 65 to 75 years who have ever smoked 100 or more cigarettes in their lifetime. Indirect evidence shows that smoking is the strongest predictor of Abdominal Aortic Aneurysm (AAA) prevalence, growth, and rupture rates.[27] There is a dose-response relationship, as greater smoking exposure is associated with an increased risk for AAA. The USPSTF Grade A and B Recommendations are available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations

[27] See the USPSTF recommendation on AAA Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/abdominal-aortic-aneurysm-screening.

V. Adult Preventive Criteria	
2) Alcohol Use Disorder Screening and Behavioral Counseling	Assess all adults at each well visit for alcohol misuse. If at any time the PCP identifies a potential alcohol misuse problem , the provider shall: • Refer any member identified with possible alcohol use disorders to the alcohol and drug program in the county where the member resides for evaluation and treatment. • Use the Alcohol Use Disorder Identification Test (AUDIT) or Alcohol Use Disorder Identification Test-Consumption (AUDIT-C). • Complete at least one expanded screening, using a validated screening tool every year and additional screenings can be provided in a calendar year if medical necessity is documented by the member's provider. • Offer behavioral counseling intervention(s) to those members that a provider identifies as having risky or hazardous alcohol use on the expanded screening tool. Behavioral counseling intervention(s) typically include one to three sessions, 15 minutes in duration per session, offered in-person, by telephone, or by telehealth modalities. See the NIH guidance on Screening Tests, available at: https://pubs.niaaa.nih.gov/publications/arh28-2/78-79.htm See APL 21-014, Alcohol and Drug Screenings, Assessment, Brief Interventions and Referral to Treatment, or any superseding APL, for additional information. The USPSTF uses the term "unhealthy alcohol use" to define a spectrum of behaviors, from risky drinking to alcohol use disorder (AUD) (e.g., harmful alcohol use, abuse, or dependence). Risky or hazardous alcohol use means drinking more than the recommended daily, weekly, or per-occasion amounts, resulting in increased risk for adverse health consequences but not meeting criteria for AUD (e.g. the National Institute on Alcohol Abuse and Alcoholism (NIAAA) defines "risky use" as exceeding the recommended limits of 4 drinks per day (56 g/d based on the US standard of 14 g/drink) or 14 drinks per week (196 g/d) for healthy adult men aged 21 to 64 years or 3 drinks per day or 7 drinks per week (42 g/d or 98 g/week) for all adult women of any age and men 65 years or older).

	<u>Screening</u> Unhealthy alcohol use screening must be done with validated screening tools. The US Surgeon General, NIAAA, CDC, and ASAM recommend routinely screening adult patients for unhealthy alcohol use and providing them with appropriate interventions, https://www.niaaa.nih.gov/guide <u>Brief Assessment</u> When a screen is positive, providers should use validated assessment tools to determine if an alcohol use disorder is present. Validated alcohol assessment tools may be used without first using validated screening tools. Validated assessment tools include, but are not limited to: • CRAFFT (Car, Relax, Alone, Forget, Friends, Trouble) • NIDA-modified Alcohol, Smoking and Substance Involvement Screening Test (NM-ASSIST) • Alcohol Use Disorders Identification Test (AUDIT) <u>Brief Interventions and Referral to Treatment</u> For recipients with brief assessments revealing alcohol misuse, brief misuse counseling should be offered. Appropriate referral for additional evaluation and treatment, including medications for addiction treatment (MAT), should be offered to recipients whose brief assessment demonstrates probable alcohol use disorder. Alcohol brief interventions includes alcohol misuse counseling and counseling a member regarding additional treatment options, referrals, or services. Brief interventions must include the following: • Providing feedback to the patient regarding screening and assessment results. • Discussing negative consequences that have occurred and the overall severity of the problem. • Supporting the patient in making behavioral changes. • Discussing and agreeing on plans for follow-up with the patient, including referral to other treatment if indicated. <u>Documentation Requirements</u> Member medical records must include the following:

V. Adult Preventive Criteria	
	• The service provided, for example: screen and brief intervention. • The name of the screening instrument and the score on the screening instrument (unless the screening tool is embedded in the electronic health record). • The name of the assessment instrument (when indicated) and the score on the assessment (unless the screening tool is embedded in the electronic health record). • If and where a referral to an alcohol or substance use disorder program was made. A recommended substance abuse assessment tool is available at http://crafft.org. Please refer to the following link to The Medi-Cal Provider Manual: https://www.dhcs.ca.gov/formsandpubs/publications/Pages/Manuals.aspx.
3) **Breast Cancer Screening**	A routine screening mammography for breast cancer is completed every 1-2 years on all women starting at age 50, concluding at age 75 unless pathology has been demonstrated.[28]
4) Cervical Cancer Screening	• Screen for cervical cancer in women ages 21 to 65 years with cytology (Pap smear) every 3 years. • Women ages 30 to 65 years who want to lengthen the screening interval, screen with a combination of cytology and human papillomavirus (HPV) co-testing every 5 years OR with high-risk human papillomavirus (hrHPV) testing alone every 5 years. • Follow-up of abnormal test results are documented. Routine Pap testing may not be required for the following: • Women who have undergone hysterectomy in which the cervix is removed (TAH - Total Abdominal Hysterectomy), unless the hysterectomy was performed because of invasive cancer. • Women 66 years and older who have had regular previous screening in which the Pap result have been consistently normal.

[28] See the USPSTF recommendation on Breast Cancer Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/breast-cancer-screening.

V. Adult Preventive Criteria	
	The USPSTF recommendation on Cervical Cancer Screening is available at: https://www.uspreventiveservicestaskforce.org/Page/Document/UpdateSummaryFinal/cervical-cancer-screening.
5) Colorectal Cancer Screening	All adults are screened for colorectal cancer beginning at age 45 years old and concluding at age 75 years to include: • High sensitivity gFOBT or FIT every year • sDNA-FIT every 1 to 3 years • CT colonography every 5 years • Flexible sigmoidoscopy every 5 years • Flexible sigmoidoscopy every 10 years + FIT every year • Colonoscopy screening every 10 years. When abnormal results are found on flexible sigmoidoscopy or CT colonography, follow-up with colonoscopy is needed for further evaluation. Rates of colorectal cancer incidence are higher in Black adults and American Indian and Alaskan Native adults, persons with a family history of colorectal cancer (even in the absence of any known inherited syndrome such as Lynch syndrome or familial adenomatous polyposis), men, and persons with other risk factors (such as obesity, diabetes, long-term smoking, and unhealthy alcohol use. The decision to screen for colorectal cancer in adults **aged 76 to 85 years** should be an individual one,taking into account the patient's overall health and prior screening history. The USPSTF recommendation on Colorectal Cancer Screening is available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/colorectal-cancer-screening.
6) Depression Screening	• Per USPSTF, screen for depression in the general adult population, including pregnant and postpartum women. • Screening should be implemented at each well visit with adequate systems in place to ensure accurate diagnosis, effective treatment, and appropriate follow-up.

V. Adult Preventive Criteria	
	• Providers should screen all adults who have not been previously screened using a validated screening tool. If the depression screening is positive, a follow up plan must be documented. • Providers should use clinical judgment in consideration of risk factors, comorbid conditions, and life events to determine if additional screening of high-risk patients is warranted. Recommended screening tools include: ○ Patient Health Questionnaire (PHQ) in various forms ○ Hospital Anxiety and Depression Scales in adults ○ Geriatric Depression Scale in older adults ○ The Edinburgh Postnatal Depression Scale (EPDS) pregnant and postpartum The USPSTF Grade A and B Recommendations are available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations The USPSTF recommendation on Screening for Depression in Adults is available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/depression-in-adults-screening.
7) Diabetic Screening and Comprehensive Care	• Per USPSTF, screen for abnormal blood glucose as part of cardiovascular risk assessment in adults aged 35 to 70 years who are overweight or obese. • Clinicians should offer or refer patients with abnormal blood glucose to intensive behavioral counseling interventions to promote a healthful diet and physical activity. • Glucose abnormalities can be detected by measuring HbA1c or fasting plasma glucose or with an oral glucose tolerance test. • Hemoglobin A1C (HbA1c) is a measure of long-term blood glucose concentration and is not affected by acute changes in glucose levels due to stress or illness. HbA1c measurements do not require fasting, they are more convenient than using a fasting plasma glucose or oral glucose tolerance test. The oral glucose tolerance

	test is done in the morning in a fasting state; blood glucose concentration is measured 2 hours after ingestion of a 75-g oral glucose load. • The diagnosis of IFG, IGT, or type 2 diabetes should be confirmed; repeated testing with the same test on a different day is the preferred method of confirmation. See the USPSTF recommendation on Prediabetes and Type 2 Diabetes Screening, available at: https://uspreventiveservicestaskforce.org/uspstf/recommendation/screening-for-prediabetes-and-type-2-diabetes. See APL 18-018, Diabetes Prevention Program, or any superseding APL for additional information. • When reviewing medical records of patients with a diagnosis of Diabetes, the reviewer should score based on documented routine comprehensive diabetic care/screening: retinal exams, podiatry, nephrology, etc. • Proper diabetes management is essential to control blood glucose, reduce risks for complications, and prolong life. With support from health care providers, patients can manage their diabetes with self-care, taking medications as instructed, eating a healthy diet, being physically active, and quitting smoking. See the National Community for Quality Assurance guidance on Comprehensive Diabetes Care, available at: https://www.ncqa.org/hedis/measures/comprehensive-diabetes-care/. See the USPSTF recommendation on Prediabetes and Type 2 Diabetes Screening, available at: https://uspreventiveservicestaskforce.org/uspstf/recommendation/screening-for-prediabetes-and-type-2-diabetes.
	Assess all adults at each well visit for drug misuse. If at any time the PCP identifies a potential drug use problem the provider shall:

V. Adult Preventive Criteria	
8) Drug Use Disorder Screening and Behavioral Counseling	• Refer any member identified with possible drug use disorders to the drug treatment program in the county where the member resides for evaluation and treatment. • Complete at least one expanded screening, using a validated screening tool, every year and additional screenings can be provided in a calendar year if medical necessity is documented by the member's provider. • Offer behavioral counseling intervention(s) to those members that a provider identified as having risky or hazardous drug use on the expanded screening tool. Behavioral counseling intervention(s) typically include one to three sessions, 15 minutes in duration per session, offered in-person, by telephone, or by telehealth modalities. See APL 21-014, Alcohol and Drug Screenings, Assessment, Brief Interventions and Referral to Treatment, or any superseding APL, for additional information. The term "unhealthy drug use" is defined as the use of illegally obtained substances, excluding alcohol and tobacco, or the use of nonmedical prescription medications that differ than the parameters for which they were prescribed such as duration, frequency, and amount. <u>Brief Assessment</u> When a screen is positive, providers should use validated assessment tools to determine if a drug use disorder is present. Validated drug assessment tools may be used without first using validated screening tools. Validated assessment tools include, but are not limited to: • CRAFFT (Car, Relax, Alone, Forget, Friends, Trouble) • NIDA-modified Alcohol, Smoking, and Substance Involvement Screening Test (NM-ASSIST) • Drug Abuse Screening Test (DAST-20) <u>Brief Interventions and Referral to Treatment</u> For recipients with brief assessments revealing drug misuse, brief misuse counseling should be offered. Appropriate referral for additional evaluation and treatment, including medications for addiction treatment (MAT), should be offered to

	recipients whose brief assessment demonstrates probable substance use disorder. Drug brief interventions includes misuse counseling and counseling a member regarding additional treatment options, referrals, or services. Brief interventions must include the following: • Providing feedback to the patient regarding screening and assessment of results. • Discussing negative consequences that have occurred and the overall severity of the problem. • Supporting the patient in making behavioral changes. • Discussing and agreeing on plans for follow-up with the patient, including referral to other treatment if indicated. Documentation Requirements Member medical records must include the following: • The service provided, for example: screen and brief intervention. • The name of the screening instrument and the score on the screening instrument (unless the screening tool is embedded in the electric health record). • The name of the assessment instrument (when indicated) and the score on the assessment (unless the screening tool is embedded in the electronic health record). • If and where a referral to an alcohol or substance use disorder program was made. A recommended substance abuse assessment tool is available at: http://crafft.org. Please refer to the following link to the Medi-Cal Provider Manual: https://www.dhcs.ca.gov/formsandpubs/publications/Pages/Manuals.aspx.
9) Dyslipidemia Screening	USPSTF recommends that adults without a history of cardiovascular disease (CVD) (e.g., symptomatic coronary artery disease or ischemic stroke) use a low- to moderate-dose statin for the prevention of CVD events and mortality when all the following criteria are met: 1) They are aged 40 to 75 years; 2) They have one or more CVD risk factors (e.g., dyslipidemia, diabetes, hypertension, or smoking); and

	3) They have a calculated 10-year risk of a cardiovascular event of 10% or greater. Screen universal lipids at every well visit for those with increased risk of heart disease and at least every 6 years for healthy adults. The USPSTF Grade A and B Recommendations are available at: https://www.uspreventiveservicestaskforce.org/Page/Name/uspstf-a-and-b-recommendations.
10) Folic Acid Supplementation	• The USPSTF recommends that all women who are planning or capable of pregnancy take a daily supplement containing 0.4 to 0.8 mg (400 to 800 µg) of folic acid.[29] • USPSTF and WHO categorize women in the age range of 12-49 years as "women who are capable of becoming pregnant".
11) Hepatitis B Virus Screening	Assess all adults for risk of acquiring Hepatitis B Virus (HBV) at each well visit. Screening those at risk should include testing to three HBV screening seromarkers (HBsAg, antibody to HBsAg [anti-HBs], and antibody to hepatitis B core antigen [anti-HBc]) so that persons can be classified into the appropriate hepatitis B category and properly recommended to receive vaccination, counseling, and linkage to care and treatment. Important risk groups for HBV infection with a prevalence of ≥2% that should be screened include: • Persons born in countries and regions with a high prevalence of HBV infection (≥2%), such as sub-Saharan Africa and Central and Southeast Asia (Egypt, Algeria, Morocco, Libya, Afghanistan, Vietnam, Cambodia, Thailand, Philippines, Malaysia, Indonesia, Singapore, etc.). • U.S.-born persons not vaccinated as infants whose parents were born in regions with a very high prevalence of HBV infection (≥8%).

[29] See the USPSTF recommendation on Folic Acid to Prevent Neural Tube Defects, available at: https://www.uspreventiveservicestaskforce.org/uspstf/draft-update-summary/folic-acid-supplementation-prevent-neural-tube-defects

V. Adult Preventive Criteria	
	• HIV-positive persons • Injection drug users • MSM • Household contacts or sexual partners of persons with HBV infection See the CDC guidance on Viral Hepatitis, available at: https://www.cdc.gov/hepatitis/hbv/hbvfaq.htm
12) Hepatitis C Virus Screening	• All adults 18 to 79 years old shall be assessed for risk of Hepatitis C Virus (HCV) exposure at each well visits. • Testing should be initiated with anti-HCV. For those with reactive test results, the anti-HCV test should be followed with an HCV RNA. Persons for whom HCV Testing is recommended: • All Adults ages 18 to 79 years should be tested once. • Currently, or had history of, ever injecting drugs. • Medical Conditions: Long term hemodialysis, persons who received clotting factor concentrates produced before 1987; HIV infection; Persistent abnormal alanine aminotransferase levels (ALT). • Prior recipients of transfusions or organ transplant before July 1992 or donor who later tested positive for HCV infection. Persons with continued risk for HCV infection (e.g., injection drug users) should be screened periodically. There is limited information about the specific screening interval that should occur in persons who continue to be at risk for new HCV infection or how pregnancy changes the need for additional screening. See the USPSTF recommendation on Screening for HCV in Adolescents and Adults Practice Considerations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/hepatitis-c-screening#bootstrap-panel--6. See the CDC Recommendations for Hepatitis C Screening Among Adults in the United States, available at: https://www.cdc.gov/hepatitis/hcv/guidelinesc.htm.

V. Adult Preventive Criteria	
	See the USPSTF Grade A and B Recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations
13) High Blood Pressure Screening	• All adults including those without known hypertension are screened. • A blood pressure (B/P) measurement for the normotensive adult is documented at least once every 2 years if the last systolic reading was below 120 mmHg and the diastolic reading was below 80 mmHg. • B/P is measured annually if the last systolic reading was 120 to 139 mmHg and the diastolic reading was 80 to 89 mmHg. See the USPSTF Grade A and B Recommendation, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/hypertension-in-adults-screening.
14) HIV Screening	USPSTF recommends risk assessment shall be completed at each well visit for patients 65 years old and younger: • Those at high risk (regardless of age) i.e., having intercourse without a condom or with more than one sexual partner whose HIV status is unknown. • IV drug users. • MSM. All shall be tested for HIV and offered pre-exposure prophylaxis (PrEP).[30] Lab results are documented. https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/human-immunodeficiency-virus-hiv-infection-screening
	• Per the USPSTF, clinicians shall screen for Intimate Partner Violence (IPV) on asymptomatic women of reproductive age, which is defined across studies as

[30] See the USPSTF recommendation on Prevention of HIV Infection, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/prevention-of-human-immunodeficiency-virus-hiv-infection-pre-exposure-prophylaxis.

V. Adult Preventive Criteria	
15) Intimate Partner Violence Screening for Women of Reproductive Age	ranging from 12 to 49 years, with most research focusing on women age 18 years or older. • Provide or refer those who screen positive to ongoing support services. Per USPSTF the following instruments accurately detect IPV in the past year among adult women: ○ Humiliation, Afraid, Rape, Kick (HARK) ○ Hurt, Insult, Threaten, Scream (HITS) ○ Extended–Hurt, Insult, Threaten, Scream (E-HITS) ○ Partner Violence Screen (PVS) ○ Woman Abuse Screening Tool (WAST) The USPSTF A and B recommendations are the minimum that is required by DHCS. The term "intimate partner violence" describes physical, sexual, or psychological harm by a current or former partner or spouse. This type of violence can occur among heterosexual or same-sex couples and does not require sexual intimacy. See the CDC guidance on IPV, available at: https://www.cdc.gov/violenceprevention/intimatepartnerviolence/
16) Lung Cancer Screening	• Assess all individuals during well adult visits for past and current tobacco use. • Per USPSTF, screen annually for lung cancer with low-dose computed tomography in adults ages 50 to 80 years who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years. • Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery. See the USPSTF recommendation on Lung Cancer Screening, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/UpdateSummaryFinal/lung-cancer-screening.

V. Adult Preventive Criteria	
17) Obesity Screening and Counseling	• USPSTF recommends that clinicians screen all adult patients for obesity and offer intensive counseling and behavioral interventions to promote sustained weight loss for obese adults. • Documentation shall include weight and BMI • There is fair to good evidence that high-intensity counseling—about diet, exercise, or both—together with behavioral interventions aimed at skill development, motivation, and support strategies produces modest, sustained weight loss (typically 3-5 kg for 1 year or more) in adults who are obese (as defined by BMI ≥ 30 kg/m2). Although the USPSTF did not find direct evidence that behavioral interventions lower mortality or morbidity from obesity, the USPSTF concluded that changes in intermediate outcomes, such as improved glucose metabolism, lipid levels, and blood pressure, from modest weight loss provide indirect evidence of health benefits. See the USPSTF recommendation on Screening and Counseling for Obesity in Adults, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/RecommendationStatementFinal/obesity-in-adults-screening-and-counseling-2003.
18) Osteoporosis Screening	Assess all postmenopausal women during well adult visits for risk of osteoporosis. USPSTF recommends screening for osteoporosis with bone measurement testing to prevent osteoporotic fractures in postmenopausal women younger than 65 years who are at increased risk of osteoporosis, or who have at least one risk factor, as determined by a formal clinical risk assessment tool.[31] These risk factors include: • Parental history of hip fracture • Smoking • Excessive alcohol consumption • Low body weight.

[31] See the USPSTF recommendations on Screening for Osteoporosis to Prevent Fractures, available at: https://www.uspreventiveservicestaskforce.org/uspstf/document/RecommendationStatementFinal/osteoporosis-screening.

	USPSTF recommends screening for osteoporosis with bone measurement testing to prevent osteoporotic fractures in women 65 years and older. For postmenopausal women younger than 65 years who have at least 1 risk factor, a reasonable approach to determine who should be screened with bone measurement testing is to use a clinical risk assessment tool.
19) Sexually Transmitted Infection (STI) Screening and Counseling	Assess all individuals during well adult visits for risk of STI.[32] Chlamydia & Gonorrhea: • Test all sexually active women under 25 years old • Older women who have new or multiple sex partners • MSM regardless of condom use or persons with HIV shall be tested at least annually Syphilis: • MSM or persons with HIV shall be screened at least annually Trichomonas: • Sexually active women seeking care for vaginal discharge • Women who are IV drug users • Exchanging sex for payment • HIV+, have History of STD, etc. Herpes: • Men and women requesting STI evaluation who have multiple sex partners shall be tested. • HIV+ • MSM w/ undiagnosed genital tract infection.

[32] See the USPSTF recommendation on STIs: Behavioral Counseling, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/sexually-transmitted-infections-behavioral-counseling.

V. Adult Preventive Criteria	
	Intensive behavioral counseling for adults who are at increased risk for STIs includes counseling on use of appropriate protection and lifestyle.
20) Skin Cancer Behavioral Counseling	USPSTF recommends that young adults and parents of young children should be counseled to minimize exposure to Ultraviolet (UV) radiation for persons aged 6 months to 24 years to reduce their risk of skin cancer.[33]
21)Tobacco Use: Screening, Counseling, and Intervention	• Assess all individuals during well adult visits for tobacco use and document prevention and/or counseling services to potential/active tobacco users. ○ Per USPSTF, providers can document any combination of the following since not all may apply especially to pregnant tobacco users: tobacco cessation services, behavioral counseling and/or pharmacotherapy. See APL 16-014, Comprehensive Tobacco Prevention and Cessation Services for Medi-Cal Beneficiaries, or any superseding APL, for additional information. If the PCP identifies tobacco use, documentation that the provider offered tobacco cessation services, behavioral counseling, and/or pharmacotherapy to include any or a combination of the following must be in the patient's medical record: • FDA-approved tobacco cessation medications (for non-pregnant adults of any age). • Individual, group, and telephone counseling for members of any age who use tobacco's products. • Services for pregnant tobacco users. See APL 16-014, Comprehensive Tobacco Prevention and Cessation Services for Medi-Cal Beneficiaries, or any superseding APL, for additional information.
22) Tuberculosis Screening	• Adults are assessed for TB risk factors or symptomatic assessments upon enrollment and at periodic physical evaluations.

[33] See the USPSTF Grade A and B Recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/skin-cancer-counseling.

V. Adult Preventive Criteria	
	• The Mantoux skin test, or other approved TB infection screening test,[34] is administered to all asymptomatic persons at increased risk of developing TB irrespective of age or periodicity if they had not had a test in the previous year. • Adults already known to have HIV or who are significantly immunosuppressed require annual TB testing. The Mantoux is not given if a previously positive Mantoux is documented. Documentation of a positive test includes follow-up care, for example: ○ Further medical evaluation ○ Chest x-ray ○ Diagnostic laboratory studies ○ Referral to specialist Practitioners are required to follow current CDC and American Thoracic Society guidelines for TB diagnosis and treatment. See the CDPH guidance on California Adult TB Risk Assessment, available at: https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/TBCB-CA-TB-Risk-Assessment-and-Fact-Sheet.pdf. See the USPSTF recommendation on Latent TB Infection Screening, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/UpdateSummaryFinal/latent-tuberculosis-infection-screening. See the CDC publications on TB, available at: www.cdc.gov/tb/publications//.
D) Adult Immunizations	

[34] Per June 25, 2010, CDC MMWR, the FDA approved IGRA serum TB tests, such as QuantiFERON®-TB Gold (QFT-G and QFT-GIT) and T-SPOT®.TB (T-Spot).

V. Adult Preventive Criteria	
1) **Given according to ACIP guidelines**	Immunization status is assessed at periodic health evaluations. Practitioners are required to ensure the provision of immunizations according to CDC's most recent ACIP guidelines, unless medically contraindicated or refused by the member.[35] Vaccination status must be assessed for the following: o Td/Tdap (every 10 years) o Flu (annually) o Pneumococcal (ages 65 and older; or anyone with underlying conditions) o Zoster (starting at age 50) o Varicella and MMR Documented evidence of immunity (i.e. titers, childhood acquired infection) in the medical record meets the criteria for Varicella and MMR. The name of the vaccines and date the member received the vaccines must be documented as part of the assessment. See APL 18-004, Immunization Requirements, or any superseding APL for additional information.
2) **Vaccine administration documentation**	The name, manufacturer, date of administration, and lot number of each vaccine given is recorded in the medical/electronic record or on medication logs, including immunization registries, in accordance with the National Childhood Vaccine Injury Act.
3) **Vaccine Information Statement (VIS) documentation**	The date the VIS was given (or presented and offered) and the VIS publication date are documented in the medical record.

[35] See the CDC ACIP Guidance on Immunization Schedules, available at: https://www.cdc.gov/vaccines/schedules/hcp/imz/adult.html.

Rationale: Perinatal assessments are provided according to the current American College of Obstetrics and Gynecologists (ACOG) standards and Comprehensive Perinatal Services Program (CPSP) Guidelines.[36] Reviewers please note, if the OB-GYN provider is also acting as the member's PCP and the member is/was pregnant during the review period (e.g. the last three years), the appropriate preventive services criteria, based on the members' age, i.e. Pediatric or Adult shall ALSO be reviewed and scored.

RN/NP/MD/PA/CNM/LM

VI. OB/CPSP Preventive Criteria	
A. Initial Comprehensive Prenatal Assessment (ICA)	**Initial Prenatal Visit - First entry to OB Care:** During the initial Comprehensive assessment, provider gathers baseline information on the pregnant woman, such as: ○ Obstetric and medical history, including medical documentation from prior visits with other providers. ○ Nutrition status ○ Health education ○ Psychosocial needs Based on the information gathered, the provider and the pregnant woman develop an individualized care plan (ICP) to meet her unique needs. Documentation of ICP services received, or reasons why not received, must be provided. See VI, B, below, for the First Trimester Comprehensive Assessment, which may be completed over more than one visit during the trimester. See the CDPH CPSP Provider Handbook, available at: https://custom.cvent.com/C506006261F8428CB7CCB91AAA9A05B4/files/8a01c5b0dd744c0aa06f0dece9dec3f1.pdf.
1) Initial Prenatal Visit	Documentation of initial prenatal visit completed within four weeks of entry to prenatal care. Optimally within the first trimester.
2) Obstetrical and Medical History	**Obstetric/medical:** The H&P exam must be consistent with the most recent ACOG Guidelines for Perinatal Care.[37]

[36] See the CDPH webpage on CPSP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/Pages/default.aspx
[37] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.

VI. OB/CPSP Preventive Criteria	
3) Physical Exam	Physical exam: includes breast and pelvic exam and calculation of estimated date of delivery. https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx
4) Dental Assessment	Dental Screening and referral as indicated must be documented. Oral health problems are associated with other diseases including heart disease, diabetes, and respiratory infections.[38]
5) Healthy Weight Gain and Behavior Counseling	The USPSTF recommends that clinicians offer pregnant women effective behavioral counseling interventions aimed at promoting healthy weight gain and preventing excess gestational weight gain in pregnancy.[39] Effective behavioral counseling interventions promotes healthy weight gain and decreases risk of gestational diabetes mellitus, emergency cesarean delivery, infant macrosomia, and LGA infants.
6) Lab tests	
a) Bacteriuria Screening	USPSTF recommends screening for asymptomatic bacteriuria with urine culture for pregnant women at 12 to 16 weeks' gestation or at their first prenatal visit, if later.[40]

[38] See the ACOG guidance on Oral Health Care During Pregnancy and Through the Lifespan, available at: https://www.acog.org/en/Clinical/Clinical%20Guidance/Committee%20Opinion/Articles/2013/08/Oral%20Health%20Care%20During%20Pregnancy%20and%20Through%20the%20Lifespan

[39] See the USPSTF recommendation on Healthy Weight and Weight Gain in Pregnancy, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/healthy-weight-and-weight-gain-during-pregnancy-behavioral-counseling-interventions

[40] See the USPSTF recommendation on Screening for Asymptomatic Bacteria in Adults, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/asymptomatic-bacteriuria-in-adults-screening.

VI. OB/CPSP Preventive Criteria	
	Urine culture is recommended for bacteriuria screening in pregnancy and is the method for diagnosis. Pregnant women with asymptomatic bacteriuria usually receive antibiotic therapy, based on urine culture results and follow-up monitoring.
b) Rh Incompatibility Screening	• Rh incompatibility screening: 24-28 weeks gestation.[41] • Rh incompatibility is a condition that occurs during pregnancy if a woman has Rh-negative blood and her baby has Rh-positive blood.
c) Diabetes Screening	USPSTF recommends screening for gestational diabetes mellitus **(**GDM**)** in asymptomatic pregnant women after 24 weeks of gestation.[42] • In the two-step approach: the 50-g OGCT is performed between 24 and 28 weeks of gestation. A diagnosis of GDM is made when two or more glucose values fall at or above the specified glucose thresholds. • One-step approach: a 75-g glucose load is administered after fasting and plasma glucose levels are evaluated after 1 and 2 hours. Gestational diabetes is diagnosed if 1 glucose value falls at or above the specified glucose threshold. Self-monitoring of blood glucose can be a useful tool in the management of pregnant woman with pre-existing and with gestational diabetes.
d) Hepatitis B Virus Screening	All pregnant women are screened for Hepatitis B during their first trimester or prenatal visit, whichever comes first.[43] The screening tests for detecting maternal HBV infection is the serologic identification of HBsAg. Screening should be performed in each pregnancy, regardless of previous HBV vaccination or previous negative HBsAg test results.

[41] See the USPSTF recommendation on Rh(D) Incompatibility Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/document/RecommendationStatementFinal/rh-d-incompatibility-screening, and the NIH guidance on Rh Incompatibility, available at: https://www.nhlbi.nih.gov/health-topics/rh-incompatibility.
[42] See the USPSTF recommendation on Gestational Diabetes Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/gestational-diabetes-screening.
[43] See the USPSTF recommendation on HBV Infection in Pregnant Women, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/hepatitis-b-virus-infection-in-pregnant-women-screening.
https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2864180/

VI. OB/CPSP Preventive Criteria	
	Following referral required for women with positive HBV: • Case management during pregnancy • HBV DNA viral load testing • Referral to specialty care for counseling and medical management of HBV infection. See Hepatitis B information on the CDC website, available at: https://www.cdc.gov/hepatitis/hbv/index.htm.
e) Hepatitis C Virus Screening	Per ACOG all pregnant women should receive Hepatitis C screening with blood assessment during the first prenatal visit. Pregnant woman with newly diagnosed HCV infection and abnormal serum aminotransferase and/or platelet levels should be referred for further medical assessment to rule out liver fibrosis or injury and so antiviral treatment can be initiated at the appropriate time. Providers should report HCV infection in a pregnant person to infant's health care provider so that follow-up HCV testing can be conducted at the recommended time, and to the local health department so that ongoing risk factors can be assessed and relevant contacts can receive hepatitis A and hepatitis B testing and vaccination, as indicated, and can be linked, as appropriate, to preventive services. https://www.acog.org/clinical/clinical-guidance/practice-advisory/articles/2021/05/routine-hepatitis-c-virus-screening-in-pregnant-individuals
f) Chlamydia Infection Screening	Per CDC, All pregnant women under 25 years old and older women with increased risk such as new or multiple sex partners, or a sex partner who has an STD, should be tested for chlamydia at their first prenatal visit pregnant women with chlamydial infection should have a test-of-cure four weeks after treatment and be retested within three months· Retest during the 3rd trimester for women under 25 years of age or at risk.

VI. OB/CPSP Preventive Criteria	
	See the CDC guidance on Chlamydia, available at: https://www.cdc.gov/std/chlamydia. See the CDC guidance on STD Tests, available at: https://www.cdc.gov/std/prevention/screeningreccs.htm. See the USPSTF recommendation on Chlamydia and Gonorrhea Screening, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/RecommendationStatementFinal/chlamydia-and-gonorrhea-screening.
g) Syphilis Infection Screening	Per CDC, all pregnant women should be tested for syphilis at the first prenatal visit.[44] High risk women need to be tested again during the third trimester (28 weeks gestation) and at delivery. This includes women who live in areas of high syphilis morbidity, are previously untested, had a positive screening test in the first trimester, or are at higher risk for syphilis (i.e., multiple sex partners, drug use, transactional sex, late entry into prenatal care or no prenatal care, meth or heroin use, incarceration themselves or of sex partners, unstable housing, or homelessness).
h) Gonorrhea Infection Screening	All pregnant women under 25 years old, and older pregnant women who are at increased risk, are screened for gonorrhea during their first prenatal visit.[45] Specific microbiologic diagnosis of *N. gonorrhea* infection should be performed for all women at risk for or suspected of having gonorrhea. See the CDC guidance on Gonococcal Infections Among Adolescents and Adults, available at: https://www.cdc.gov/std/treatment-guidelines/gonorrhea-adults.htm.

[44] See the CDC information on syphilis, available at: https://www.cdc.gov/std/syphilis/stdfact-syphilis-detailed.htm.
[45] See the CDC guidance on Gonococcal Infections Among Adolescents and Adults, available at: https://www.cdc.gov/std/treatment-guidelines/gonorrhea-adults.htm, and the USPSTF recommendation on Chlamydia and Gonorrhea Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/document/RecommendationStatementFinal/chlamydia-and-gonorrhea-screening.

VI. OB/CPSP Preventive Criteria	
i) Human Immunodeficiency Virus (HIV) Screening	Per ACOG, all pregnant women should be informed that HIV test is part of the routine panel of the prenatal tests.[46] If woman declines HIV testing this should be documented in the medical record. Repeat testing in the third trimester is recommended for woman known to be at high risk of acquiring HIV infection, and women who declined testing earlier in pregnancy.
B. First Trimester Comprehensive Assessment	A Comprehensive Perinatal Assessment must be completed each trimester and during the postpartum period. A Comprehensive Assessment tool must be used and updated every trimester and during the 12-month post-pregnancy period. The assessment tool must be consistent with CDPH's template tool, as confirmed by the local county or city Perinatal Health Coordinator.[47] See the CPSP Integrated Initial 1, 2, and 3 Trimester Assessments and ICP, available link bottom of the page.
1) Individualized Care Plan (ICP)	ICP documentation includes specific obstetric, nutrition, psychosocial, and health education risk problems/conditions, interventions, and referrals. **ICP must be developed based on the comprehensive assessment in each trimester and during the 12-month post-pregnancy period. The ICP must be updated based on the Comprehensive Assessments in each trimester, during the 12-month post-pregnancy period, and more frequently as needed. Documentation must be provided of the services offered and whether received.**
2) Nutrition Assessment	A complete initial nutrition assessment should be performed at the initial visit or within four weeks thereafter and should be documented in the

[46] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx, and the USPSTF recommendation on HIV Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/human-immunodeficiency-virus-hiv-infection-screening

[47] See the CDPH CPSP webpage, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/Pages/default.aspx, and the Title 22 CPSP regulations, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-Title22CPSPRegulations.pdf

	pregnant woman medical record: • anthropometric data • biochemical data • clinical data • dietary data
3) Psychosocial Assessment	The psychosocial screening should be performed on a regular basis and documented in the woman's prenatal record.[48] The assessment should include the following: ○ Depression assessment ○ Social and mental history ○ Substance use Disorder including alcohol and tobacco ○ Unintended pregnancy ○ Support systems ○ Documentation of referral as appropriate. See the proposed changes for the 20202 Prenatal and Postpartum care HEDIS measures, available at: https://www.ncqa.org/wp-content/uploads/2019/02/20190208_08_Perinatal_Depression.pdf.
a) Maternal Mental Health Screening	Screening for maternal mental health conditions must be part of the Comprehensive Assessments at each trimester. Identified needs must be incorporated into the Individualized Care Plan and follow up services documented. *Health and Safety Code (HSC) Section 123640: and* AB-1477 Maternal mental *health: Licensed health care practitioner who provides prenatal, postpartum or interpregnancy care for a patient shall ensure that the mother is offered screening or is appropriately screened for maternal mental health conditions.* Counselling, referrals, or any interventions is documented.

[48] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx, and the CDPH CPSP Provider Handbook, available at: https://custom.cvent.com/C506006261F8428CB7CCB91AAA9A05B4/files/8a01c5b0dd744c0aa06f0dece9dec3f1.pdf.

	"Maternal mental health condition" means a mental health condition that occurs during pregnancy or during the postpartum period and includes, but is not limited to, postpartum depression. • USPSTF recommends screening for depression in the general adult population, including pregnant and postpartum women. • CMS Technical Specifications include screening using validated tools and documentation of a follow-up plan if the depression screening is positive that aligns with USPSTF's referral and documentation of counseling or interventions with those found at risk for perinatal depression. • Patient is screened for depression on the date of the encounter using an age-appropriate standardized tool AND, if positive, a follow-up plan is documented on the date of the positive screen. Standardized Depression Screening Tool – A normalized and validated depression screening tool developed for the patient population in which it is being utilized. The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record. • Edinburgh Postnatal Depression Scale (EPDS), • Patient Health Questionnaire (PHQ) 9 Follow-Up Plan – Documented follow-up for a positive depression screening must include one or more of the following: • Additional evaluation or assessment for depression • Suicide Risk Assessment • Referral to a practitioner who is qualified to diagnose and treat depression • Pharmacological interventions • Other interventions or follow-up for the diagnosis or treatment of depression Additional information on CMS Technical Specifications, is available at: https://www.medicaid.gov/license/form/6466/4391.

VI. OB/CPSP Preventive Criteria	
	See the USPSTF Grade A and B Recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations
b) Social Needs Assessment	The comprehensive Assessments in each trimester must also provide social needs assessment includes housing, food, transportation, unintended pregnancy, support system available.[49] Identified needs must be incorporated into the Individualized Care Plan, and follow up services documented
c) Substance Use Disorder Assessment	• All pregnant women should be routinely asked about their use of alcohol, tobacco and drug, including prescription opioids and other medications used for nonmedical reasons. • If the woman acknowledges the use of alcohol, cocaine, opioids, amphetamines, or other mood-altering drugs or if chemical dependence is suspected, she should be counseled about the perinatal implications of their use during pregnancy and offered referral to an appropriate treatment program. See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx.
3) Breastfeeding and other Health Education Assessment	• Health Education including breast feeding, preparation to breastfeed, language, cultural competence. And education needs must be assessed at least once during each trimester and more frequently as needed. Identified needs must be incorporated into the Individualized Care Plan, and follow up services documented. • Materials must be available in the appropriate threshold languages and must meet readability and suitability requirements for educational material distributed to Medi-Cal members.[50]

[49] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx.

[50] See APL 18-016, Readability and Suitability of Written Health Education Materials, or any superseding APL.

VI. OB/CPSP Preventive Criteria	
4) Preeclampsia Screening	USPSTF recommends screening for preeclampsia in pregnant women with blood pressure measurements throughout pregnancy.[51]
5) Intimate Partner Violence Screening	• USPSTF recommends that clinicians screen IPV in women of reproductive age and provide or refer women who screen positive to ongoing support services.[52] • Provision of a Domestic Violence Screening is documented. • Assessment checklists, body diagrams and/or documentation in progress notes are acceptable. Domestic violence screening includes: • Medical screening • Documentation of physical injuries • Documentation of illnesses attributable to spousal/partner abuse • Referral to appropriate community service agencies[53]
C. Second Trimester Comprehensive Assessment	See the CDPH CPSP webpage, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/Pages/default.aspx. See the Title 22 CPSP Regulations, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-Title22CPSPRegulations.pdf.
1) Individualized Care Plan (ICP)	ICP documentation includes specific obstetric, nutrition, psychosocial, and health education risk problems/conditions, interventions, and referrals. ICP must be updated every trimester and more frequently as needed

[51] See the USPSTF recommendation on Preeclampsia Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/preeclampsia-screening.
[52] See the USPSTF recommendation on IPV, Elder Abuse, and Abuse of Vulnerable Adults Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/intimate-partner-violence-and-abuse-of-elderly-and-vulnerable-adults-screening.
[53] HSC 1233.5

VI. OB/CPSP Preventive Criteria	
2) Nutrition Assessment	A nutrition reassessment using updated information should be offered to each client at least once every trimester and the individualized care plan should be revised accordingly. Nutrition ICP component should address: • The prevention and/or resolution of nutrition problems. • The support and maintenance of strengths and habits oriented toward optimal nutritional status • Dispensing, as medically necessary, prenatal vitamin/mineral supplement to each pregnant woman. • Treatment and intervention directed toward helping the patient understand the importance of, and maintain good nutrition during pregnancy and lactation, with referrals as appropriate.
3) Psychosocial Assessment	The psychosocial screening should be performed on a regular basis and documented in the woman's prenatal record. The assessment should include the following: o Depression assessment o Social and mental history o Substance use/abuse including alcohol and tobacco o Unintended pregnancy o Support systems o Documentation of referrals as appropriate. See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx. https://www.ncqa.org/wp-content/uploads/2019/02/20190208_08_Perinatal_Depression.pdf
a) Maternal Mental Health Screening	Screening for maternal mental health conditions must be part of the Comprehensive Assessments at each trimester. Identified needs must be incorporated into the Individualized Care Plan and follow up services documented.

	Health and Safety Code (HSC) Section 123640 and AB-1477 Maternal Mental Health: Licensed health care practitioner who provides prenatal, postpartum or interpregnancy care for a patient shall ensure that the mother is offered screening or is appropriately screened for maternal mental health conditions. Counseling, referrals or any interventions is documented. *"Maternal mental health condition" means a mental health condition that occurs during pregnancy or during the postpartum period and includes, but is not limited to, postpartum depression.* • USPSTF recommends screening for depression in the general adult population, including pregnant and postpartum women. • CMS Technical Specifications includes screening using validated tools and documentation of a follow-up plan if the depression screening is positive that aligns with USPSTF's referral and documentation of counseling or interventions with those found at risk for perinatal depression. • Patient screened for depression on the date of the encounter using an age-appropriate standardized tool AND, if positive, a follow-up plan is documented on the date of the positive screen. • Edinburgh Postnatal Depression Scale (EPDS), • Patient Health Questionnaire (PHQ) 9 Standardized Depression Screening Tool – A normalized and validated depression screening tool developed for the patient population in which it is being utilized. The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record. Follow-Up Plan – Documented follow-up for a positive depression screening must include one or more of the following: o Additional evaluation or assessment for depression • Suicide Risk Assessment • Referral to a practitioner who is qualified to diagnose and treat depression • Pharmacological interventions

VI. OB/CPSP Preventive Criteria	
	• Other interventions or follow-up for the diagnosis or treatment of depression For additional information on CMS Technical Specifications, see: https://www.medicaid.gov/license/form/6466/4391. See the USPSTF Grade A and B recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations
b) Social Needs Assessment	Social needs assessment including housing, food, transportation, unintended pregnancy, support system available.[54]
c) Substance Use Disorder Assessment	• All pregnant women should be routinely asked about their use of alcohol, tobacco, and drugs, including prescription opioids and other medications used for nonmedical reasons. • If the woman acknowledges the use of alcohol, cocaine, opioids, amphetamines, or other mood-altering drugs or if chemical dependence is suspected, she should be counseled about the perinatal implications of their use during pregnancy and offered referral to an appropriate treatment program. See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx See the USPSTF Grade A and B Recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations.
4) Breastfeeding and Other Health Education Assessment	• Health Education including breast feeding, language, cultural competence, and education needs must be assessed. • Materials must be available in the appropriate threshold languages and must meet readability and suitability requirements for educational material distributed to Medi-Cal members.[55]

[54] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx.
[55] See APL 18-106, Readability and Suitability of Written Health Education Materials, or any superseding APL.

VI. OB/CPSP Preventive Criteria	
5) Preeclampsia Screening	USPSTF recommends screening for preeclampsia in pregnant women with blood pressure measurements throughout pregnancy.[56]
a) Low Dose Aspirin	The Provider should advise on the use of low-dose aspirin (81 mg/d) as preventive medication after 12 weeks of gestation in women who are at high risk for preeclampsia.[57]
6) Intimate Partner Violence Screening	• USPSTF recommends that clinicians screen for IPV in women of reproductive age and provide or refer women who screen positive to ongoing support services.[58] • Provision of a Domestic Violence Screening is documented. • Assessment checklists, body diagrams and/or documentation in progress notes are acceptable. Domestic violence screening includes: • Medical screening. • Documentation of physical injuries or illnesses attributable to spousal/partner abuse. • Referral to appropriate community service agencies.[59]

---

[56] See the USPSTF recommendation on Preeclampsia Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/preeclampsia-screening.
[57] See the USPSTF Grande A and B recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-and-b-recommendations.
[58] See the USPSTF recommendation on IPV, Elder Abuse, and Abuse of Vulnerable Adults Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/intimate-partner-violence-and-abuse-of-elderly-and-vulnerable-adults-screening.
[59] HSC 1233.5

VI. OB/CPSP Preventive Criteria	
7) Diabetes Screening	The **USPSTF** recommends screening for **gestational diabetes** mellitus **(GDM)** in asymptomatic pregnant women after 24 and 28 weeks of gestation.[60] • In the 2-step approach, the 50-g OGCT is performed between 24 and 28 weeks of gestation in a non-fasting state. If the screening threshold is met or exceeded, patients receive the oral glucose tolerance test (OGTT). A diagnosis of GDM is made when 2 or more glucose values fall at or above the specified glucose thresholds. • 1-step approach, a 75-g glucose load is administered after fasting and plasma glucose levels are evaluated after one and two hours. Gestational diabetes is diagnosed if 1 glucose value falls at or above the specified glucose threshold.
D. Third Trimester Comprehensive Assessment	See the CDPH CPSP webpage, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/Pages/default.aspx. See the Title 22 CPSP Regulations, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-Title22CPSPRegulations.pdf.
1) Individualized Care Plan (ICP) Update and Follow Up	ICP documentation includes specific obstetric, nutrition, psychosocial and health education risk problems/conditions, interventions, and referrals. See the CPSP Integrated Initial 1, 2, and 3 Trimester Assessments and ICP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-CombinedInitialandTrimesterAssessmentandCarePlan.pdf. See the CPCP Postpartum Assessment and ICP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-PostpartumAssessmentandCarePlan.pdf.

[60] See the USPSTF recommendation on Gestational Diabetes Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/gestational-diabetes-screening.

VI. OB/CPSP Preventive Criteria	
2) Nutrition Assessment	A nutrition reassessment using updated information should be offered to each client at least once every trimester and the individualized care plan should be revised accordingly. Nutrition ICP component should address: • The prevention and/or resolution of nutrition problems. • The support and maintenance of strengths and habits oriented toward optimal nutritional status. • Dispensing, as medically necessary, prenatal vitamin/mineral supplement to each pregnant woman. • Treatment and intervention directed toward helping the patient understand the importance of, and maintain good nutrition during pregnancy and lactation, with referrals as appropriate. https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-Title22CPSPRegulations.pdf
3) Psychosocial Assessment	Psychosocial assessment must be performed on a regular basis and documented in the woman's prenatal record. The assessment should include the following: • Depression Assessment • Social and Mental History • Substance use/abuse including alcohol and tobacco; unintended pregnancy • Support systems • Documentation of referrals as appropriate See the CDPH CPSP Provider Handbook, available at: https://custom.cvent.com/C506006261F8428CB7CCB91AAA9A05B4/files/8a01c5b0dd744c0aa06f0dece9dec3f1.pdf. See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx
	Practitioner who provides prenatal, interpregnancy, or postpartum care for a patient shall ensure that the mother is offered screening or is appropriately screened for

VI. OB/CPSP Preventive Criteria	
a) Maternal Mental Health Screening	*maternal mental health conditions.* Counselling, referrals or any interventions is documented. *"Maternal mental health condition" means a mental health condition that occurs during pregnancy or during the postpartum period and includes, but is not limited to, postpartum depression.*[61] • USPSTF recommends screening for depression in the general adult population, including pregnant and postpartum women. • CMS Technical Specifications includes screening using validated tools and documentation of a follow-up plan if the depression screening is positive that aligns with USPSTF's referral and documentation of counseling or interventions with those found at risk for perinatal depression. • Patient screened for depression on the date of the encounter using an age-appropriate standardized tool AND, if positive, a follow-up plan is documented on the date of the positive screen. Standardized Depression Screening Tool – A normalized and validated depression screening tool developed for the patient population in which it is being utilized. The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record. • Edinburgh Postnatal Depression Scale (EPDS), • Patient Health Questionnaire (PHQ) 9 Follow-Up Plan – Documented follow-up for a positive depression screening must include one or more of the following: • Additional evaluation or assessment for depression • Suicide Risk Assessment • Referral to a practitioner who is qualified to diagnose and treat depression • Pharmacological interventions • Other interventions or follow-up for the diagnosis or treatment of depression

[61] HSC 123640

VI. OB/CPSP Preventive Criteria	
	For additional information on CMS Technical Specifications, see: https://www.medicaid.gov/license/form/6466/4391. See the USPSTF recommendation on Screening Depression in Adults, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/depression-in-adults-screening. The USPSTF recommends that clinicians provide or refer pregnant and postpartum persons who are at increased risk of perinatal depression to counseling interventions.[62]
b) Social Needs Assessment	The comprehensive assessments in each trimester must also provide social needs assessment including housing, food, transportation, unintended pregnancy, support system available.[63] Identified needs must be incorporated into the Individualized Care Plan, and follow up services documented
c) Substance Use Disorder Assessment	• All pregnant women should be routinely asked about their use of alcohol, tobacco and drug, including prescription opioids and other medications used for nonmedical reasons. • If the woman acknowledges the use of alcohol, cocaine, opioids, amphetamines, or other mood-altering drugs or if chemical dependence is suspected, she should be counseled about the perinatal implications of their use during pregnancy and offered referral to an appropriate treatment program. The USPSTF recommends screening for unhealthy alcohol use in primary care settings in adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use.

[62] See the USPSTF recommendation on Perinatal Depression, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/perinatal-depression-preventive-interventions.
[63] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx.

VI. OB/CPSP Preventive Criteria	
	See APL 21-014, Alcohol and Drug Screening, Assessment, Brief Interventions and Referral to Treatment, or any superseding APL for additional information. The USPSTF recommends that clinicians ask all pregnant persons about tobacco use, advise them to stop using tobacco, and provide behavioral interventions for cessation to pregnant persons who use tobacco.[64] See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx. See the USPSTF Grade A and B Recommendations, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation-topics/uspstf-a-and-b-recommendations.
4) Breastfeeding and other Health Education Assessment	• Health Education including breast feeding, preparation to breastfeed, language, cultural competence, and education needs must be assessed at least once during each trimester and more frequently as needed. Identified needs must be incorporated into the Individualized Care Plan and follow up services documented. • Materials must be available in the appropriate threshold languages and must meet readability and suitability requirements for educational material distributed to Medi-Cal members.[65]
5) Preeclampsia Screening	USPSTF recommends screening for preeclampsia in pregnant women with blood pressure measurements throughout pregnancy.[66]

[64] See the USPSTF recommendation on Tobacco Smoking Cessation in Adults, Including Pregnant Persons, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/tobacco-use-in-adults-and-pregnant-women-counseling-and-interventions.
[65] See APL 18-016, Readability and Suitability of Written Health Education Materials, or any superseding APL.
[66] See the ACIP recommendations on Routine Vaccination of Infants, Children, Adolescents, Pregnant Women, and Adults, available at: https://www.cdc.gov/vaccines/vpd/dtap-tdap-td/hcp/recommendations.html.

VI. OB/CPSP Preventive Criteria	
a) Low-Dose Aspirin	USPSTF recommends the use of low-dose aspirin (81 mg/d) as preventive medication after 12 weeks of gestation in women who are at high risk for preeclampsia.[67]
6) Intimate Partner Violence Screening	• USPSTF recommends that clinicians screen for IPV in women of reproductive age and provide or refer women who screen positive to ongoing support services.[68] • Provision of a Domestic Violence Screening is documented. • Assessment checklists, body diagrams and/or documentation in progress notes are acceptable. Domestic violence screening includes: • Medical screening. • Documentation of physical injuries or illnesses attributable to spousal/partner abuse. • Referral to appropriate community service agencies.[69]
7) Diabetic Screening	The **USPSTF** recommends screening for **gestational diabetes** mellitus **(GDM)** in asymptomatic pregnant women after 24 and 28 weeks of gestation.[70] • In the 2-step approach, the 50-g OGCT is performed between 24 and 28 weeks of gestation in a non-fasting state. If the screening threshold is met or exceeded, patients receive the oral glucose tolerance test (OGTT). A diagnosis of GDM is made when 2 or more glucose values fall at or above the specified glucose thresholds.

[67] See the USPSTF recommendation on Aspirin Use to Prevent Preeclampsia and Related Morbidity and Mortality, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/low-dose-aspirin-use-for-the-prevention-of-morbidity-and-mortality-from-preeclampsia-preventive-medication.
[68] See the USPSTF recommendation on IPV, Elder Abuse, and Abuse of Vulnerable Adults Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/intimate-partner-violence-and-abuse-of-elderly-and-vulnerable-adults-screening.
[69] HSC 1233.5
[70] See the USPSTF recommendation on Screening for Gestational Diabetes, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/gestational-diabetes-screening.

VI. OB/CPSP Preventive Criteria	
	• 1-step approach, a 75-g glucose load is administered after fasting and plasma glucose levels are evaluated after one and two hours. Gestational diabetes is diagnosed if 1 glucose value falls at or above the specified glucose threshold. • Self-monitoring of blood glucose can be a useful tool in the management of pregnant woman with pre-existing and with gestational diabetes.
8) Screening for Strep B	All pregnant women are screened for Group B Streptococcus (GBS) between their 35th and 37th week of pregnancy. Vaginal or rectal swab cultures at 36 – 37 weeks of gestation are positive for GBS, they should receive appropriate intrapartum antibiotic prophylaxis unless a prelabor cesarean birth is performed in the setting of intact membranes. Please refer to the following link for ACOG Frequently Asked Questions on Group B Streptococcus and pregnancy: https://www.acog.org/womens-health/faqs/group-b-strep-and-pregnancy. See the ACOG guidance on Prevention of Group B Streptococcal Early-Onset Disease in Newborns, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2020/02/prevention-of-group-b-streptococcal-early-onset-disease-in-newborns?utm_source=vanity&utm_medium=web&utm_campaign=clinical.
9) Screening for Syphilis	Pregnant women with high risk for syphilis and women who live in areas with high syphilis morbidity should be re-tested for syphilis between 28 and 32 weeks and at delivery. Stat RPR should be performed at delivery for women with no prenatal care. https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/CS_Eval_Management_pregnant%20women.pdf
10)Tdap Immunization	• Pregnant women should receive a single dose of Tdap during every pregnancy, preferably at 27 through 36 weeks gestation.

VI. OB/CPSP Preventive Criteria	
	• Tdap is recommended only in the immediate postpartum period before discharge from the hospital or birthing center for new mothers who have never received Tdap before or whose vaccination status is unknown. • Practitioners are required to ensure the provision of immunizations according to CDC's most recent ACIP guidelines, unless medically contraindicated or refused by the member. See the CDC's ACIP recommendations on Routine Vaccination of Infants, Children, Adolescents, Pregnant Women, and Adults, available at: https://www.uspreventiveservicestaskforce.org/Page/Document/UpdateSummaryFinal/preeclampsia-screening1. See the CDC's ACIP guidelines on vaccines, available at: https://www.cdc.gov/vaccines/hcp/acip-recs/index.html. Please note-the administration of pertussis is eligible for the Valued Based Payment (VBP) program. Please consult with the MCP for details.
E. **Prenatal care visit periodicity according to most recent ACOG Standards**	ACOG's *Guidelines for Perinatal Care* recommend the following prenatal schedule for a 40-week uncomplicated pregnancy: 1) First visit by 6-8th week 2) Approximately every 4 weeks for the first 28 weeks of pregnancy 3) Every 2-3 weeks until 36 weeks gestation 4) Weekly thereafter until delivery If the recommended ACOG schedule is not met, documentation shows missed appointments, attempts to contact member and/or outreach activities. Refer the following link to ACOG for further details: https://www.acog.org/clinical
F. **Influenza Vaccine**	CDC and ACIP recommend that pregnant women gets vaccinated during any trimester of their pregnancy. Refer to the following link for further information on vaccination schedules:

	https://www.cdc.gov/vaccines/pregnancy/hcp-toolkit/guidelines.html https://www.cdc.gov/vaccines/hcp/acip-recs/rec-vac-preg.html See CDC guidance on pregnancy and vaccination, available at: https://www.cdc.gov/vaccines/pregnancy/pregnant-women/index.html See APL 18-004, Immunization Requirements, or any superseding APL for additional information.
G. COVID Vaccine	The American College of Obstetricians and Gynecologists (ACOG) recommends that all eligible persons greater than age 12 years, including pregnant and lactating individuals, receive a COVID-19 vaccine or vaccine series. Provider should document the discussion in the medical record if pregnant woman refused to receive the vaccine. During the subsequent office visits, obstetrician–gynecologists should address ongoing questions and concerns and offer vaccination again. https://www.acog.org/clinical/clinical-guidance/practice-advisory/articles/2020/12/covid-19-vaccination-considerations-for-obstetric-gynecologic-care
H. Referral to Special Supplemental Nutrition Program for Women, Infants, and Children (**WIC) and assessment of Infant Feeding Status**	Pregnant and breastfeeding mothers must be referred to WIC.[71] • Referral to WIC is documented in the medical record.[72] • Infant feeding plans are documented during the prenatal period. • Infant feeding/breastfeeding status is documented during the postpartum period.[73] Refer to the following link for information on the WIC program: https://www.myfamily.wic.ca.gov/

[71] Public Law 103-448, Section 203(e)
[72] 42 CFR 431.635
[73] PL 98-010, Breastfeeding Promotion

	Note: Although WIC determines eligibility for program participation, nearly all Medi-Cal beneficiaries are income eligible for WIC. Federal regulations specify that pregnant and breastfeeding women are given the highest priority for WIC Program enrollment.
I. HIV-related services *offered*	Per ACOG, repeat testing in the third trimester is recommended for women known to be at high risk of acquiring HIV infection, and women who declined testing earlier in pregnancy. • The ***offering*** of prenatal HIV information, counseling, and HIV antibody testing is documented.[74] • Practitioners are ***not required*** to document that the HIV test was given or disclose (except to the member) the results (positive or negative) of an HIV test. • Offering a prenatal HIV test is not required if a positive HIV test is already documented in the patient's record or if the patient has AIDS diagnosed by a physician. See the ACOG Guidelines for Perinatal Care, available at: https://www.acog.org/clinical-information/physician-faqs/-/media/3a22e153b67446a6b31fb051e469187c.ashx. See the CDC STI Screening Recommendations, available at: https://www.cdc.gov/std/treatment-guidelines/screening-recommendations.htm. See the ACOG guidance on Prenatal and Perinatal HIV Testing, available at: https://www.acog.org/Clinical-Guidance-and-Publications/Committee-Opinions/Committee-on-Obstetric-Practice/Prenatal-and-Perinatal-Human-Immunodeficiency-Virus-Testing?IsMobileSet=false. See the USPSTF recommendation on HIV Screening, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/human-immunodeficiency-virus-hiv-infection-screening.

[74] HSC 125107

VI. OB/CPSP Preventive Criteria	
J. AFP/Genetic Screening *offered*	The offering of blood screening tests prior to 20 weeks gestation counting from the first day of the last normal menstrual period is documented.[75] Genetic screening documentation includes: • Family history • Triple marker screening tests: Alpha Fetoprotein (AF), unconjugated estriol (UE), human chorionic gonadotropin (HCG) • Member's consent or refusal to participate For information on the Alpha-Fetoprotein Test, see: https://americanpregnancy.org/prenatal-testing/alpha-fetoprotein-test **Note:** Member's participation is voluntary. Testing occurs through CDPH Expanded AFP Program, and only laboratories designated by CDPH may be used for testing.
K. Family Planning Evaluation	• Women should be counseled about the risks and benefits of repeat pregnancy sooner than 18 months which have been associated with adverse perinatal outcomes, including preterm birth, low birth weight, and small size of gestational age, as well as adverse maternal outcomes. • All postpartum women can be considered at risk for unintended pregnancy for that period of time. Family Planning counseling, including counseling of interpregnancy intervals, contraceptive care, referral or provision of services is documented.[76] Prenatal discussions should include the woman's reproductive life plans, including the desire for and timing of any future pregnancies. See the HHS guidance on Contraceptive Care Measures, available at: https://opa.hhs.gov/research-evaluation/title-x-services-research/contraceptive-care-measures

[75] 17 CCR 6521-6532
[76] See PL 98-011, Family Planning Services in Medi-Cal Managed Care, or any superseding APL for additional information.

	See DHCS' Office of Family Planning webpage, available at: https://www.dhcs.ca.gov/services/ofp/Pages/OfficeofFamilyPlanning.aspx See APL 18-019, Family Planning Services Policy for Self-Administered Hormonal Contraceptives, or any superseding APL for additional information.
L. Comprehensive Postpartum Assessment	The weeks following birth are a critical period for a woman and her infant, setting the stage for long-term health and well-being. To optimize the health of women and infants, postpartum care should become an ongoing process, rather than a single encounter, with services and support tailored to each woman's individual needs. As of April 1, 2022, Medi-Cal's postpartum period is extended from 60 to 365 days, regardless of how the pregnancy ends. • Per ACOG, women should contact their OB-GYN or other obstetric care providers within the first three weeks postpartum. • The comprehensive postpartum visit should be scheduled between four weeks and six weeks after delivery. • This initial postpartum assessment should be followed up with ongoing care as needed throughout the 12 month postpartum period, including with a comprehensive postpartum visit no later than 12 weeks after birth. The comprehensive postpartum visit should include a full assessment of physical, social, and psychological well-being, including the following domains: o Mood and emotional well-being o Infant care and feeding o Sexuality o Contraception o Birth spacing o Sleep and fatigue o Physical recovery from birth o Chronic disease management o Health maintenance

	Women with chronic medical conditions such as hypertensive disorders, obesity, diabetes, thyroid disorders, renal disease, and mood disorders should be counseled regarding the importance of timely follow-up with their OB-GYN or primary care providers for ongoing coordination of care. During the postpartum period, the woman and her OB-GYN or other obstetric care provider should identify the health care provider who will assume primary responsibility for her ongoing care in her primary medical home. See the ACOG guidance on Optimizing Postpartum Care, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/05/optimizing-postpartum-care. See the ACOG guidance on Postpartum Care, available at: https://www.acog.org/news/news-releases/2018/04/acog-redesigns-postpartum-care See the CDPH CPSP Postpartum Assessment and ICP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-PostpartumAssessmentandCarePlan.pdf. https://www.dhcs.ca.gov/services/medi-cal/eligibility/letters/Documents/I21-13.pdf#:~:text=Individuals%20in%20Medi-Cal%20with%20a%20SOC%20may%20be,for%20the%20rest%20of%20pregnancy%20and%20postpartum%20period. See PL 12-003, Obstetrical Care-Perinatal Services, or any superseding APL for additional information. See ACOG information on Optimizing Postpartum Care, available at: https://www.acog.org/More-Info/OptimizingPostpartumCare. **<u>Note</u>:** Postpartum care is eligible for the VBP program. Please consult with the MCP for details.

VI. OB/CPSP Preventive Criteria	
	For screening: If the postpartum assessment visit is not documented a point will not be given. A point can be given if there is documentation in the medical record of missed appointments and attempts to contact member and/or outreach activities. If appointments are documented in a separate system from medical records, they must be readily accessible and meet the medical retention requirements.
1) Individualized Care Plan (ICP)	ICP documentation includes specific obstetric, nutrition, psychosocial and health education risk problems/conditions, interventions, and referrals. **ICP must be developed based on the comprehensive assessment in each trimester and post-partum.** See the CDPH CPSP Integrated Initial 1st, 2nd, and 3rd Trimester Assessments and ICP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-CombinedInitialandTrimesterAssessmentandCarePlan.pdf. See the CDPH CPSP Postpartum Assessment and ICP, available at: https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-PostpartumAssessmentandCarePlan.pdf.
2) Nutrition Assessment	• USPSTF recommends providing interventions during pregnancy and after birth to support breastfeeding. Nutrition Assessment should include mother and infant including support for breast feeding.[77] • Any needed interventions must be noted. • Documentation of referrals as indicated. Infant feeding/breastfeeding status is documented during the postpartum period.[78] See the ACOG guidance on Optimizing Support for Breastfeeding as Part of Obstetric Practice, available at: https://www.acog.org/Clinical-Guidance-and-

[77] See the USPSTF recommendation on Breastfeeding: Primary Care Interventions, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/breastfeeding-primary-care-interventions.
[78] See PL 98-010, Breastfeeding Promotion, or any superseding APL for additional information.

	Publications/Committee-Opinions/Committee-on-Obstetric-Practice/Optimizing-Support-for-Breastfeeding-as-Part-of-Obstetric-Practice?IsMobileSet=false. https://www.cdph.ca.gov/Programs/CFH/DMCAH/CPSP/CDPH%20Document%20Library/CPSP-PostpartumAssessmentandCarePlan.pdf
3) Psychosocial Assessment	Psychosocial Assessment includes mood and emotional wellbeing; sleep and fatigue.[79] See the ACOG guidance on Optimizing Postpartum Care, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/05/optimizing-postpartum-care.
a) Maternal Mental Health Screening/Postpartum Depression screening	*Practitioner who provides prenatal or postpartum care for a patient shall ensure that the mother is offered screening or is appropriately screened for maternal mental health conditions.* Counselling and intervention must be documented. • USPSTF recommends that clinicians provide or refer postpartum persons who are at increased risk of postpartum depression to counseling interventions.[80] • CMS Technical Specifications includes screening using validated tools and documentation of a follow-up plan if the depression screening is positive that aligns with USPSTF's referral and documentation of counseling or interventions with those found at risk for postpartum depression. • Patient screened for depression on the date of the encounter using an age-appropriate standardized tool AND, if positive, a follow-up plan is documented on the date of the positive screen. Standardized Depression Screening Tool – A normalized and validated depression screening tool developed for the patient population in which it is being utilized. The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record.

[79] See the ACOG guidance on Optimizing Postpartum Care, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/05/optimizing-postpartum-care?utm_source=redirect&utm_medium=web&utm_campaign=otn.
[80] See the USPSTF recommendation on Perinatal Depression, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/abdominal-aortic-aneurysm-screening.

VI. OB/CPSP Preventive Criteria	
	Follow-Up Plan – Documented follow-up for a positive depression screening must include one or more of the following: o Additional evaluation or assessment for depression o Suicide Risk Assessment o Referral to a practitioner who is qualified to diagnose and treat depression o Pharmacological interventions o Other interventions or follow-up for the diagnosis or treatment of depression For additional information on CMS Technical Specifications, see: https://www.medicaid.gov/license/form/6466/4391. Edinburgh Postnatal Depression Scale (EPDS) is most commonly used and has been translated in 50 different languages.[81]
b) Social Needs Assessment	Social and Mental History (past and current). Follow up on pre-existing mental health disorders and social care needs such as housing, food, and transportation refer as appropriate.
c) Substance Use Disorder Assessment	Screen for tobacco and alcohol use and provide counseling; Screen for substance use disorder and refer as indicated. USPSTF recommends screening for unhealthy alcohol use in primary care settings in adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use.[82] See APL 21-014, Alcohol and Drug Screening, Assessment, Brief Interventions and Referral to Treatment, or any superseding APL for additional information.

[81] HSC 123640
[82] See the USPSTF recommendation on Unhealthy Alcohol Use in Adolescents and Adults, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/unhealthy-alcohol-use-in-adolescents-and-adults-screening-and-behavioral-counseling-interventions.

VI. OB/CPSP Preventive Criteria	
	USPSTF recommends that clinicians ask all pregnant persons about tobacco use, advise them to stop using tobacco, and provide behavioral interventions for cessation to pregnant persons who use tobacco.[83]
4) Breastfeeding and other Health Education Assessment	• Health Education on infant care and feeding including breast feeding, contraception, and birth spacing. • Materials must be in threshold language and must meet readability and suitability requirements for educational material distributed to Medi-Cal members.[84] See the USPSTF recommendation on Breastfeeding, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/breastfeeding-primary-care-interventions. See APL 18-019, Family Planning Services Policy for Self-Administered Hormonal Contraceptives, or any superseding APL for additional information.
5) Comprehensive Physical Exam	The comprehensive postpartum visit should include a full assessment of physical, social, and psychological well-being, including the following domains: • Mood and emotional well-being • Infant care and feeding • Sexuality • Contraception • Birth spacing • Sleep and fatigue • Physical recovery from birth • Chronic disease management • Health maintenance

[83] See the USPSTF recommendation on Tobacco Smoking Cessation in Adults, Including Pregnant Persons, available at: https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/tobacco-use-in-adults-and-pregnant-women-counseling-and-interventions

[84] See APL 18-016, Readability and Suitability of Written Health Education Materials, or any superseding APL for additional information.

VI. OB/CPSP Preventive Criteria	
	Women with chronic medical conditions such as hypertensive disorders, obesity, diabetes, thyroid disorders, renal disease, and mood disorders should be counseled regarding the importance of timely follow-up with their OB-GYN or primary care providers for ongoing coordination of care. During the postpartum period, the woman and her OB-GYN or other obstetric care provider should identify the health care provider who will assume primary responsibility for her ongoing care in her primary medical home. It is recommended that all women have contact with their OB-GYN or other obstetric care providers within the first three weeks postpartum. This initial assessment should be followed up with ongoing care as needed, concluding with a comprehensive postpartum visit no later than 12 weeks after birth. See the ACOG guidance on Optimizing Postpartum Care, available at: https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/05/optimizing-postpartum-care

REFERRAL, CONSULTS, DIAGNOSTIC TESTING TICKLER LOG

Date	Patient Name	Refer To	Appointment Date	Report Received	Calls to Specialist/Lab, X-Ray, Etc.	Results of Follow-Up Action

Instructions: When the physician orders a procedure, test or consultation, enter the date, patient's name, the referred to office and the date of the appointment. When the report of the ordered services is received, enter the date received. If the report is not received within 2 weeks of the scheduled date of the ordered service, call the provider of the service to inquire about the results report and document the call(s). Record results of actions taken to obtain reports.

MEDICAL WASTE LOG SHEET
FOR SMALL QUANTITY GENERATOR FACILITY

Per CA Health & Safety Code (HSC) § 117928 & 117945

California law allows hospitals to pick up bio-hazardous waste from associated medical buildings when they are not required to cross any city streets or public roads. Our medical building located at the following address meets this requirement:

____

____

____

As a service to the physicians of this building, ____________________________ (name of hospital/medical building) will pick up bio-hazardous and sharps waste when properly contained. It will then be transported to the hospital's common storage facility. The hospital is contracted with ____________________________, a registered hazardous waste hauler for the proper transport, treatment and disposal of the bio-hazardous waste. The contract is kept current and on file at: ____

IMPORTANT: Completed log sheets must be kept on-site for at least TWO years.

Container Type (e.g. sharps container, red bag with biohazard waste, etc)	**Quantity**	**Name of Hospital Staff Transporter**	**Date of Removal**	**Comments**

Medi-Cal Member Instructions for Post-Emergency Room Care

Dear Medi-Cal Member:

You or your child has completed a medical screening examination at this emergency department. If it has been determined that you or your child's medical condition does not need immediate emergency treatment in this emergency department, you should call your primary care physician (PCP) for further instructions.

Your PCP, or the doctor on call for your PCP, is available to direct your present or follow-up care needs. Your PCP's name and telephone number are on the front of your Plan's member identification card.

If you cannot reach your PCP or the doctor on call for your PCP, call your Plan's Member Services Department, available 24 hours per day to assist you. This telephone number is on the back of your Plan's identification card.

(If signed by other than Member) RELATIONSHIP: ______________________________
(MOTHER, FATHER, GUARDIAN)

If you should have any further questions or need additional assistance concerning this matter, please contact our Member Services Department toll free at (800) 675-6110 (TTY:711). When complete, please submit this form to: Health Net, Attn: Medi-Cal Member Appeals and Grievance Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Fax Number: (877) 831-6019.

The California Department of Managed Health Care is responsible for regulating health care service plans. If you have a grievance against your health plan, you should first telephone your health plan at **1-800-675-6110** and use your health plan's grievance process before contacting the department. Utilizing this grievance procedure does not prohibit any potential legal rights or remedies that may be available to you. If you need help with a grievance involving an emergency, a grievance that has not been satisfactorily resolved by your health plan, or a grievance that has remained unresolved for more than 30 days, you may call the department for assistance. You may also be eligible for an Independent Medical Review (IMR). If you are eligible for an IMR, the IMR process will provide an impartial review of medical decisions made by a health plan related to the medical necessity of a proposed service or treatment, coverage decisions for treatments that are experimental or investigational in nature and payment disputes for emergency or urgent medical services. The department also has a toll-free telephone number **(1-888-466-2219)** and a TDD line **(1-877-688-9891)** for the hearing and speech impaired. The department's internet website **www.dmhc.ca.gov** has complaint forms, IMR application forms, and instructions online.

Если у Вас есть вопросы или Вам нужна дополнительная помощь по данному делу, свяжитесь с Отделом обслуживания участников (Member Services Department) по бесплатному номеру (800) 675-6110 или по номеру линии (TTY: 711). После заполнения направьте данную форму по адресу: Health Net, Attn: Medi-Cal Member Appeals and Grievance Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Номер факса: (877) 831-6019.

Департамент управляемого медицинского обслуживания штата Калифорния (California) отвечает за регулирование деятельности планов медицинского страхования. Если у Вас есть претензия к плану медицинского страхования, то, прежде чем обращаться в Департамент, Вам следует позвонить в план по телефону 1-800-675-6110 и воспользоваться внутренней процедурой рассмотрения претензий. Использование данной процедуры не лишит Вас никаких законных прав и средств их защиты, которые могут быть Вам доступны. Если Вам нужна помощь по поводу претензии, связанной с чрезвычайной ситуацией, претензии, разрешенной планом медицинского страхования не в Вашу пользу, или претензии, остающейся без решения более 30 дней, Вы можете обратиться за содействием в Департамент. У Вас также может быть право на независимую медицинскую экспертизу (Independent Medical Review, IMR). Если у Вас есть право на IMR, в ходе IMR будет проведен объективный анализ медицинских решений, вынесенных планом медицинского страхования в отношении необходимости, с медицинской точки зрения, в предлагаемой услуге или лечении, решений о страховом покрытии видов лечения, которые по своей природе являются экспериментальными и исследовательскими, а также споров по оплате

за экстренную или неотложную медицинскую помощь. В департамент также можно обратиться по бесплатному номеру телефона (1-888-466-2219) и на линию TDD (1-877-688-9891) для лиц с нарушениями слуха и речи. На веб-сайте Департамента www.dmhc.ca.gov представлены формы для подачи жалоб, формы запроса о проведении IMR и указания по их заполнению.

Si tiene alguna otra pregunta o necesita ayuda adicional con respecto a este asunto, comuníquese con nuestro Departamento de Servicios al Afiliado al número gratuito (800) 675-6110 (TTY: 711). Una vez completado, envíe este formulario a: Health Net, Attn: Medi-Cal Member Appeals and Grievance Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Número de Fax: (877) 831-6019.

El Departamento de Atención Médica Administrada de California es la entidad responsable de regular los planes de servicios de atención de salud. Si tiene alguna queja formal contra su plan de salud, debe llamar primero a su plan de salud al **1-800-675-6110** y usar el proceso de quejas formales de su plan de salud antes de comunicarse con el departamento. La utilización de este procedimiento de quejas formales no prohíbe el ejercicio de ningún derecho ni recurso legal potencial que pueda estar a su disposición. Si necesita ayuda con una queja formal que tenga que ver con una emergencia, una queja formal que su plan de salud no haya resuelto satisfactoriamente o una queja formal que haya permanecido sin resolverse por más de 30 días, puede llamar al departamento para obtener ayuda. También podría ser elegible para una Revisión Médica Independiente (por sus siglas en inglés, IMR). Si es elegible para una IMR, el proceso de IMR proporcionará una revisión imparcial de las decisiones médicas tomadas por un plan de salud en relación con la necesidad médica de un servicio o tratamiento propuesto, las decisiones de cobertura para los tratamientos que son de naturaleza experimental o de investigación y las disputas por pagos de servicios médicos de emergencia o de urgencia. El departamento también tiene un número de teléfono gratuito **(1-888-466-2219)** y una línea TDD **(1-877-688-9891)** para las personas con dificultades de audición y del habla. El sitio Web del departamento, www.dmhc.ca.gov, tiene formularios de quejas, formularios de solicitud de IMR e instrucciones en línea.

MEDIKAL NA PAGPAPALABAS

MIYEMBRO: Pakibigay ang pangalan at numero ng telepono ng sinumang provider na maaaring gumamot sa iyo para sa kundisyon na paksa ng iyong karaingan.

Ang lahat ng Talang Medikal na makukuha ay mahigpit na pananatilihing kumpidensyal at tanging gagamitin sa layunin ng pagsusuri ng iyong karaingan.

SA PAMAMAGITAN NITO AY PINAHIHINTULUTAN AT HINIHILING KO ANG (MGA) PROVIDER NA NAKALISTA SA ITAAS NA ILABAS ANG ANUMAN AT LAHAT NG TALANG MEDIKAL SA HEALTH NET NA SUMUSUPORTA SA PANGANGAILANGANG MEDIKAL PARA SA PAKSA NG KARAINGANG ITO:

____

LAGDA:________________________________ **PETSA:**____________________________

(Kung nilagdaan ng iba pa maliban sa Miyembro) KAUGNAYAN:______________________
(INA, AMA, TAGAPANGALAGA)

Kung mayroon ka pang anumang tanong o kung kailangan ng karagdagang tulong tungkol dito, nang walang bayad sa aming Member Services Department sa (800) 675-6110 (TTY: 711). Kapag tapos na, pakisumite ang form na ito sa: HealthNet, Attn: Medi-Cal Member Appeals and Grievance Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Numero ng Fax: (877) 831-6019.

Responsibilidad ng Departamento ng Pinamamahalaang Pangangalagang Pangkalusugan ng California na pangasiwaan ang mga plano ng serbisyo sa pangangalagang pangkalusugan. Kung mayroon kayong karaingan laban sa inyong planong pangkalusugan, dapat ninyo munang tawagan ang inyong planong pangkalusugan sa **1-800-675-6110** at gamitin ang proseso sa karaingan ng inyong planong pangkalusugan bago makipag-ugnayan sa departamento. Hindi makakahadlang ang paggamit sa pamamaraan ng karaingan na ito sa anumang potensyal na legal na karapatan o solusyon na maaari ninyong gamitin. Kung kailangan ninyo ng tulong sa isang karaingang nauugnay sa emergency, karaingang hindi pa kasiya-siyang nalulutas ng inyong planong pangkalusugan, o karaingang hindi pa rin nalulutas sa loob ng mahigit sa 30 araw, maaari kayong tumawag sa departamento para sa tulong. Maaari din kayong maging kwalipikado para sa isang Independiyenteng Medikal na Pagsusuri (Independent Medical Review, IMR). Kung kwalipikado kayo para sa IMR, magsasagawa sa proseso ng IMR ng isang walang kinikilingang pagsusuri ng mga medikal na pasya na ginawa ng isang planong pangkalusugang nauugnay sa medikal na pangangailangan ng isang iminumungkahing serbisyo o paggamot, mga pasya ukol sa pagsaklaw para sa mga paggamot na pang-eksperimento o sinisiyasat pa lang, at di-pagkakasundo sa pagbabayad ng mga medikal na serbisyong pang-emergency o kinakailangan kaagad. Ang departamento ay mayroon ding toll-free na numero ng telepono **(1-888-466-2219)** at linya ng TDD **(1-877-688-9891)** para sa mga may kapansanan sa pandinig at pagsasalita. Ang internet website ng departamento **(www.dmhc.ca.gov)** ay may mga form sa pagrereklamo, form ng aplikasyon sa IMR, at tagubilin online.

Nếu quý vị có thêm bất kỳ thắc mắc hoặc cần thêm trợ giúp nào về vấn đề này, vui lòng liên lạc Ban Phục vụ Hội viên theo số miễn phí (800) 675-6110 (TTY: 711). Khi hoàn thành, xin vui lòng gửi mẫu này đến: Health Net, Attn: Medi-Cal Member Appeals and Grievance Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Số fax: (877) 831-6019.

Sở Quản lý Chăm sóc Sức khỏe California chịu trách nhiệm về quản lý các chương trình dịch vụ chăm sóc sức khỏe. Nếu quý vị có khiếu nại đối với chương trình bảo hiểm sức khỏe của mình, trước tiên quý vị cần gọi điện thoại đến chương trình bảo hiểm sức khỏe theo số **1-800-675-6110** và sử dụng quy trình khiếu nại của chương trình bảo hiểm sức khỏe của quý vị trước khi liên lạc với sở. Việc sử dụng thủ tục khiếu nại này không cấm bất kỳ quyền pháp lý hoặc biện pháp sửa chữa tiềm năng nào có thể có sẵn cho quý vị. Nếu quý vị cần hỗ trợ về khiếu nại liên quan đến trường hợp cấp cứu, khiếu nại không được chương trình bảo hiểm sức khỏe của quý vị giải quyết thỏa đáng hoặc khiếu nại đã quá 30 ngày mà vẫn chưa được giải quyết, quý vị có thể gọi cho sở để được hỗ trợ. Quý vị cũng có thể đủ điều kiện được Duyệt xét y khoa độc lập (Independent Medical Review, IMR). Nếu quý vị đủ tiêu chuẩn cho Duyệt xét y khoa độc lập (IMR), quy trình Duyệt xét y khoa độc lập (IMR) sẽ cung cấp đánh giá khách quan về các quyết định y tế được chương trình bảo hiểm sức khỏe đưa ra liên quan đến sự cần thiết về mặt y tế của dịch vụ hoặc phương pháp điều trị được đề xuất, quyết định về bảo hiểm đối với các phương pháp điều trị có tính chất thí nghiệm hoặc mang tính nghiên cứu và các tranh chấp về thanh toán cho trường hợp cấp cứu hoặc dịch vụ y tế khẩn cấp. Sở cũng có số điện thoại miễn phí **(1-888-466-2219)** và đường dây TDD **(1-877-688-9891)** dành cho người khiếm thính và khiếm thanh. Trang web trên internet của sở **www.dmhc.ca.gov** có mẫu than phiền, mẫu đơn Duyệt xét y khoa độc lập (IMR) và hướng dẫn trực tuyến.

I have received a denial for coverage for treatment, services, or supplies deemed experimental and have an incurable or irreversible condition that has a high probability of causing death within one year or less.

Yes, I am requesting a conference: ________

Use the back of this form if additional space is needed.

_______________________________________ ______________________

Signature of Member Date

(or signature of parent where member is a minor or incapacitated)

If you believe a delay in the decision-making may impose an imminent and serious threat to your health, please contact our Member Services Department toll free at 1-888-893-1569 to request an expedited review. If your case meets the criteria for urgent and requires fast review, it will be resolved within 72 hours.

If you have received a denial for coverage and you have an incurable or irreversible condition that has a high probability of causing death within one year or less, for treatment, services, or supplies deemed experimental, as recommended by a participating plan provider you may request a conference. Upon receiving your request, within 30 calendar days, CalViva Health will provide you the opportunity to attend a conference. The conference is held within 5 business days, if your doctor, after consultation with the CalViva Health Chief Medical Officer or designee, determines that the effectiveness of the proposed treatment, services, alternate treatment, or supplies covered by the plan, would be materially reduced if not provided at the earliest possible date. You may contact our Member Services Department toll free at 1-888-893-1569 to request a terminally ill conference. You may also request a conference by checking the statement on the first page of this form and returning the completed complaint form to the address below.

If you should have any further questions or need additional assistance concerning this matter, please contact our Member Services Department toll free at 1-888-893-1569 or TTY 711. When complete, please submit this form to: CalViva Health, Attn: Grievance and Appeals Department C-5, 21281 Burbank Blvd. Woodland Hills, CA 91367. Fax number (877) 831-6019.

If you have already filed an Appeal with CalViva Health and did not receive a Notice of Appeal Resolution (NAR) within 30 days from the date you filed the appeal with CalViva Health (or within 72 hours of your filing an expedited appeal with CalViva Health), you have the right to request a State Hearing from the California Department of Social Services. There is a 120 day deadline from the date you received a Notice of Appeal Resolution (NAR) from CalViva Health for filing a State Hearing. You have the right to be represented by legal counsel, a friend, or other spokesperson at the hearing. If you want to request a State Hearing or need assistance obtaining information on legal service organizations for representation, you may call the California Department of Social Services toll-free number at 1-800-952-5253, TDD 1-800-952-8349. You also have the right to request disenrollment from the health plan, through Health Care Options, by calling (800) 430-4263.

The Department of Health Care Services (DHCS) Medi-Cal Managed Care Ombudsman Program is available to provide assistance in investigating and resolving any grievances you may have about this health plan. If you wish to use the services of the DHCS to help you with your grievance, you may call the Ombudsman Program toll-free at 1-888-452-8609.

The California Department of Managed Health Care is responsible for regulating health care service plans. If you have a grievance against your Health Plan, you should first telephone your health plan at **1-888-893-1569** and use your health plan's grievance process before contacting the department. Utilizing this grievance procedure does not prohibit any potential legal rights or remedies that may be available to you. If you need help with a grievance involving an emergency, a grievance that has not been satisfactorily resolved by your health plan, or a grievance that has remained unresolved for more than 30 days, you may call the department for assistance. You may also be eligible for an Independent Medical Review (IMR). If you are eligible for IMR, the IMR process will provide an impartial review of medical decisions made by a health plan related to the medical necessity of a proposed service or treatment, coverage decisions for treatments that are experimental or investigational in nature and payment disputes for emergency or urgent medical services. The department also has a toll-free telephone number **(1-888-466-2219)** and a TDD line **(1-877-688-9891)** for the hearing and speech impaired. The

department's internet website **www.dmhc.ca.gov** has complaint forms, IMR application forms and instructions online.

Note: Appropriate action will be initiated to resolve your complaint. Within **5 calendar days** of receiving your grievance you will receive a response saying we have your grievance and are working on it. Then, within **30 calendar days** of receiving your grievance (or within 72 hours if this is an urgent issue), you will receive a written response letting you know how your grievance was resolved.

MEDICAL RELEASE / MEMBER AUTHORIZATION

All medical records obtained from providers who may have treated you for the condition which is the subject of this grievance will be held in strict confidence and used solely for the purpose of reviewing your grievance.

I HEREBY AUTHORIZE AND REQUEST THE PROVIDER(S) TO RELEASE ANY AND ALL MEDICAL RECORDS TO CALVIVA HEALTH SUPPORTING MEDICAL NECESSITY FOR:

Fecha

Si considera que una demora para tomar la decisión podría implicar una amenaza inminente y grave para su salud, comuníquese con nuestro Departamento de Servicios al Afiliado al número gratuito 1-888-893-1569 para solicitar una revisión acelerada. Si su caso cumple con los criterios de urgencia y requiere una revisión rápida, se resolverá dentro de las 72 horas.

Si usted recibió una denegación para obtener la cobertura de tratamientos, servicios o suministros considerados de experimentales, según las recomendaciones de un proveedor participante del plan, y tiene una enfermedad incurable o irreversible que tiene una alta probabilidad de provocarle la muerte dentro de un año o menos, puede solicitar una conferencia. Después de recibir su solicitud, dentro de los 30 días calendario, CalViva Health le brindará la oportunidad de asistir a la conferencia. La conferencia tendrá lugar dentro de los 5 días hábiles si su médico, después de consultar con el director médico general de CalViva Health o una persona designada, determina que la eficacia del tratamiento, los servicios, el tratamiento alternativo o los suministros propuestos cubiertos por el plan se reducirían materialmente si no fueran brindados lo antes posible. Puede comunicarse con nuestro Departamento de Servicios al Afiliado al número gratuito 1-888-893-1569 para solicitar una conferencia para personas con enfermedades terminales. También puede solicitar una conferencia si marca la parte de la declaración en la primera página de este formulario y envía el formulario de quejas completo a la dirección que se encuentra más abajo.

Si tiene más preguntas o necesita más ayuda con este asunto, comuníquese con nuestro Departamento de Servicios al Afiliado al número gratuito 1-888-893-1569 o TTY 711. Envíe el formulario completo a la siguiente dirección: CalViva Health, Attn: Grievance and Appeals Department C-5, 21281 Burbank Blvd. Woodland Hills, CA 91367. Número de fax: (877) 831-6019.

Si usted ya presentó una apelación a CalViva Health y no recibió un *Aviso de Resolución de Apelación* (por sus siglas en inglés, NAR) dentro de los 30 días a partir de la fecha en que presentó la apelación a CalViva Health (o dentro de las 72 horas de haber presentado una apelación acelerada a CalViva Health), tiene derecho a solicitar una audiencia ante el estado al Departamento de Servicios Sociales de California. Hay un plazo de 120 días a partir de la fecha en que usted recibe un *Aviso de Resolución de Apelación* de CalViva Health para solicitar una audiencia ante el estado. Tiene derecho a que un asesor legal, un amigo u otra persona lo represente en la audiencia. Si desea solicitar una audiencia ante el estado o necesita ayuda para obtener información sobre organizaciones de servicios legales para que lo representen, puede llamar al Departamento de Servicios Sociales de California al número gratuito 1-800-952-5253, TDD 1-800-952-8349. También tiene derecho a solicitar la cancelación de la afiliación al plan de salud, a través de Opciones de Atención de Salud, llamando al (800) 430-4263.

El Programa de la Defensoría de Atención Administrada de Medi-Cal del Departamento de Atención Médica Administrada (por sus siglas en inglés, DHCS) está disponible para brindarle ayuda con la investigación y resolución de las quejas formales que usted pueda tener sobre este plan de salud. Si desea utilizar los servicios del DHCS para recibir ayuda con su queja formal, puede llamar al número gratuito del Programa de la Defensoría, al 1-888-452-8609.

El Departamento de Atención Médica Administrada de California es la entidad responsable de regular los planes de servicios de atención de salud. Si tiene alguna queja formal contra su plan de salud, primero debe llamar a su plan de salud al **1888-893-1569** y usar el proceso de presentación de quejas formales del plan antes de comunicarse con el Departamento. La utilización de este procedimiento de quejas formales no prohíbe el ejercicio de ningún derecho ni recurso legal potencial que pueda estar a su disposición. Si necesita ayuda con una queja formal que tenga que ver con una emergencia, una queja formal que su plan de salud no haya resuelto satisfactoriamente o una queja formal que haya permanecido sin resolverse por más de 30 días, puede llamar al Departamento para obtener ayuda. También puede ser elegible para una revisión médica independiente (por sus siglas en inglés, IMR). Si es elegible para una IMR, el proceso de IMR proporcionará una revisión imparcial de las decisiones médicas tomadas por un plan de salud en relación con la necesidad

médica de un servicio o tratamiento propuestos, las decisiones de cobertura para los tratamientos que son de naturaleza experimental o de investigación y las disputas por pagos de servicios médicos de emergencia o de urgencia. El Departamento también tiene un número de teléfono gratuito **(1-888-466-2219)** y una línea TDD **(1-877-688-9891)** para las personas con dificultades de audición y del habla. El sitio web del Departamento, **www.dmhc.ca.gov,** tiene formularios de presentación de quejas, formularios de solicitud de IMR e instrucciones en línea.

Nota: Se tomarán las medidas correspondientes para resolver su queja. Dentro de los **5 días calendario** después de recibir su queja formal, recibirá una respuesta en la que se le informará que recibimos la queja formal y estamos trabajando en ella. Luego, dentro de los **30 días calendario** después de recibir su queja formal (o dentro de las 72 horas si es un problema urgente), recibirá una respuesta escrita en la que se le informará cómo se resolvió su queja formal.

DIVULGACIÓN MÉDICA/AUTORIZACIÓN DEL AFILIADO

Todos los expedientes médicos obtenidos de los proveedores que lo hayan tratado por la enfermedad que se relaciona con esta queja formal permanecerán bajo estricta confidencialidad y se utilizarán únicamente con el fin de revisar su queja formal.

POR MEDIO DEL PRESENTE, AUTORIZO Y SOLICITO QUE LOS PROVEEDORES DIVULGUEN A CALVIVA HEALTH TODOS LOS EXPEDIENTES MÉDICOS QUE RESPALDEN LA NECESIDAD MÉDICA DE LO SIGUIENTE:

POLICY AND PROCEDURE: Member Grievances/Complaints	Approved date: ____________________ Approved by: ____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:

The site has an established process for member grievances and complaints.

- A “grievance” is defined as any written or oral expression of dissatisfaction that involves coverage dispute, healthcare medical necessity, experimental or investigational treatment. The health plan does not delegate the resolution of grievances to contracted medical groups.

- A “complaint” is any expression of dissatisfaction regarding the quality of service (excluding quality of care) which can be resolved in the initial contact. A “complaint” is self limiting (e.g. service complaints, appointment wait times) that can be resolved to the member’s satisfaction, such as they do not ask for additional assistance

PROCEDURE:

A. The staff will ensure that any member who expresses a grievance or complaint is informed of the right for a State Fair Hearing and offered the following numbers:

1. The California Department of Managed Health Care 1-888-466-2219
2. For Hearing and Speech impaired call 1-800-735-2929
3. State Fair Hearing 1-800-952-5253

B. Staff will ensure that grievance forms **(in threshold languages) for each participating health plan** will be provided to members promptly upon request.

- The grievance form must be submitted to the health plan **within 1 business day.**

C. The staff will ensure that all complaints (self limiting complaints: e.g. service complaints, appointment wait times) are logged and submitted to the health plan monthly (if there were complaints during the time period).

1. These complaints may be resolved at the point of service
2. Log the complaint and include:
    a. Date of complaint
    b. Name of complainant and ID#
    c. Nature of the complaint
    d. Resolution/action taken (include information that health plan was notified as appropriate)
    e. Date of resolution/action
    f. Date log submitted to health plan

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Personnel Training: Minors' Rights	Approved date: ____________ Approved by: ____________ Effective date: ____________ Revised date: ____________ Revised date: ____________

POLICY:
Provide medical services per California Law Family Code to protect minors' rights to sensitive services.

PROCEDURE:

Sensitive Services/Minors Rights

- Parental consent is not required for members under the age of 18 to access pregnancy-related services, including family planning.
  ** California Law Family Code Section 6925.

- A minor who is 12 years of age or older and who may have come into contact with an infectious, contagious, or communicable disease may consent to medical care related to the diagnosis or treatment of the disease, if the disease or condition is one that is required by law or regulation adopted pursuant to law to be reported to the local health officer, or is a related sexually transmitted disease, as may be determined by the State Public Health Officer.

  The minor's parents or guardian are not liable for payment for medical care provided pursuant to this section.

*** California Law Family Code Section 6926 (6920-6929).*

- A minor may consent to the minor's medical care or dental care if all of the following conditions are satisfied:

(1) The minor is 15 years of age or older.
(2) The minor is living separate and apart from the minor's parents or guardian, whether with or without the consent of a parent or guardian and regardless of the duration of the separate residence.
(3) The minor is managing the minor's own financial affairs, regardless of the source of the minor's income.

  - The parents or guardian are not liable for medical care or dental care provided pursuant to this section.
  - A physician and surgeon or dentist may, with or without the consent of the minor patient, advise the minor's parent or guardian of the treatment given or needed if the physician and surgeon or dentist has reason to know, on the basis of the

information given by the minor, the whereabouts of the parent or guardian.

*** California Law Family Code section 6922 (6920-6929).*

- **Special precautions must be taken to ensure that communication regarding the medical information of a minor related to sensitive services is protected** (i.e. letters and phone calls should NOT be directed to the home without the minor's authorization).

Miscellaneous Coding Policies – State Health Programs	
Category	**Coding Edit**
Add-On Code	HCPCS add-on codes are always performed in conjunction with a primary procedure and should never be reported as standalone services. If the primary procedure is not allowed, then the add-on code is also not allowed
Allergy	Evaluation and management (E&M) services for established patients are included in allergy immunotherapy unless a significant, separately identifiable service is performed
Anesthesia	The daily management of post-operative analgesia is considered part of the global services for other major anesthesia services
	Anesthesiologists are required to utilize the appropriate anesthesia CPT does rather than surgical codes
Assistant Surgeon	Health Net denies assistant surgeon services for certain procedures where the concept of assistant surgeon does not apply
Bilateral Procedures	The appropriate billing method for procedures that are bilateral in nature is to bill the procedure on a two claim lines: one line with the modifier 50 with 1 unit of service and the second line without a modifier 50 with 1 unit of service
	Only procedures that can be billed as bilateral should have modifier 50
Bundled Services	There are a number of services/supplies for which payment is bundled into the payment for other related services, whether specified or not. The list of bundled services is based on Centers for Medicare and Medicaid Services' (CMS') National Physician Relative Value File
	The codes included in the bundled services policy are from the CMS National Physician Fee Schedule list and are updated as CMS makes updates on a quarterly bases. Services with RVUs are routinely denied or bundled into other payable services unless they are billed alone and the provider has not billed any services within 12 months for the same member
	A digital rectal exam is considered a bundled service and, therefore, is not eligible for separate payment
Cardiology	Cardiac blood pool imaging is included in myocardial perfusion studies
	PTCA is included in the services for the transcatheter placement of intracoronary stent
	Abdominal autography performed at the time of a cardiac catheterization or percutaneous cardiac interventional procedure is included in the primary procedure
	The insertion of the cardioverter-defibrillator and/or electrodes includes an electronic analysis of the device

	Catheterization of the vena cava is included in the surgical interruption of the vena cava
	The insertion of a pacemaker or cardioverter-defibrillator includes the electronic analysis and reprogramming of the device
	Nuclear imaging of the heart can only be performed in an office or hospital setting
	E&M services are included in pacemaker analysis unless a significant, separately identifiable service is performed
	Pulmonary perfusion imaging is included with myocardial perfusion studies when both are performed at the same time
	When a patient is on continuous monitoring in the hospital, emergency room, or any monitored unit, the interpretation of telemetric rhythm strips is considered to be part of the E&M services
	A non-invasive physiologic study is included in an E&M service unless a significant, separately identifiable service is performed
	Electrocardiogram (EKG) interpretations are considered part of the medical decision-making component of an E&M services performed in any setting and should not be reported separately. Electrocardiogram interpretations are allowed in addition to an E&M service performed in a hospital setting or emergency room setting. Should multiple providers render EKG interpretations, only one reimbursement is provided, to the provider who submits the first claim. The reading must be substantially separate and independent of the usual E&M services. Documentation of a written/dictated report must be available upon request for audit purposes, and medical necessity for EKG testing must be met
Chiropractic Services	Chiropractic manipulation is considered for reimbursement once per day, per patient
CMS Coverage	Pre-administration services for intravenous immunoglobulin (IVIG) infusion must be reported with the IVIG itself
	Medical nutrition therapy is included in the monthly dialysis services
	Codes for measurement for reporting purposes (status M codes for CMS) are not reimbursed
	Active wound care service(s) require the appropriate therapy service modifier, when the service is performed by a therapist
	Transportation of portable X-ray equipment and personnel must be reported with an appropriate radiological procedure
	Presbyopia-correcting intraocular lens inserted in lieu of the conventional IOL is not eligible for reimbursement
CMS National Coverage Determination (NCD) Policy	Services and supplies must be reported with an appropriate diagnosis code
	Services and supplies are considered for reimbursement when reported at an appropriate frequency
	Cellular therapy is not covered
	Services reported with modifiers are considered for reimbursement when reported with appropriate modifiers

	Intragastric hypothermia using gastric freezing is not covered
	Laetrile, amygdalin and vitamin B-17 are not covered
	Magnetic resonance spectroscopy is not covered
	Prolotherapy is not covered
	The code that accurately describes the service performed should be reported
	Services, supplies and medications must be reported with an appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying service and no contractions, reported for appropriate indications and reported with appropriate places of service
	Services and supplies considered for reimbursement when reported with an appropriate place of service
Co-Surgeon	Co-surgeon services should not be billed for procedures where the concept of co-surgeon does not apply
Dental Rule	Dental anesthesia services (D codes) are included in intraoral anesthesia services (00170)
Dermatology	PUVA is only allowed for the following diagnoses: chronic kidney disease, unspecified pruritic disorders, psoriasis, arthropathy, dyshidrosis, malignant mast cell tumors, mycosis fungoides, Seazry disease, pityriasis rosea, other alopecia, acne, or vitiligo
	Debridement, paring, biopsy, shaving, and destruction of benign or premalignant lesions is included in Moh's surgery
Devices and Supplies	Certain imaging agents are applicable to only specific diagnostic or therapeutic imaging services. When imaging agents are billed alone or with imaging services that are not consistent with their use, the imaging agents are denied
Diagnosis – Gender	Certain procedure and diagnosis, by definition or nature of the procedure, are limited to the treatment of one gender
Drugs	Certain medication codes have been assigned a maximum number of units that may be billed based on pharmacology guidelines
	Epogen/Procrit must be reported with an appropriate diagnosis code
Duplicate	Claims that have already been paid should not be resubmitted
	Lab services are only reimbursed to one provider. When both a physician and a laboratory bill for the same lab service, only one provider is reimbursed
Evaluation and Management (E&M) Services	E&M services are included in chemotherapy administration unless they are separate services
	A new patient office visit should only be billed when the patient has not had any previous services in the last 3 years by that provider, including other providers in the same group with the same specialty
	One E&M service is considered for reimbursement per day per provider
	If an inpatient consult is performed within 7 days of another inpatient consult, then the second consult should be billed as an inpatient follow-up consult

	An inpatient admission is allowed once every 7 days unless there is a discharge service between the two admissions
	Initial observation care codes should not be billed on consecutive days
	Unusual travel, physician direction of EMS, ECG monitoring, and ambulatory blood pressure monitoring are included in critical care transport services
	Providers may only bill one E&M service on the same day. Taking care of a problem or abnormality is considered part of the global service when a preventive medicine service is performed unless the problem or abnormality is significant enough to require additional work to perform the key components of a problem-oriented E&M service, in which case the latter service should be billed with modifier 25
	Emergency room visits are included in critical care visits
	The following services are included in critical care services during interfacility transport for pediatric patients (99289-99290): routine venous access, blood collection, arterial puncture, naso- or oro-gastric tube placement, chest X-ray interpretation, temporary transcutaneous pacing, ventilation assist and management, CPAP or CNP, pulse oximetry, and analysis of computer data
	In-hospital or out-of-hospital mandated on-call services are included in other services performed
	Instructing a patient on the proper use of medication or devices is included in E&M services
	Services provided at the request of the patient in a location other than the physician's office are included in the office E&M services
	After-hours services are only payable at the same time as office E&M services
	Office visits are included in smoking and tobacco-use cessation counseling unless they are separately identifiable services
	The initial preventative physical examination (IPPE) and the electrocardiogram performed as a part of the IPPE examination should only be reported once per lifetime
	Care plan oversight services are included in monthly ESRD
	Services, supplies and medications must be reported with appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying service and no contradictions, reported for appropriate indications and reported with appropriate places of service
	Observation care services are considered for reimbursement when reported with the appropriate initial observation or discharge codes
Frequent Policy	Services, supplies and medications must be reported with appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying service and no contradictions, reported for appropriate indications and reported with appropriate places of service

Gastroenterology	Colorectal cancer screening done by colonoscopy is included in non-screening colonoscopies
	A portion of the work associated with a gastric analysis procedure is included in an upper GI endoscopy. Report the gastric analysis procedure with modifier –52
General Surgery	Repair of an umbilical hernia is included in the repair of an incisional or ventral hernia
	Partial mastectomy codes should be billed with an appropriate cancer diagnosis
Global Obstetrical Package	Only one delivery code is allowed every 240 days. This excludes multiple gestation delivery and related assistant surgeon(s) for these procedures when done on the same day
	E&M services and procedures performed within the six-week postpartum period are included in the payment for the delivery code
Global Surgery	The Global Surgery package includes all necessary services normally furnished by the surgeon before, during and after a surgical procedure. The global surgery package applies only to surgical procedures that have post-operative global periods of 0, 10 and 90 days. The global surgery concept applies only to primary surgeons and co-surgeons. The global surgery package includes preoperative and same day E&M visits after the decision is made to operate and all post-operative E&M visits and procedures for 10-day and 90-day global surgeries related to the primary procedure
	Intravenous access and infusion/injection procedures for anesthesia, intra-operative care, and post-operative pain management are included in the global surgical package
Hand Surgery	A ganglion excision or an excision of a tendon sheath of the wrist is included in a carpal tunnel neuroplasty
Health Plan Policy Rules	Office services provided on an emergency basis are not payable at the same time as a preventive office visit
	Supplies and materials billed by providers are only covered for the office place of service
	The CMS physician voluntary reporting program codes G8006-G8186 and G9050-G9130 are for informational and reporting purposes only. They are considered to be included in other services provided to the member
	Supplies and materials billed by providers are only covered for the office place of service. However, syringes, needles, alcohol, betadine, surgical trays, and miscellaneous surgical supplies are not separately payable to providers in the office place of service when billed with laboratory or pathology services
	Services, supplies and medications are considered for reimbursement when reported with appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying services, and no contraindications
	HCPCS codes S0000-S9999 are not payable except as recognized by Health Net Medi-Cal
Home Health/Home Infusion	Add-on codes must be reported with the corresponding primary code on the same date of service

ICD-9 Guidelines	An encounter for chemotherapy or immunotherapy should not be the sole diagnosis for chemotherapy. The underlying disorder should also be listed
	Manifestation diagnoses should be reported with another diagnosis code indicating the underlying disease
	Services must be reported with an appropriate diagnosis code
Incident To Services	Incident To services are those services furnished as an integral, although incidental, part of the physician's personal professional services in the course of diagnosis or treatment of an illness or injury to the physician's patient. Incident To services, as defined by CMS, should only be billed in the physician's office
Laboratory	Laboratory panel codes should be billed when the components of the panel are performed. Both the lab panel code and the component codes should not be billed
	Laboratory panels are not eligible for reimbursement when submitted with reduced service or discontinued service modifiers
Laboratory & Pathology	Laboratory and pathology services are included in hospital E&M services
Maximum Units	All procedure codes are assigned a maximum number of units that may be billed on a single date of service. Health Net has assigned maximum units based on one or more of the following criteria: CMS' maximum units per day list, the procedure code definition or nomenclature, the anatomical site, clinical guidelines, or determinations made by expert specialty panels
Modifier Policy	Only valid modifiers are considered for reimbursement
Multiple Procedure Reduction	When more than one procedure is billed for the same date of service, the procedure with the highest RVUs is reimbursed at 100% of the allowed amount. Subsequent procedures are reimbursed at 50% of the allowed amount based on principles of multiple procedure reduction
National Correct Coding Initiative (CCI) Policy Manual	Established patient E&M services are included in cardiac stress tests, transthoracic echocardiography, and myocardial perfusion imaging unless a significant, separately identifiable service was performed
	The introduction of an intravenous needle or catheter is included in a venipuncture
	CCI edits applied to CPT codes are applied to analogous HCPCS codes (or their HCPCS code counterparts)
	Claims are subject to policies that appear in the narrative sections of CMS' CCI policy manual
Nephrology	Epoetin Alpha is covered for the following diagnoses: anemia in end-stage renal disease, hypertensive heart and/or renal disease, or chronic renal failure
Neurology	No more than four sensory nerve conduction studies should be required for the diagnosis of carpal tunnel syndrome

	Electromyogram (EMG) and nerve conduction studies are considered diagnostic services and should not be reported with therapy modifiers such as GN, GP, and GO
	Somatosensory evoked potential studies are considered for reimbursement when reported with an appropriate diagnosis code
	Services, supplies and medications are considered for reimbursement when reported with appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying services, and no contraindications
	Digital analysis of electroencephalogram (EEG) is considered from reimbursement when reported with an appropriate EEG service
Obstetrics and Gynecology	Saline infusion hysterography includes pelvic echography
	Insertion of cervical dilator is included in the global obstetrical package
	For multiple gestation vaginal deliveries (including vaginal deliveries after previous cesarean section), the global care code that includes antepartum, postpartum and delivery care should only be used once. The codes for delivery alone should be used to indicate the birth of the additional gestation(s)
	The global delivery code for babies delivered by cesarean section is considered to include one or more babies. The additional work to deliver more than one baby via cesarean section is considered to be part of that global service
	Services, supplies and medications are considered for reimbursement when reported with appropriate diagnosis codes, patient age, frequency, number of units, related or qualifying services, and no contraindications
	Ultrasounds for multiple gestations should be billed with multiple gestational diagnoses
Once per lifetime services	Services performed once in a lifetime are considered for reimbursement once per member
Ophthalmology	When a patient is over 8-years-old, the sensorimotor exam with multiple measurements of ocular deviation with interpretation and report is considered to be included in the E&M services both general and ophthalmologic
	Radial keratotomy and keratomileusis are only covered for anomalous corneal size/shape or keratoconus
	Photodynamic therapy requires performance of fluorescein angiography
Orthopedic	The following procedures are considered to be an integral part of primary orthopedic or neurosurgical procedures: intravenous fluid administration; explorations of applicable cavity; isolation, retraction and protection of anatomical structures; nerve stimulation; fluoroscopy; cultures; wound closure; scar revision; and cast applications

	Open treatment of a knee dislocation with primary ligamentous repair is included in arthroscopically aided anterior or posterior cruciate ligament repair/augmentation or reconstruction
	The deep excision of a bone cyst or benign tumor includes the partial or superficial excision of a bone cyst or benign tumor
	An injection of a major joint billed with Hylan G-F 20 or sodium hyaluronate is only allowed with the following diagnoses: osteoarthritis or osteoarthrosis of the knee and lower leg
	Removal of a knee prosthesis includes a synovectomy, removal of a foreign body, a capsulotomy, knee ligament reconstruction, partial excision of the bone, a chondroplasty, and an arthrotomy with biopsy
	A knee immobilizer is included in a double-upright knee orthosis
	An arthroscopy with an abrasion arthroplasty is included in an arthroscopy with menisectomy if they are in the same compartment
	Exploration of spinal fusion is included in more comprehensive spine procedures
	Diagnostic shoulder arthroscopy is included in more comprehensive shoulder procedures
Otolaryngology	Tympanostomy for patients older than age 13 should be performed in an office setting
Physical Medicine	Vasopneumatic compression therapy is considered for reimbursement when used for treatment of lymphedema
	Therapeutic procedures or therapeutic activities, in any combination, are only allowed up to four units per date of service
	For physical therapists, E&M services are included in physical therapy modalities and therapeutic procedures
	Physical therapists should use physical therapy evaluation codes, not E&M codes
	Neurostimulator application or physical/occupational therapy re-evaluation is included in unattended electrical stimulation
	Application of unattended electrical stimulation is included in application of manual electrical stimulation
	Unattended electrical stimulation (97014) cannot be billed with other electrical stimulation procedures (G0281 or G0329) because they are mutually exclusive procedures
	Chiropractic manipulative treatment services require specific skills and are therefore limited to providers trained in Chiropractic medicine
	Therapy and athletic training evaluations are considered for reimbursement once a month
Place of Service	Medical supplies, surgical supplies and durable medical equipment may only be billed by the physician in an office setting. In the outpatient or inpatient settings the facility is responsible for the supplies and billing

	E&M codes need to be billed for a place of service consistent with the code definition
	Certain procedures are only appropriate for the inpatient setting
	Emergency department visits are only allowed for place of service 23
	Home care visits are only allowed for place of service 12
	Casts and strappings provided by physical or occupational therapists in a skilled nursing facility are included in the payment to the facility
	In an office setting, a presbyopia-correcting intraocular lens must be reported with an appropriate cataract removal surgical service
	CMS has identified procedures that are rarely or never performed in a non-facility setting. Health Net denies these procedures if they are billed in the office
	Monthly home dialysis services are eligible for reimbursement when performed in the appropriate place of service
Podiatry	Trimming and debridement of nails and benign hyperkeratotic lesions are allowed if they are accompanied by a diagnosis for a fungal infection of the nail or other diagnoses that put the patient at some risk for a complication, such as diabetes or peripheral vascular disease
	Use of codes for examination of the feet for diabetic members with peripheral neuropathy and loss of protective sensation (G0245-G0247) is reserved only for diabetic members with neurological manifestations
	Within the podiatry specialty, there is a set of services that may be rendered by that specialty under the state's licensure. Other services are considered to be outside of the scope of services for that specialty
Procedure Code Definition	When a procedure is described by both a CPT and a HCPCS code, only one of these codes should be billed
	The newborn metabolic screening panel includes galactose, hemoglobin electrophoresis, hydroxprogesterone 17-d, phenylalanine, and total thyroxine
	The services for orthotic management and training are included in the fitting or dispensing of the orthotic
	The EKG as a component of the initial preventive physical examination consists of the tracing and the interpretation. When tracing and interpretation are reported separately, they are combined into the overall EKG for reimbursement
Procedure – Age	Removal of sutures under anesthesia is limited to members under age 7
	Certain procedure codes by definition are limited to specific ages
Procedure – Gender	Certain procedure codes, by definition or nature of the procedure, are limited to the treatment of one gender
Professional, Technical and Global Services	Interpretation of most radiologic procedures done in an inpatient or emergency room setting are payable only to radiologists

	Only the professional component is covered when a diagnostic test or radiologic service is performed in an inpatient or outpatient place of service
	Payment for a global ECG is only covered in the physician's office
	Low osmolar contrast media is only covered for patients of extreme age or when there is a contraindication to the use of ionic contrast
	Procedures that are professional component only in nature should not be billed with modifier 26 or TC (technical component)
	Procedures that are technical component only in nature should not be billed with modifier TC or 26
	Providers are not reimbursed for technical only component services provided in the inpatient or outpatient hospital locations
	Physicians are only reimbursed for the professional component of exercise testing when done in an inpatient or outpatient facility
	Physicians are only reimbursed for the report and interpretation portion of a 24-hour ECG when done in an inpatient or outpatient facility
	Physicians are only reimbursed for the report and interpretation portion of a 30-day patient demand event recording when done in an inpatient or outpatient facility
	The professional component of certain radiologic procedures performed in the outpatient facility are only covered when performed by the radiologist
	Only one provider should bill for the professional component of a given procedure
	Only laboratory services that have a professional component may be reported with a modifier 26
	Only services that have a professional and technical component may be billed with modifiers 26 and TC respectively
	Procedures that are professional only should not be billed with a modifier TC
	Professional and technical component modifiers require the use of a code that is appropriate for the modifier
	The Professional component of certain radiologic procedures is eligible for reimbursement one time by radiologists or other appropriate specialists
Radiation Oncology	Continuing medical physics consultation should only be billed weekly
	An E&M service is included in radiation oncology services unless it is a separately identifiable service
	Radiation treatment management represents 5 treatments
	Therapeutic port films are only allowed once every 7 days
Radiology	Indications for performing a bone density measurement study include but are not limited to osteopenia, osteoporosis, ovarian failure, and fractures

	Provision of diagnostic radiopharmaceutical substances is included in the supply of the radiopharmaceutical diagnostic agents
	Radiopharmaceuticals and imaging agents need to be billed with appropriate imaging procedures
	Interpretation of X-rays is included in hospital E&M services
	Radiologic exam of the hand includes the X-ray exam of the wrist
	Complete radiologic exam of the pelvis includes the X-ray exam of the hip
	Digital subtraction angiography needs to be done in conjunction with a related imaging procedure
	A single spot film of the spine is considered to be included in a more comprehensive specific, spinal X-ray procedure
	MRI and CT scans of the same anatomic region are considered to be mutually exclusive procedures performed on the same day
	A CT angiogram and magnetic resonance angiogram of the same anatomic region are considered to be mutually exclusive procedures performed on the same day
	MRI and arthrography of the temporomandibular joint are considered to be mutually exclusive procedures performed on the same day
	Thyroid imaging without vascular flow and thyroid imaging with vascular flow are considered to be mutually exclusive procedures when performed on the same day
	A complete ultrasound of the abdomen includes an examination of the retro-peritoneum
	A CT or DEXA study of the axial skeleton is included in the DEXA study of the appendicular skeleton
	A magnetic resonance angiogram of the pelvis and abdomen are mutually exclusive when performed on the same day
	Plain X-rays of specific regions are included in bone age and bone length studies and in osseous surveys
	Myocardial infarct scanning is mutually exclusive of cardiac blood pool imaging performed on the same day
Separate Procedures	Fluoroscopy is only a separate procedure when it is not performed as an integral part of another service
	Procedures that are defined as separate procedures should not be billed when they are performed as part of another major service
	A service designated as a separate procedure is considered an integral component of the total service
Split Surgical Care	Care split between providers should be reported appropriately to define preoperative care only (modifier 56), surgical care only (modifier 54), and post-operative care only (modifier 55)
	Emergency physicians who perform a surgical procedure with any global period in the emergency department should report the procedure as surgical care only (modifier 54) unless they also provide the post-operative care

Surgery	Venipuncture and exchange transfusion procedures are included in laboratory tests
	Removal of mammary implant material is included in the periprosthetic capsulectomy
	IV infusion during an observation stay is included in any surgical procedure
	Introduction of a needle or catheter in a vein and blood collection services are not covered for providers in the inpatient and outpatient hospital settings
Urology	Injection procedure for pyelography is included in the change of a pyelostomy or nephrostomy tube
	When a post-void residual volume is measured in the bladder after urodynamic testing, the ultrasound performed to obtain this value is limited. The complete pelvic ultrasound should not be used for this measurement
	Ureteral stenting is considered to be part of endoscopic procedures involving the ureter with tumor resection
	Bladder irrigation is included as part of other endoscopic or open procedures of the bladder
	When an initial approach to a procedure is unsuccessful, and an alternative approach is undertaken, the successful approach is considered for reimbursement
	Prostate cancer screening is eligible for reimbursement once annually
Vaccines	Zoster vaccination is limited to members ages 60 and older. For a complete description of the medical policy, select Medical Policies located under Policies and Procedures on the Health Net provider Web site at www.healthnet.com/provider

Additional information

Privacy Statement (Civil Code Section 1798 et seq.)

The information requested on this form is required by the Department of Health Care Services for purposes of identification and document processing. Furnishing the information requested on this form is mandatory. Failure to provide the mandatory information may result in your request being delayed or not be processed.

41. Signature of physician/provider or authorized designee	42. Date

Instructions

1. Date of the request: Date the request is being made.

Provider Information

2. Provider's name: Enter the name of the provider who is requesting services.
3. Provider number: Enter National Provider Identification (NPI) number (no group numbers).
4. Address: Enter the requesting provider's address.
5. Contact person: Enter the name of the person who can be contacted regarding the request; all authorizations should be addressed to the contact person.
6. Contact telephone number: Enter the phone number of the contact person.
7. Contact fax number: Enter the fax number for the provider's office or contact person.

Client Information

8. Client name: Enter the client's name—last, first, and middle.
9. Alias (AKA): Enter the patient's alias, if known.
10. Gender: Check the appropriate box.
11. Date of birth: Enter the client's date of birth.
12. CCS/GHPP case number: Enter the client's California Children's Services (CCS)/Genetically Handicapped Persons Program (GHPP) number. If not known, leave blank.
13. Medical record number: Enter the client's hospital or office medical record number.
14. Home phone number: Enter the home phone number where the client or client's legal guardian can be reached.
15. Cell phone number: Enter the cellular phone number where the client or client's legal guardian can be reached.
16. Work phone number: Enter the work phone number where the client or client's legal guardian can be reached.
17. Email address: Enter the email address of the client or client's legal guardian.
18. Residence address: Enter the address of the client. Do not use a P.O. Box number.
19. Mailing address: Enter the mailing address if it is different than number 18.
20. County of residence: Enter residential county of the client.
21. Language spoken: Enter the client's language spoken.
22. Name of parent/legal guardian: Enter the name of client's parent/legal guardian.
23. Mother's first name: Enter the client's mother's first name.
24. Primary care physician: Enter the client's primary care physician's name. If it is not known, enter NK (not known).
25. Primary care physician telephone number: Enter the client's primary care physician phone number.

Insurance Information

26a. Enrolled in Medi-Cal? Mark the appropriate box. If the answer is yes, enter the client's index number in box 26.b. and the client's Medi-Cal number in box 26.c.

27. Enrolled in a commercial insurance plan? Mark the appropriate box, if the answer is yes, mark the type of insurance plan and enter the name of the commercial insurance plan on the line provided.

Diagnosis

28. Diagnosis and/or ICD-10: Enter the diagnosis or ICD-10 code, if known, relating to the requested services.

Requested Services

29. CPT-4/HCPCS code/NDC: Enter the CPT-4, HCPCS code or NDC code being requested. This is only required if services requested are other than ongoing physician authorizations or special care center authorizations. Also not required for inpatient hospital stay requests.
30. Specific description of procedure/service: Enter the specific description of the procedure/service being requested.
31. From and to dates: Enter the date you would like the services to begin. Enter the date you would like the services to end. These dates are not necessarily the dates that will be authorized.
32. Frequency/duration: Enter the frequency or duration of the procedures/service being requested.
33. Units: For NDC, enter total number of fills plus refills. For all other codes, enter the total number/amount of services/supplies requested for SAR effective dates.
34. Quantity: Use only for products identified by NDC. For drugs, enter the amount to be dispensed (number, ml or cc, gms, etc.). For lancets or test strips, enter the number per month or per dispensing period.
35. Other documentation attached: Check this box if attaching additional documentation.
36. Enter facility name: Complete this field with the name of the facility where you would like to perform the surgery you are requesting.

Inpatient Hospital Services

37. Begin date: Enter the date the requested inpatient stay shall begin.
38. End date: Enter the end date for the inpatient stay requested.
39. Number of days: Enter the number of days for the requested inpatient stay.

Additional Services Requested from Other Health Care Providers

40. Provider's name: Enter name of the provider you are referring services to.
    Provider number: Enter the provider's National Provider Identification (NPI) number. Telephone: Enter provider's telephone number.
    Contact person: Enter the name of the person who can be contacted regarding the request. Address: Enter address of the provider.
    Description of services: Enter description of referred services.
    Procedure code: Enter the procedure code for requested service other than ongoing physician services.
    Units: For NDC, enter total number of fills plus refills. For all other codes, enter the total number/amount of services/supplies requested for SAR effective dates.
    Quantity: Use only for products identified by NDC. For drugs, enter the amount to be dispensed (number, ml or cc, gms, etc.). For lancets or test strips, enter the number per month or per dispensing period.
    Additional information: Include any written instructions/details here.

Signature

41. Signature of physician or provider: Form must be signed by the physician, pharmacist, or authorized representative.
42. Date: Enter the date the request is signed.

Notice of non-discrimination

Discrimination is against the law. CalViva Health follows State and Federal civil rights laws. CalViva Health does not unlawfully discriminate, exclude people or treat them differently because of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, gender, gender identity or sexual orientation.

CalViva Health provides:

- Free aids and services to people with disabilities to help them communicate better, such as qualified sign language interpreters and written information in other formats (large print, audio, accessible electronic formats and other formats).
- Free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages.

If you need these services, contact the CalViva Health 24 hours a day, 7 days a week by calling 1-888-893-1569. Or, if you cannot hear or speak well, please call (TTY/TDD 711) to use the California Relay Service. Upon request, this document can be made available to you in braille or accessible PDF, large print, audiocassette, or electronic form. To obtain a copy in one of these alternative formats, please call or write to: CalViva Health, 7625 N. Palm Ave., Suite #109, Fresno, CA 93711, 1-888-893-1569, California Relay 711.

HOW TO FILE A GRIEVANCE

If you believe that CalViva Health has failed to provide these services or unlawfully discriminated in another way on the basis of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, gender, gender identity or sexual orientation, you can file a grievance with CalViva Health Member Services. You can file a grievance in writing, in person, or electronically:

- By phone: Contact us 24 hours a day, 7 days a week by calling 1-888-893-1569. Or, if you cannot hear or speak well, please call (TTY/TDD 711) to use the California Relay Service
- In writing: Fill out a complaint form or write a letter and send it to: CalViva Health Member Appeals and Grievances Department, P.O. Box 10348, Van Nuys, CA 91410-0348. 1-888-893-1569 (TTY/TDD 711)
Fax: 1-877-831-6019
- In person: Visit your doctor's office or CalViva Health and say you want to file a grievance.
- Electronically: Visit CalViva Health's website at www.CalVivaHealth.org.

OFFICE OF CIVIL RIGHTS – CALIFORNIA DEPARTMENT OF HEALTH CARE SERVICES

You can also file a civil rights complaint with the California Department of Health Care Services, Office of Civil Rights by phone, in writing, or electronically:

- By phone: Call **916-440-7370**. If you cannot speak or hear well, please call **711 (Telecommunications Relay Services).**
- In writing: Fill out a complaint form or write a letter and send it to Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
Complaint forms are available at http://www.dhcs.ca.gov/Pages/Language_Access.aspx
- Electronically: Send an email to CivilRights@dhcs.ca.gov

OFFICE OF CIVIL RIGHTS – U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

If you believe you have been discriminated against because of race, color, national origin, age, disability or sex, you can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights by phone, in writing or electronically:

- By phone: Call **1-800-368-1019**. If you cannot speak or hear well, please call **TTY/TDD: 1-800-537-7697** or **711** to use the California Relay Service.
- In writing: Fill out a complaint form or send a letter to: U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html
- Electronically: Visit the Office for Civil Rights Complaint Portal at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

Aviso de No Discriminación

La discriminación es ilegal. CalViva Health cumple con las leyes estatales y federales sobre derechos civiles. CalViva Health no discrimina ilegalmente, no excluye ni trata a las personas de forma diferente por motivos de sexo, raza, color, religión, ascendencia, nacionalidad, identidad de origen étnico, edad, discapacidad mental o física, enfermedad, información genética, estado civil, género, identidad de género u orientación sexual.

CalViva Health brinda:

- Herramientas y servicios gratuitos a personas con discapacidad para facilitarles la comunicación, como intérpretes del lenguaje de señas calificados e información por escrito en varios formatos (letra grande, audio, formatos electrónicos accesibles y otros).
- Servicios de idioma gratuitos a personas cuya lengua principal no es el inglés, como intérpretes calificados e información escrita en otros idiomas.

Si necesita estos servicios, comuníquese con CalViva Health, al 1-888-893-1569, disponible las 24 horas del día, los 7 días de la semana. Si tiene dificultades de audición o del habla, llame al Servicio de Retransmisión de Datos de California (TTY/TDD: 711). Podemos brindarle este documento en braille, en un archivo PDF accesible, en letra grande, grabado en un casete o en forma electrónica si lo solicita. Para obtener una copia en alguno de estos formatos alternativos, llame o escriba a CalViva Health, 7625 N. Palm Ave., Suite #109, Fresno, CA 93711. Teléfono: 1-888-893-1569, Retransmisión de Datos de California: 711.

CÓMO PRESENTAR UNA QUEJA FORMAL

Si cree que CalViva Health no brindó estos servicios o que se discriminó de alguna otra manera por motivos de sexo, raza, color, religión, ascendencia, nacionalidad, identidad de origen étnico, edad, discapacidad mental o física, enfermedad, información genética, estado civil, género, identidad de género u orientación sexual, puede presentar una queja formal al Departamento de Servicios al Afiliado de CalViva Health. Puede hacerlo por teléfono, por escrito, en persona o en línea.

- Por teléfono: Comuníquese al 1-888-893-1569, disponible las 24 horas del día, los 7 días de la semana. Si tiene dificultades de audición o del habla, llame al Servicio de Retransmisión de Datos de California (TTY/TDD: 711).
  - Por escrito: Complete el formulario de quejas o escriba una carta y envíela a CalViva Health Member Appeals and Grievances Department, P.O. Box 10348, Van Nuys, CA 91410-0348. Teléfono: 1-888-893-1569 (TTY/TDD: 711). Fax: 1-877-831-6019.
- En persona: Visite el consultorio de su médico o vaya a CalViva Health e informe que quiere presentar una queja formal.
- En línea: Visite el sitio web de CalViva Health, www.CalVivaHealth.org.

OFICINA DE DERECHOS CIVILES DEL DEPARTAMENTO DE SERVICIOS DE ATENCIÓN MÉDICA DE CALIFORNIA

También puede presentar una queja sobre los derechos civiles por teléfono, por escrito o en línea a la Oficina de Derechos Civiles del Departamento de Servicios de Atención Médica de California.

- Por teléfono: Comuníquese al **916-440-7370**. Si tiene dificultades de audición o del habla, llame al **711 (Servicios de Retransmisión de Telecomunicaciones)**.
- Por escrito: Complete el formulario de quejas o escriba una carta y envíela a Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Los formularios de quejas están disponibles en http://www.dhcs.ca.gov/Pages/Language_Access.aspx.

- En línea: Envíe un correo electrónico a CivilRights@dhcs.ca.gov.

OFICINA DE DERECHOS CIVILES DEL DEPARTAMENTO DE SALUD Y SERVICIOS HUMANOS DE LOS EE. UU.
Si cree que fue víctima de discriminación por motivos de raza, color, nacionalidad, edad, discapacidad o sexo, también puede presentar una queja sobre los derechos civiles por teléfono, por escrito o en línea a la Oficina de Derechos Civiles del Departamento de Salud y Servicios Humanos de los EE. UU.

- Por teléfono: Comuníquese al **1-800-368-1019**. Si tiene dificultades de audición o del habla, llame a la línea **TTY/TDD: 1-800-537-7697** o al número del Servicio de Retransmisión de Datos de California **711**.
- Por escrito: Complete el formulario de quejas o envíe una carta a U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201. Los formularios de quejas están disponibles en http://www.hhs.gov/ocr/office/file/index.html.
- En línea: Visite el portal para quejas de la Oficina de Derechos Civiles en https://ocrportal.hhs.gov/ocr/portal/lobby.jsf.

Nondiscrimination Notice

Community Health Plan of Imperial Valley follows State and Federal civil rights laws and does not discriminate, exclude people or treat them differently because of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, gender, gender identity or sexual orientation.

Community Health Plan of Imperial Valley provides:

- Free aids and services to people with disabilities to communicate better with us, such as qualified sign language interpreters and written information in other formats (large print, audio, accessible electronic formats, other formats).
- Free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages.

If you need these services or to request this document in an alternative format, contact the Community Health Plan of Imperial Valley (CHPIV) at 1-833-236-4141 (TTY: 711), 24 hours a day, 7 days a week.

If you believe that Community Health Plan of Imperial Valley has failed to provide these services or unlawfully discriminated in another way, you can file a grievance with Community Health Plan of Imperial Valley by phone, in writing, in person or electronically:

- By phone: Contact us 24 hours a day, 7days a week by calling 1-833-236-4141. Or, if you cannot hear or speak well, please call (TTY/TDD 711) to use the California Relay Service.
- In writing: Fill out a complaint form or write a letter and send it to Community Health Plan of Imperial Valley Member Appeals and Grievances Department P.O. Box 10287 Van Nuys CA 91410-0287.
- In person: Visit your doctor's office or Community Health Plan's office and say you want to file a grievance.
- By fax: Community Health Plan of Imperial Valley Member Appeals and Grievances Dept. 1-833-405-0312.
- Electronically: Visit Community Health Plan of Imperial Valley's website at http://chpiv.org/.

You can also file a civil rights complaint with the California Department of Health Care Services, Office of Civil Rights by phone, in writing or electronically:

- By phone: Call 916-440-7370. If you cannot speak or hear well, please call 711.
- In writing: Fill out a complaint form or write a letter and send it to Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Complaint forms are available at http://www.dhcs.ca.gov/Pages/Language Access.aspx.
- Electronically: Send an email to CivilRights@dhcs.ca.gov.

If you believe you have been discriminated against because of race, color, national origin, age, disability, or sex, you can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights by phone, in writing or electronically:

- By phone: 1-800-368-1019 (TDD: 1-800-537-7697).
- In writing: Fill out a complaint form or send a letter to U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201.
  Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html.
- Electronically: Visit the Office for Civil Rights Complaint Portal at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf.

Ukrainian: Якщо вам або людині, якій ви допомагаєте, потрібні послуги перекладу, телефонуйте на номер 1-833-236-4141 (TTY: 711). Ми також надаємо матеріали та послуги для людей з обмеженими можливостями, як-от документи в спеціальному форматі PDF або надруковані великим шрифтом. Ці послуги для вас безкоштовні.

Vietnamese: Nếu quý vị hoặc ai đó mà quý vị đang giúp đỡ cần dịch vụ ngôn ngữ, hãy gọi 1-833-236-4141 (TTY: 711). Chúng tôi cũng có sẵn các trợ giúp và dịch vụ dành cho người khuyết tật, như tài liệu dạng bản in khổ lớn và PDF có thể tiếp cận được. Quý vị được nhận các dịch vụ này miễn phí.

Aviso de No Discriminación

Community Health Plan of Imperial Valley cumple con las leyes estatales y federales sobre derechos civiles y no discrimina, no excluye ni trata a las personas de forma diferente por motivos de sexo, origen racial, color, religión, ascendencia, nacionalidad, identidad de origen étnico, edad, discapacidad mental o física, enfermedad, información genética, estado civil, género, identidad de género u orientación sexual.

Community Health Plan of Imperial Valley brinda:

- Herramientas y servicios gratuitos a personas con discapacidad para que puedan comunicarse mejor con nosotros, como intérpretes calificados de lengua de señas e información por escrito en varios formatos (letra grande, audio, formatos electrónicos accesibles y otros).
- Servicios de idioma gratuitos a personas cuyo idioma principal no es el inglés, como intérpretes calificados e información escrita en otros idiomas.

Si necesita estos servicios o quiere solicitar este documento en otro formato, llame a Community Health Plan of Imperial Valley (CHPIV) al 1-833-236-4141 (TTY: 711) las 24 horas del día, los 7 días de la semana.

Si cree que Community Health Plan of Imperial Valley no le ha brindado estos servicios o que le ha discriminado ilegalmente de alguna otra manera, puede presentar una queja formal a Community Health Plan of Imperial Valley por teléfono, por escrito, en persona o en formato electrónico.

- Por teléfono: Comuníquese con nosotros las 24 horas del día, los 7 días de la semana, al 1-833-236-4141. Si tiene dificultades de audición o del habla, llame al Servicio de Retransmisión de Datos de California (TTY/TDD: 711).
- Por escrito: Complete el formulario de quejas o envíe una carta a Community Health Plan of Imperial Valley Member Appeals and Grievances Department, P.O. Box 10287 Van Nuys, CA 91410-0287.
- En persona: Visite el consultorio del médico o vaya a Community Health Plan e informe que quiere presentar una queja formal.
- Por fax: Departamento de Quejas Formales y Apelaciones para afiliados de Community Health Plan of Imperial Valley, 1-833-405-0312.
- En formato electrónico: Visite el sitio web de Community Health Plan of Imperial Valley, http://chpiv.org/.

También puede presentar una queja sobre los derechos civiles a la Oficina de Derechos Civiles del Departamento de Servicios de Atención Médica de California por teléfono, por escrito o en línea.

- Por teléfono: Llame al 916-440-7370. Si tiene dificultades de audición o del habla, llame al 711.
- Por escrito: Complete el formulario de quejas o escriba una carta y envíela a Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Los formularios de quejas están disponibles en http://www.dhcs.ca.gov/Pages/Language Access.aspx.
- En formato electrónico: Envíe un correo electrónico a CivilRights@dhcs.ca.gov.

Si cree que fue víctima de discriminación por motivos de origen racial, color, nacionalidad, edad, discapacidad o sexo, también puede presentar una queja sobre los derechos civiles por teléfono, por escrito o en línea a la Oficina de Derechos Civiles del Departamento de Salud y Servicios Humanos de los EE. UU.

- Por teléfono: 1-800-368-1019 (TDD: 1-800-537-7697).
- Por escrito: Complete el formulario de quejas o envíe una carta a U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201.
  Los formularios de quejas están disponibles en http://www.hhs.gov/ocr/office/file/index.html.
- En formato electrónico: Visite el portal para quejas de la Oficina de Derechos Civiles, https://ocrportal.hhs.gov/ocr/portal/lobby.jsf.

Nondiscrimination Notice

Health Net follows State and Federal civil rights laws and does not discriminate, exclude people or treat them differently because of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, gender, gender identity or sexual orientation.

Health Net provides:

- Free aids and services to people with disabilities to communicate better with us, such as qualified sign language interpreters and written information in other formats (large print, audio, accessible electronic formats, other formats).
- Free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages.

If you need these services or to request this document in an alternative format, contact the Health Net Customer Contact Center at 1-800-675-6110 (TTY: 711), 24 hours a day, 7 days a week, 365 days a year.

If you believe that Health Net has failed to provide these services or unlawfully discriminated in another way, you can file a grievance with Health Net by phone, in writing, in person or electronically:

- By phone: Call Health Net Civil Rights Coordinator at 1-866-458-2208 (TTY: 711), Monday through Friday, 8 a.m. to 5 p.m.
- In writing: Fill out a complaint form or write a letter and send it to Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- In person: Visit your doctor's office or Health Net and say you want to file a grievance.
- Electronically: Visit Health Net's website at www.healthnet.com

You can also file a civil rights complaint with the California Department of Health Care Services, Office of Civil Rights by phone, in writing or electronically:

- By phone: Call 916-440-7370. If you cannot speak or hear well, please call 711.
- In writing: Fill out a complaint form or write a letter and send it to Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Complaint forms are available at http://www.dhcs.ca.gov/Pages/Language_Access.aspx
- Electronically: Send an email to CivilRights@dhcs.ca.gov

If you believe you have been discriminated against because of race, color, national origin, age, disability or sex, you can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights by phone, in writing or electronically:

- By phone: 1-800-368-1019 (TDD: 1-800-537-7697)
- In writing: Fill out a complaint form or send a letter to U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html
- Electronically: Visit the Office for Civil Rights Complaint Portal at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

Vietnamese: Nếu quý vị hoặc ai đó mà quý vị đang giúp đỡ cần dịch vụ ngôn ngữ, hãy gọi 1-800-675-6110 (TTY: 711). Chúng tôi cũng có sẵn các trợ giúp và dịch vụ dành cho người khuyết tật, như tài liệu dạng bản in khổ lớn và PDF có thể tiếp cận được. Quý vị được nhận các dịch vụ này miễn phí.

إشعار بخصوص عدم التمييز

تمتثل Health Net لقوانين الحقوق المدنية الفدرالية المعمول بها ولا تمارس التمييز أو تستثني الأشخاص أو تعاملهم بشكل مختلف بناءً على الجنس أو العرق أو اللون أو الدين أو السلالة أو الأصل الوطني أو تحديد المجموعة العرقية أو العمر أو الإعاقة العقلية أو الحالة الصحية أو المعلومات الجينية أو الحالة الزوجية أو النوع الاجتماعي أو هوية الاجتماعي أو التوجه الجنسي.

توفر Health Net ما يلي:

- مساعدات وخدمات مجانية للأشخاص الذين يعانون من إعاقات تحول دون التواصل بفعالية معنا، مثل مترجمي لغة إشارة مؤهلين ومعلومات مكتوبة بصيغ أخرى (حروف طباعة كبيرة، وصيغ إلكترونية يسهل الوصول إليها، وغيرها من التنسيقات).
- خدمات لغوية مجانية للأشخاص الذين لا يجيدون التحدث باللغة الإنجليزية، وذلك مثل مترجمين فوريين مؤهلين ومعلومات خطية بلغات أخرى.

إذا كنت تحتاج لهذه الخدمات أو لطلب هذه الوثيقة، يُرجى الاتصال بـ مركز اتصال العملاء الخاص بـHealth Net على الرقم 1-800-675-6110 (TTY: 711)، على مدار 24 ساعة في اليوم، 7 أيام في الأسبوع، و365 أيام في السنة.
إذا كنت تعتقد أن Health Net قد فشلت في تقديم هذه الخدمات أو قد مارست التمييز بصورة غير قانونية من خلال وسيلة أخرى، فيمكنك تقديم تظلم لدى Health Netعبر الهاتف أو خطيًا أو شخصيًا أو إلكترونيًا:

- عبر الهاتف: اتصل بـ منسق الحقوق المدنية لدى Health Net على الرقم 1-866-458-2208 (TTY: 711) من الإثنين إلى الجمعة، بين الساعة 8 صباحًا و5 مساء.
- خطيًا: قم بملء نموذج الشكوى أو اكتب خطابًا وأرسله إلى
  Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- شخصيًا: يمكنك زيارة عيادة طبيبك أو زيارة Health Net والتعبير عن رغبتك في تقديم تظلم.
- إلكترونيًا: يمكنك زيارة موقع Health Net الإلكتروني على www.healthnet.com

يمكنك أيضًا تقديم شكوى تتعلق بالحقوق المدنية إلى مكتب الحقوق المدنية التابع لإدارة خدمات الرعاية الصحية في ولاية California، مكتب الحقوق المدنية عبر الهاتف أو خطيًا أو إلكترونيًا:

- عبر الهاتف: اتصل على الرقم 916-440-7370. إذا كنت غير قادر على التحدث أو السمع جيدًا، فيرجى الاتصال على الرقم 711.
- خطيًا: قم بملء نموذج الشكوى أو اكتب خطابًا وأرسله إلى
  Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights,
  P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  تتوفر نماذج الشكوى على الموقع الإلكتروني http://www.dhcs.ca.gov/Pages/Language_Access.aspx.
- إلكترونيًا: أرسل بريدًا إلكترونيًا إلى CivilRights@dhcs.ca.gov

إذا كنت تعتقد أنك تعرضت للتمييز على أساس العِرق أو اللون أو الأصل القومي أو العمر أو الإعاقة أو الجنس، يمكنك أيضًا تقديم شكوى تتعلق بالحقوق المدنية إلى مكتب الحقوق المدنية التابع لوزارة الصحة والخدمات الإنسانية عبر الهاتف أو خطيًا أو إلكترونيًا:

- عبر الهاتف: 1-800-368-1019 (TDD: 1-800-537-7697)
- خطيًا: قم بملء نموذج الشكوى أو إرسال خطاب إلى
  U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F,
  HHH Building, Washington, DC 20201
  تتوفر نماذج الشكاوي على http://www.hhs.gov/ocr/office/file/index.html.
- إلكترونيًا: يمكنك زيارة بوابة الشكاوى الخاصة بمكتب الحقوق المدنية على https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

Ոչ-խտրականության ծանուցագիր

Health Net-ը հետևում է Նահանգային և Դաշնային քաղաքացիական օրենքներին և խտրականություն չի դրսևորում, բացառում մարդկանց կամ վերաբերվում նրանց որևէ այլ կերպ՝ կախված նրանց սեռից, ռասայից, մաշկի գույնից, կրոնից, նախնիներից, ազգային պատկանելիությունից, էթնիկ խմբի նույնականացումից, տարիքից, մտային անկարողությունից, ֆիզիկական հաշմանդամությունից, բժշկական վիճակից, գենետիկ տեղեկություններից, ամուսնական կարգավիճակից, գենդերից, գենդերային պատկանելությունից կամ սեռական կողմնորոշումից:

Health Net-ը տրամադրում է.

- Անվճար օգնություն և ծառայություններ հաշմանդամություն ունեցող մարդկանց, որպեսզի նրանք ավելի լավ հաղորդակցվեն մեզ հետ, ինչպես օրինակ՝ որակավորված նշանային լեզվի թարգմանիչներ ու գրավոր նյութեր այլ ձևաչափերով (խոշոր տառատեսակով, աուդիո, մատչելի էլեկտրոնային ձևաչափեր, այլ ձևաչափեր):
- Անվճար լեզվական ծառայություններ այն անձանց, ում առաջնային լեզուն անգլերենը չէ, ինչպես օրինակ՝ որակավորված բանավոր թարգմանիչներ և այլ լեզուներով գրավոր նյութեր:

Եթե ձեզ անհրաժեշտ են այս ծառայությունները կամ ուզում եք խնդրել այս փաստաթուղթն այլընտրանքային ձևաչափով, կապվեք Health Net-ի Հաճախորդների կապի կենտրոն 1-800-675-6110 (TTY՝ 711) հեռախոսահամարով, օրը 24 ժամ, շաբաթը 7 օր, տարեկան 365 օր:

Եթե կարծում եք, որ Health Net-ը չի կարողացել տրամադրել այս ծառայությունները կամ հակաօրինական կերպով խտրականություն է տրամադրել, դուք կարող եք բողոք ներկայացնել Health Net-ի դեմ հեռախոսով, գրավոր, անձամբ կամ էլեկտրոնային տարբերակով.

- Հեռախոսով. Զանգահարեք Health Net-ի Քաղաքացիական իրավունքների համակարգողին 1-866-458-2208 (TTY՝ 711) հեռախոսահամարով, երկուշաբթիից ուրբաթ օրերին, 8 a.m.-ից 5 p.m.-ը:
- Գրավոր. Լրացրեք գանգատի ձևաթուղթը կամ նամակ գրեք և ուղարկեք այն հետևյալ հասցեով՝ Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103:
- Անձամբ. Այցելեք ձեր բժշկի գրասենյակ կամ Health Net և տեղեկացրեք, որ ցանկանում եք բողոք ներկայացնել:
- Էլեկտրոնային ձևով. Այցելեք Health Net-ի կայք՝ www.healthnet.com

Կարող եք նաև քաղաքացիական իրավունքների գանգատ ներկայացնել California-ի Առողջական խնամքի ծառայությունների բաժանմունքի Քաղաքացիական իրավունքների գրասենյակ՝ հեռախոսով, գրավոր կամ էլեկտրոնային տարբերակով.

- Հեռախոսով. Զանգահարեք 916-440-7370 հեռախոսահամարով: Եթե չեք խոսում կամ լավ չեք լսում, խնդրում ենք զանգահարել 711:
- Գրավոր. Լրացրեք գանգատի ձևաթուղթը կամ նամակ գրեք և ուղարկեք այն հետևյալ հասցեով՝ Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413:

  Գանգատի ձևերը հասանելի են http://www.dhcs.ca.gov/Pages/Language_Access.aspx հղումով:
- Էլեկտրոնային ձևով. Էլ. նամակ ուղարկեք CivilRights@dhcs.ca.gov

Եթե կարծում եք, որ ձեր նկատմամբ խտրականություն է դրսևորվել ռասայի, մաշկի գույնի, ազգային պատկանելիության, տարիքի, հաշմանդամության կամ սեռի պատճառով, կարող եք նաև քաղաքացիական իրավունքների գանգատ ներկայացնել ԱՄՆ Առողջապահության և մարդու ծառայությունների բաժանմունքի Քաղաքացիական իրավունքների գրասենյակ՝ հեռախոսով, գրավոր կամ էլեկտրոնային տարբերակով.

- Հեռախոսով. 1-800-368-1019 (TDD՝ 1-800-537-7697)
- Գրավոր. Լրացրեք գանգատի ձևաթուղթը կամ նամակ ուղարկեք հետևյալ հասցեով՝
  U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F,
  HHH Building, Washington, DC 20201
  Գանգատի ձևերը մատչելի են http://www.hhs.gov/ocr/office/file/index.html
- Էլեկտրոնային ձևով. Այցելեք Քաղաքացիական իրավունքների գրասենյակի գանգատների հարթակ՝ https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

反歧視聲明

Health Net 遵守州和聯邦民權法律，不會因性別、種族、膚色、宗教、血統、國籍、族裔、年齡、智力障礙、身體殘疾、醫療狀況、遺傳資訊、婚姻狀況、性別、性別認同或性取向而非法歧視、排斥或區別對待他人。

Health Net 可以：

- 為殘疾人士提供免費輔助和服務，例如：合格手語翻譯員以及其他格式（大字版、語音版、無障礙電子版、其他格式）的書面資訊，以讓其可以更好地與我們溝通。
- 為非以英語為母語的人士提供免費的語言服務，例如：合格口譯員以及其他語言版本的書面資訊。

如果您需要上述服務或想要本文件的其他格式，請致電 1-800-675-6110（聽障專線：711）
與 Health Net 客戶聯絡中心 聯絡，服務時間為每年 365 天、每週 7 天、每天 24 小時。

如果您認為 Health Net 未能提供上述服務或透過其他方式非法歧視他人，您可透過電話、寫信、當面或在線上向 Health Net 提出申訴：

- 透過電話：請致電 1-866-458-2208（聽障專線：711）與 Health Net 民權協調員聯絡，服務時間為星期一到星期五上午 8 點到下午 5 點
- 寫信：填寫投訴表，或書寫信函並寄送至 Health Net 民權協調員，地址為 P.O. Box 9103, Van Nuys, CA 91409-9103。
- 當面：前往您的醫生辦公室或 Health Net>，表明您要進行申訴。
- 線上：請瀏覽 Health Net> 的網站 www.healthnet.com

您還可以透過電話、寫信或在線上向 California Department of Health Care Services' Office of Civil Rights 提交民權投訴：

- 透過電話：致電 916-440-7370。如果您有語言或聽力障礙，請致電 711。
- 寫信：填寫投訴表，或書寫信函並寄送至民權辦公室副主任，地址為 Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413。
  您可在 http://www.dhcs.ca.gov/Pages/Language_Access.aspx 網站找到投訴表
- 線上：傳送電子郵件至 CivilRights@dhcs.ca.gov

如果您認為因種族、膚色、原國籍、年齡、殘疾或性取向而受歧視，您也可以透過電話、寫信或在線上向美國 Department of Health and Human Services' Office for Civil Rights 提出民權投訴：

- 透過電話：1-800-368-1019（聽語障專線：1-800-537-7697）
- 寫信：填寫投訴表，或將信函寄送至美國 Department of Health and Human Services，
  地址為 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  請前往 http://www.hhs.gov/ocr/office/file/index.html 取得投訴表
- 線上：請瀏覽 Office for Civil Rights 投訴入口網站 https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

Thai: หากคุณหรือคนที่คุณช่วยเหลือ ต้องการบริการด้านภาษา โทร 1-800-675-6110 (TTY: 711) นอกจากนี้ยังมีความช่วยเหลือและบริการสำหรับผู้ทุพพลภาพ เช่น PDF ที่เข้าถึงได้และเอกสารที่พิมพ์ขนาดใหญ่ บริการเหล่านี้ไม่มีค่าใช้จ่ายสำหรับคุณ

Ukrainian: Якщо вам або людині, якій ви допомагаєте, потрібні послуги перекладу, телефонуйте на номер 1-800-675-6110 (TTY: 711). Ми також надаємо матеріали та послуги для людей з обмеженими можливостями, як-от документи в спеціальному форматі PDF або надруковані великим шрифтом. Ці послуги для вас безкоштовні.

Vietnamese: Nếu quý vị hoặc ai đó mà quý vị đang giúp đỡ cần dịch vụ ngôn ngữ, hãy gọi 1-800-675-6110 (TTY: 711). Chúng tôi cũng có sẵn các trợ giúp và dịch vụ dành cho người khuyết tật, như tài liệu dạng bản in khổ lớn và PDF có thể tiếp cận được. Quý vị được nhận các dịch vụ này miễn phí.

اعلامیه عدم تبعیض

Health Net قوانین حقوق مدنی ایالتی و فدرال را رعایت می‌کند و بر مبنای جنس، نژاد، رنگ پوست، مذهب، تبار، اصلیت ملی، گروه قومی، سن، ناتوانی ذهنی، ناتوانی جسمی، وضعیت پزشکی، اطلاعات ژنتیکی، وضعیت تأهل، جنسیت، هویت جنسی یا گرایش جنسی، هیچ‌کسی را مورد تبعیض، طرد یا رفتار متفاوت قرار نمی‌دهد.

Health Net موارد زیر را ارائه می‌دهد:

- کمک‌ها و خدمات رایگان به افرادی که در ارتباط مؤثر با ما ناتوانی دارند؛ خدماتی نظیر مترجمان شفاهی زبان اشاره دارای صلاحیت و اطلاعات کتبی به فرمت‌های دیگر (چاپ با حروف درشت، صدا، فرمت‌های دسترس‌پذیر الکترونیک و سایر فرمت‌ها).
- خدمات زبانی رایگان به افرادی که زبان اصلی آن‌ها انگلیسی نیست؛ خدماتی نظیر مترجمان شفاهی دارای صلاحیت و اطلاعات نوشته‌شده به زبان‌های دیگر.

اگر به این خدمات نیاز دارید یا برای درخواست این سند در قالب دیگر، به صورت 24 ساعته و در 7 روز هفته و 365 روز سال با Health Net Customer Contact Center به شمارهٔ 1-800-675-6110 (TTY: 711) تماس بگیرید.

اگر فکر می‌کنید که Health Net نتوانسته است این خدمات را به شما ارائه کند یا به هر شکل دیگری تبعیض غیرقانونی قائل شده است، می‌توانید از طریق تماس تلفنی، مکاتبه، مراجعه حضوری یا به صورت الکترونیک شکایت خود را به Health Net ارائه کنید:

- از طریق تلفن: بین ساعات 8 صبح تا 5 عصر روزهای دوشنبه تا جمعه، با هماهنگ‌کنندهٔ حقوق مدنی Health Net به شمارهٔ 1-866-458-2208 (TTY: 711) تماس بگیرید.
- به صورت کتبی: فرم شکایت را تکمیل کنید یا نامه‌ای بنویسید و به این آدرس ارسال نمایید: Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- به صورت حضوری: به مطب پزشک یا دفتر Health Net مراجعه کنید و تمایل خود برای تنظیم شکایت را اعلام نمایید.
- به صورت الکترونیک: به وب‌سایت Health Net به نشانی www.healthnet.com مراجعه کنید

همچنین می‌توانید از طریق تلفن، مکاتبه یا ایمیل یک شکایت حقوق مدنی را به California Department of Health Care Services, Office of Civil Rights ارائه دهید:

- از طریق تلفن: با 916-440-7370 تماس بگیرید. اگر نمی‌توانید به‌خوبی صحبت کنید یا بشنوید، لطفاً با 711 تماس بگیرید.
- به صورت کتبی: فرم شکایت را تکمیل کنید یا نامه‌ای بنویسید و به این آدرس ارسال نمایید: Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  فرمهای شکایت در نشانی http://www.dhcs.ca.gov/Pages/Language_Access.aspx موجود هستند.
- به صورت الکترونیک: ایمیلی به CivilRights@dhcs.ca.gov ارسال کنید

همچنین اگر فکر می‌کنید که به دلیل نژاد، رنگ پوست، اصلیت ملی، سن، معلولیت یا جنسیت مورد تبعیض قرار گرفته‌اید، می‌توانید از طریق تلفن، مکاتبه یا ایمیل یک شکایت حقوق مدنی نزد U.S. Department of Health and Human Services, Office for Civil Rights ارائه کنید:

- از طریق تلفن: 1-800-368-1019 (TDD: 1-800-537-7697)
- به صورت کتبی: فرم شکایت را تکمیل کنید یا نامه‌ای بنویسید و به این آدرس ارسال نمایید: U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  فرم‌های شکایت در نشانی http://www.hhs.gov/ocr/office/file/index.html موجود هستند.
- به صورت الکترونیک: به درگاه دفتر شکایات حقوق مدنی به نشانی https://ocrportal.hhs.gov/ocr/portal/lobby.jsf مراجعه کنید.

Уведомление о недопущении дискриминации

Health Net соблюдает требования федерального законодательства и законов штатов, касающихся гражданских прав, и не допускает дискриминации, не отказывает в обслуживании и не относится к одним людям иначе, чем к другим, на основании их пола, расы, цвета кожи, религии, исторических корней, страны происхождения, принадлежности к этнической группе, возраста, ограниченных психических и физических возможностей, заболеваний, генетической информации, семейного положения, гендера, гендерной самоидентификации или сексуальной ориентации.

Health Net обеспечивает указанные ниже услуги.

- Бесплатная помощь и услуги для людей с ограниченными возможностями для более эффективной коммуникации с нами, в том числе услуги квалифицированных сурдопереводчиков и печатные материалы в других форматах (крупный шрифт, специальный электронный формат, аудиозапись и т. д.).
- Бесплатные услуги перевода для людей, чей родной язык — не английский, в том числе услуги квалифицированных устных переводчиков и печатные материалы на других языках.

Если вам нужны эти услуги или вы хотите запросить данный документ в альтернативном формате, свяжитесь с контактным центром для клиентов Health Net по телефону 1-800-675-6110 (TTY: 711). Линия работает круглосуточно и без выходных.

Если вы считаете, что компания Health Net не предоставила вам такие услуги или иным образом незаконно дискриминировала вас, вы можете подать жалобу в Health Net по телефону, лично, в письменном или в электронном виде.

- По телефону. Позвоните координатору по вопросам гражданских прав Health Net по номеру 1-866-458-2208 (TTY: 711) с 8:00 до 17:00 с понедельника по пятницу.
- В письменной форме. Заполните бланк жалобы или напишите письмо и отправьте его по следующему адресу: Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- Лично. Придите в офис своего врача или Health Net и сообщите, что хотите подать претензию.
- В электронной форме. Посетите сайт Health Net www.healthnet.com.

Кроме того, вы можете подать жалобу на нарушение своих гражданских прав в Управление по вопросам гражданских прав Департамента здравоохранения штата California по телефону, в письменной или электронной форме.

- По телефону. Позвоните по номеру 916-440-7370. Если у вас есть трудности с речью или слухом, позвоните по номеру 711.
- В письменной форме. Заполните бланк жалобы или напишите письмо и отправьте его по следующему адресу: Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Бланки жалоб есть на сайте http://www.dhcs.ca.gov/Pages/Language_Access.aspx.
- В электронной форме. Отправьте электронное письмо на адрес CivilRights@dhcs.ca.gov.

Если вы считаете, что в отношении вас была допущена дискриминация на основании расы, цвета кожи, страны происхождения, возраста, ограниченных возможностей или пола, вы можете подать жалобу на нарушение ваших гражданских прав в Управление по вопросам гражданских прав при Департаменте здравоохранения и социальных служб США по телефону, в письменной или электронной форме.

- По телефону. Позвоните по номеру 1-800-368-1019 (TDD: 1-800-537-7697).
- В письменной форме. Заполните бланк жалобы или напишите письмо и отправьте его по следующему адресу: U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201.
  Бланки жалоб есть на сайте http://www.hhs.gov/ocr/office/file/index.html.

Thai: หากคุณหรือคนที่คุณช่วยเหลือ ต้องการบริการด้านภาษา โทร 1-800-675-6110 (TTY: 711) นอกจากนี้ยังมีความช่วยเหลือและบริการสำหรับผู้ทุพพลภาพ เช่น PDF ที่เข้าถึงได้และเอกสารที่พิมพ์ขนาดใหญ่ บริการเหล่านี้ไม่มีค่าใช้จ่ายสำหรับคุณ

Ukrainian: Якщо вам або людині, якій ви допомагаєте, потрібні послуги перекладу, телефонуйте на номер 1-800-675-6110 (TTY: 711). Ми також надаємо матеріали та послуги для людей з обмеженими можливостями, як-от документи в спеціальному форматі PDF або надруковані великим шрифтом. Ці послуги для вас безкоштовні.

Vietnamese: Nếu quý vị hoặc ai đó mà quý vị đang giúp đỡ cần dịch vụ ngôn ngữ, hãy gọi 1-800-675-6110 (TTY: 711). Chúng tôi cũng có sẵn các trợ giúp và dịch vụ dành cho người khuyết tật, như tài liệu dạng bản in khổ lớn và PDF có thể tiếp cận được. Quý vị được nhận các dịch vụ này miễn phí.

Aviso de No Discriminación

Health Net cumple con las leyes estatales y federales sobre derechos civiles y no discrimina, no excluye ni trata a las personas de forma diferente por motivos de sexo, raza, color, religión, ascendencia, nacionalidad, identidad de origen étnico, edad, discapacidad mental o física, enfermedad, información genética, estado civil, género, identidad de género u orientación sexual.

Health Net brinda:

- Herramientas y servicios gratuitos a personas con discapacidad para facilitarles la comunicación con nosotros, como intérpretes del lenguaje de señas calificados e información por escrito en varios formatos (letra grande, audio, formatos electrónicos accesibles y otros).
- Servicios de idioma gratuitos a personas cuya lengua principal no es el inglés, como intérpretes calificados e información escrita en otros idiomas.

Si necesita esos servicios o quiere solicitar este documento en un formato alternativo, llame al Centro de Comunicación con el Cliente de Health Net, al 1-800-675-6110 (TTY: 711), disponible las 24 horas del día, los 7 días de la semana, los 365 días del año.

Si cree que Health Net no brindó estos servicios o que se discriminó de alguna otra manera ilícita, puede presentar una queja formal a Health Net por teléfono, por escrito, en persona o en línea.

- Por teléfono: Comuníquese con el coordinador de derechos civiles de Health Net, 1-866-458-2208 (TTY: 711), de lunes a viernes, de 8 a.m. a 5 p.m.
- Por escrito: Complete el formulario de quejas o envíe una carta a Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- En persona: Visite el consultorio de su médico o vaya a Health Net e informe que quiere presentar una queja formal.
- En línea: Visite el sitio web de Health Net, www.healthnet.com.

También puede presentar una queja sobre los derechos civiles por teléfono, por escrito o en línea a la Oficina de Derechos Civiles del Departamento de Servicios de Atención Médica de California.

- Por teléfono: Comuníquese al 916-440-7370. Si tiene dificultades de audición o del habla, llame al 711.
- Por escrito: Complete el formulario de quejas o escriba una carta y envíela a Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Los formularios de quejas están disponibles en http://www.dhcs.ca.gov/Pages/Language_Access.aspx.
- En línea: Envíe un correo electrónico a CivilRights@dhcs.ca.gov.

Si cree que fue víctima de discriminación por motivos de raza, color, nacionalidad, edad, discapacidad o sexo, también puede presentar una queja sobre los derechos civiles por teléfono, por escrito o en línea a la Oficina de Derechos Civiles del Departamento de Salud y Servicios Humanos de los EE. UU.

- Por teléfono: 1-800-368-1019 (TDD: 1-800-537-7697)
- Por escrito: Complete el formulario de quejas o envíe una carta a U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201.
  Los formularios de quejas están disponibles en http://www.hhs.gov/ocr/office/file/index.html
- En línea: Visite el portal para quejas de la Oficina de Derechos Civiles en https://ocrportal.hhs.gov/ocr/portal/lobby.jsf.

English: If you, or someone you are helping, need language services, call 1-800-675-6110 (TTY: 711). Aids and services for people with disabilities, like accessible PDF and large print documents, are also available. These services are at no cost to you.

Abiso sa Hindi Pandidiskrimina

Sumusunod ang Health Net sa mga Pang-estado at Pederal na batas sa karapatang sibil at hindi ito nandidiskrimina, nagbubukod ng mga tao o nagtatrato nang iba dahil sa kasarian, lahi, kulay, relihiyon, lipi, bansang pinagmulan, pagkakakilanlan ng kinabibilangang etniko, edad, kapansanan sa pag-iisip, pisikal na kapansanan, medikal na kundisyon, impormasyong henetiko, katayuan sa pag-aasawa, kasarian, kinikilalang kasarian o sekswal na oryentasyon.

Ang Health Net ay nagbibigay ng:

- Mga libreng tulong at serbisyo sa mga taong may mga kapansanan upang makipag-usap nang mas mabuti sa amin, tulad ng mga kwalipikadong interpreter ng sign language at nakasulat na impormasyon sa iba pang format (malaking print, naa-access na electronic na format, iba pang format).
- Mga libreng serbisyo sa wika sa mga taong hindi Ingles ang pangunahing wika, tulad ng mga kwalipikadong interpreter at impormasyong nakasulat sa iba pang mga wika.

Kung kailangan mo ng mga serbisyong ito o para hingiin ang dokumentong ito ng nasa alternatibong format, makipag-ugnayan sa Health Net Customer Contact Center sa 1-800-675-6110 (TTY: 711), 24 na oras sa isang araw, 7 araw sa isang linggo, 365 araw sa isang taon.

Kung naniniwala kang nabigo ang Health Net na ibigay ang mga serbisyong ito o labag sa batas na nandiskrimina sa ibang paraan, maaari kang maghain ng karaingan sa Health Net sa pamamagitan ng telepono, pagsulat, nang personal, o sa paraang elektroniko:

- Sa pamamagitan ng telepono: Tumawag sa Health Net Civil Rights Coordinator sa 1-866-458-2208 (TTY: 711), Lunes hanggang Biyernes, 8 a.m. hanggang 5 p.m.
- Sa pamamagitan ng pagsulat: Sagutan ang form para sa reklamo o gumawa ng sulat at ipadala ito sa Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- Nang personal: Bisitahin ang tanggapan ng iyong doktor o ang Health Net at sabihin na gusto mong maghain ng karaingan.
- Sa paraang elektroniko: Bumisita sa website ng Health Net sa www.healthnet.com

Maaari ka ring maghain ng reklamo tungkol sa mga karapatang sibil sa California Department of Health Care Services, Office of Civil Rights sa pamamagitan ng telepono, pagsulat, o sa paraang elektroniko:

- Sa pamamagitan ng telepono: Tumawag sa 916-440-7370. Kung hindi ka nakakapagsalita o nakakarinig nang maayos, mangyaring tumawag sa 711.
- Sa pamamagitan ng pagsulat: Sagutan ang form para sa reklamo o gumawa ng sulat at ipadala ito sa Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Available ang mga form para sa reklamo sa http://www.dhcs.ca.gov/Pages/Language_Access.aspx
- Sa paraang elektroniko: Magpadala ng email sa CivilRights@dhcs.ca.gov

Kung naniniwala kang diniskrimina ka dahil sa lahi, kulay, bansang pinagmulan, edad, kapansanan o kasarian, maaari ka ring maghain ng reklamo tungkol sa U.S. Department of Health and Human Services, Office for Civil Rights sa pamamagitan ng telepono, pagsulat, o sa paraang elektroniko:

- Sa pamamagitan ng telepono: 1-800-368-1019 (TDD: 1-800-537-7697)
- Sa pamamagitan ng pagsulat: Sagutan ang form para sa reklamo o magpadala ng sulat sa U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  Available ang mga form para sa reklamo sa http://www.hhs.gov/ocr/office/file/index.html
- Sa paraang elektroniko: Bisitahin ang Portal para sa Reklamo ng Tanggapan para sa mga Karapatang Sibil sa https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

Ukrainian: Якщо вам або людині, якій ви допомагаєте, потрібні послуги перекладу, телефонуйте на номер 1-800-675-6110 (TTY: 711). Ми також надаємо матеріали та послуги для людей з обмеженими можливостями, як-от документи в спеціальному форматі PDF або надруковані великим шрифтом. Ці послуги для вас безкоштовні.

Vietnamese: Nếu quý vị hoặc ai đó mà quý vị đang giúp đỡ cần dịch vụ ngôn ngữ, hãy gọi 1-800-675-6110 (TTY: 711). Chúng tôi cũng có sẵn các trợ giúp và dịch vụ dành cho người khuyết tật, như tài liệu dạng bản in khổ lớn và PDF có thể tiếp cận được. Quý vị được nhận các dịch vụ này miễn phí.

Thông báo không phân biệt đối xử

Health Net tuân thủ các luật về dân quyền của Tiểu bang và Liên bang và không phân biệt đối xử, loại trừ mọi người hoặc đối xử khác biệt với họ vì lý do giới tính, chủng tộc, màu da, tôn giáo, tổ tiên, nguồn gốc xuất thân, nhận dạng nhóm dân tộc, tuổi tác, tình trạng khuyết tật tâm thần, tình trạng khuyết tật thể chất, tình trạng y tế, thông tin di truyền, tình trạng hôn nhân, giới, bản dạng giới hoặc khuynh hướng tình dục.

Health Net cung cấp:

- Dịch vụ và hỗ trợ miễn phí cho người khuyết tật để giao tiếp hiệu quả với chúng tôi, chẳng hạn như thông dịch viên ngôn ngữ ký hiệu có trình độ và thông tin bằng văn bản ở các định dạng khác (bản in khổ lớn, định dạng điện tử có thể truy cập, các định dạng khác).
- Dịch vụ ngôn ngữ miễn phí cho những người có ngôn ngữ chính không phải là tiếng Anh, chẳng hạn như thông dịch viên có trình độ và thông tin được viết bằng các ngôn ngữ khác.

Nếu quý vị cần những dịch vụ này hoặc yêu cầu cung cấp tài liệu này ở định dạng thay thế, hãy liên hệ với Trung tâm Liên lạc Hội viên Health Net theo số 1-800-675-6110 (TTY: 711), 24 giờ một ngày, 7 ngày một tuần, 365 ngày một năm.

Nếu quý vị tin rằng Health Net đã không cung cấp các dịch vụ này hoặc phân biệt đối xử trái pháp luật theo một cách khác, quý vị có thể nộp đơn khiếu nại cho Health Net qua điện thoại, gửi thư, theo hình thức trực tiếp hoặc bằng phương tiện điện tử:

- Qua điện thoại: Hãy gọi Điều phối viên dân quyền của Health Net theo số 1-866-458-2208 (TTY: 711), từ thứ Hai đến thứ Sáu, 8 giờ sáng đến 5 giờ chiều
- Gửi thư: Điền thông tin vào mẫu đơn than phiền hoặc viết thư và gửi đến:
  Health Net Civil Rights Coordinator, P.O. Box 9103, Van Nuys, CA 91409-9103.
- Trực tiếp: Đến văn phòng bác sĩ của quý vị hoặc Health Net và cho biết quý vị muốn nộp đơn khiếu nại.
- Phương tiện điện tử: Truy cập trang web của Health Nettại địa chỉ www.healthnet.com

Quý vị cũng có thể nộp đơn than phiền về dân quyền cho Văn phòng Đặc trách Dân quyền thuộc Sở Quản lý Chăm sóc Sức khỏe của Tiểu Bang California qua điện thoại, gửi thư hoặc bằng phương tiện điện tử:

- Qua điện thoại: Gọi đến số 916-440-7370. Nếu quý vị không thể nói hoặc nghe rõ, vui lòng gọi số 711.
- Gửi thư: Điền thông tin vào mẫu đơn than phiền hoặc viết thư và gửi đến Deputy Director, Office of Civil Rights, Department of Health Care Services, Office of Civil Rights, P.O. Box 997413, MS 0009, Sacramento, CA 95899-7413.
  Mẫu đơn than phiền sẵn có tại http://www.dhcs.ca.gov/Pages/Language_Access.aspx
- Phương tiện điện tử: Gửi email đến địa chỉ CivilRights@dhcs.ca.gov

Nếu quý vị tin rằng quý vị đã bị phân biệt đối xử vì lý do chủng tộc, màu da, quốc gia xuất thân, tuổi tác, tình trạng khuyết tật hoặc giới tính, quý vị cũng có thể nộp đơn than phiền về dân quyền cho Văn phòng đặc trách Dân quyền thuộc Bộ Y tế và Dịch vụ Nhân sinh Hoa Kỳ qua điện thoại, gửi thư hoặc bằng phương tiện điện tử:

- Qua điện thoại: 1-800-368-1019 (TDD: 1-800-537-7697)
- Gửi thư: Điền thông tin vào mẫu đơn than phiền hoặc gửi thư đến U.S. Department of Health and Human Services, 200 Independence Avenue SW, Room 509F, HHH Building, Washington, DC 20201
  Mẫu than phiền sẵn có tại http://www.hhs.gov/ocr/office/file/index.html
- Phương tiện điện tử: Truy cập Cổng thông tin than phiền của Văn phòng đặc trách Dân quyền tại https://ocrportal.hhs.gov/ocr/portal/lobby.jsf

English: If you, or someone you are helping, need language services, call 1-800-675-6110 (TTY: 711). Aids and services for people with disabilities, like accessible PDF and large print documents, are also available. These services are at no cost to you.

SECTION: Personnel	
POLICY AND PROCEDURE: Non-Physician Medical Practitioners	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________

POLICY:

Physician offices will have standardized procedures that clearly define the scope of services and supervision of all non-physician medical providers (NPMP).

PROCEDURE:

I. SCOPE OF PRACTICE OF NON-PHYSICIAN MEDICAL PRACTITIONERS

A. Standardized procedures defining the scope of practice of Nurse Practitioners, Certified Nurse Midwives, and Physician Assistants must be documented on-site. Standardized procedures identify the furnishing of drugs or devices, extent of physician supervision, method of periodic review of competence, and review of provisions in the standardized procedures.

B. **Scope of practice for non-physician medical practitioners (NPMP) is clearly defined. Standardized procedures shall undergo periodic review, with signed, dated revisions completed at each change in scope of work. Certified Nurse Midwife (CNM):** The certificate to practice nurse mid-wifery authorizes the holder, under supervision of a licensed physician, to attend cases of normal childbirth and to provide prenatal, intrapartum, and postpartum care, including family planning care for the mother and immediate care for the newborn. The supervising and back-up physician for the CNM must be credentialed to perform obstetrical care in the same delivering facility in which the CNM has delivery privileges.

C. **Nurse Practitioner (NP):** Nurse practitioners may provide primary care and perform advanced procedures. The extent of required supervision must be specified in the **standardized procedures**.

Physician Assistants (PA): Every PA is required to have the following documents:

1) <u>Practice Agreement:</u> **Defines specific procedures identified in practice protocols or specifically authorized by the supervising physician, and must be dated and signed by physician and PA. An original or copy must be readily accessible at all practice sites in which the PA works. There is no established time period for renewing the Practice Agreement, but it is expected that the Practice Agreement will be revised, dated and signed whenever any changes occur. Failure to maintain a Practice Agreement is a**

violation of the Physician Assistant Regulations and is grounds for disciplinary action by the Medical Board of California against a physician assistant's licensure.

2) Approved Supervising Physician's Responsibility for Supervision of Physician Assistants' Practice Agreement: Defines supervision responsibilities and methods required by Title 16, section 1399.545 of the Physician Assistant Regulations, and is signed by the physician. The following procedures must be identified:

a) **Transport and back-up procedures for when the supervising physician is not on the premises.**

b) **One or more methods for performing medical record review by the supervising physician.**

c) **Responsibility for physician review and countersigning of medical records.**

1. **Responsibility of the PA to enter the name of approved supervising physician responsible for the patient on the medical record. Delegation of Services Agreement: Defines specific procedures identified in practice protocols or specifically authorized by the supervising physician, and must be dated and signed by the physician and PA. An original or copy must be readily accessible at all practice sites in which the PA works.**

The Agreement will be revised, dated, and signed any time changes occur. Failure to maintain a Delegation of Services Agreement is a violation of the Physician Assistant Regulations and is grounds for disciplinary action by the Medical Board of California against a physician assistant's licensure.

2. **Approved Supervising Physician's Responsibility for Supervision of Physician Assistants Agreement: Defines supervision responsibilities and methods required by Title 16, section 1399.545 of the Physician Assistant Regulations, and is signed by the physician. The following procedures must be identified:**
3. Each NP, CNM, and PA that prescribes controlled substances must have a valid DEA Registration Number.

II. SUPERVISION OF NON-PHYSICIAN MEDICAL PRACTITIONERS

1. The supervising physician holds ultimate responsibility for the practice of each supervised non-physician medical practitioner. A The MD is permitted to supervise:

2. Up to 4 Physician Assistants
3. There is no limit to Nurse Practitioners the MD may supervise **UNLESS** the FNPs have Furnishing Licenses, then only a **Maximum of 4 Nurse Practitioners with a Furnishing License**
4. A total of 8 equaling 4 FNP and 4 PAs' at one time and
5. The MD may also supervise 4 Certified Nurse Midwives

2. **This may bring the TOTAL number of mid-levels supervised to 12

    1. **<u>Evidence of Non-Physician Medical Practitioner Supervision:</u> The supervising physician shall review, countersign, and date a minimum of five percent sample of medical records of patients treated by the physician assistant functioning under these protocols within thirty (30) days as a component of the Practice Agreement. Standardized Procedures for NP or CNM should identify the furnishing of drugs or devices, extent of physician or surgeon supervision, method of periodic review of competence, including peer review, and review of provisions in the Standardized Procedures. Standardized Procedures shall undergo periodic review, with signed, dated revisions completed at each change in scope of work. Evidence of supervision of NPMP(s) are verifiable through on-site observation of supervisory processes, documentation, or supervisor/NPMP's knowledge of the process.**

- California Nursing Practice Act Article 8 BPC §2834

Update per AB 2346; highlights may be found In Medical Board of CA Newsletter Summer 2014.

A. The designated supervising or back-up physician is available in person or by electronic communication at all times when a NPMP is caring for patients.

III. IDENTIFICATION OF HEALTH CARE PRACTITIONERS

A. A health care practitioner shall disclose his or her name and practitioner's license status, as granted by the State of California, on a nametag with at least 18-point type. A health care practitioner in a practice or office, whose license is prominently displayed, may opt not to wear a nametag.

Note: It is unlawful for any person to use the title "nurse" in reference to himself or herself, in any capacity, except for an individual who is a registered nurse or licensed vocational nurse.

NEW REGULATION – NOTIFICATION TO CONSUMERS

Effective August 11, 2011, Section 1399.547, Title 16 of the California Code of Regulations, mandated by Business and Professions Code section 138, requires that physician assistants inform patients that they are licensed and regulated by the Physician Assistant Committee (Committee). The notification must include the following statement and information:

NOTIFICATION TO CONSUMERS
PHYSICIAN ASSISTANTS ARE LICENSED AND REGULATED BY THE PHYSICIAN ASSISTANT COMMITTEE
(916) 561-8780
WWW.PAC.CA.GOV

Physician assistants may provide this notification by one of the following three methods:

- Prominently posting a sign in an area of their offices conspicuous to patients, in at least 48-point type in Arial font.

- Including the notification in a written statement, signed and dated by the patient or patient's representative, and kept in that patient's file, stating the patient understands the physician assistant is licensed and regulated by the Committee.

- Including the notification in a statement on letterhead, discharge instructions, or other document given to a patient or the patient's representative, where the notification is placed immediately above the signature line for the patient in at least 14-point type.

The regulation language and notification follows and may be downloaded for your use.

For more information, please contact the Executive Officer of the Physician Assistant Committee, Elberta Portman, at (916) 561-8782 or Elberta.Portman@mbc.ca.gov

California Code of Regulations:

1399.547. Notification to Consumers.

(a) A licensee engaged in providing medical services shall provide notification to each patient of the fact that the licensee is licensed and regulated by the committee. The notification shall include the following statement and information:

NOTIFICATION TO CONSUMERS

Physician assistants are licensed and regulated
by the Physician Assistant Committee
(916) 561-8780
www.pac.ca.gov

(b) The notification required by this section shall be provided by one of the following methods:

(1) Prominently posting the notification in an area visible to patients on the premises where the licensee provides the licensed services, in which case the notice shall be in at least 48-point type in Arial font.

(2) Including the notification in a written statement, signed and dated by the patient or the patient's representative and retained in that patient's medical records, stating the patient understands the physician assistant is licensed and regulated by the committee.

(3) Including the notification in a statement on letterhead, discharge instructions, or other document given to a patient or the patient's representative, where the notice is placed immediately above the signature line for the patient in at least 14-point type.

Note: Authority cited: Section 3510, Business and Professions Code. Reference: Section 138, Business and Professions Code.

HISTORY

1. New section filed 7-12-2011; operative 8-11-2011 (Register 2011, No. 28).

NOTIFICATION TO CONSUMERS

Physician Assistants are licensed and regulated by the Physician Assistant Committee
(916) 561-8780
www.pac.ca.gov

NOTICE TO PATIENTS

Medical doctors are licensed and regulated by the Medical Board of California.

To check up on a license or to file a complaint go to

www.mbc.ca.gov,

email: licensecheck@mbc.ca.gov,

or call (800) 633-2322.

Password reset 3

Dashboard 5

Placing a request 6

Retrieve completed projects 11

Introduction

This document outlines the process for submitting Medi-Cal notice of action (NOA) letters for translation into member requested language or alternate format using the Akorbi Plunet portal.

Health Net* will cover these costs for NOA letters when the below criteria are met:

- Must be for Health Net Medi-Cal member NOA translations or alternate formats only.
- Must use current Health Net pre-translated NOA template (available at www.iceforhealth.org/home.asp).
- Must use Health Net's preferred vendor, Akorbi Language Consulting (Akorbi).

To avoid issues and errors, please follow the process shown in this document for each letter submitted.

Please note: You must keep a log of all letters that you are submitting for translation or conversion to an alternate format for our members. During your annual utilization management (UM) compliance audit, this log may be requested so that samples can be selected for validation as part of the audit scope.

Request a username and password

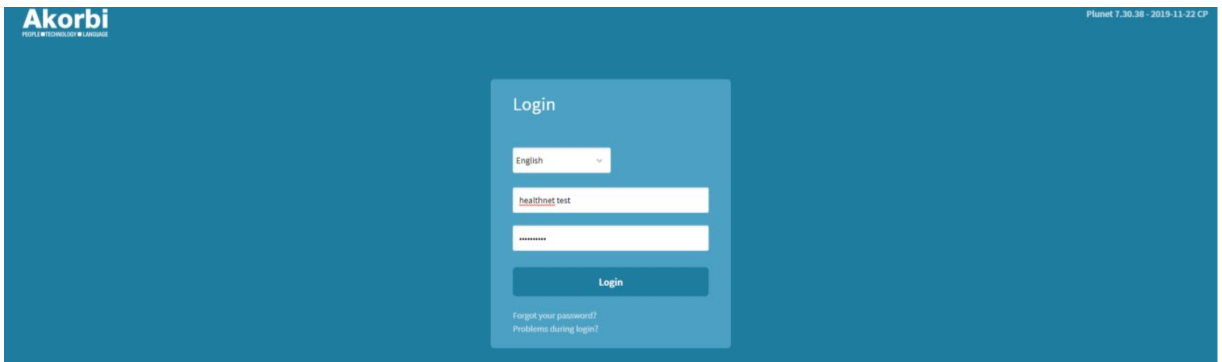
1. If you do not have a Health Net specific username and password for the Akorbi Plunet system, send an email to Delegation_Oversight_Group@Centene.com to request access. Include the following in your email:
   a. Requested username.
   b. First and last name of primary user.
   c. Primary email address (for all notifications from the system).
   d. Secondary email addresses (will be copied via CC on all notifications).

Please note: It is recommended that you have one login and password for all Health Net requests that is shared by the required users in your organization. This will minimize the likelihood of being unable to retrieve your completed project as they can only be retrieved through the account that submitted the request.

Login and password reset

2. Enter the website address plunet.akorbi.com into your browser.
3. Enter your username and password to access the system.
    a. If you use the wrong password for login **three times in a row**, your account will automatically be locked for 24 hours. To unlock the account earlier please contact healthnet@akorbi.com.

Note: To be able to send requests using Akorbi Plunet portal, you need Internet Explorer (Version 8 or higher). You can also use Google Chrome, Mozilla Firefox or Safari.



Password reset

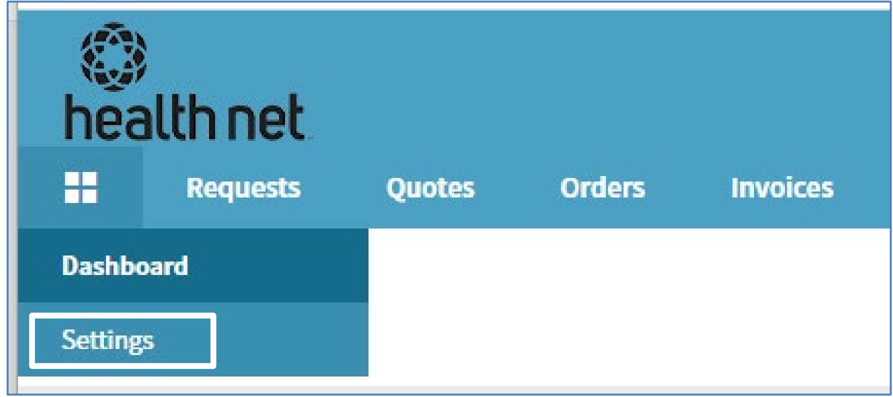
If you have forgotten your password click on "**Forgot your password?"** You will receive an email with a link to trigger a new password. Click the link in the email and you will be sent another email with your temporary password and instructions on how to reset your password.

Please note, there will be two emails sent as part of the password reset process.

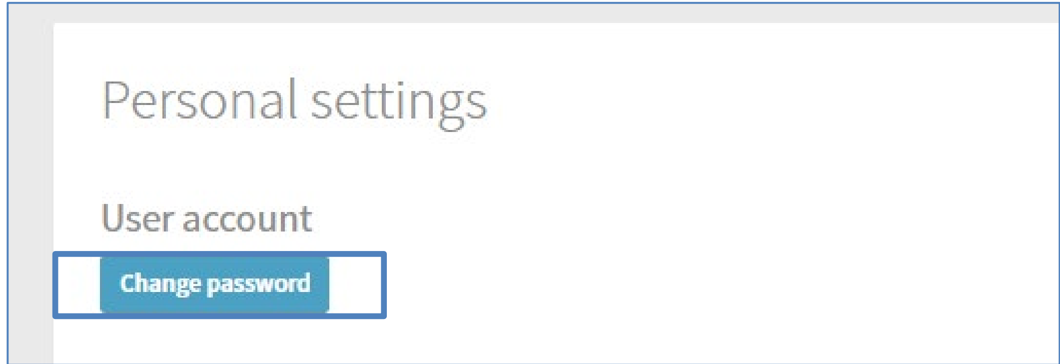
Manually change password

To manually change your password in the Plunet system:

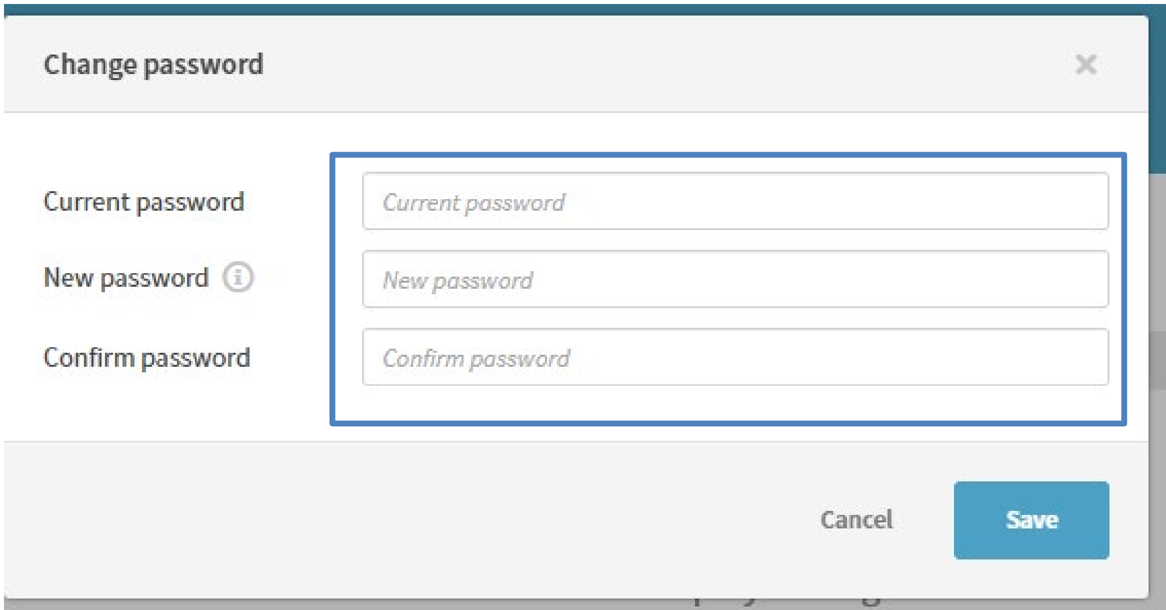
1. Click on the four blocks icon on the top left of your screen.
2. Select "Settings" for the drop down menu.



3. Click “Change password” in the user account section.



4. Enter your old password in the first field.
5. Enter your new password in the second and third fields.
6. Click “Save”.



Note: You will receive an automated email every three months requesting you to change your password. To avoid login issues, please complete your password resets as instructed as soon as you receive the email.

Dashboard

Once you log in, you will be taken to your Dashboard. The dashboard displays all your orders in compressed form by status.

By clicking on the description (e.g. Pending or InProgress) you will be able to see additional information about your requests.

Dashboard

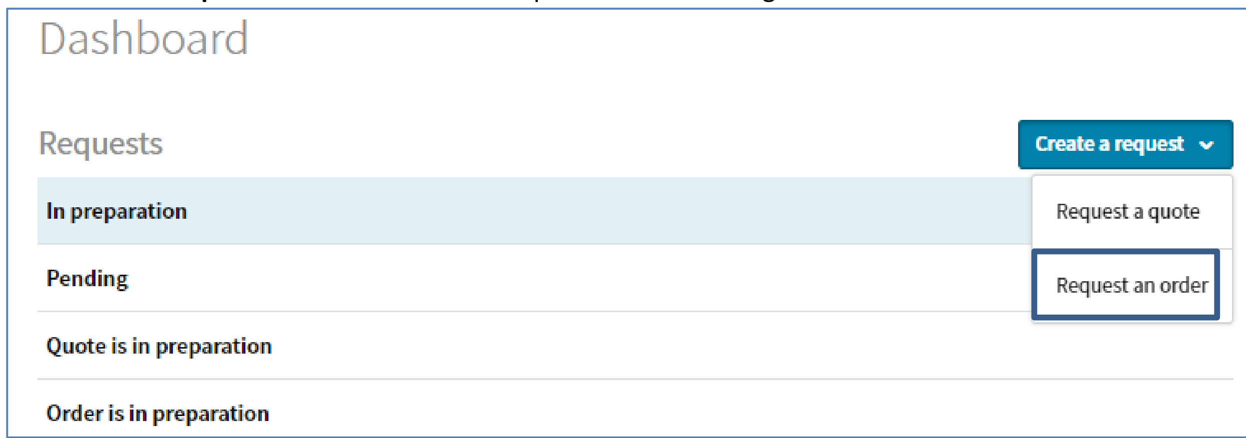
Order is in preparation

Placing a request

To begin your request for a letter translation or alternate format:

1. Click the "**Create a request"** button on your dashboard**.**
2. Select "**Request an order"** from the drop-down menu to begin.

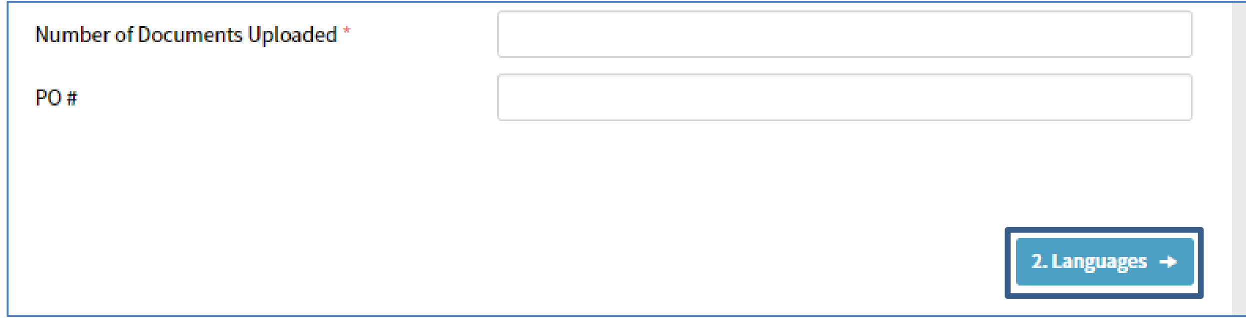


3. Enter the following information into the project fields:

Field	Details
Project Name	Must follow the naming convention: APL 21-011_[Template Type]_[Auth Number]_[Turnaround Time] • **APL 20-011:** Notes the regulatory requirement. • **Template Type:** Enter one of the following - Carve-out, Deny, Delay, Modify, or Terminate. • **Auth Number:** Enter the authorization number for this notification. • **Turnaround Time:** Enter the timeframe in which you need the project completed. Please note, these are business hours. Requests sent after business hours will be processed the following day. Project Name Example: APL-2011_Deny_008776498232_12 hours
Reference Number	Enter the member/subscriber ID number.
Requested Delivery Date	Enter the date and time by which you would like your project completed.
Customer	Should be pre-populated to "Health Net."
PPG	Select the applicable PPG from the drop-down list. Note: They are shown as [PPGID] PPG Name.
Alternate Format	**Select "Not applicable" for translation requests.** For alternate format requests, select one of the following: • Audio Format • Braille • Large Print

Field	Details
Lines of Business	Select the following (once selected, click the checkmark): • CA-Medi-Cal (For Health Net direct members) • Molina (For Health Net Molina members)
Department of	Select "PPG Delegated" from the drop-down list.
Number of Documents	Enter 1. Each letter must be submitted separately.

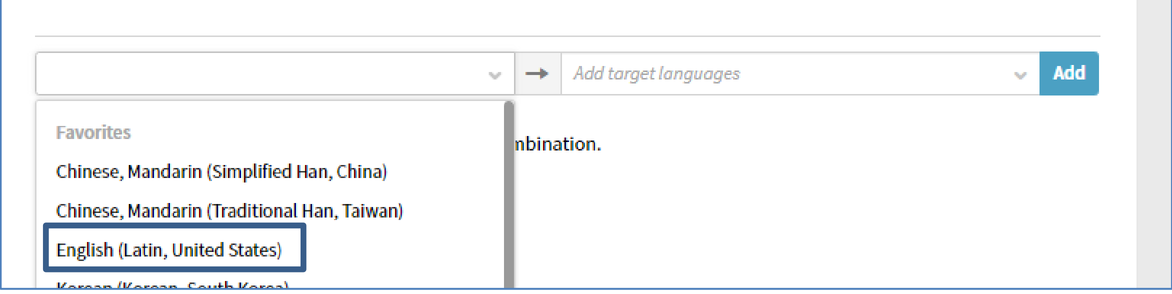
4. Click the Languages button to move to the next screen.



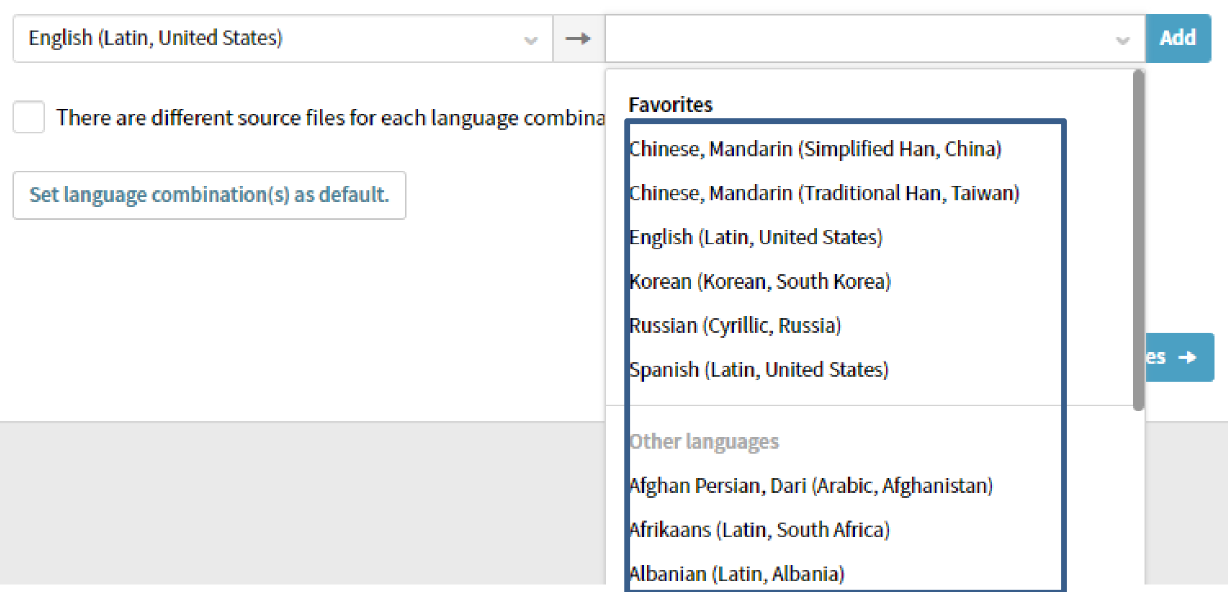
Below are examples of threshold languages you can select from.

English (Latin, United States) → Arabic (Arabic, World)
English (Latin, United States) → Armenian (Armenian, Armenia)
English (Latin, United States) → Chinese, Mandarin (Traditional Han, Taiwan)
English (Latin, United States) → Iranian Persian, Farsi (Arabic, Iran)
English (Latin, United States) → Khmer (Khmer, Cambodia)
English (Latin, United States) → Korean (Korean, South Korea)
English (Latin, United States) → Russian (Cyrillic, Russia)
English (Latin, United States) → Spanish (Latin, United States)
English (Latin, United States) → Tagalog (Latin, Philippines)
English (Latin, United States) → Vietnamese (Latin, Vietnam)
English (Latin, United States) → Hmong, White (Latin, United States)

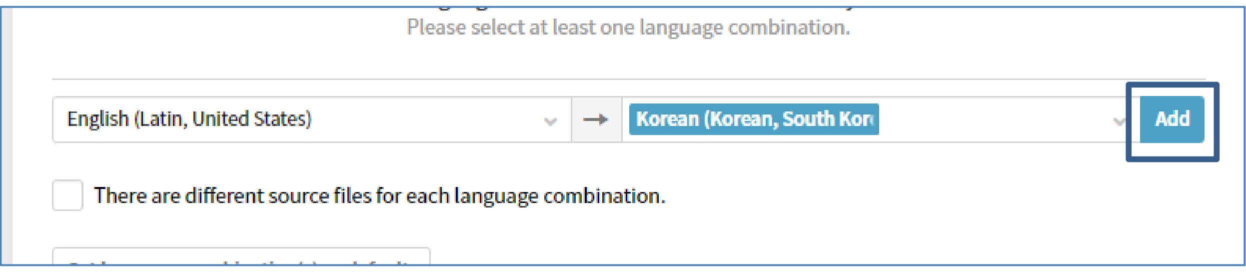
5. Select the Source language from the drop-down box, selecting English.



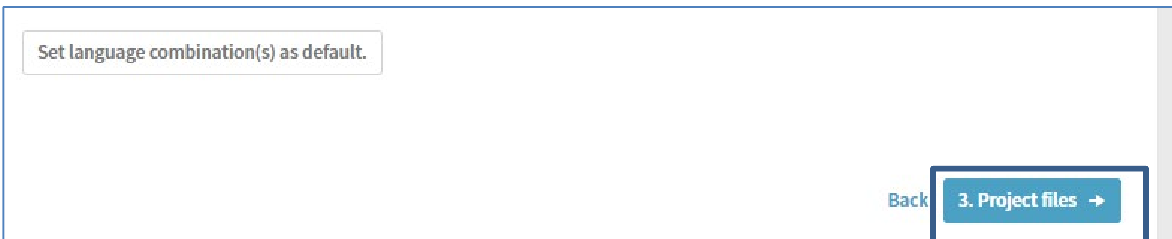
6. Select the "target language". This is the member's preferred language. **Note: For alternate format requests that do not need to be translated, select English for the target language.**



7. Click "add" to confirm your selection.



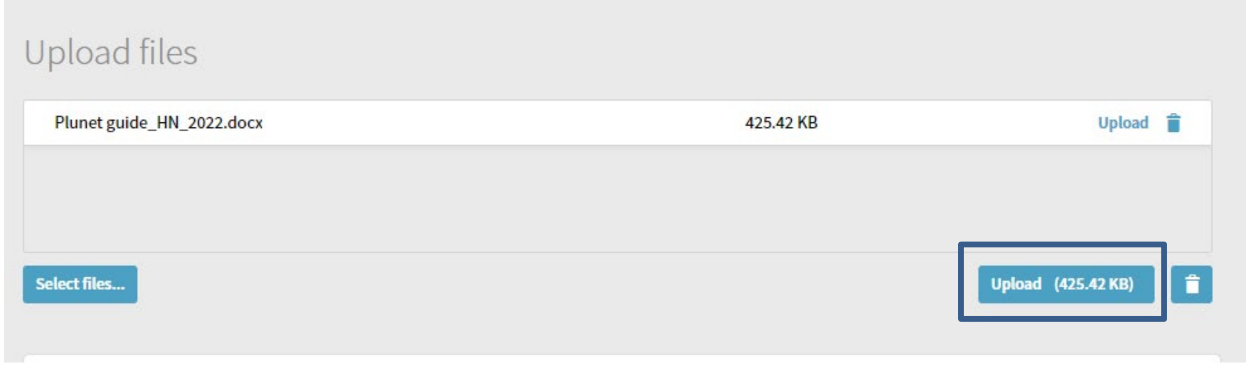
8. Click "Project files" to move to the next screen and upload your document.



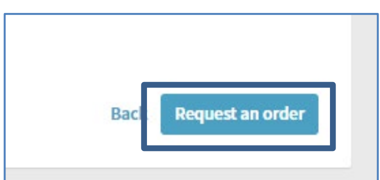
9. Click the “source folder” icon to select and upload your document.

10. In the pop-up window, you can drag and drop your file or click the “select files” button to attach and follow the prompts.

11. Click the “Upload” button to complete the document upload. You can now close the pop-up window.



12. Click the “Summary” button to move to the confirmation page. Review the summary details for accuracy and click “request an order” at the bottom of the page to submit.



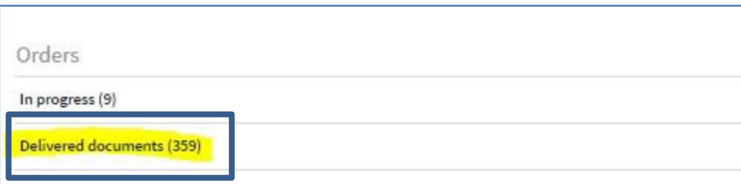
You will receive an email confirmation that will serve as proof that the letter was accepted.

You can also check the status, by looking at the top of your dashboard and clicking on “pending” to verify successful submission.

Retrieve completed projects

Once your document has been successfully prepared, you will receive an email notification from Plunet. This is your indication to log in to the system and download your document.

You can see your documents by status when you log in to the system. Click on "delivered documents" to expand the list of documents ready for retrieval.



You can then click on the download icon to retrieve your document.

During your annual utilization management (UM) compliance audit, this log may be requested so that samples can be selected for validation as part of the audit scope.

Request a username and password

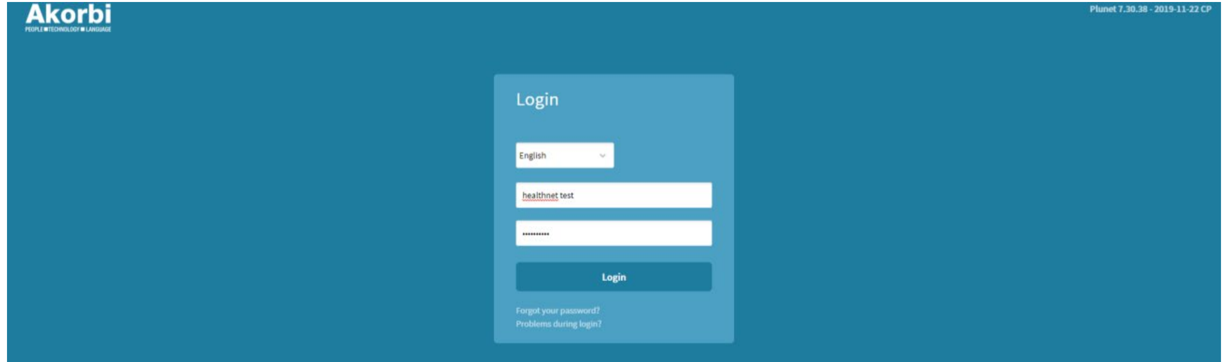
1. If you do not have a Health Net specific username and password for the Akorbi Plunet system, send an email to Delegation_Oversight_Group@Centene.com to request access. Include the following in your email:
    a. Requested username.
    b. First and last name of primary user.
    c. Primary email address (for all notifications from the system).
    d. Secondary email addresses (will be copied via CC on all notifications).

Please note: It is recommended that you have one login and password for all Health Net or CalViva Health requests that is shared by the required users in your organization. This will minimize the likelihood of being unable to retrieve your completed project as they can only be retrieved through the account that submitted the request.

Login and password reset

2. Enter the website address plunet.akorbi.com into your browser.
3. Enter your username and password to access the system.
    a. If you use the wrong password for login **three times in a row**, your account will automatically be locked for 24 hours. To unlock the account earlier please contact healthnet@akorbi.com.

Note: To be able to send requests using Akorbi Plunet portal, you need Internet Explorer (Version 8 or higher). You can also use Google Chrome, Mozilla Firefox or Safari.



Password reset

If you have forgotten your password click on "**Forgot your password?"** You will receive an email with a link to trigger a new password. Click the link in the email and you will be sent another email with your temporary password and instructions on how to reset your password.

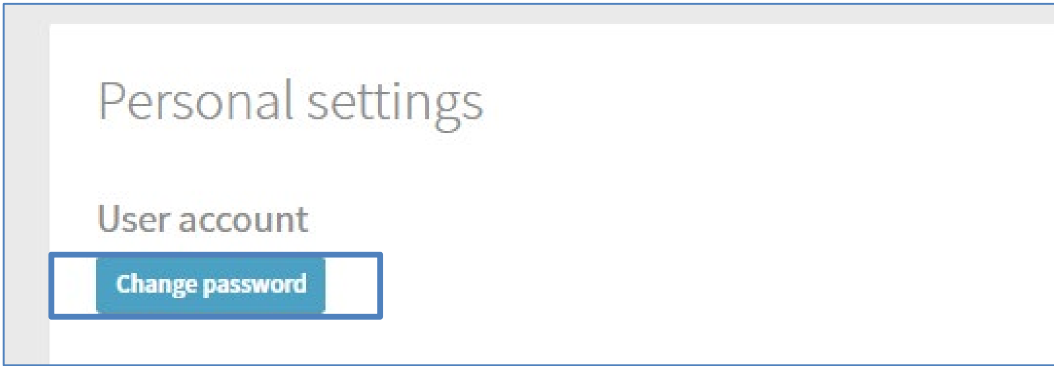
Please note, there will be two emails sent as part of the password reset process.

Manually change password

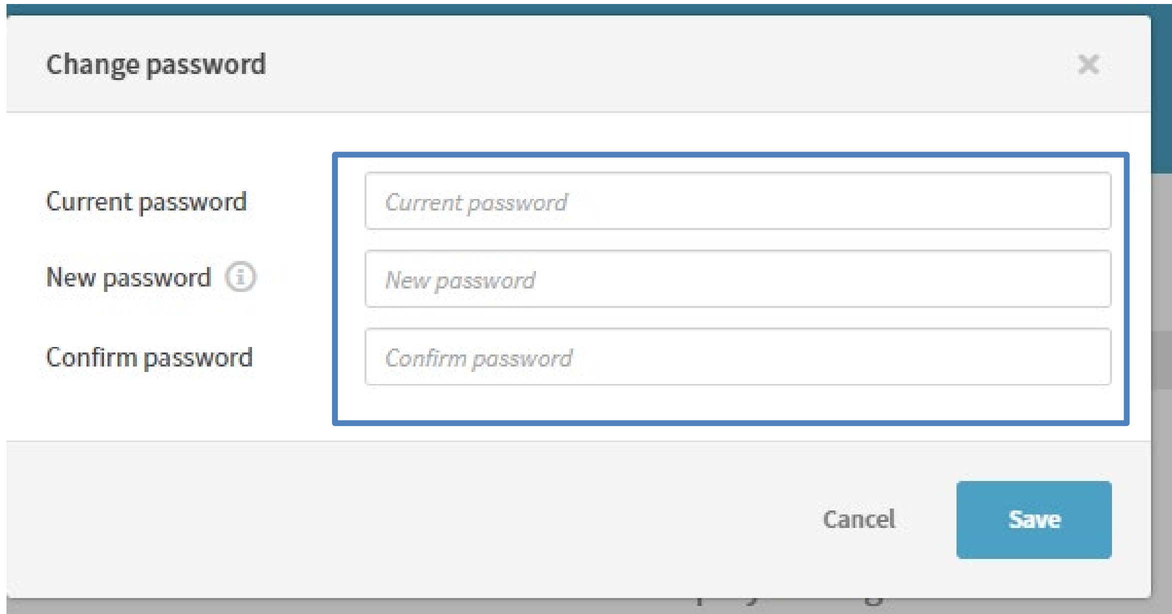
To manually change your password in the Plunet system:

1. Click on the four blocks icon on the top left of your screen.
2. Select "Settings" for the drop down menu.

3. Click “Change password” in the user account section.



4. Enter your old password in the first field.
5. Enter your new password in the second and third field.
6. Click “Save”.



Note: You will receive an automated email every three months requesting you to change your password. To avoid login issues, please complete your password resets as instructed as soon as you receive the email.

Dashboard

Once you log in, you will be taken to your Dashboard. The dashboard displays all your orders in compressed form by status.

By clicking on the description (e.g. Pending or InProgress) you will be able to see additional information about your requests.

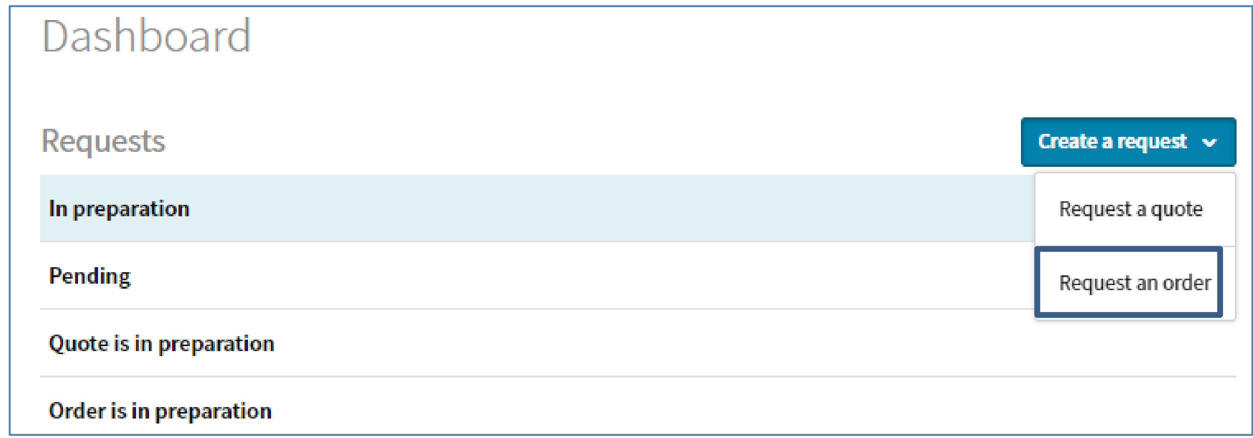
Placing a request

To begin your request for a letter translation or alternate format:

1. Click the "**Create a request"** button on your dashboard**.**
2. Select "**Request an order"** from the drop down menu to begin.

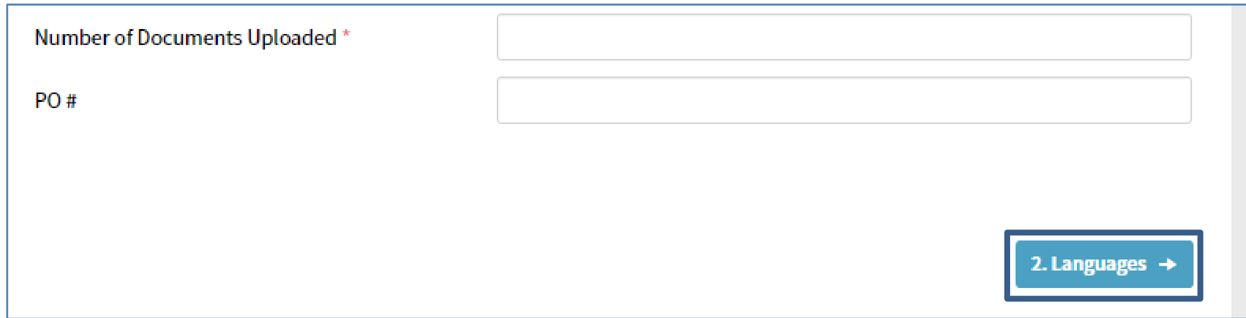


3. Enter the following information into the project fields:

Field	Details
Project Name	Must follow the naming convention: APL 21-011_[Template Type]_[Auth Number]_[Turnaround Time] • **APL 20-011:** Notes the regulatory requirement. • **Template Type:** Enter one of the following - Carve-out, Deny, Delay, Modify, or Terminate. • **Auth Number:** Enter the authorization number for this notification. • **Turnaround Time:** Enter the timeframe in which you need the project completed. Please note, these are business hours. Requests sent after business hours will be processed the following day. Project Name Example: APL-2011_Deny_008776498232_12 hours
Reference Number	Enter the member/subscriber ID number.
Requested Delivery Date	Enter the date and time by which you would like your project completed.
Customer	Should be pre-populated to "Health Net."
PPG	Select the applicable PPG from the drop-down list. Note: They are shown as [PPGID] PPG Name.
Alternate Format	**Select "Not applicable" for translation requests.** For alternate format requests, select one of the following: • Audio Format • Braille • Large Print

Lines of Business	Select the following (once selected, click the checkmark): • CalViva (For CalViva Health members)
Department of	Select "PPG Delegated" from the list.
Number of Documents	Enter 1. Each letter must be submitted separately.

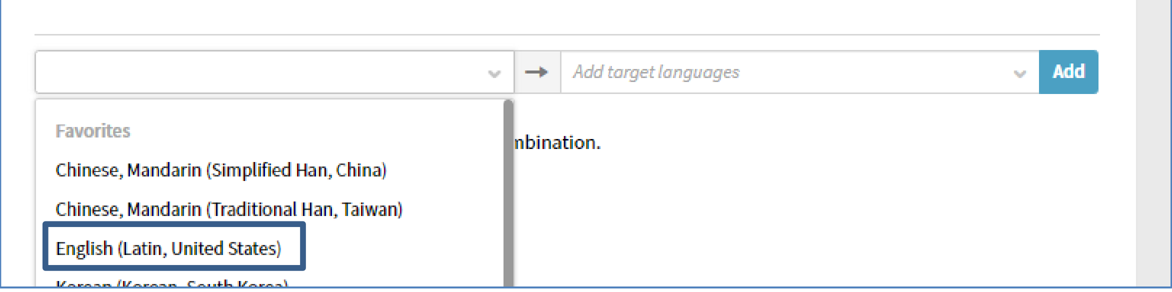
4. Click the Languages button to move to the next screen.



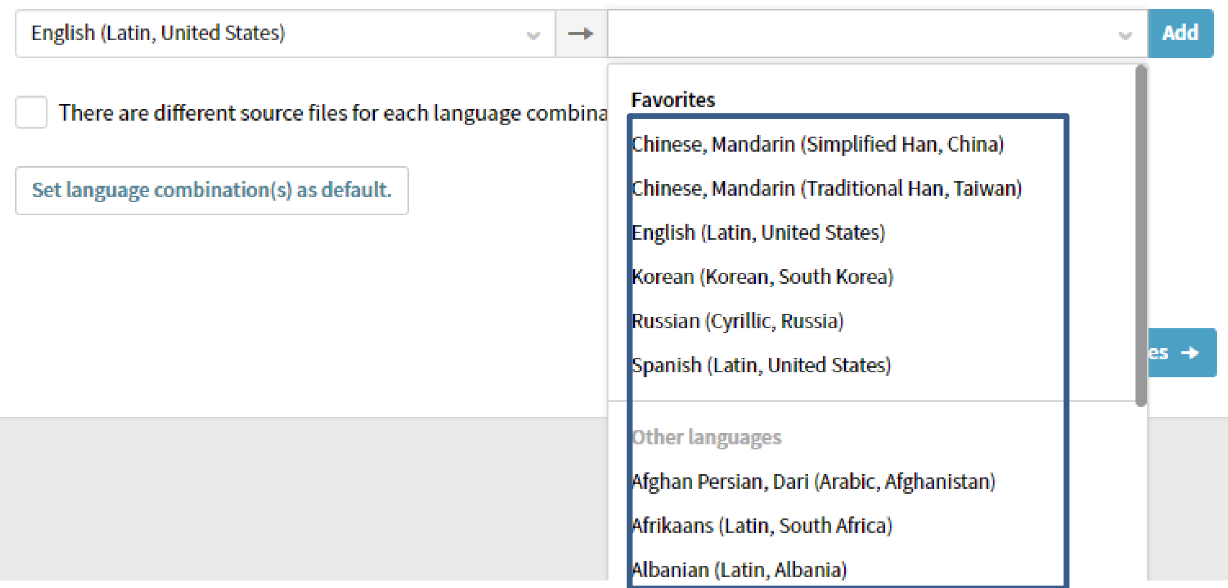
Below are examples of threshold languages you can select from.

English (Latin, United States) → Spanish (Latin, United States)
English (Latin, United States) → Hmong, White (Latin, United States)

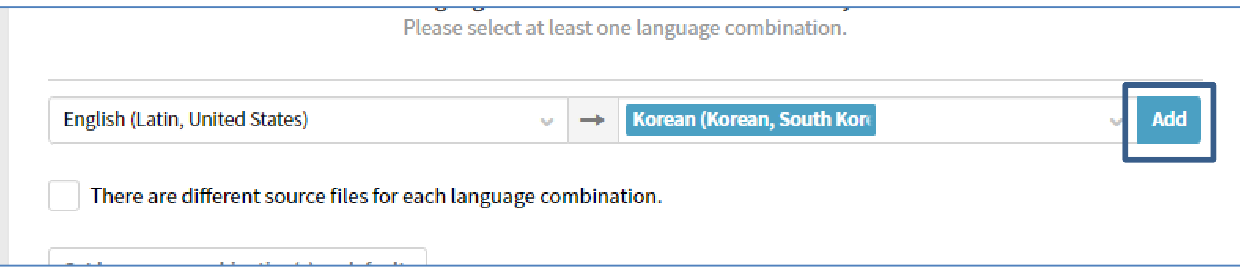
5. Select the Source language from the drop-down box, selecting English.



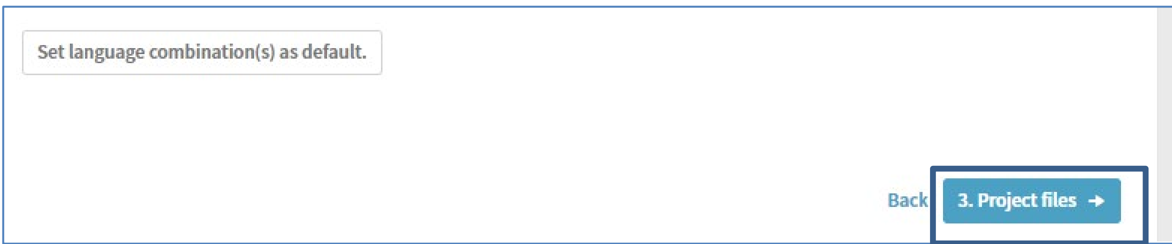
6. Select the “target language”. This is the members preferred language. **Note: For alternate format requests that do not need to be translated, select English for the target language.**



7. Click “add” to confirm your selection.

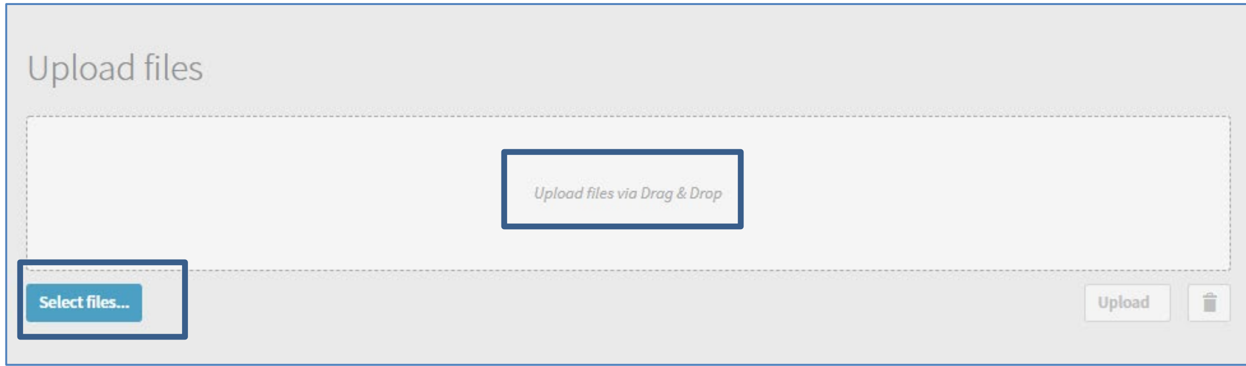


8. Click “Project files” to move to the next screen and upload your document.

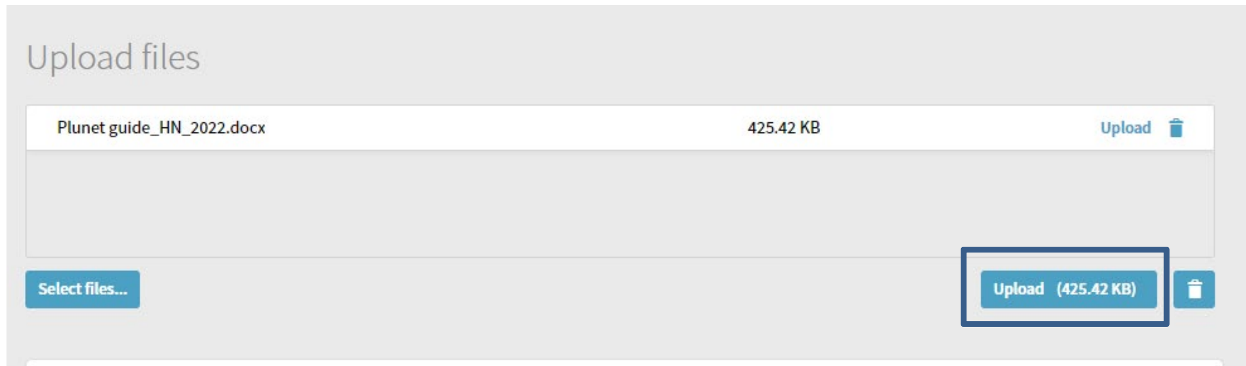


9. Click the “source folder” icon to select and upload your document.

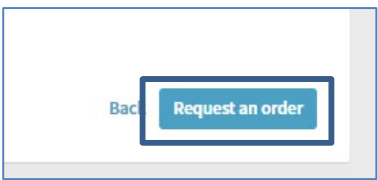
10. In the pop-up window, you can drag and drop your file or click the “select files” button to attach and follow the prompts.



11. Click the “Upload” button to complete the document upload. You can now close the pop-up window.



12. Click the “Summary” button to move to the confirmation page. Review the summary details for accuracy and click “request an order” at the bottom of the page to submit.



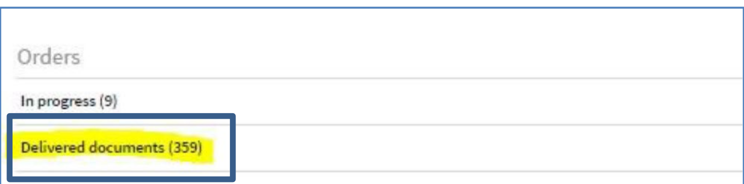
You will receive an email confirmation that will serve as proof that the letter was accepted.

You can also check the status, by looking at the top of your dashboard and clicking on “pending” to verify successful submission.

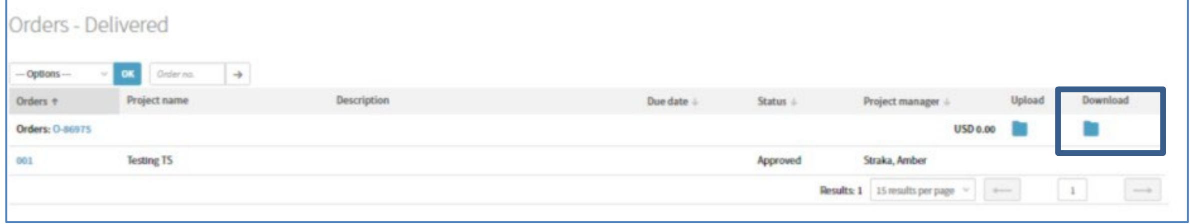
Retrieve completed projects

Once your document has been successfully prepared, you will receive an email notification from Plunet. This is your indication to log in to the system and download your document.

You can see your documents by status when you log in to the system. Click on “delivered documents” to expand the list of documents ready for retrieval.



You can then click on the download icon to retrieve your document.



CalViva Health is a licensed health plan in California that provides services to Medi-Cal enrollees in Fresno, Kings and Madera counties. CalViva Health contracts with Health Net Community Solutions, Inc. to provide and arrange for network services. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

Placing a request 6
Retrieve completed projects 11

Introduction

This document outlines the process for submitting Medi-Cal notice of action (NOA) letters for translation into member requested language or alternate format using the Akorbi Plunet portal.

Health Net*, on behalf of Community Health Plan of Imperial Valley (CHPIV), will cover these costs for NOA letters when the below criteria are met:

- Must be for CHPIV Medi-Cal member NOA translations or alternate formats only.
- Must use current CHPIV pre-translated NOA template.
- Must use the Plan's preferred vendor, Akorbi Language Consulting (Akorbi).

To avoid issues and errors, please follow the process shown in this document for each letter submitted for translation.

Please note: You must keep a log of all letters that you are submitting for translation or conversion to an alternate format for our members. During your annual utilization management (UM) compliance audit, this log may be requested so that samples can be selected for validation as part of the audit scope.

Request a username and password

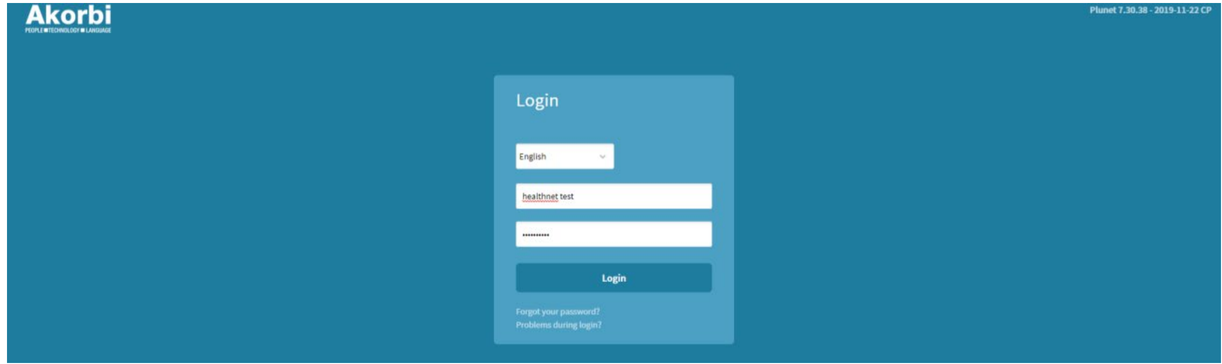
1. If you do not have a Health Net specific username and password for the Akorbi Plunet system, send an email to Delegation_Oversight_Group@Centene.com to request access. Include the following in your email:
    a. Requested username.
    b. First and last name of primary user.
    c. Primary email address (for all notifications from the system).
    d. Secondary email addresses (will be copied via CC on all notifications).

Please note: It is recommended that you have one login and password for all Health Net or CHPIV requests that is shared by the required users in your organization. This will minimize the likelihood of being unable to retrieve your completed project as they can only be retrieved through the account that submitted the request.

Login and password reset

2. Enter the website address plunet.akorbi.com into your browser.
3. Enter your username and password to access the system.
    a. If you use the wrong password for login **three times in a row**, your account will automatically be locked for 24 hours. To unlock the account earlier please contact healthnet@akorbi.com.

Note: To be able to send requests using Akorbi Plunet portal, you need Internet Explorer (Version 8 or higher). You can also use Google Chrome, Mozilla Firefox or Safari.



Password reset

If you have forgotten your password, click on "**Forgot your password?"** You will receive an email with a link to trigger a new password. Click the link in the email and you will be sent another email with your temporary password and instructions on how to reset your password.

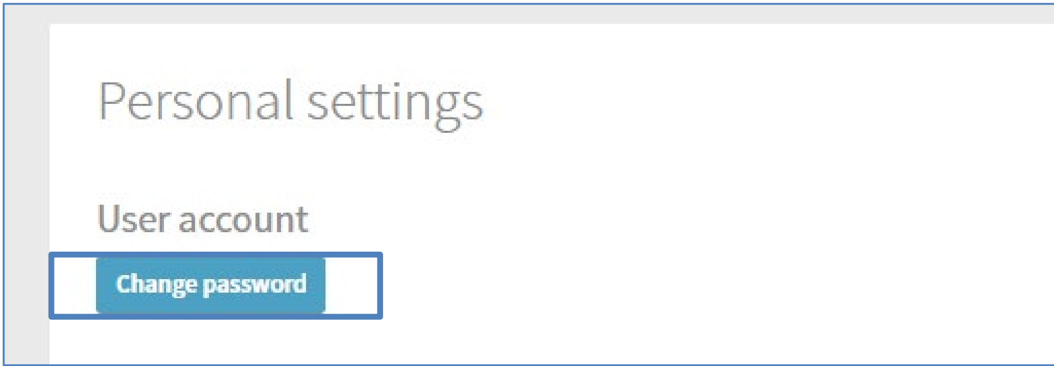
Please note, there will be two emails sent as part of the password reset process.

Manually change password

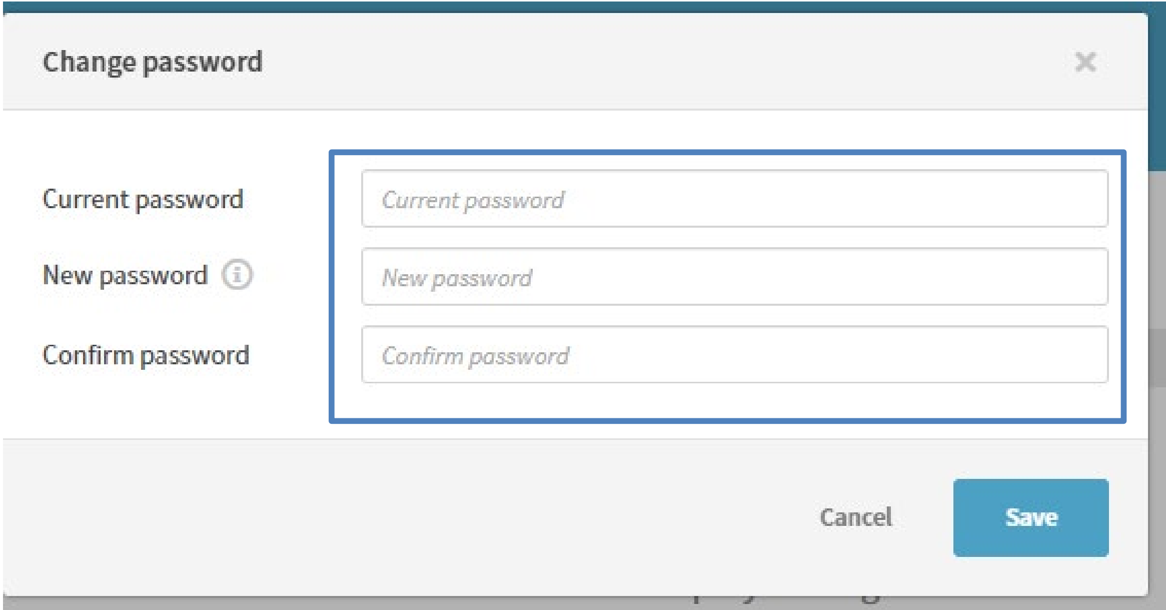
To manually change your password in the Plunet system:

1. Click on the four blocks icon on the top left of your screen.
2. Select "Settings" for the drop-down menu.

3. Click “Change password” in the user account section.



4. Enter your old password in the first field.
5. Enter your new password in the second and third field.
6. Click “Save”.



Note: You will receive an automated email every three months requesting you to change your password. To avoid login issues, please complete your password resets as instructed as soon as you receive the email.

Offshore Subcontracting Attestation: Participating Provider

If you are a Health Net of California, Inc., Health Net Community Solutions, Inc. and/or Health Net Life Insurance Company (Health Net) participating provider (also referred to as first-tier, downstream or related entities) using offshore subcontractors, indicate your business name and tax identification (ID) number below.	
Name of participating provider (if applicable): **Tax ID:**	
If you manage multiple participating providers, list the name(s) and tax IDs for whom you are completing this attestation or attach a separate sheet.	
Enter your name, title, phone number, signature, and date that you completed this attestation.	
Name: **Title:** **Phone number:** **Signature:** **Date:**	
Do you utilize offshore subcontractors? The Centers for Medicare & Medicaid Services (CMS) defines *offshore subcontractor* as follows: "The term subcontractor refers to any organization that a Medicare Advantage Organization or Part D sponsor contracts with to fulfill or help fulfill requirements in their Part C and/or Part D contracts. Subcontractors include all first-tier, downstream and/or related entities. The term offshore refers to any country that is not within the United States or one of the United States territories (American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands). Examples of countries that meet the definition of 'offshore' include Mexico, Canada, India, Germany, and Japan. Subcontractors that are considered offshore can be either American-owned companies with certain portions of their operations performed outside the United States or foreign-owned companies with their operations performed outside the United States. Offshore subcontractors provide services that are performed by workers located in offshore countries, regardless of whether the workers are employees of American or foreign companies." Health Net policy prohibits the transfer or storage of data outside the United States.	**Response:** **Yes** **No**
Do you engage in offshore subcontracting that involves processing, handling or accessing protected health information (PHI)? If "No," the survey is complete and you do not need to complete or submit the attestation. If "Yes," continue completing the form and submit a copy via mail or fax to: Health Net Kristina Rodriguez Director, Provider Network Management Operations Email: Kristina.M.Rodriguez@healthnet.com This form must be completed in full for each new offshore subcontractor, and sent to Health Net within 20 calendar days from the date the contract is signed with the offshore subcontractor to the address or fax number provided above.	**Response:** **Yes** **No**

Offshore Subcontracting Attestation: Participating Provider

Part I. Offshore subcontractor information	
Offshore subcontractor name:	
Offshore subcontractor country:	
Offshore subcontractor address:	
Describe offshore subcontractor functions:	
State proposed or actual effective date for offshore subcontractor (Month, day, year):	

Part II. Precautions for PHI	
Describe the PHI that will be provided to the offshore subcontractor:	
Discuss why providing PHI is necessary to accomplish the offshore subcontractor objectives:	
Describe alternatives considered to avoid providing PHI and why each alternative was rejected:	

Offshore Subcontracting Attestation: Participating Provider

Part III. Attestation of safeguards to protect beneficiary information in the offshore subcontract		
Item	**Attestation**	**Response: Yes No**
III.1	Offshore subcontracting arrangement has policies and procedures in place to ensure that beneficiary PHI and other personal information remain secure.	
	Participating provider to provide a copy of the policies and procedures that document the process used to ensure the security of beneficiary PHI and other personal information. Copies are provided to Health Net along with this completed attestation.	
III.2	Offshore subcontracting arrangement prohibits subcontractor's access to data not associated with the sponsor's contract with the offshore subcontractor.	
III.3	Offshore subcontracting arrangement has policies and procedures in place that allow for immediate termination of the subcontract upon discovery of a significant security breach.	
	Participating provider to provide a copy of the policies and procedures that document the process used for the immediate termination of the subcontract upon discovery of a significant security breach. Copies are provided to Health Net along with this completed attestation.	
III.4	Offshore subcontracting arrangement includes all required Medicare Part C and Part D language, such as record retention requirements, compliance with all Medicare Part C and Part D requirements, etc.	
	Applicable to participating providers contracting with Health Net for the Medicare Advantage line of business – Participating provider to provide a copy of the provider's agreement (proprietary information removed) with the offshore subcontractor. A copy is provided to Health Net along with this completed attestation.	

Part IV. Attestation of audit requirements to ensure protection of PHI		
Item	**Attestation**	**Response: Yes No**
IV.1	Participating provider will conduct an annual audit of the offshore subcontractor.	
	Participating provider to provide a copy of the policies and procedures documenting the process used for conducting annual audits, for monitoring and tracking results, and resolving any identified deficiencies. Copies are provided to Health Net along with this completed attestation.	
IV.2	Audit results are used by the participating provider to evaluate the continuation of its relationship with the offshore subcontractor.	
IV.3	Participating provider agrees to share offshore subcontractors' audit results with Health Net or CMS upon request.

Oral Health Risk Assessment Tool

The American Academy of Pediatrics (AAP) has developed this tool to aid in the implementation of oral health risk assessment during health supervision visits. This tool has been subsequently reviewed and endorsed by the National Interprofessional Initiative on Oral Health.

Instructions for Use

This tool is intended for documenting caries risk of the child, however, two risk factors are based on the mother or primary caregiver's oral health. All other factors and findings should be documented based on the child.

The child is at an absolute high risk for caries if any risk factors or clinical findings, marked with a ⚠ sign, are documented yes. In the absence of ⚠ risk factors or clinical findings, the clinician may determine the child is at high risk of caries based on one or more positive responses to other risk factors or clinical findings. Answering yes to protective factors should be taken into account with risk factors/clinical findings in determining low versus high risk.

Patient Name:______________________ Date of Birth:______________ Date:______________

Visit: ☐ 6 month ☐ 9 month ☐ 12 month ☐ 15 month ☐ 18 month ☐ 24 month ☐ 30 month ☐ 3 year ☐ 4 year ☐ 5 year ☐ 6 year ☐ Other______________

- Has teeth brushed twice daily ☐ Yes ☐ No

CLINICAL FINDINGS

- ⚠ White spots or visible decalcifications in the past 12 months ☐ Yes ☐ No
- ⚠ Obvious decay ☐ Yes ☐ No
- ⚠ Restorations (fillings) present ☐ Yes ☐ No
- Visible plaque accumulation ☐ Yes ☐ No
- Gingivitis (swollen/bleeding gums) ☐ Yes ☐ No
- Teeth present ☐ Yes ☐ No
- Healthy teeth ☐ Yes ☐ No

ASSESSMENT/PLAN

Caries Risk:

☐ Low ☐ High

Completed:

☐ Anticipatory Guidance
☐ Fluoride Varnish
☐ Dental Referral

Self Management Goals:

☐ Regular dental visits
☐ Dental treatment for parents
☐ Brush twice daily
☐ Use fluoride toothpaste
☐ Wean off bottle
☐ Less/No juice
☐ Only water in sippy cup
☐ Drink tap water
☐ Healthy snacks
☐ Less/No junk food or candy
☐ No soda
☐ Xylitol

Treatment of High Risk Children

If appropriate, high-risk children should receive professionally applied fluoride varnish and have their teeth brushed twice daily with an age-appropriate amount of fluoridated toothpaste. Referral to a pediatric dentist or a dentist comfortable caring for children should be made with follow-up to ensure that the child is being cared for in the dental home.

Adapted from Ramos-Gomez FJ, Crystal YO, Ng MW, Crall JJ, Featherstone JD. Pediatric dental care: prevention and management protocols based on caries risk assessment. *J Calif Dent Assoc.* 2010;38(10):746–761; American Academy of Pediatrics Section on Pediatric Dentistry and Oral Health. Preventive oral health intervention for pediatricians. *Pediatrics.* 2003; 122(6):1387–1394; and American Academy of Pediatrics Section of Pediatric Dentistry. Oral health risk assessment timing and establishment of the dental home. *Pediatrics.* 2003;111(5):1113–1116.

Oral Health Risk Assessment Tool Guidance

Timing of Risk Assessment

The Bright Futures/AAP "Recommendations for Preventive Pediatric Health Care," (ie, Periodicity Schedule) recommends all children receive a risk assessment at the 6- and 9-month visits. For the 12-, 18-, 24-, 30-month, and the 3- and 6-year visits, risk assessment should continue if a dental home has not been established. View the Bright Futures/AAP Periodicity Schedule—http://brightfutures.aap.org/clinical_practice.html.

Risk Factors

Maternal Oral Health

Studies have shown that children with mothers or primary caregivers who have had active decay in the past 12 months are at greater risk to develop caries. **This child is high risk.**

Maternal Access to Dental Care

Studies have shown that children with mothers or primary caregivers who do not have a regular source of dental care are at a greater risk to develop caries. A follow-up question may be if the child has a dentist.

Continual Bottle/Sippy Cup Use

Children who drink juice, soda, and other liquids that are not water, from a bottle or sippy cup continually throughout the day or at night are at an increased risk of caries. The frequent intake of sugar does not allow for the acid it produces to be neutralized or washed away by saliva. Parents of children with this risk factor need to be counseled on how to reduce the frequency of sugar-containing beverages in the child's diet.

Frequent Snacking

Children who snack frequently are at an increased risk of caries. The frequent intake of sugar/refined carbohydrates does not allow for the acid it produces to be neutralized or washed away by saliva. Parents of children with this risk factor need to be counseled on how to reduce frequent snacking and choose healthy snacks such as cheese, vegetables, and fruit.

Special Health Care Needs

Children with special health care needs are at an increased risk for caries due to their diet, xerostomia (dryness of the mouth, sometimes due to asthma or allergy medication use), difficulty performing oral hygiene, seizures, gastroesophageal reflux disease and vomiting, attention deficit hyperactivity disorder, and gingival hyperplasia or overcrowding of teeth. Premature babies also may experience enamel hypoplasia.

Protective Factors

Dental Home

According to the American Academy of Pediatric Dentistry (AAPD), the dental home is oral health care for the child that is delivered in a comprehensive, continuously accessible, coordinated and family-centered way by a licensed dentist. The AAP and the AAPD recommend that a dental home be established by age 1. Communication between the dental and medical homes should be ongoing to appropriately coordinate care for the child. If a dental home is not available, the primary care clinician should continue to do oral health risk assessment at every well-child visit.

Fluoridated Water/Supplements

Drinking fluoridated water provides a child with systemic and topical fluoride exposure, a proven caries reduction intervention. Fluoride supplements may be prescribed by the primary care clinician or dentist if needed. View fluoride resources on the Oral Health Practice Tools Web Page http://aap.org/oralhealth/PracticeTools.html.

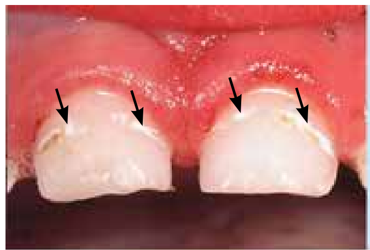
Fluoride Varnish in the Last 6 Months

Applying fluoride varnish provides a child with highly concentrated fluoride to protect against caries. Fluoride varnish may be professionally applied and is now recommended by the United States Preventive Services Task Force as a preventive service in the primary care setting for all children through age 5 http://www.uspreventiveservicestaskforce.org/Page/Topic/recommendation-summary/dental-caries-in-children-from-birth-through-age-5-years-screening. For online fluoride varnish training, access the Caries Risk Assessment, Fluoride Varnish, and Counseling Module in the Smiles for Life National Oral Health Curriculum, www.smilesforlifeoralhealth.org.

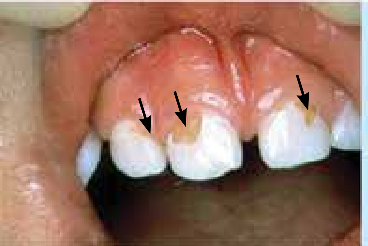
Tooth Brushing and Oral Hygiene

Primary care clinicians can reinforce good oral hygiene by teaching parents and children simple practices. Infants should have their mouths cleaned after feedings with a wet soft washcloth. Once teeth erupt it is recommended that children have their teeth brushed twice a day. For children under the age of 3 (until 3rd birthday) it is appropriate to recommend brushing with a smear (grain of rice amount) of fluoridated toothpaste twice per day. Children 3 years of age and older should use a pea-sized amount of fluoridated toothpaste twice a day. View the AAP Clinical Report on the use of fluoride in the primary care setting for more information http://pediatrics.aappublications.org/content/early/2014/08/19/peds.2014-1699.

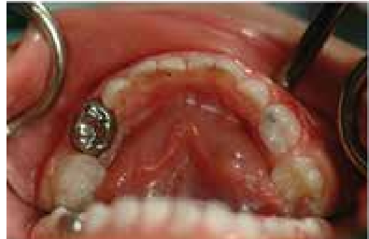
Clinical Findings



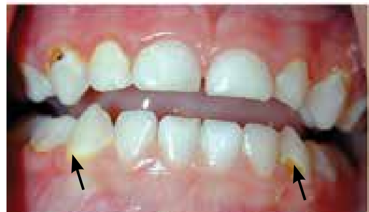
⚠ **White Spots/Decalcifications**
This child is high risk.
White spot decalcifications present—immediately place the child in the high-risk category.



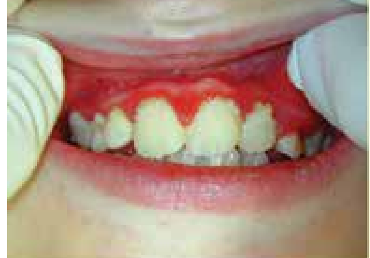
⚠ **Obvious Decay**
This child is high risk.
Obvious decay present—immediately place the child in the high-risk category.



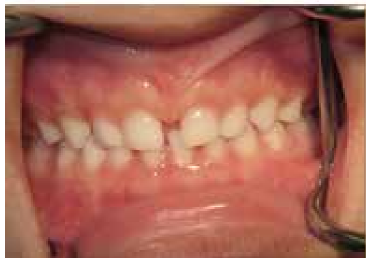
⚠ **Restorations (Fillings) Present**
This child is high risk.
Restorations (Fillings) present—immediately place the child in the high-risk category.



Visible Plaque Accumulation
Plaque is the soft and sticky substance that accumulates on the teeth from food debris and bacteria. Primary care clinicians can teach parents how to remove plaque from the child's teeth by brushing and flossing.



Gingivitis
Gingivitis is the inflamation of the gums. Primary care clinicians can teach parents good oral hygiene skills to reduce the inflammation.



Healthy Teeth
Children with healthy teeth have no signs of early childhood caries and no other clinical findings. They are also experiencing normal tooth and mouth development and spacing.

For more information about the AAP's oral health activities email oralhealth@aap.org or visit www.aap.org/oralhealth.

PEDIATRIC HEALTH MAINTENANCE CHECKLIST

Name: ______________________ D.O.B. ______________ Allergies:

Age: ____________ Sex: Male Female TB Risk: Y N (1,6,12 months and then annually)

Advanced Directive:18 & older
Y N Date Discussed: Primary Language: Interpreter: Y N Interpreter Name:

Examination & Tests	Age Range	Frequency	DATE DONE	DATE DONE	DATE DONE
INITIAL HEALTH ASSESSMENT	Newborn-20 years old	Within 120 days of effective date with Plan or effective date with the PCP			
Health Risk Assessment (ACE, PEARLS, or SDOH)	Newborn-20 years old	Within 120 days of effective date with Plan or effective date with the PCP. Review yearly.			
IHEBA/"Staying Healthy"	Newborn-20 years old	Not mandated but continues to help with obtaining information for certain screenings	Document on Form (IHEBA)		
Well Check Visit	Newborn-20 years old	Per AAP Guidelines			
Alcohol Use Disorder Screening and Behavioral Counseling	11 and older	Every Well Check Visit. Use CRAFFT, TAPS etc. If positive refer for counseling and/or treatment			
Anemia Screening	4, 15, 18, 24, 30 months and 3 years old	**Test Serum Hemoglobin at 12 months** Assess annually and document risk after 3 years old.			
Anthropometric Measurements	WHO chart 0-2years CDC growth chart 2 years and older	Every Well Check Visit. Measure and track BMI at each Well Visit. Head circumference-Infant to 24 months			
Anticipatory Guidelines	0-20 years old	Age Appropriate with each Well Check Visit			
Autism Screening	18 and 24 months	Based on AAP Bright Futures periodicity			
Blood Lead Screening	Assess at 6 months- 72 months	**Blood Lead screening at 12 months and 24 months if no record up to 72 months of age**			
Blood Pressure Screening	3 years and older	With each Well Check Visit			
Dental /Oral Health Assessment	First Health assessment and through age 20	Identify and document dental home-12 months and older is to be referred to a dentist.			
Fluoride Supplementation	6 months-16 years	Assess and provide fluoride supplementation per AAP guidelines			
Fluoride Varnish	Once first tooth has erupted- 5th year birthday	May be applied by PCP or dentist every 3-6 months per AAP			
Depression Screening	12 years-20 years	Per USPTF guidelines starting at 12 years old at each Well Check Visit (PHQ9A etc..)			
Maternal Depression Screening	Starting at 1 month	Maternal depression screening at 1, 2, 4, and 6-month visits.			
Developmental Disorder Screening	Starting at 9 months	Screening at 9th, 18th and 30th month visits. (May be done at 24 months).			
Developmental Surveillance Screen	0-20 years old	Every Well Check Visit			
Drug Use Screening/Behavior Counseling	11-20 years old	Every Well check visit beginning at age 11 (CRAFFT, TAPS etc..). If positive refer for counseling and/or treatment			
Dyslipidemia	Risk assessment 2,4,6,8 years	Annual risk screening after 8 years old 9-11 one-time lipid panel and again at 17-21			
Folic Acid Supplementation	Females 12-20 years old	Assess each Well Check Visit			
Hearing Screening	2m-3years non audio 4-20 years old audio	Age appropriate screen per AAP guidelines			
Hep B Screening	0-20 years old	Assess with each Well Check Visit			
Hep C Screening	18-20 years old	Assess with each Well Check Visit			
HIV screening	Assess beginning age 11years old	If high risk test and assess yearly. Test once between 15-18 years old			
TB screening	0-20 years old	Assess at 1m,6m,12months old and annually thereafter			
Psychosocial/Behavioral Assessment	0-20 years	Assess and document with each Well Check Visit			
Suicide Risk Assessment	12-20 years old unless clinically indicated for younger individuals	Assess with each Well Check Visit. Example is Ask Suicide Questions form, etc..			
Contraceptive Care/ STI screening on all sexually active adolescents	Assess at 11-20 years old	Assess at each Well Check Visit			
Tobacco Product Use: Screening/Prevention/Cessation	11 years-20 years	Screen at each Well Check Visit(TAPS)			
Sudden Cardiac Arrest and Sudden Cardiac Death Screening	11 years old -20 years	Assess on each Well Check visit starting at age 11.			

Vision Screening	3-20 years	Age-appropriate screen per AAP			
Immunizations-Documentation Verification (CAIR)/ Immunization Record	0-20 years	Assess on each Well Check Visit and verify using CAIR

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
1. When is your baby due?	_____/_____/_____ MM/DD/YY			
2. Who are you seeing for your pregnancy? Telephone:	 (______)_______-_______			
3. When was your first doctor's visit for this pregnancy? a) How many times have you seen your doctor since your first visit? b) When is your next appointment? c) How many appointments have you missed? d) Is there any reason you have problems keeping your appointment? If yes, what is the reason?	___/_____/_____ MM/DD/YY _____/_____/_____ MM/DD/YY	 ❒ < 2 ❒ N	 ❒ ≥ 2 ❒ Y	

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
4. How many times have you been pregnant?		❒ < 5	❒ ≥ 5	**Notify CM if pregnancies less than ONE year apart.**
a) How many children do you have? • What are their ages?				
b) Have you lost or terminated any pregnancies? • How far along were you?	**Loss (SAB)** **Terminated (TAB)**	❒ < 2 ❒ < 4	❒ ≥ 2 ❒ ≥ 4	**If YES, how many losses?** **If YES, how many terminations?**
c) Have you had any pregnancies that you delivered more than one baby?		❒ N	❒ Y	
d) For this pregnancy, do you think you're carrying more than one baby?		❒ N	❒ Y	
5. Were any of your babies born early (before 37 weeks)? If yes, why?		❒ N	❒ Y	
• Were you ever treated for or hospitalized for preterm labor?		❒ N	❒ Y	
• Have any of your babies needed to stay in the hospital after you went home? If yes, why?		❒ N	❒ Y	

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
6. Have you had any problems with previous pregnancies? Ex: a) Diabetes b) Excessive vomiting requiring intravenous hydration c) High blood pressure d) Bleeding after 12 weeks e) Other		❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N**	❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y**	**A YES to any condition is considered high risk.**
7. How many of your babies were born by vaginal delivery? a) How many were born by C-Section? b) What type of delivery are you planning for this baby?	❒ Vaginal ❒ C-Section	❒ **< 2**	❒ **≥ 2**	
8. Where are you planning to deliver your baby?	❒ Hospital ❒ Birthing Center ❒ Home			**Confirm use of a contracted facility at the end of the call and forward to CM if using non-contracted facility.**

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
9. Did you have any existing health problems prior to this pregnancy? Ex: a) Diabetes b) High Blood Pressure c) Asthma d) Kidney Disease e) Heart Disease f) Frequent Bladder Infections g) AIDS or HIV Infection h) Sexually Transmitted Diseases i) Surgery of the Uterus j) Other		❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N**	❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y**	**A YES to any condition is considered HIGH RISK.**
10. Have you ever had any problems with depression, anxiety disorders or other mental illness?		❒ **N**	❒ **Y**	
11. Have you had any problems or been hospitalized during this pregnancy? Ex: a) Diabetes b) Excessive vomiting requiring intravenous hydration c) High blood pressure d) Bleeding after 12 weeks e) Other		❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N** ❒ **N**	❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y** ❒ **Y**	**A YES to any condition is considered HIGH RISK.**

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
12. Is there any family history of babies with physical or mental problems?		❒ N	❒ Y	
13. We need to know if you are taking any other medications: a) Please tell us what medication(s) are recommended or prescribed by your doctor including PNV, Folic Acid, and Iron? b) Please tell us what over-the-counter drugs are you taking, such as Tylenol, Aspirin, sleeping aids, etc.? c) Herbal remedies?	 ❒ NONE ❒ NONE ❒ NONE	 ❒ N ❒ N ❒ N	 ❒ Y ❒ Y ❒ Y	
14. During the past year, have you used any tobacco products? a) If yes, and you used cigarettes how many packs do you smoke per day? b) If you stopped smoking, when did you stop? c) Does anyone smoke in your house?	 ❒ Y ❒ N If YES, see comments	❒ N	❒ Y	 If anyone smokes at home, encourage smoking cessation or smoking outside away from baby.

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
15. In the past year how many alcoholic beverages did you average in a week? a) If yes, when was your last drink? b) If you do not drink, when did you stop?		❒ N	❒ Y	**Any number is considered HIGH RISK.**
16. Have you used recreational drugs in the last year? a) If no, when did you stop? b) If yes, what are you using? c) How often do you use it/them?		❒ N	❒ Y	**Examples: Cocaine, Marijuana, Ecstasy, and Heroin.**
17. Have you been referred to Women, Infants & Children (WIC)?	❒ **Y** ❒ **N**			**If NO, instruct to contact local WIC office.**
18. Do you feel you are eating a healthy diet for you and your baby? • If no, why?		❒ Y	❒ N	A healthy diet includes three meals a day with balanced amounts of fish and meats, fruits and vegetables as well as grains or rice.

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
19. How are you planning to feed your baby?	❐ Breast ❐ Bottle ❐ Both			
20. Pregnancy can be a difficult time. Do you feel you have a good support system available from family or friends? • Do you live with baby's father? • Parents • Other adults	(Check ALL that apply) ❐ Y ❐ N ❐ Y ❐ N ❐ Y ❐ N	❐ **Y**	❐ **N**	
21. Do you have any concerns about your safety or the safety of your baby? • If yes why?		❐ **N**	❐ **Y**	
22. Do you have any other concerns? • If yes, what are they?		❐ **N**	❐ **Y**	

Questions	Responses (Information Only)	LOW Risk	HIGH Risk	Comments
23. Are you receiving Comprehensive Perinatal Services Program (CPSP)? a) Was this offered? b) If not offered, would you like to receive CPSP services?	 ❒ Y ❒ N ❒ Y ❒ N	❒ Y	❒ N	**Medi-Cal Only. Do not rate for AIM or HF.**
24. Have you taken any classes related to pregnancy or child rearing? If YES, what have you taken?	❒ If NO, suggest the following: ❒ Breast Feeding ❒ Childbirth ❒ C/S Birth Class ❒ Infant Child Resuscitation ❒ Parenting ❒ Refresher Birth Class ❒ Sibling **FOR AIM MEMBERS:** ❒ Early Pregnancy Class			**For AIM, refer to Car Seat Program.**
25. Do you have a car seat for this baby?		❒ Y	❒ N	
26. Would you like our Health Education department to mail you information on pregnancy or other related health issues?	❒ Y ❒ N			**For Medi-Cal only.**

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: **Personnel: Staff Education Training**	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY

That all staff at PCP sites receive education/training regarding safety issues, information on Members' rights and other issues related to clinical procedures. This education/training should take place **initially upon hire, then annually** thereafter for those areas identified with an asterisk on the Checklist.

PROCEDURE:

I. NEW HIRE PROCESS

A. Upon hire, all new employees will receive training on safety, Members' rights and clinical procedures as outlined in the attached checklist.

B. Types of training may include, but is not limited to: new employee orientation, in-service training, instructional videos, educational materials, annual training renewal, etc.

C. Upon completion of each criterion within this education/training, the employee's supervisor will initial the Checklist with the corresponding date of completion. The supervisor's initials indicate the employee either stated or demonstrated an understanding of the education/training provided.

1. When all areas on the Checklist have been completed, the employee and the instructor will sign and date the Checklist, signifying the employee was knowledgeable of all criteria presented by the instructor.

2. A copy of the completed Checklist shall be kept in each employee's file. All records of education/training **need to be kept for three years**. ***Must be available onsite of each office/clinic at time of audit***

D. ANNUAL REVIEW

E. All employees must receive an annual renewal of all training/education identified with an asterisk on the Training Checklist.

F. Follow the same procedure as, described above, for the New Employee.

PCP:	
SECTION: Clinical Services	
POLICY AND PROCEDURE: Pharmaceutical Services	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:
The site will maintain competent, efficient and ethical Pharmaceutical Services according to state and federal statutes for the health and safety of its patients.

PROCEDURE:

A. Drugs and medication supplies are maintained secure to prevent unauthorized access.

1. All drugs (including sample and over-the-counter), medication supplies, prescription pads and hazardous substances are securely stored in a lockable space (room, closet, cabinet, drawer) within the office/clinic (CA B&P Code, 4051.3). Keys to the locked storage area are available only to staff authorized by the physician to have access (16 CCR, Chapter 2, Division 3, Section 1356.32).

**During business hours, the lockable space may remain unlocked ONLY if there is no access to this area by unauthorized persons and authorized clinic personnel remain in the immediate area at all times. At all other times, all drugs (including sample and over-the-counter), medication supplies, prescription pads and hazardous substances must be securely locked.

2. Controlled drugs are stored separately from other drugs, in a secured, lockable space accessible ONLY to authorized personnel (including physicians, dentists, podiatrists, physician assistants, licensed nurses and pharmacists) (Control Substances Act, CFR 1301.75). There is no need for the controlled substances to be double locked.

**Controlled substances include all Schedule I, II, III, IV and V substances listed in the CA Health and Safety Code, Sections 11053-11058.

3. A dose-by-dose controlled substance distribution log in maintained, including:
   A. Date
   B. Provider’s DEA number
   C. Name of controlled substance
   D. Original quantity of controlled substance
   E. Dose administered, Number of remaining doses
   F. Name of patient receiving controlled substance
   G. Name of authorized person dispensing controlled substance

B. Drugs are handled safely and stored appropriately.

1. Preparation:
   - Drugs are prepared in a clean area, or "designated clean" area if prepared in a multipurpose room.
   - Drugs or medication supplies are considered "adulterated" if it contains any filthy, putrid or decomposed substance, or if it has been prepared, packed or held under unsanitary conditions (21 USC, Section 351).
2. Storage:
   - Items other than medications in refrigerator/freezer are kept in a secured, separate compartment from drugs, as these items may potentially cause contamination.
   - Drugs are stored separately from test reagents, germicides, disinfectants and other household substances.
   - Drugs for external use are stored separately from drugs for internal use.
   - Drugs are stored under appropriate conditions of temperature, humidity and light, so that the identity, strength, quality and purity of the drug product are not affected (21 CFR, Section 211.142). Room temperature where drugs are stored does not exceed 30°C (86°F) (Title22, Section 75037(d)).
3. Immunobiologics:
   - Vaccines are placed in a refrigerator or freezer (**not** on the door) immediately upon receipt on site and are stored according to specific instructions in the package insert for each vaccine.
   - Vaccines, such as DTP, DtaP, DT, Td, Hep A, Hep B, Enhanced Inactive Polio (E-IPV), and Pneumococcal, are kept in a refrigerator maintained at 2°- 8°C, or 35°- 46°F (at time of visit). [MMR and varicella are protected from light at all times, and kept cold]. Oral polio vaccine (OPV), MMR, MMRV and varicella vaccines are stored in a freezer maintained at -15°C, or 5°F, or lower (at time of visit). Failure to adhere to recommended specifications for storage and handling immunobiologics could make these products impotent.
   - Refrigerator and freezer temperatures must be checked at least once a day and documented (U.S. Pharmacopeial Convention Regulations and Recommendations). However, the CA DHCS Immunization Branch recommends checking temperatures twice a day, first thing in the morning and last thing at night. (See Attachments)
   - The most current Vaccine Information Statements (VIS) are available from state and local health departments or can be downloaded from the CDC website at www.cdc.gov/nip/publications/VIS or by calling the CDC Immunization Hotline at 800-232-2522.
4. Hazardous substances (Substances that are physical or health hazards):
   - Safety practices on site are followed in accordance with current/updated CAL-OSHA standards.

- The manufacturer's label is not removed from a container as long as the hazardous material (or residues from the material) remains in the container.
- All portable containers of hazardous chemicals and secondary containers (into which hazardous substances are transferred or prepared) require labeling. Hazardous substances are appropriately labeled with the following information:
  a. Identity of hazardous substance
  b. Description of hazard warning: can be words, pictures, symbols
  c. Date of preparation or transfer

  ****Exception:** Labeling is NOT required for portable containers into which hazardous chemicals are transferred from labeled containers, and which are intended only for the immediate use of the individual who performs the transfer. **
- Site has method(s) in place for drug and hazardous substance disposal. Proper disposal is via the site's contracted/licensed medical waste hauler.

C. Drugs are dispensed according to State and Federal drug distribution laws and regulations.

1. Drug Expiration:
   - There are no expired drugs on site, as they may not be distributed or dispensed.
   - The manufacturer's expiration date must appear on the label of all drugs. All prescription drugs not bearing the expiration date are deemed to have expired.
   - If a drug is reconstituted at the time of dispensing, its label must contain expiration information for both the reconstituted and unconstituted drug.
   - Site has a procedure to check expiration date of all drugs (including vaccines and samples), and infant and therapeutic formulas. Must be done AT LEAST monthly. A log is preferred, but it is acceptable to clearly mark the outside of the drug packages with the expiration date.
2. Prescription Labeling
   - All stored and dispensed prescription drugs are appropriately labeled with:
     a. Provider's name
     b. Patient's name
     c. Drug name
     d. Dose
     e. Frequency
     f. Route
     g. Quantity dispensed
     h. Manufacturer's name and lot number

3. Drug Dispensing and Administration
   - Each prescription medication is dispensed in a container that is not cracked, soiled or without secure closures (Title 22, CCR, Section 75037 (a)).
   - Drug dispensing is in compliance with all applicable State and Federal laws and regulations. Drugs are not offered for sale, charged or billed to Medi-Cal members (Business and Professions Code, Article 13, Section 4193).
   - Drugs are dispensed **ONLY** by a physician, pharmacist or other persons (i.e. NP, CNM, RN, PA) lawfully authorized to dispense medications upon the order of a licensed physician or surgeon. **Personnel, such as medical assistants, office managers, and receptionists, DO NOT DISPENSE DRUGS**.
   - California Pharmacy Law *does not* prohibit furnishing a limited quantity of sample drugs if dispensed to the patient in the package provided by the manufacturer, no charge is made to the patient, and appropriate documentation is made in the patient's medical record (CA Business and Professions Code, Sections 4170,4171).
   - Administration of medications ordered by the licensed practitioner may be completed by the MA using the following procedures:
     - Prepare Medication in a clean area
     - Have the ordering practitioner or another licensed practitioner (i.e. MD, NP, PA, CNM, RN, LVN) verify the medication and dosage prior to administration of the drug.
       - Showing the checking practitioner the bottle or vial and medicine cup or syringe,
       - If the practitioner checking the medication is not the practitioner that ordered the drug show the checking practitioner the patient's chart with the original order.
       - Administer to the patient only after a licensed practitioner has checked the prepared medication.

     Note: No MA may administer any anesthetic agent or any medication mixed with an anesthetic agent (e.g. Rocephin diluted with Xylocaine).

4. Vaccine Information Statements (VIS)
   - Since 1994, the National Childhood Vaccine Injury Act, Section 2126 of the Public Health Service Act, mandates that parents/guardians or adult patients be informed before vaccines are administered. Health care providers **must** give a copy of the most recent VIS to patients prior to each vaccination dose of DTaP, Td, MMR, IPV, Hep B, Hib, Varicella and Pneumococcal Conjugate. VISs for other vaccines are available through the CDC website referred to previously.

- VISs for distribution to patients are present on site. Site personnel should be able to verbalize standard practices regarding VIS distribution.
- The *date the VIS was given* **and** *the publication date of the VIS* **MUST** be documented in the patient's medical record.

5. Pharmacy:
   - If there is a pharmacy on site, it is licensed by the CA State Board of Pharmacy, with a licensed pharmacist monitoring drug distribution and current policies/procedures for drug storage and dispensing.

***Note: All site review survey deficiencies related to Pharmaceutical Services REQUIRE a corrective action plan. ***

Physical Accessibility Review Survey

California Department of Health Care Services
Medi-Cal Managed Care Division

Provider Name: ☐ PCP ☐ Specialist ☐ Ancillary	Date of Review: Name of Reviewer:
Address: City:	Health Plan Name:
Phone: FAX:	Contact Person Name:

	Level of Access:
Basic Access: Demonstrates facility site access for the members with disabilities to parking, building, elevator, doctor's office, exam room and restroom. To meet Basic Access requirements, all (29) Critical Elements (CE) must be met.	☐ Basic Access
Limited Access: Demonstrates facility site access for the members with a disability is missing or is incomplete in one or more features for parking, building, elevator, doctor's office, exam room, and restroom. Deficiencies in 1 or more of the Critical Elements (CE) are encountered.	☐ Limited Access
Medical Equipment Access: PCP site has height adjustable exam table and patient accessible weight scales per guidelines (for wheelchair/scooter plus patient). This is noted in addition to level of Basic or Limited Access as appropriate.	☐ Medical Equipment is available

Below are the symbols that will be used in the provider directories to indicate areas of accessibility at a provider office/site. These should also be used in online directories. In order for a provider office to receive a symbol, the appropriate criteria must be met.

These symbols are in addition to identifying whether the provider office has Basic Access or Limited Access. A provider who has Basic Access will automatically meet the critical elements for the first six symbols (P, EB, IB, R, and E). And a provider who has Medical Equipment Access will meet the medical equipment elements for the last symbol (T).

Accessibility Indicator	Must Satisfy these Criteria	Yes	No	N/A	Comments
P = PARKING	Critical Elements (CE): 3, 7, 8, 11				
EB - EXTERIORBUILDING	(CE): 14, 20, 22, 23 25, 27, 28, 31				
IB = INTERIORBUILDING	(CE): 31, 34, 37 If lift include: 40 If elevators include: 53, 54, 55, 56, 57, 58				
R=RESTROOM	(CE): 65, 67, 68, 71, 75, 77				
E=EXAM ROOM	(CE): 80, 85				
T = EXAM TABLE/SCALE	Medical Equipment Elements (ME): 81, 82, 86

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
PARKING						
1	Is off-street public parking available?	Self explanatory.				
2	Are accessible parking spaces provided in off-street parking?	Self explanatory.				
3 (CE)	**Are the correct number of accessible parking spaces provided?** **1 to 25 total spaces – 1 required** **26 to 50 – 2 required** **51 to 75 – 3 required** **76 to 100 – 4 required** **101 to 150 – 5 required** **151 to 200 – 6 required** **201 to 300 – 7 required** **301 to 400 – 8 required**	If there are 25 total parking spaces or less, at least one accessible space is required. If there are between 26 and 50 total spaces, at least two accessible spaces are required, etc.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
4	Is the accessible parking space(s) closest to the main entrance?	The accessible parking space (s) should afford the shortest route of travel from adjacent parking to the accessible entrance.				
5	Is there an access aisle next to the accessible space(s)?	The access aisle is the space next to the accessible parking space where a person using the accessible space can load and unload from the vehicle. ACCESS AISLE FOR VAN 96 INCHES 96 INCHES				
6	Is the parking space(s) and access aisle(s) free of curb ramps that extend into the space and other obstructions?	If a curb ramp extends into the parking space(s) or access aisle, a person using that space and aisle would not have adequate level space to unload and load from the vehicle.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
7 (CE)	**Do curbs on the route from off-street public parking have curb ramps at the parking locations?**	Pathways should have curb ramps. Without curb ramps, wheelchair users may be required to travel in the street or behind parked cars where drivers cannot see them.				
8 (CE)	**Do curbs on the route from off-street public parking have curb ramps at the drop off locations?**	See above Question # 7.				
9	Does every accessible parking space have a vertical sign posted with the International Symbol of Accessibility?	Symbol in the illustration depicts the International Symbol of Accessibility.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
10	Are signs mounted a minimum of 60 inches above the ground surface so that they can be seen over a parked vehicle?	Signs must be located so a vehicle parked in the space does not obscure them. (Van accessible spaces must be indicated with an additional sign)				
11 (CE)	**Is VAN accessible parking provided?**	1 van space for every 6 standard accessible spaces must be provided, but never less than one. For example, if there are 23 total spaces, at least one accessible space is required and it must be large enough (See Question # 5 for dimensions) to accommodate a van. If there are 201 total parking spaces, at least seven accessible spaces would be required and two of those would have to accommodate vans.				
12	Is VAN accessible parking signage provided?	Signs must be mounted a minimum of 60 inches above the ground surface so that they can be seen over a parked vehicle.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
13	If van accessible parking is provided in a parking garage, is there at least 8 feet 2 inches (98 inches total) vertical clearance available for full-sized, lift equipped vans?	If there is no parking garage, check NA. If designated accessible parking is located in a garage, the vertical clearance should be at a minimum 8 feet 2 inches (98 inches). Vertical clearance should be posted. 98 INCHES MIN 16 FEET MIN				
EXTERIOR ROUTE (FROM ACCESSIBLE PARKING, PUBLIC TRANSPORTATION, AND PUBLIC SIDEWALK TO THE ENTRANCE)						
14 (CE)	**For exterior routes, if the accessible route crosses a curb, is a curb ramp provided to the building entrance from the following: (Please mark NA for those that do not apply.)**	Self explanatory.				
	a. Parking?					
	b. Public transportation?					

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
	c. Public sidewalk?					
15	Is the accessible route to the building entrance at least 36 inches wide for exterior routes from the following:(Please mark NA for those that do not apply.)	SIDEWALK 36 INCHES MIN				
	a. Parking?					
	b. Public transportation?					
	c. Public sidewalk?					
16	Is the accessible route to the building entrance stable, firm, and slip resistant from the following: (Please mark NA for those that do not apply.)	An example of a stable surface is a floor or ground surface without loose elements like gravel or wood chips. Firm surfaces include solid concrete or pavement as opposed to a grassy, graveled or soft soil surface. Avoid glossy or slick surfaces such as ceramic tile.				
	a. Parking?					

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
	b. Public transportation?					
	c. Public sidewalk?					
17	Is there an accessible route that does not include stairs or steps?	Self explanatory.				
18	Is the route to the entrance from the accessible parking spaces, including transitions at curb ramps, free of grates, gaps, and openings that are both greater than ½ inch wide and over ¼ inch deep?	Self explanatory.				
RAMPS:						
19	Is an access ramp present?	If there is more than one ramp, select the one that appears to be the primary access ramp.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
20 (CE)	**Is each run (leg) of the ramp no longer than 30 feet between landings?**	**Each "run," shown in the white sections in the diagram below, must be no longer than 30 feet.** 				
21	Are 60 inches (5 feet) long, level landings provided at the top and bottom of each ramp run?	See Question 20 diagram above.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
22 (CE)	**Are handrails provided on both sides of the ramp that are mounted between 34 and 38 inches above the ramp surface, if it is longer than 6 feet?**	If the ramp is not longer than 6 feet, check NA. HANDRAILS ON BOTH SIDES				
23 (CE)	**Are all ramps at least 36 inches wide?**	PASSAGEWAY 36 INCHES MIN				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments

BUILDING ENTRANCE						
24	Is the main entrance accessible?	Self explanatory.				
25 (CE)	**If a main entrance is not accessible, is there another accessible entrance?**	Self explanatory.				
26	If a main entrance is not accessible, is there directional signage indicating the location of the accessible entrance?	ENTRANCE				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
27 (CE)	**Do doors have an opening at least 32 inches wide (at the narrowest point below the opening hardware) when opened to 90°?**	When measuring double doors, measure the opening with one door open to 90°. 32 INCHES MIN CLEAR OPENING				
28 (CE)	**Is space available for a wheelchair user to approach, maneuver, and open the door?**	Appropriate space perpendicular and parallel to a doorway permits a wheelchair user, people using walkers and other mobility devices to open the door safely and independently. Following are two common examples of required minimum maneuvering clearances: 1. Approaching the door and pulling it toward you to open requires 60 inches of clear space perpendicular to the doorway and 18 inches parallel to the doorway. 2. Approaching the door and pushing it away from you to open requires 48 inches of clear space perpendicular to the doorway.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
		18 min 445 60 min 1525 (a) front approach, pull side 12 min 305 48 min 1220 (c) front approach, push side, door provided with both closer and latch				
29	Is the space required to open the door level and clear of movable objects (chairs, trash cans, etc.)?	If there are nonpermanent items such as trashcans, merchandise, etc., located in these areas, they must be removed or relocated.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
30	Are there automatic doors?	Self explanatory.				
31 (CE)	**Do entrance doors have handles that can be opened without grasping, pinching, or twisting of the wrist?**	Can the door be opened by someone with a closed fist or fully open hand?Door knobs, for example, cannot be used in this manner.				
INTERIOR ROUTE (FROM THE BUILDING ENTRANCE TO THE CLINIC/OFFICE ENTRANCE, TO THE REGISTRATION COUNTER/WINDOW, AND THROUGH THE CLINIC/OFFICE TO AREAS THAT PATIENTS COULD GO)						
32	Is there an interior route to the medical office?	Some medical offices are accessed directly from the street or parking lot rather than being located within a larger office building or complex, therefore they do not have interior routes.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
33	Is there an interior accessible route to the medical office that does not include stairs or steps?	Floors of a given story are level throughout the building, or connected by ramps, passenger elevators or access lifts.				
34 (CE)	**Are ALL interior paths of travel at least 36 inches wide?**	PASSAGEWAY 36 INCHES MIN				
35	Is the interior accessible routestable, firm, and slip resistant?	Avoid unsecured carpeting or other loose elements. It is easier for people using walkers, wheelchairs and other aids to walk or push on surfaces that have low pile carpeting without a pad underneath. Glossy or slick surfaces such as ceramic tile or marble can be slippery.				
36	Is the interior accessible route well lighted?	A brightly lit corridor will help avoid falls.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
37 (CE)	**If there are stairs on the accessible route, are there handrails on each side?**	If there are no stairs, check NA.				
38	If there are stairs, are all stairs risers closed that are on the accessible route?					
39	If there are stairs, are all stair treads marked by a stripe providing a clear visual contrast to assist people with visual impairments?	Contrast striping must be provided on the upper approach and lower tread for interior stairs and on the upper approach and all treads for exterior stairs. Stripes must be 2" to 4" wide placed parallel to and no more than 1" from the nose of the step or upper approach. The stripe must extend the full width of the step or upper approach and should be made of material that is at least as slip resistant as the other stair treads (a painted stripe is acceptable).				
40 (CE)	**If a platform lift is used, can it be used without assistance?**	If there is no platform lift, check NA. Lifts sometimes require a key for operation, thus preventing independent use.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
41	Does the interior door to the medical office require less than 5 pounds of pressure to open?	If interior door is a fire door, check NA. For interior doors (not fire doors), labor force to open a door should be ≤ 5 lbs. Measure the weight of the labor force of the door after the door is unlatched; attach the hook end of the scale to the door handle and pull until the door opens and read the weight of the force.				
42	Is there a clear space 30 inches wide by 48 inches long in the waiting area(s) for a wheelchair or scooter user to park that is not in the path of travel?	48 min 1220 30 min 760				
43	Is the path through the medical office free of any objects that stick out into the circulation path that a blind person might not detect with a cane?	If an object protrudes more than 4 inches and is located between 27 inches above the walking surface and below 80 inches, a blind person walking with a cane will not detect it. OVERHANGING SIGN PROTRUDING OBJECT 80 INCHES 4 INCHES MAX 27 INCHES				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
44	If floor mats are used, are the edges of floor mats stiff enough or secured so that they do not roll up?	If floor mats are not in use, check NA. Floor mats that are not secured to the floor can roll up or bunch up under walkers or wheelchair casters and cause a tripping hazard.				
45	Is a section of the sign-in/registration counter no more than 34 inches high and at least 36 inches wide and free of stored items.	28 to 34 INCHES				
46	Does the office have a method, other than a lowered counter, by which people can sign in/register? (If yes, please note this method in comments.)	A medical office may use reasonable alternative methods to meet this need such as a clip board.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
47	Do signs identifying permanent rooms and spaces include raised letters and Braille?	AREA OF REFUGE 48 min 1220 60 max 1525				
48	Are the raised letters and Braille signs mounted between 48 inches and 60 inches from the floor?	AREA OF REFUGE 48 min 1220 60 max 1525 Raised letters and Braille signs are either on the latch side of doors or on the face of doors and are mounted between 48 inches and 60 inches from the floor.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
49	If the building has a fire alarm system, are visual signals provided in each public space, including toilet rooms and each room where patients are seen?	If the building does not have a fire alarm system, check NA.				
50	Are all patient-operated controls (call buttons, self-service literature, brochures, hand sanitizers, etc.) mounted or presented between 15 inches and 48 inches from the floor?	15 min 380 48 max 1220 15 min 380 48 max 1220 10 max 255				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
51	Are all patient operated controls (e.g., call buttons, hand sanitizers) operable with one hand without grasping, pinching, or twisting to operate?	For example, a pump hand sanitizer that must be operated using two hands is inaccessible.				
ELEVATORS						
52	Is there an elevator?					
53 (CE)	**If needed, is the elevator available for public/patient use during business hours?**	Self explanatory.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
54 (CE)	**Is the elevator equipped with both visible and audible door opening/closing and floor indicators?**	A visible and audible signal is required at each elevator entrance to indicate which car is answering a call. An audible signal would be a "ding" or a verbal announcement. "DING" "DING - DING"				
55 (CE)	**Is there a raised letter and Braille sign on each side of each elevator jamb?**	These signs allow everyone to know which floor they are on before entering or exiting the elevator.				
56 (CE)	**Are the hall call buttons for the elevator no higher than 48 inches from the floor?**	15 min 380 48 max 1220				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
		15 min 380 48 max 1220 10 max 255				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
57 (CE)	**Is the elevator car large enough for a wheelchair or scooter user to enter, turn to reach the controls, and exit?**	The doorway should be at least 36 inches wide and the floor area should be at least 51 inches long and 80 inches wide or 54 inches long and 68 inches wide, depending on where the door is located.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
58 (CE)	**Do the buttons on the control panel inside the elevator have Braille and raised characters/symbols near the buttons?**	Self explanatory.				
59	Is there an emergency communication system in the elevator?	Self explanatory.				
60	Is the elevator emergency communication system usable without requiring voice communication?	It is essential that emergency communication not be dependent on voice communications alone because the safety of people with hearing or speech impairments could be jeopardized. Visible signal requirement could be satisfied with something as simple as a button that lights when the message is answered, indicating that help is on the way.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
61	Do raised letters and Braille identify the emergency intercom in the elevator?	Self explanatory.				
TOILET ROOMS (INCLUDING THOSE USED FOR SPECIMEN COLLECTION)						
ALL TOILET ROOMS:						
62	Is there an accessible toilet room?	Self explanatory.				
63	If there is an inaccessible toilet room, is there directional signage to an accessible toilet room?	Mark NA if there are no inaccessible toilet rooms. Self explanatory.				
64	Does the interior door to the restroom require less than 5 pounds of pressure to open?	If restroom door is a fire door, check NA. For interior doors (not fire doors), labor force to open a door should be ≤ 5 lbs. Measure the				

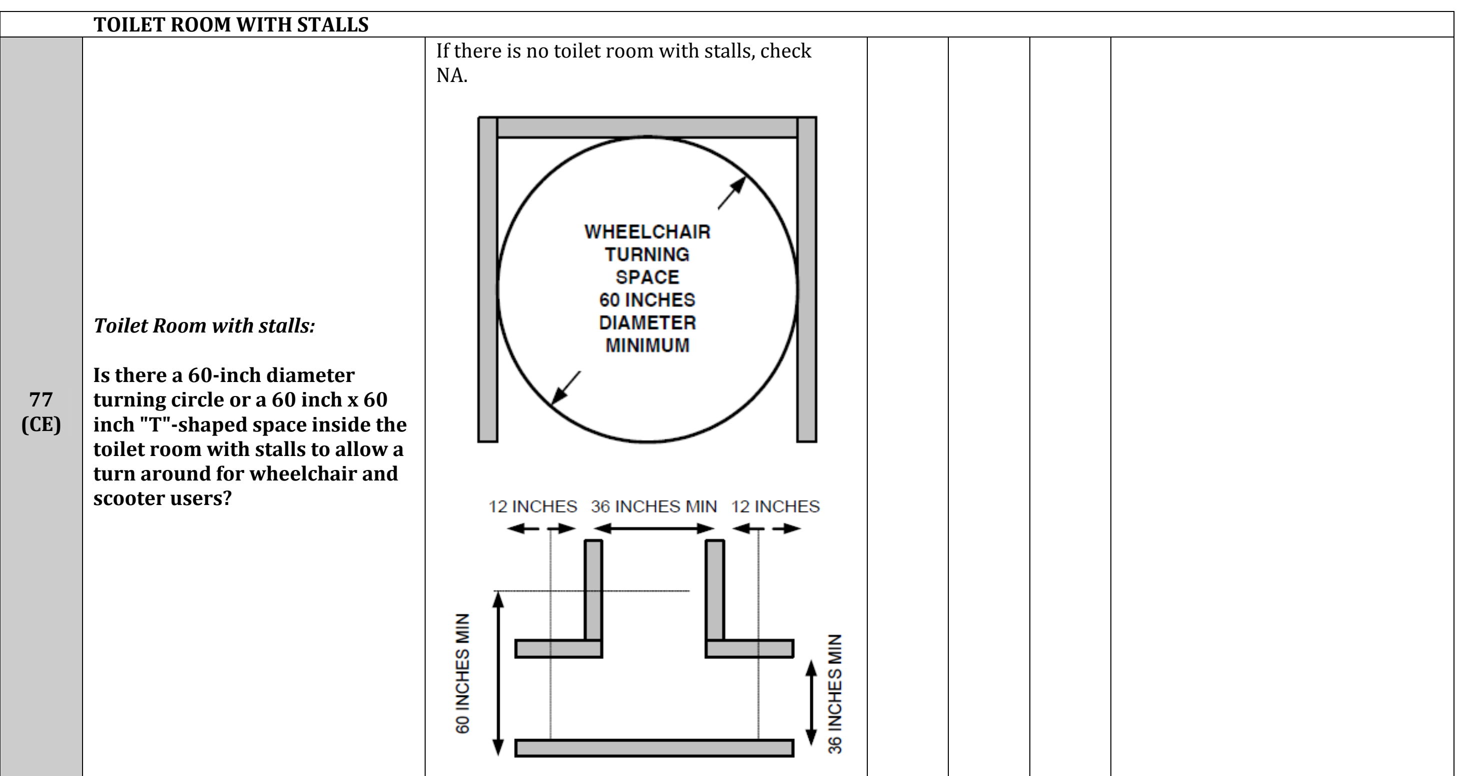
Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
		weight of the labor force of the door after the door is unlatched; attach the hook end of the scale to the door handle and pull until the door opens and read the weight of the force.				
65 (CE)	**For all toilet rooms with and without stalls:** **Are grab bars provided, one on the wall behind the toilet and one on the wall next to the toilet?**	Grab bars should be installed in a horizontal position between 33 and 36 inches above the floor measured to the top of the gripping surface.				
66	Are all objects mounted at least 12 inches above and 1½ inches below the grab bars?	This includes seat cover dispensers, toilet paper dispensers, sanitizers, trash containers, etc.				
67 (CE)	**Is the toilet paper dispenser mounted below the side grab bar with the centerline of the toilet paper dispenser between 7 inches and 9 inches in front of the toilet, and at least 15 inches high?**	15 min 380 48 max 1220 7-9 180-230				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
68 (CE)	**Is there a space that is at least 30 inches wide and 48 inches deep to allow wheelchair users to park in front of the sink?**	This space must extend at least 17 inches under the sink from the front edge, although it can extend up to 19 inches underneath.				
69	Is the space in front of the sink free of trashcans and other movable items?	Self explanatory.				
70	Are the pipes and water supply lines under the sink wrapped with a protective cover?					
71 (CE)	**Are faucet handles operable with one hand and without grasping, pinching, or twisting? (Check Yes if faucets are automatic.)**	A knob handle would not be accessible.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
		LEVER HANDLES				
72	Are all dispensers mounted no higher than 40 inches from the floor?	Included are soap dispensers, paper towel dispensers, seat cover dispensers, hand dryers, etc.				
73	Are all dispensers (soap, paper towel, etc.) operable with one hand and without grasping, pinching, or twisting?	Self explanatory.				
74	If there is a pass-through door for specimen collection, is there a 30 inches by 48 inches space for a wheelchair or scooter user to park in front of it?	If there is no such door, check NA.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
	TOILET ROOM WITHOUT STALLS					
75 (CE)	***Toilet room without stalls:*** **Do toilet room doorways have a minimum clear opening of 32 inches with the door open at 90 degrees, measured between the face of the door and the opposite stop?**	If there is no toilet room without stalls, check NA. 32 INCHES MIN CLEAR OPENING				
76	Is the space inside the toilet room without stalls clear, without trashcans, shelves, equipment, chairs, and other movable objects?	Self explanatory.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
	TOILET ROOM WITH STALLS					
77 (CE)	***Toilet Room with stalls:*** **Is there a 60-inch diameter turning circle or a 60 inch x 60 inch "T"-shaped space inside the toilet room with stalls to allow a turn around for wheelchair and scooter users?**	If there is no toilet room with stalls, check NA.				



Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
78	Is the space inside the accessible stall clear, without trashcans, shelves, equipment, chairs, and other movable objects?	Self explanatory.				
79	Can the hardware on the stall door be operated without grasping, pinching, or twisting of the wrist?	Handles, pulls, latches, locks, and other operating devices on accessible doors shall have a shape that is easy to grasp with one hand and does not require tight grasping, tight pinching, or twisting of the wrist to operate.				
EXAM/TREATMENT ROOMS/MEDICAL EQUIPMENT						
80 (CE)	**Do exam room doorways have a minimum clear opening of 32 inches with the door open at 90 degrees, measured between the face of the door and the opposite stop?**	32 INCHES MIN CLEAR OPENING				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
81 (ME)	**Is there a height adjustable exam table that lowers to between 17 inches and 19 inches from the floor to the top of the cushion?**	Self explanatory				
82 (ME)	**Is there space next to the height adjustable exam table for a wheelchair or scooter user to approach, park, and transfer or be assisted to transfer onto the table?**	[9] 48 min 1220 30 min 760				
83	Does the exam table provide elements to assist during a transfer (such as rails) and support a person while on the table? (If yes, please list in comments.)	Items that could help support a patient while on the table would be armrests, side rails, padded straps, cushions, wedges, etc.				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
84	Is a lift available to assist staff with transfers (portable, overhead, or ceiling mounted)?	Self explanatory.				
85 (CE)	**Is there a 60 inch diameter turning circle or a 60 inch x 60 inch "T"-shaped space so that a wheelchair or scooter user can make a 180° turn?**	WHEELCHAIR TURNING SPACE 60 INCHES DIAMETER MINIMUM 12 INCHES 36 INCHES MIN 12 INCHES 60 INCHES MIN 36 INCHES MIN				

Question #	Criteria (CE = Critical Elements)	Explanation/Guidelines	Yes	No	N/A	Comments
86 (ME)	**Is a weight scale available within the medical office with a platform to accommodate a wheelchair or scooter and the patient?**	Accessible scales are usable by all people including: wheelchair users, people with activity limitations, and larger people who may exceed a standard weight scale limit. This includes people with conditions that interfere with mobility, walking, climbing, using steps (joint pain, short stature, pregnancy, fatigue, respiratory and cardiac conditions, post surgical conditions, orthopedic injuries); and/or who use mobility devices (e.g. canes, crutches, walkers).

2010 ADA Standards for Accessible Design
U.S Department of Justice
http://www.ada.gov/2010ADAstandards_index.htm

The revised regulations for Titles II and III of the Americans with Disabilities Act of 1990 (ADA) were published in the Federal Register on September 15, 2010. They provide the scoping and technical requirements for new construction and alterations resulting from the adoption of revised 2010 Standards in the final rules for Title II (28 CFR part 35) and Title III (28 CFR part 36). The 2010 ADA Standards go into effect March 15, 2012, but can be used now instead of the 1991 standards. The FSR Attachment C draws upon access requirements found in both the 1991 Americans with Disabilities Act Accessibility Guidelines and the 2010 ADA Standards. Some diagrams that appear in the FSR Attachment C are reproduced from these sources.

Two questions in the FSR Attachment C were drawn from Title 24, Part 2 of the California Building Standards Code. These are

1133B.4.4 – Striping for the visually impaired (Rev.1-1-2009), and 1115B-1 – Bathing and Toilet Facilities, placement of toilet paper dispensers. These standards can be found in:
2009 California Building Standards Code with California Errata and Amendments
State of California
Department of General Services
Division of the State Architect
Updated April 27, 2010

Physician Certification Statement Form – Request For Transportation

THIS FORM MUST BE COMPLETED IN FULL AND SIGNED OR IT WILL NOT BE PROCESSED

The purpose of this form is for physicians to communicate to Modivcare™ specific transportation restrictions of a patient/member due to a **medical condition.** The restrictions and requirements stated on this form will be used by Modivcare to assign the best means of transportation for the patient/member.

THEREFORE, THE STATEMENTS MADE BY PHYSICIANS REGARDING PATIENT TRANSPORTATION RESTRICTIONS ARE MADE UNDER PENALTY OF MEDICAID FRAUD.

Patient name: ____

Patient ID #/CIN #: ____________________________ Patient DOB: ________/____________/____________

If the patient requires **NEMT**, **refer to page 2 to determine the medically necessary mode of transport.** Then, select one of the following:

☐ Gurney/litter/stretcher van ☐ BLS ambulance ☐ ALS ambulance ☐ Critical care transport
☐ Air transportation ☐ Wheelchair van

These services require physician justification and signature below.

Duration of services (based on continued health plan eligibility):

Start Date:_________ ☐ 60 days ☐ 90 days ☐ 180 days ☐ 365 days (Chronic condition only)

Justification

Transportation under Medi-Cal is covered only when the patient's medical and physical condition does not allow him or her to travel by bus, passenger car, taxi, or other form of public or private conveyance. The physician is required to document the patient's limitations and provide specific physical and medical limitations that preclude the patient's ability to reasonably ambulate without assistance or be transported by public or private vehicles. Please document below: **What prevents the patient from traveling by bus, passenger car, taxi, or other form of public or private conveyance?**

____

____

Certification

The physician, dentist or podiatrist responsible for providing care for the patient is responsible for determining medical necessity for transportation. This certificate can be completed and signed by a **participating physician group (PPG)**, **independent practice association (IPA)**, **primary care physician (PCP)**, **MD**, **LVN**, **RN**, **PA**, **NP**, **mental health provider, substance use disorder provider, certified midwife**, or **discharge planner** who is employed or supervised by the **hospital, facility or physician's office** where the patient is being treated and who has knowledge of the patient's condition at the time of completion of this certificate.

Staff/physician's name (print): ____

Staff/physician's signature: ________________________________Title:________________________________

Description of transportation services	
Gurney/litter/stretcher van	Patient is confined to a bed and cannot sit in a wheelchair but **does not require** medical attention or monitoring during transport.
BLS ambulance	Patient is confined to a bed, cannot sit in a wheelchair, and **requires** medical attention or monitoring during transport for reasons, such as: • Isolation precautions. • Non-self-administered oxygen. • Sedation.
ALS ambulance	Patient is confined to a bed, cannot sit in a wheelchair, and **requires** medical attention or monitoring during transport for reasons, such as: • IV requiring monitoring. • Cardiac monitoring. • Tracheotomy.
Critical care transport	Patient has a special condition that **requires** the presence of a critical care nurse or a medical doctor during transport.
Air transportation	**Requires** prior authorization from the plan.
Wheelchair van	Patient is a wheelchair user and **requires** lift-equipped or roll-up wheelchair vehicle.

Wheelchair van	Patient is a wheelchair user and **requires** lift-equipped or roll-up wheelchair vehicle.

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Staff Qualifications	Approved date: ___________________ Approved by: _____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:
All professional health care personnel must have current California licenses and certifications and must be qualified and trained for assigned responsibilities.

PROCEDURE:
I. HEALTH CARE LICENSE AND CERTIFICATION REQUIREMENTS

A. All medical professional licenses and certifications must be current and issued from the appropriate agency to practice in California. Copies and/or lists of currently certified or credentialed personnel must be readily available when requested by reviewers.

Medical Professional	License/Certification	Issuing Agency
Certified Nurse Midwife	RN License and Nurse-Midwife certificate	CA Board of Registered Nursing
Certified Radiological Technologist (CRT)	CRT Certificate	CA Department of Public Health (Radiological Branch)
Doctor of Osteopathy (DO)	Physician's & Surgeon's Certificate, DEA Registration	Osteopathic Medical Board of CA, Drug Enforcement Administration
Licensed Vocational Nurse (LVN)	LVN License	CA Board of Vocational Nursing and Psychiatric Technicians
Nurse Practitioner (NP)	RN License with NP Certification and Furnishing Number	CA Board of Registered Nursing
Pharmacist (Pharm.D)	Pharmacist License	CA State Board of Pharmacy
Physician/Surgeon (MD)	Physician's & Surgeon's Certificate, DEA Registration	Medical Board of CA, Drug Enforcement Administration
Physician's Assistant (PA)	PA License	Physician Assistant Examining Committee / Medical Board of CA
Radiological Technician	Limited Permit	CA Department of Health Care Services (Radiological Branch)
Registered Dietitian	RD Registration Card	Commission on Dietetic Registration
Registered Nurse	RN license	CA Board of Registered Nursing

II. IDENTIFICATION OF HEALTH CARE PRACTITIONERS

A. A health care practitioner shall disclose his or her name and practitioner's license type, as granted by the State of California, on a nametag with at least 18-point type. A health care practitioner in a practice or office, whose license is prominently displayed, may opt not to wear a nametag.

Note: It is unlawful for any person to use the title "nurse" in reference to himself or herself, in any capacity, except for an individual who is a registered nurse or licensed vocational nurse.

III. TRAINING OF SITE PERSONNEL

A. Personnel on site must be qualified for their responsibilities and adequately trained for their scope of work. Site staff should have a general understanding of the systems/processes in place, appropriate supervisions, and knowledge of the available sources of information on site.

B. Provider and staff must be able to demonstrate operation of medical equipment used in their scope of work.

Notice To Consumers Regulation

Effective June 27, 2010, a new regulation, mandated by Business and Professions Code section 138, will go into effect requiring physicians in California to inform their patients that they are licensed by the Medical Board of California, and include the board's contact information. The information must read as follows.

NOTICE TO CONSUMERS
Medical doctors are licensed and regulated by the Medical Board of California
(800) 633-2322
www.mbc.ca.gov

The purpose of this new requirement (Title 16, California Code of Regulations section 1355.4) is to inform consumers where to go for information or with a complaint about California medical doctors.

- Physicians may provide this notice by one of three methods:
- Prominently posting a sign in an area of their offices conspicuous to patients, in at least 48-point type in Arial font. (See link "Sign for printing", below, to print the actual notice.)
- Including the notice in a written statement, signed and dated by the patient or patient's representative, and kept in that patient's file, stating the patient understands the physician is licensed and regulated by the board.
- Including the notice in a statement on letterhead, discharge instructions, or other document given to a patient or the patient's representative, where the notice is placed immediately above the signature line for the patient in at least 14-point type.

For more information, please contact Frank Miller, at frank.miller@mbc.ca.gov or (916) 263-2480.
Sign for printing: http://www.mbc.ca.gov/licensee/notice_to_consumers_regulation_Sample_sign.pdf

PCP:	
SECTION: Infection Control	
POLICY AND PROCEDURE: Standard and Universal Precautions	Approved date: _________________ Approved by: ___________________ Effective date: __________________ Revised date: __________________ Revised date: __________________

POLICY:

Infection Control standards are practiced on site to minimize risk of disease transmission. Site personnel will apply the principles of "Standard Precautions" (CDC, 1996), used for all patients regardless of infection status. Standard precautions apply to blood, all body fluids, non-intact skin, and mucous membranes, which are treated as potentially infectious for HIV, HBV or HCV, and other bloodborne pathogens. "Universal precautions" refer to the OSHA mandated program that requires implementation of work practice controls, engineering controls, bloodborne pathogen orientation/education, and record keeping in healthcare facilities.

PROCEDURE:

I. HAND WASHING FACILITIES

A. Hand washing facilities are available in the exam room and/or utility room, and include an adequate supply of running potable water, soap and single use towels or hot air drying machines. Sinks with a standard faucet, foot-operated pedals, 4-6-inch wing-type handle, automatic shut-off systems or other types of water flow control mechanism are acceptable. Staff is able to demonstrate infection control "barrier" methods used on site to prevent contamination of faucet handle, door handles and other surfaces until hand washing can be performed. On occasions when running water is not readily available, an antiseptic hand cleanser, alcohol-based hand rub, or antiseptic towelettes is acceptable until running water is available (29 CFR 1919.1030).

B. Hand washing prevents infection transmission by removing dirt, organic material and transient microorganisms from hands. Hand washing with plain (non-antimicrobial) soap in any form (e.g., bar, leaflet, liquid, powder, granular) is acceptable for general patient care (Association for Professionals in Infection Control and Epidemiology, Inc., 1995).

II. ANTISEPTIC HAND CLEANER

A. Antimicrobial agents or alcohol-based antiseptic hand rubs are used for hand washing when indicated to remove debris and destroy transient microorganisms (e.g., before performing invasive procedures, after contact with potentially infectious materials). Plain and antiseptic hand wash products are properly maintained and/or dispensed to prevent contamination.

III. WASTE DISPOSAL CONTAINER

A. Contaminated wastes (e.g. dental drapes, band aids, sanitary napkins, soiled disposal diapers) are disposed of in regular solid waste (trash) containers, and are maintained to prevent potential contamination of patient/staff areas and/or unsafe access by infants/children.

IV. ISOLATION PROCEDURES

A. Personnel are able to demonstrate or verbally explain procedure(s) used on site to isolate patients with potentially contagious conditions from other patients. If personnel are unable to demonstrate or explain site-specific isolation procedures *and* cannot locate written isolation procedure instructions, site is considered deficient.

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.
Complete all fields and forward immediately via secure fax: (877) 808-7024.

PURPOSE

The Potential Quality Issue (PQI) Referral Form is to be used to report any potential or suspected deviation from the standard of care that cannot be determined to be justified without additional review. It should also be used for hospital-acquired conditions (HACs), health care-acquired conditions (HCACs), other provider preventable conditions (OPPCs), and serious reportable adverse events (SRAEs).

IMPORTANT

The PQI Referral Form is a confidential document used by the Quality Management Program to aid in the evaluation and improvement of the overall quality of care delivered to CalViva Health enrollees. PQI referral forms are reviewed and evaluated confidentially in a separate and secure manner.

Refer issues identified as *member appeals or member grievances* to the Member Appeals and Grievances Department for appropriate case handling and resolution.

To protect the confidentiality and privilege of this PQI referral, follow the guidelines outlined below:

1. Never discuss the details of this referral reporting with anyone (including the enrollee) other than those to whom you have been specifically directed to communicate with by your supervisor or a representative of the PQI review entity.
2. Although you must never refer to the referral reporting itself within the member's medical records, you should objectively record pertinent facts of the incident (for example, injury or medication reaction) within the record whenever appropriate.
3. Never make or retain photocopies of this PQI referral reporting under any circumstances.
4. Never use or refer to this report in associate disciplinary action of any kind or any time.

REFERRAL CONTENT

1. All the fields on the PQI form are **required** fields.
2. Use the fillable PDF form to complete the PQI referral. Do not fax a handwritten PQI referral form. Handwritten PQI forms will be returned to originator for proper re-submission.
3. <u>All sections</u> of the PQI referral must be completed.
4. The form should be completed as follows:
   a) Referral source – Include referral date, first and last name of the associate completing the referral, contact information (telephone number, fax number) and the name of the associate who identified the PQI. If same as the referred by, enter *same as referred by* in this section.
   b) Member demographics – Include member first and last name, member ID, member's current primary care physician (PCP) and the associated participating physician group (PPG).
   c) PQI Event Dates / Filed Against Details – Include date of event, first and last name of practitioner that PQI is filed against (if same as PCP, re-enter PCP and PPG name here) and practitioner's office location. If hospital, please include name of hospital and location. Provide an admission date. Indicate the type of PQI using the check box items provided on the PQI referral. In the description of event field, describe event(s) chronologically, including dates, provider or practitioner names, specify any equipment or medication involved, quote relevant statements made by the provider or others and provide a complete explanation describing the potential deviation in the standard of care.
5. Complete and submit this report directly via secure fax at (877) 808-7024 within one business day of the event/occurrence. The case will be forwarded for clinical evaluation and/or review.
6. Incomplete referral forms are returned to the associate, such as the registered nurse (RN), who initiated the referral and/or his or her supervisor via email.

Potential Quality Issue (PQI) Referral Form

HAC/HCAC, OPPC, SRAE, & AND OTHER PQI INDICATORS **(Bolded text indicates HAC/HCAC, OPPC OR SRAE)**

Surgical events:

- ☐ **Surgery on wrong body part**
- ☐ **Surgery on wrong patient**
- ☐ **Wrong surgical procedures on a patient**
- ☐ **Foreign object retained after surgery**
- ☐ Anesthesia adverse event
- ☐ **Surgery with post-operative/intra-operative death in a normal healthy patient**
- ☐ Acute MI or CVA within 48 hours after elective surgery
- ☐ Cardiac or respiratory arrest in the operating room (OR)
- ☐ Unplanned return to OR, unplanned removal, injury or repair of an organ
- ☐ Other (explain) ______________________

Surgical site/post-operative infections:

- ☐ **Mediastinitis after coronary artery bypass graft (CABG)**
- ☐ **Bariatric surgery for obesity (laparoscopic gastric bypass, gastroenterostomy, laparoscopic gastric restrictive surgery)**
- ☐ **Orthopedic procedures on spine, neck, shoulder, elbow, knee or hip**
- ☐ Other (explain) ______________________

Patient death/disability:

- ☐ Maternal death or serious disability associated with labor or delivery in a low-risk pregnancy while being cared for in a health care facility
- ☐ Patient death or serious disability associated with the use of contaminated drugs, devices, or biologics
- ☐ Patient death or serious disability associated with use or function of a device in patient care in which the device is used or functions other than as intended
- ☐ Patient death or serious disability associated with a medication error (e.g., errors involving the wrong drug, wrong dose, wrong patient, wrong time, wrong rate, wrong preparation or wrong route of administration)
- ☐ Unexpected death (Please explain) ______________________

Patient issue:

- ☐ Member leaves against medical advice (AMA) when there is a potential for serious adverse event(s)
- ☐ Patient suicide attempt or serious injury to self while in treatment
- ☐ Other (explain) ______________________

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.
Complete all fields and forward immediately via secure fax: (877) 808-7024.

HAC/HCAC, OPPC, SRAE, & AND OTHER PQI INDICATORS **(Bolded text indicates HAC/HCAC, OPPC OR SRAE)**

Hospital-acquired (nosocomial) infections:

☐ **Catheter-associated urinary tract infection (UTI)**
☐ **Vascular catheter-associated Infection**
☐ Other (explain) ____________________

Deep vein thrombosis or pulmonary embolism following orthopedic procedures:

☐ **Total knee replacement**
☐ **Total hip replacement**
☐ Other (explain) ____________________

Falls (with trauma):

☐ **Fractures**
☐ **Dislocations**
☐ **Intracranial injuries**
☐ Other (explain) ____________________

Injury:

☐ **Crushing injuries**
☐ **Burns**
☐ **Electric shock**
☐ Other (explain) ____________________

Manifestations of poor glycemic control:

☐ **Diabetic ketoacidosis**
☐ **Nonketotic hyperosmolar coma**
☐ **Hypoglycemic coma**
☐ **Secondary diabetes with ketoacidosis**
☐ **Secondary diabetes with hyperosmolarity**

Obstetrics:

☐ Nonmedically indicated (elective) delivery less than 39 weeks gestational age
☐ Newborn Apgar < 4 at 1 minute or < 6 at 5 minutes

Admission/readmission/discharge:

☐ Unexpected / unanticipated readmission within 30 days to acute level of care with same or similar diagnosis or as a complication of the previous admission
☐ Unplanned admission following diagnostic test or outpatient procedure
☐ Neurological deficit present at discharge not present on admit
☐ Delay in transfer/treatment or discharge – which results in a poor outcome to the member or additional costs to the plan
☐ Delayed diagnosis or missed diagnosis – resulting in adverse member outcome or extended hospital stay
☐ **Infant discharged to the wrong person**

Outpatient/ambulatory care:

☐ Breach of member confidentiality or ethics concern/violation
☐ Abnormal diagnostic study not followed up appropriately where the potential for adverse outcome exists
☐ Inattention to or lack of appropriate follow-up of consultant's major recommendations without appropriate rationale
☐ Practitioner's failure to follow-up on any member's significant complaint or physical finding within a reasonable period of time
☐ Members with a disease process requiring follow-up with no evidence of follow-up and no documentation in the medical records of member contact for follow-up
☐ Hospitalization resulting from inappropriate drug therapy

Other:

☐ **Pressure ulcer stages III & IV occurring after hospital admission**
☐ **Air embolism**
☐ **Blood transfusion incompatibility**
☐ Any substandard care with the potential for harm to the member (please explain fully)

____

☐ Member refused to file a grievance
☐ Grievance withdrawal
☐ Other (select only when no other selection is applicable and explain fully)

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.
Complete all fields and forward immediately via secure fax: (877) 808-7024.

Description of event:

Based on my judgment, I believe there was a deviation in the standard of care resulting in a potential quality of care issue for the following reasons (please provide complete and detailed summary – must be typed, not handwritten):

CalViva Health is a licensed health plan in California that provides services to Medi-Cal enrollees in Fresno, Kings and Madera counties. CalViva Health contracts with Health Net Community Solutions, Inc. to provide and arrange for network services. Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

HAC/HCAC, OPPC, SRAE, & AND OTHER PQI INDICATORS **(Bolded text indicates HAC/HCAC, OPPC OR SRAE)**

Surgical events:

- ☐ **Surgery on wrong body part**
- ☐ **Surgery on wrong patient**
- ☐ **Wrong surgical procedures on a patient**
- ☐ **Foreign object retained after surgery**
- ☐ Anesthesia adverse event
- ☐ **Surgery with post-operative/intra-operative death in a normal healthy patient**
- ☐ Acute MI or CVA within 48 hours after elective surgery
- ☐ Cardiac or respiratory arrest in the operating room (OR)
- ☐ Unplanned return to OR, unplanned removal, injury or repair of an organ
- ☐ Other (explain) ______________________

Surgical site/post-operative infections:

- ☐ **Mediastinitis after coronary artery bypass graft (CABG)**
- ☐ **Bariatric surgery for obesity (laparoscopic gastric bypass, gastroenterostomy, laparoscopic gastric restrictive surgery)**
- ☐ **Orthopedic procedures on spine, neck, shoulder, elbow, knee or hip**
- ☐ Other (explain) ______________________

Patient death/disability:

- ☐ Maternal death or serious disability associated with labor or delivery in a low-risk pregnancy while being cared for in a health care facility
- ☐ Patient death or serious disability associated with the use of contaminated drugs, devices, or biologics
- ☐ Patient death or serious disability associated with use or function of a device in patient care in which the device is used or functions other than as intended
- ☐ Patient death or serious disability associated with a medication error (e.g., errors involving the wrong drug, wrong dose, wrong patient, wrong time, wrong rate, wrong preparation or wrong route of administration)
- ☐ Unexpected death (Please explain) ______________________

Patient issue:

- ☐ Member leaves against medical advice (AMA) when there is a potential for serious adverse event(s)
- ☐ Patient suicide attempt or serious injury to self while in treatment
- ☐ Other (explain) ______________________

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.

HAC/HCAC, OPPC, SRAE, & AND OTHER PQI INDICATORS **(Bolded text indicates HAC/HCAC, OPPC OR SRAE)**

Hospital-acquired (nosocomial) infections:

- ☐ **Catheter-associated urinary tract infection (UTI)**
- ☐ **Vascular catheter-associated Infection**
- ☐ Other (explain) ___________________________

Deep vein thrombosis or pulmonary embolism following orthopedic procedures:

- ☐ **Total knee replacement**
- ☐ **Total hip replacement**
- ☐ Other (explain) ___________________________

Falls (with trauma):

- ☐ **Fractures**
- ☐ **Dislocations**
- ☐ **Intracranial injuries**
- ☐ Other (explain) ___________________________

Injury:

- ☐ **Crushing injuries**
- ☐ **Burns**
- ☐ **Electric shock**
- ☐ Other (explain) ___________________________

Manifestations of poor glycemic control:

- ☐ **Diabetic ketoacidosis**
- ☐ **Nonketotic hyperosmolar coma**
- ☐ **Hypoglycemic coma**
- ☐ **Secondary diabetes with ketoacidosis**
- ☐ **Secondary diabetes with hyperosmolarity**

Obstetrics:

- ☐ Nonmedically indicated (elective) delivery less than 39 weeks gestational age
- ☐ Newborn Apgar < 4 at 1 minute or < 6 at 5 minutes

Admission/readmission/discharge:

- ☐ Unexpected / unanticipated readmission within 30 days to acute level of care with same or similar diagnosis or as a complication of the previous admission
- ☐ Unplanned admission following diagnostic test or outpatient procedure
- ☐ Neurological deficit present at discharge not present on admit
- ☐ Delay in transfer/treatment or discharge – which results in a poor outcome to the member or additional costs to the plan
- ☐ Delayed diagnosis or missed diagnosis – resulting in adverse member outcome or extended hospital stay
- ☐ **Infant discharged to the wrong person**

Outpatient/ambulatory care:

- ☐ Breach of member confidentiality or ethics concern/violation
- ☐ Abnormal diagnostic study not followed up appropriately where the potential for adverse outcome exists
- ☐ Inattention to or lack of appropriate follow-up of consultant's major recommendations without appropriate rationale
- ☐ Practitioner's failure to follow-up on any member's significant complaint or physical finding within a reasonable period of time
- ☐ Members with a disease process requiring follow-up with no evidence of follow-up and no documentation in the medical records of member contact for follow-up
- ☐ Hospitalization resulting from inappropriate drug therapy

Other:

- ☐ **Pressure ulcer stages III & IV occurring after hospital admission**
- ☐ **Air embolism**
- ☐ **Blood transfusion incompatibility**
- ☐ Any substandard care with the potential for harm to the member (please explain fully)

____

- ☐ Member refused to file a grievance
- ☐ Grievance withdrawal
- ☐ Other (select only when no other selection is applicable and explain fully)

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.
Complete all fields and forward immediately via secure fax: 877-808-7024.

Description of event:

Based on my judgment, I believe there was a deviation in the standard of care resulting in a potential quality of care issue for the following reasons (please provide complete and detailed summary – must be typed, not handwritten):

Community Health Plan of Imperial Valley ("CHPIV") is the Local Health Authority (LHA) in Imperial County, providing services to Medi-Cal enrollees in Imperial County. CHPIV contracts with Health Net Community Solutions, Inc. to arrange health care services to CHPIV members. *Health Net Community Solutions, Inc. is a subsidiary of Health Net, LLC and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All other identified trademarks/service marks remain the property of their respective companies. All rights reserved.

Potential Quality Issue (PQI) Referral Form

(Includes HACs/HCACs, OPPCs and SRAEs)

Do not photocopy this form. The information contained is confidential and peer-review protected.
Complete all fields and forward immediately to Health Net* via secure fax: (877) 808-7024.

PURPOSE

The Potential Quality Issue (PQI) Referral Form is to be used to report any potential or suspected deviation from the standard of care that cannot be determined to be justified without additional review. It should also be used for hospital-acquired conditions (HACs), health care-acquired conditions (HCACs), other provider preventable conditions (OPPCs), and serious reportable adverse events (SRAEs).

IMPORTANT

The PQI Referral Form is a confidential document used by the Health Net Quality Management Program to aid in the evaluation and improvement of the overall quality of care delivered to Health Net enrollees. PQI referral forms are reviewed and evaluated confidentially in a separate and secure manner.

Refer issues identified as *member appeals or member grievances* to Health Net's Member Appeals and Grievances Department for appropriate case handling and resolution.

To protect the confidentiality and privilege of this PQI referral, follow the guidelines outlined below:

1. Never discuss the details of this referral reporting with anyone (including the enrollee) other than those to whom you have been specifically directed to communicate with by your supervisor or a representative of the PQI review entity.
2. Although you must never refer to the referral reporting itself within the member's medical records, you should objectively record pertinent facts of the incident (for example, injury or medication reaction) within the record whenever appropriate.
3. Never make or retain photocopies of this PQI referral reporting under any circumstances.
4. Never use or refer to this report in associate disciplinary action of any kind or any time.

REFERRAL CONTENT

1. All the fields on the PQI form are **required** fields.
2. Use the fillable PDF form to complete the PQI referral. Do not fax a handwritten PQI referral form. Handwritten PQI forms will be returned to originator for proper re-submission.
3. All sections of the PQI referral must be completed.
4. The form should be completed as follows:
   a) Referral source – Include referral date, first and last name of the associate completing the referral, contact information (telephone number, fax number) and the name of the associate who identified the PQI. If same as the referred by, enter *same as referred by* in this section.
   b) Member demographics – Include member first and last name, member ID, member's current primary care physician (PCP) and the associated participating physician group (PPG).
   c) PQI Event Dates / Filed Against Details – Include date of event, first and last name of practitioner that PQI is filed against (if same as PCP, re-enter PCP and PPG name here) and practitioner's office location. If hospital, please include name of hospital and location. Provide an admission date. Indicate the type of PQI using the check box items provided on the PQI referral. In the description of event field, describe event(s) chronologically, including dates, provider or practitioner names, specify any equipment or medication involved, quote relevant statements made by the provider or others and provide a complete explanation describing the potential deviation in the standard of care.
5. Complete and submit this report directly via secure fax at (877) 808-7024 within one business day of the event/occurrence. The case will be forwarded for clinical evaluation and/or review.
6. Incomplete referral forms are returned to the Health Net associate, such as the registered nurse (RN), who initiated the referral and/or his or her supervisor via email.

PCP:	
SECTION: Preventive Services	
POLICY AND PROCEDURE: Preventive Services: Screening and Equipment	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:

Preventive health care services and health appraisal examinations are provided on a periodic basis for detection of asymptomatic diseases. Examination equipment, appropriate for primary care services is required to be available at the Primary Care Physician office site.

PROCEDURE:

The following equipment shall be maintained onsite and will be appropriate to the population served.

A. Examination table: the examination table has a protective barrier to cover the exam table surface that is changed between patient contact. The exam table is in “good repair”. “Good repair” means clean and well maintained in proper working order.

B. Scales: Precise, reproducible measurements required correct equipment, which is maintained and regularly checked (per manufacturer recommendations or at least annually), for proper functioning and accuracy.

- **Infant scales** are marked and accurate to increments of one (1) ounce or less, and have a capacity of at least 35 pounds. Infant and children are weighed undressed or wearing minimal indoor clothing. If the child resists to the extent that he/she cannot be weighed accurately, document in the medical record that the child resisted and the weight measurement is imprecise.

- **Standing floor scales** are marked and have accurate to increments of one-fourth (¼) pound or less with a capacity of at least 300 pounds.

- **Balance beam or electronic scales** are appropriate for clinic use.

- **Electronic or digital scales** have automatic zeroing and lock-in weight features.

- **Spring balance scales (e.g. bathroom scales) are UNSATISFACTORY** for clinical use.

C. Measuring stature devices: includes length, height and head circumference

- Rigid 90° right angle headboard block that is perpendicular to the recumbent measurement surface or vertical to the wall mounted standing measurement surface.

- Flat, paper or plastic non-stretchable tape or yardstick marked to one-eighth inch (1/8 or 1 mm) or less. The “0” of the tape is exactly at the base of the headboard for recumbent measurement, or exactly at foot level for standing measurement.

- Non-flexible footboard at 90° right angle perpendicular to the recumbent measurement surface or a flat floor surfaces for standing. Adult scale height measuring devices are unacceptable.

- **Head circumference** measurement uses a non-stretchable tape measuring device marked to (1/8 or 1 mm) or less (up to 24 months of age).

D. Basic exam equipment available for use in exam rooms:

- Thermometers: oral and/or tympanic

- Stethoscope and sphygmomanometer with various sized cuffs (e.g., child, adult, obese/thigh)

- Percussion hammer

- Tongue blades

- Patient gowns are appropriate to the population served on site.

- Ophthalmoscope

- Otoscope with adult and pediatric ear speculums

E. Vision testing:

- **Eye charts:** both literate (e.g. Snellen) and illiterate (e.g. “E” chart, “kindergarten” chart, Allen Picture Card Test) eye charts are available.

- **Heel lines** are aligned with the center of the eye chart at a distance of 10 or 20 feet depending on whether the chart is for 10 foot or 20 foot distance. Eye charts are located in an area with adequate lighting and at height appropriate to patient (adjustable).

- **Eye "occluders"** that are disposable (e.g. Dixie cups or tongue blades with back-to-back stickers) are acceptable. Non-disposable occluders are disinfected between patients.

F. Audiometric testing:

- **Tester will assess the testing room for noise level** prior to the start of testing. To ensure the testing room is quiet enough to perform the hearing screening.

Growth and Development			
☐ Prone, lifts head 45°	☐ Vocalizes (cooing)	☐ Grasps rattle	
☐ Kicks	☐ Follows past midline	☐ Smiles responsively (social)	

Physical Examination		**WNL**
General appearance	Well-nourished & developed No abuse/neglect evident	☐
Head	Symmetrical, A.F. open ____cm	☐
Eyes	PERRLA, conjunctivae & sclerae clear Red reflexes present, No strabismus Appears to see	☐
Ears	Canals clear, TMs normal Appears to hear	☐
Nose	Passages clear, MM pink, no lesions	☐
Mouth / Gums	Pink, no bleeding/inflammation/lesions	☐
Neck	Supple, no masses, thyroid not enlarged	☐
Chest	Symmetrical, no masses	☐
Heart	No organic murmurs, regular rhythm	☐
Lungs	Clear to auscultation bilaterally	☐
Abdomen	Soft, no masses, liver & spleen normal	☐
Genitalia	Grossly normal	☐
Male	Circ / uncircumcised, testes in scrotum	☐
Female	No lesions, normal external appearance	☐
Hips	Good abduction, leg lengths equal	☐
Femoral pulses	Present and equal	☐
Extremities	No deformities, full ROM	☐
Skin	Clear, no significant lesions	☐
Neurologic	Alert, no gross sensory or motor deficit	☐

Growth and Development / School Progress Grade: ________		
☐ School achievement	☐ Performs chores	☐ Plays / listens to music
☐ School attendance	☐ Learns new skills	☐ Reads
☐ Understands parental limits & consequences for unacceptable behavior	☐ Participates in organized sports / social activities	☐ Uses both hands independently
☐ Ability to get along with peers	☐ Learns from mistakes & failures, tries again	☐ Preoccupation with rapid body changes

Physical Examination		**WNL**
General appearance	Well-nourished & developed No abuse/neglect evident	☐
Head	No lesions	☐
Eyes	PERRLA, conjunctivae & sclerae clear Vision grossly normal	☐

Ears	Canals clear, TMs normal Hearing grossly normal	☐
Nose	Passages clear, MM pink, no lesions	☐
Teeth	No visible cavities, grossly normal	☐
Mouth / Gums	Pink, no bleeding/inflammation/lesions	☐
Neck	Supple, no masses, thyroid not enlarged	☐
Chest/Breast (females)	Symmetrical, no masses Tanner stage: I II III IV V	☐
Heart	No organic murmurs, regular rhythm	☐
Lungs	Clear to auscultation bilaterally	☐
Abdomen	Soft, no masses, liver & spleen normal	☐
Genitalia	Grossly normal Tanner stage: I II III IV V	☐
Male	Circ / uncircumcised, testes in scrotum	☐
Female	No lesions, normal external appearance	☐
Femoral pulses	Normal	☐
Extremities	No deformities, full ROM	☐
Lymph nodes	Not enlarged	☐
Back	No scoliosis	☐
Skin	Clear, no significant lesions	☐
Neurologic	Alert, no gross sensory or motor deficit	☐

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Personnel Training: Prior Authorization/Referrals	Approved date: ___________________ Approved by: ____________________ Effective date: ____________________ Revised date: _____________________ Revised date: _____________________

POLICY:
To ensure that referrals for specialty care and medical procedures are processed in a timely manner, the site will have a process for the timely processing of internal and external referrals, consultant reports and diagnostic test results.

PROCEDURE:
I. REFERRAL FORMS

A. The staff has an organized, timely referral system clearly evident for making and tracking referrals, physician review of reports, and providing and/or scheduling follow-up care.
   - Appropriate referral forms shall be available at the Primary Care Physician site. The practitioner shall complete the referral form and attach all relevant medical information. Refer to the attached Health Plan specific referral forms.

B. Primary Care Physician offices are required to maintain a "Referral Tracking Log" or an appropriate tickler system. Refer to the referral tracking log attached.
   - The PCP must ensure timely receipt of the specialist's report or medical procedure report.
   - **Reports must be in the patient's medical record within thirty (30) days from the date of the procedure or appointment. If the PCP site has not received the report within 30 days, the PCP/staff will contact the specialist or procedure site to request a copy of the report.**
   - Document results of follow up actions

C. The PCP shall ensure that referral informational resources, i.e. Health Plan Specialty and Network Directory, are readily available for use by site personnel.

The following elements should be included within the referral system:
- Patient Name
- Date of Referral
- Referral Type
- Appointment Date
- Appointment Kept or Failed
- Date Report Received
- Physician Follow-up/Documentation

D. Site staff should be able to demonstrate (e.g., “walk through”) the office referral process from beginning to end.

BE INFORMED

If you are a patient being treated for any form of prostate cancer, or prior to performance of a biopsy for prostate cancer, your physician and surgeon is urged to provide you a written summary of alternative efficacious methods of treatment pursuant to Section 1704.7 of the California Health & Safety Code.

The information about methods of treatment was developed by the State Department of Health Services to inform patients of the advantages, disadvantages, risks, and descriptions of procedures.

INFÓRMESE

Si es usted un paciente que está recibiendo tratamiento contra cualquier forma de cáncer de próstata, o en la etapa prévia a una biopsia por cáncer prostático, su médico o cirujano está urgido dar a usted un sumario escrito de los métodos alternativos de tratamiento disponibles considerados eficaces. Esto es en cumplimiento con la Sección 1704.7 del Código de Salud y Seguridad del Estado de California.

La información sobre los métodos de tratamiento fueron desarrollados por los Servicios de Salud del Estado de California para informar a los pacientes sobre las ventajas y desventajas, riesgos y descripciones de los procedimientos.

通知

如果你是前列癌病患者或如要进行前列腺癌的切片測驗，按照加省衛生安全規則第 1704.7 部份，你的醫生必要向你提供一份有關各種有效治療的報告書。

各種治療的資料是由國家衛生服務局所提供，來使病人知道各種不同治療的好處、壞處、危險和治療的程序。

PCP:	
SECTION: Office Management	
POLICY AND PROCEDURE: Provision of Services 24 Hours a Day	Approved date: ________________ Approved by: __________________ Effective date: ________________ Revised by: ___________________ Revised by: ___________________

POLICY:
The site will have a provision for appropriate, coordinated health care services twenty-four hours a day, seven days a week

PROCEDURE:

A. The staff will ensure that current clinic office hours are posted within the office or readily available upon request.

B. The PCP will ensure that current site-specific resource information is available to site personnel about physician office hour schedule(s), local and/or Plan-specific systems for after-hours urgent care, emergent physician coverage available 24 hours a day, 7 days per week, and system for providing follow-up care.

C. Medi-Cal and Cal MediConnect participating providers must offer hours of operation to Medi-Cal and CalMediConnect members that are no less than hours of operation offered to patients from other lines of business, or to Medi-Cal Fee-for-Service (FFS) beneficiaries.

D. The staff will be able to contact the PCP (or covering physician) at all times via telephone, cell phone or pager.

Imperial, Orange, Riverside, San Bernardino.

PCP:	
SECTION: Clinical Services	
POLICY AND PROCEDURE: Radiology Services	Approved date: _________________ Approved by: ___________________ Effective date: __________________ Revised date: __________________ Revised date: __________________

POLICY:
The site will meet California DHCS Radiological inspection and safety regulations by ensuring that radiation is used safely and effectively, individuals are protected from unnecessary radiation exposure and that environmental quality is preserved and maintained (17 CCR §30255, §30305, §30404, §30405).

PROCEDURE:

A. Site has current CA Radiologic Health Branch Inspection Report, if there is radiological equipment on site.

1. If no current inspection report on site, there is either a:
   - Short Form Sign-off Sheet (issued for minimal problems that are easily corrected) **or**
   - Notice of Violation Form (issued if there are more serious violations) **with** an approval letter for a corrective action plan form the CA Radiologic Health Branch.

2. Equipment inspection, based on a “priority” rating system, is established by legislation (CA H&S Code, Section 115115).
   - Mammography equipment is inspected annually (Mammography Quality Standards Act, 21 CFR, Section 900), and must have federal FDA Certification on site ***and*** CA Mammography X-ray Equipment and Facility Accreditation Certification posted on the machine.
   - High Priority equipment (e.g. fluoroscopy, portable X-ray) is inspected every three years.
   - Medium Priority equipment is inspected every 4-5 years depending on the volume of patients, frequency of x-ray equipment use, and likelihood of radiation exposure.

- DEXAscanner equipment: According to the CA Radiological Branch, a lead apron/shield and gonad shields are usually not required. The CA Radiologic Health Branch (RHB) has additional requirements . such as, the registration of the DEXAscanner and use of dosimeter badges. Ref: CCR Title 17 Sections 30111, 30305, 30404.
- If reviewer is uncertain about the "current" status of equipment inspection, call the Radiological Health Branch.

B. The following documents are posted on site:

1. Current copy of Title 17 with a posted notice about availability of Title 17 and its location.
2. "Radiation Safety Operating Procedures" posted in a highly visible location.
3. "Notice to Employees Poster" posted in highly visible location.
4. "Caution, X-Ray" sign posted on or next to door of each room that has X-Ray equipment.
5. Physician Supervisor/Operator certificate posted and within current expiration date.
6. Technologist certificate posted and within current expiration date.
    - If there are a large number of technicians, a list of names, license numbers and expiration dates may be substituted.
    - The Certified Radiological Technologist (CRT) certificate permits the technologist to perform all radiology films except mammography and fluoroscopy, which require separate certificates.
    - The "Limited Permit" limits the technician to one of the 10 X-ray categories specified on the limited certificate: Chest, Dental Laboratory, Dermatology, Extremities, Gastrointestinal, Genitourinary, Leg-podiatric, Skull, Torso-skeletal, and X-Ray bone densitometry.

C. The following radiological protective equipment is present on site:

1. Operator protection devices: radiologic equipment operator must use lead apron or lead shield.
2. Gonadal shield (0.5 mm or greater lead equivalent): for patient procedures in which gonads are in direct beam.

Notes:

- The Radiologic Health Branch of the Food, Drug, and Radiation Safety Division of the CA Department of Health Care Services enforces the Radiation Control Laws and Regulations designed to protect both the public and employees against radiation hazards. Enforcement is carried out through licensing, registration and periodic inspection of sources of radiation, such as radiation machines.
- For questions regarding radiologic safety (e.g. expired or no inspection letters on site), call CA DHCS Radiologic Health Branch (Compliance Unit) General Information (daytime hours) at (916) 327-5106.

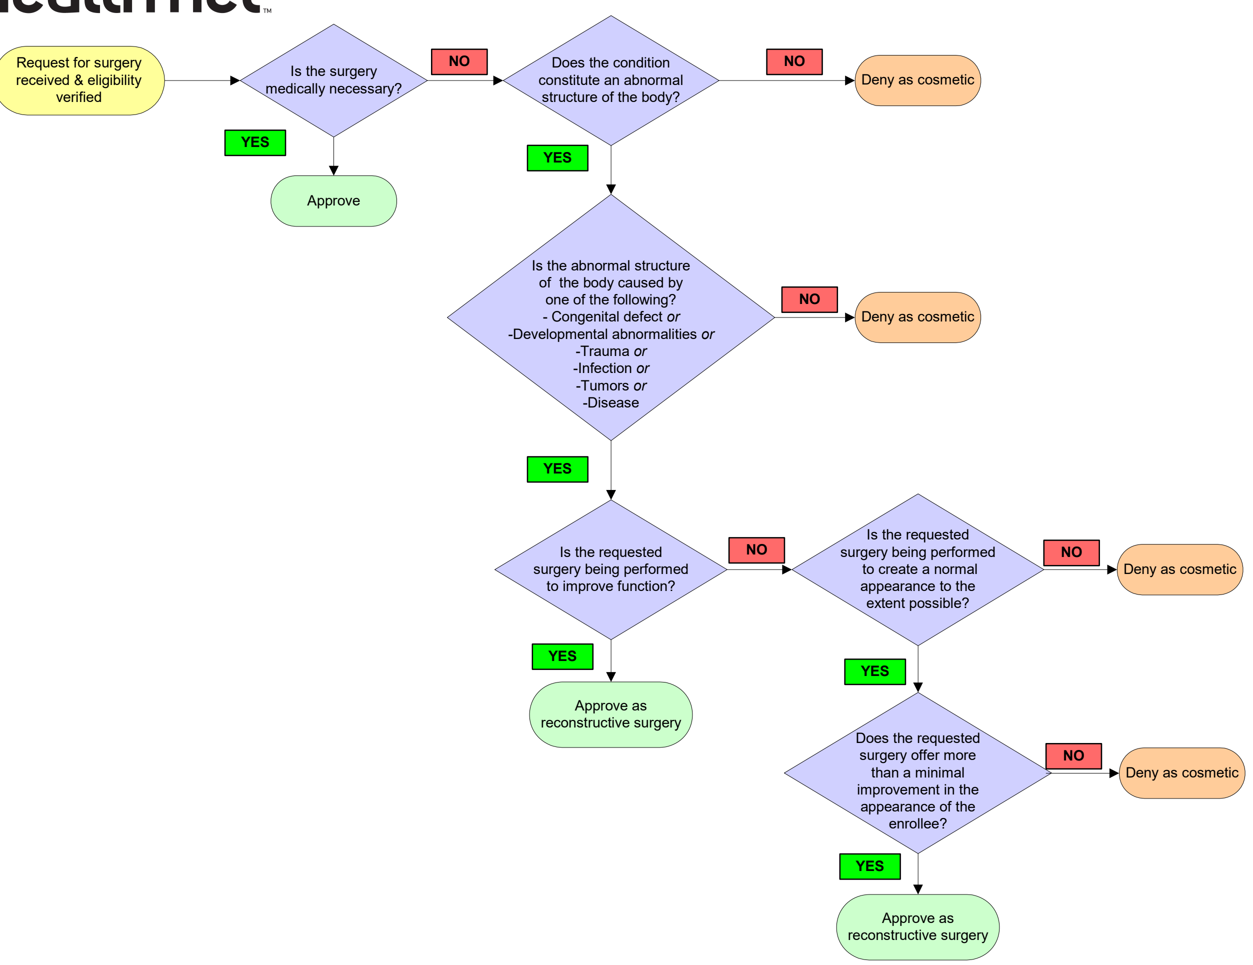
Reconstructive Surgery Decision Tree



RED FLAGS FOR ALCOHOL/DRUG ABUSE

Observable

1. Tremor/perspiring/tachycardia
2. Evidence of current intoxication
3. Prescription drug seeking behavior
4. Frequent falls; unexplained bruises
5. Diabetes, elevated BP, ulcers; non-responsive to treatment
6. Frequent hospitalizations
7. Inflamed, eroded nasal septum
8. Dilated pupils
9. Track marks/injection sites
10. Gunshot/knife wound
11. Suicide talk/attempt; depression
12. Pregnancy (screen all)

Laboratory

1. MCV - over 95
2. MCH - High
3. GGT - High
4. SGOT - High
5. Bilirubin - High
6. Triglycerides - High
7. Anemia
8. Positive UA for illicit drugs

QUESTIONS TO ASK PATIENT

C 1. Have you ever felt you should ***Cut Down*** on your drinking or drug use?

A 2. Have people ***Annoyed*** you by criticizing or complaining about your drinking or drug use?

G 3. Have you ever felt bad or ***Guilty*** about your drinking or drug use?

E 4. Have you ever had a drink or drug in the morning ***(Eye Opener)*** to steady your your nerves or to get rid of a hangover?

5. Do you use any drugs other than those prescribed by a physician?
6. Has a physician ever told you to cut down or quit use alcohol or drugs?
7. Has your drinking/drug use caused family, job or legal problems?
8. When drinking/using drugs have you ever had a memory loss (blackout)?

REFERRAL, CONSULTS, DIAGNOSTIC TESTING TICKLER LOG

Date	Patient Name	Refer To	Appointment Date	Report Received	Calls to Specialist/Lab, X-Ray, Etc.	Results of Follow-Up Action

Instructions: When the physician orders a procedure, test or consultation, enter the date, patient's name, the referred to office and the date of the appointment. When the report of the ordered services is received, enter the date received. If the report is not received within 2 weeks of the scheduled date of the ordered service, call the provider of the service to inquire about the results report and document the call(s). Record results of actions taken to obtain reports.

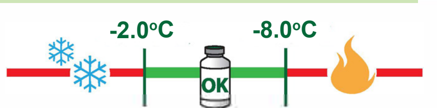
Instructions

Keep refrigerator in OK range.



Check temperatures twice a day.

1. Fill out month, year, refrigerator ID, and PIN.
2. Record the time and your initials.
3. Record a check if an alarm went off.
4. Record Current, MIN, and MAX.

If no alarm:

1. Clear MIN/MAX.
2. Ensure data logger is in place and recording.

IF ALARM WENT OFF:

1. Clear MIN/MAX and alarm symbol.
2. Post "Do Not Use Vaccines" sign.
3. Alert your supervisor.
4. Report excursion to SHOTS at MyVFCvaccines.org.
5. Record assigned SHOTS ID.
6. Ensure data logger is in place and recording.

Supervisor's Review

When log is complete, check all that apply:

- ☐ Month/year/fridge ID/PIN are recorded.
- ☐ Temperatures were recorded twice daily.
- ☐ I reviewed data files for all the days on this log to find any missed excursions. Date downloaded: ___/___/___
- ☐ Any excursions were reported to SHOTS at MyVFCvaccines.org.
- ☐ We understand that falsifying this log is grounds for vaccine replacement and termination from the VFC Program.

Title 17, California Code of Regulations (CCR) §2500, §2593, §2641.5-2643.20, and §2800-2812 Reportable Diseases and Conditions*

§ 2500. REPORTING TO THE LOCAL HEALTH AUTHORITY.

- **§ 2500(b)** It shall be the duty of every health care provider, knowing of or in attendance on a case or suspected case of any of the diseases or condition listed below, to report to the local health officer for the juridiction where the patient resides. Where no health care provider is in attendance, any individual having knowledge of a person who is suspected to be suffering from one of the diseases or conditions listed below may make such a report to the local health officer for the jurisdiction where the patient resides.
- **§ 2500(c)** The administrator of each health facility, clinic, or other setting where more than one health care provider may know of a case, a suspected case or an outbreak of disease within the facility shall establish and be responsible for administrative procedures to assure that reports are made to the local officer.
- **§ 2500(a)(14)** "Health care provider" means a physician and surgeon, a veterinarian, a podiatrist, a nurse practitioner, a physician assistant, a registered nurse, a nurse midwife, a school nurse, an infection control practitioner, a medical examiner, a coroner, or a dentist.

URGENCY REPORTING REQUIREMENTS [17 CCR §2500(h)(i)]

✆ ! =Report immediately by telephone (designated by a ♦ in regulations).
† =Report immediately by telephone when two or more cases or suspected cases of foodborne disease from separate households are suspected to have the same source of illness (designated by a ● in regulations.)
FAX ✆ ✉ =Report by electronic transmission (including FAX), telephone, or mail within one working day of identification (designated by a + in regulations).
=All other diseases/conditions should be reported by electronic transmission (including FAX), telephone, or mail within seven calendar days of identification.

HIV REPORTING BY HEALTH CARE PROVIDERS § 2641.5-2643.20

Human Immunodeficiency Virus (HIV) infection is reportable by traceable mail or person-to-person transfer within seven calendar days by completion of the HIV/AIDS Case Report form (CDPH 8641A) available from the local health department. For completing HIV-specific reporting requirements, see Title 17, CCR, § 2641.5-2643.20 and http://www.cdph.ca.gov/programs/aids/Pages/OAHIVReporting.aspx

REPORTABLE NONCOMMUNICABLE DISEASES AND CONDITIONS §2800–2812 and §2593(b)

Disorders Characterized by Lapses of Consciousness (§2800-2812)
Pesticide-related illness or injury (known or suspected cases)**
Cancer, including benign and borderline brain tumors (except (1) basal and squamous skin cancer unless occurring on genitalia, and (2) carcinoma in-situ and CIN III of the Cervix) (§2593)***

LOCALLY REPORTABLE DISEASES (If Applicable):

* This form is designed for health care providers to report those diseases mandated by Title 17, California Code of Regulations (CCR). Failure to report is a misdemeanor (Health & Safety Code §120295) and is a citable offense under the Medical Board of California Citation and Fine Program (Title 16, CCR, §1364.10 and 1364.11).
** Failure to report is a citable offense and subject to civil penalty ($250) (Health and Safety Code §105200).
*** The Confidential Physician Cancer Reporting Form may also be used. See Physician Reporting Requirements for Cancer Reporting in CA at: www.ccrcal.org.

Request for PCP/PPG Change Form

☐ **Health Net** ☐ **Molina** ☐ **BND**

New PCP Name:	
Location:	
License/ Clinic#:	
PPG Name:	
Reason For request:	

	Member's Name	**Date of Birth**	**CIN#**
1			
2			
3			

Please check Yes or No:	Yes	No
Is the member currently hospitalized?		
Is the member in her 3rd trimester of pregnancy?		
Did the member receive any services with the assigned PCP/PPG?		
Is the member currently receiving treatment?		
Is the member scheduled to receive future treatment (surgery, specialist care, etc.)?		
Has the member recently delivered a baby within the past 60 days?		
Does the member have an infant less than 60 days old who is currently in the hospital?		
Did the member receive any services in the emergency room?		

Please read Disclaimer:
Any prior authorizations submitted to or approved by the existing PCP/PPG will no longer be valid with the new PCP/PPG.
If a member becomes hospitalized prior to the effective date of change, the member will be changed back to existing PCP/PPG until the episode of care is complete.
If the mother of a newborn request a PCP/PPG change prior to her first post-partum visit, (which usually occurs within 40 days of delivery), the change cannot be processed. (Only exception is if the requested PCP is in the same PPG).

Sharps Injury Log

The following information, if known or reasonably available, should be documented within 14 working days of the date on which each exposure incident was reported.

1. Date and time of the exposure incident: ______________________________
2. Date of exposure incident report: ____________ Report written by: ______________
3. Type and brand of sharp involved: ______________________________
4. Description of exposure incident:
   - Job classification of exposed employee: ______________________________
   - Department or work area where the incident occurred: ______________________
   - Procedure being performed by the exposed employee at the time of the incident: ____________ ______________________________
   - How the incident occurred: ______________________________
   - Body part(s) involved: ______________________________
   - Did the device involved have engineered sharps injury protection? Yes (✓) _______ No (✓) _______
   - Was engineered sharps injury protection on the sharp involved? Yes (✓) _______ No (✓) _______

If Yes	If No
A. Was the protective mechanism activated at the time of the exposure incident? Yes ____ No ____ B. Did the injury occur before, during, or after the mechanism was activated? ____________ Comments: ______________________	A. Does the injured employee believe that a protective mechanism could have prevented the injury? Yes ____ No ____

   - Does the exposed employee believe that any controls (e.g., engineering, administrative, or work practice) could have prevented the injury? Yes (✓) _______ No (✓) _______
   - Employee's opinion: ______________________________

5. Comments on the exposure incident (e.g., additional relevant factors involved): ______________________________
6. Employee interview summary: ______________________________
7. Picture(s) of the sharp(s) involved (please attach if available).

SECTION: Access/Safety	
POLICY AND PROCEDURE: **Site Accessibility by Individuals with Physical Disabilities**	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:
Site shall be accessible and useable by individuals with physical disabilities. The site will meet city, county and state building structure and access ordinances for persons with physical disabilities as well as meet the California Department of Health Care Services Medi-Cal Managed Care Division Physical Accessibility Review Survey (PARS).

PROCEDURE:

I. ACCOMODATIONS

Accessibility levels and elements are made available to members on the health plan website and in provider directories. Access is Basic or Limited with element summary for: Parking, Exterior Building, Interior Building, Restroom, Exam Room, and Medical Equipment such as accessible scale and hi-lo exam table.

A. The site shall maintain the following safety accommodations seniors and persons with disabilities.
   1. Designated disabled parking space near the primary entrance.
      a. Are there accessible parking spaces provided in off-street parking and the correct number of accessible parking spaces provided.
      b. Do curbs on the route from off-street public parking have curb ramps at the parking and drop-off location?
      c. Is VAN accessible parking provided or available.
      d. Staff will assist disabled members who choose to continue to seek care at the site, in spite of accessibility, and will meet any disabled member at the scheduled time/place and assist the member at a meeting point as near as possible to an entrance agreed upon.
   2. An exterior route to the main entrance from accessible parking, public transportation, and public sidewalks will include:
      a. A curb ramp if the accessible route crosses a curb.
      b. The accessible route is at least 36 inches wide, is stable, firm, and slip resistant, and free of grates, gaps, and openings greater than ½ inch wide and over ¼ inch deep.
   3. Pedestrian ramps will be maintained. (Any path is considered a ramp if the slope is greater than a one foot rise in twenty feet of horizontal run).
      a. Each run (leg) of the ramp is no longer than 30 feet between landings.

   b. Handrails are provided on both sides of the ramp, between 34 and 38 inches above the ramp surface if it is longer than six feet.
   c. Level landings at the top and bottom of all ramps will be maintained clear of any obstruction and staff are responsible for clearing any obstruction noted.
4. The building entrance shall be made accessible to the disabled or another accessible entrance shall be made available.
   a. The main entrance door is at least 32 inches wide when opened to 90 degrees.
   b. Appropriate space perpendicular and parallel to a doorway permits a wheelchair user, a person using a walker or other mobility devices, to open the door safely and independently.
5. If there is an interior route (from the building entrance to the clinic/office entrance, to the registration counter/window, or through the clinic/office to areas that patients could go) is the accessible route:
   a. At least 36 inches wide
   b. There are handrails on each side of the stairs on the accessible route.
   c. A platform lift (if available) can be used without assistance.
6. Passenger elevator will be maintained in working condition for multi-level floor accommodation and will be available for use during business hours. If elevator(s) are present, is the elevator:
   a. Equipped with both visible and audible door opening/closing and floor indicators.
   b. There are raised letter and Braille sign on each side of each elevator jamb.
   c. The hall call buttons for the elevator are no higher than 48 inches from the floor.
   d. The elevator car is large enough for a wheelchair or scooter user to enter, turn to reach the controls, and exit (floor area is at least 51 inches long and 80 inches wide or 54 inches long and 68 inches wide).
   e. The buttons on the control panel inside the elevator have Braille and raised characters/symbols near the buttons.
7. The patient restroom(s) will be accessible to physically disabled individuals. Staff may make a reasonable alternative available to the member as needed. Alternatives may include: directing or accompanying the member to a nearby disabled – accessible restroom, physically assisting the member in the smaller restroom, or, providing a urinal, bedpan or commode, and sanitary supplies, as acceptable to the member. An accessible restroom shall:
   a. Provide grab bars, one on the wall behind the toilet and one on the wall next to the toilet.

b. Toilet paper dispenser mounted below the side grab bar with the centerline of the toilet paper dispenser between 7 inches and 9 inches in front of the toilet, and at least 15 inches high.
c. Space is provided in front of the sink to allow wheelchair users to park in front of the sink that is 30 inches wide and 48 inches deep.
d. Faucet handles are operable with one hand and without grasping, pinching, or twisting.
e. The restroom doorway has a minimum clear opening of 32 inches with the door open at 90 degrees.
f. Restrooms with stalls has a 60-inch diameter turning circle or a 60-inch x 60 inch "T" shaped space inside the restroom to allow a wheelchair or scooter to turn around.

8. Accessible patient exam/treatment room(s) has a minimum clear opening of 32 inches with the door open at 90 degrees, measured between the face of the door and the opposite stop.
9. PCP sites that have accessible medical equipment shall have:
    a. Height adjustable exam table(s) that lowers to between 17 inches and 19 inches from the floor to the top of the cushion.
    b. Space next to the height adjustable exam table for a wheelchair or scooter user to approach, park, and transfer or be assisted to transfer onto the table.
    c. There is a 60-inch diameter turning circle or a 60-inch x 60 inch "T" shaped space so that a wheelchair or scooter user can make a 180 degree turn.
    d. A weight scale within the medical office is available with a platform to accommodate a wheelchair or scooter and the patient.

II. CHANGES IN ACCESS/AVALABILITY

A. Notification

1. If at any time the site becomes inaccessible to physically disabled individuals, all contracted health plans will be notified in writing.

Download this topic [PDF]

Ultraviolet (UV) Radiation

What is UV radiation?

Ultraviolet (UV) radiation is a form of electromagnetic radiation that comes from the sun and man-made sources like tanning beds and welding torches.

Radiation is the emission (sending out) of energy from any source. There are many types of radiation, ranging from very high-energy (high-frequency) radiation – like x-rays and gamma rays – to very low-energy (low-frequency) radiation – like radio waves. UV rays are in the middle of this spectrum. They have more energy than visible light, but not as much as x-rays.

There are also different types of UV rays, based on how much energy they have. Higher-energy UV rays are a form of *ionizing radiation*. This means they have enough energy to remove an electron from (ionize) an atom or molecule. Ionizing radiation can damage the DNA (genes) in cells, which in turn may lead to cancer. But even the highest-energy UV rays don't have enough energy to penetrate deeply into the body, so their main effect is on the skin.

UV radiation is divided into 3 main groups:

- **UVA rays** have the least energy among UV rays. These rays can cause skin cells to age and can cause some indirect damage to cells' DNA. UVA rays are mainly linked to long-term skin damage such as wrinkles, but they are also thought to play a role in some skin cancers.
- **UVB rays** have slightly more energy than UVA rays. They can damage the DNA in skin cells directly, and are the main rays that cause sunburns. They are also thought to cause most skin cancers.
- **UVC rays** have more energy than the other types of UV rays. Fortunately, because of this, they react with ozone high in our atmosphere and don't reach the ground, so they are not normally a risk factor for skin cancer. But UVC rays can also come from some man-made sources, such as arc welding torches, mercury lamps, and UV sanitizing bulbs used to kill bacteria and other germs (such as in water, air, food, or on surfaces).

How are people exposed to UV radiation?

Sunlight

Sunlight is the main source of UV radiation, even though UV rays make up only a small portion of the sun's rays. Different types of UV rays reach the ground in different amounts. About 95% of the UV rays from the sun that reach the ground are UVA rays, with the remaining 5% being UVB rays.

The strength of the UV rays reaching the ground depends on a number of factors, such as:

- **Time of day:** UV rays are strongest between 10 am and 4 pm.
- **Season of the year:** UV rays are stronger during spring and summer months. This is less of a factor near the equator.

- **Distance from the equator (latitude):** UV exposure goes down as you get farther from the equator.
- **Altitude:** More UV rays reach the ground at higher elevations.
- **Clouds:** The effect of clouds can vary, but what's important to know is that UV rays can get through to the ground, even on a cloudy day.
- **Reflection off surfaces:** UV rays can bounce off surfaces like water, sand, snow, pavement, or even grass, leading to an increase in UV exposure.
- **Contents of the air:** Ozone in the upper atmosphere, for example, filters out some UV radiation.

The amount of UV exposure a person gets depends on the strength of the rays, the length of time the skin is exposed, and whether the skin is protected with clothing or sunscreen.

Man-made sources of UV rays

People can also be exposed to man-made sources of UV rays. These include:

- **Sunlamps and sunbeds (tanning beds and booths):** The amount and type of UV radiation someone is exposed to from a tanning bed (or booth) depends on the specific lamps used in the bed, how long a person stays in the bed, and how many times the person uses it. Most modern UV tanning beds emit mostly UVA rays, with the rest being UVB.
- **Phototherapy (UV therapy):** Some skin problems (such as psoriasis) are helped by treatment with UV light. For a treatment known as PUVA, a drug called a psoralen is given first. The drug collects in the skin and makes it more sensitive to UV. Then the patient is treated with UVA radiation. Another treatment option is the use of UVB alone (without a drug).
- **Black-light lamps:** These lamps use bulbs that give off UV rays (mostly UVA). The bulb also gives off some visible light, but it has a filter that blocks most of that out while letting the UV rays through. These bulbs have a purple glow and are used to view fluorescent material. Bug-zapping insect traps also use "black light" that gives off some UV rays, but the bulbs use a different filter that causes them to glow blue.
- **Mercury-vapor lamps:** Mercury-vapor lamps can be used to light large public areas such as streets or gyms. They do not expose people to UV rays if they are working properly. They are actually made up of 2 bulbs: an inner bulb that emits light and UV rays, and an outer bulb that filters out the UV. UV exposure can only occur if the outer bulb is broken. Some mercury-vapor lamps are designed to turn themselves off when the outer bulb breaks. The ones that don't have this feature are only supposed to be installed behind a protective layer or in areas where people wouldn't be exposed if part of the bulb breaks.
- **High-pressure xenon and xenon-mercury arc lamps, plasma torches, and welding arcs:** Xenon and xenon-mercury arc lamps are used as sources of light and UV rays for many things, such as UV "curing" (of inks, coatings, etc.), disinfection, to simulate sunlight (to test solar panels, for example), and even in some car headlights. Most of these, along with plasma torches and welding arcs, are mainly of concern in terms of workplace UV exposure.

Does UV radiation cause cancer?

Most skin cancers are a result of exposure to the UV rays in sunlight. Both basal cell and squamous cell cancers (the most common types of skin cancer) tend to be found on sun-exposed parts of the body, and their occurrence is typically related to lifetime sun exposure. The risk of melanoma, a more serious but less common type of skin cancer, is also related to sun exposure, although perhaps not as strongly. Skin cancer has also been linked to exposure to some man-made sources of UV rays.

What do studies show?

Many studies have found that **basal and squamous cell skin cancers** are linked to certain behaviors that put people in the sun, as well as a number of markers of sun exposure, such as:

- Spending time in the sun for recreation (including going to the beach)

- Spending a lot of time in the sun in a swimsuit
- Living in an area that gets a lot of sunlight
- Having had serious sunburns in the past (with more sunburns linked to a higher risk)
- Having signs of sun damage to the skin, such as liver spots, actinic keratoses (rough skin patches that can be precancerous), and solar elastosis (thickened, dry, wrinkled skin caused by sun exposure) on the neck

Studies have also found links between certain behaviors and markers of sun exposure and **melanoma of the skin**, including:

- Activities that lead to “intermittent sun exposure,” like sunbathing, water sports, and taking vacations in sunny places
- Previous sunburns
- Signs of sun damage to the skin, such as liver spots, actinic keratoses, and solar elastosis

Because UV rays don’t penetrate deeply into the body, they wouldn’t be expected to cause cancer in internal organs, and most research has not found such links. However, some studies have shown possible links to some **other cancers**, including Merkel cell carcinoma (a less common type of skin cancer) and melanoma of the eye.

Studies have found that people who use **tanning beds (or booths)** have a higher risk of skin cancer, including melanoma and squamous and basal cell skin cancers. The risk of melanoma is higher if the person started indoor tanning before age 30 or 35, and the risk of basal and squamous cell skin cancer is higher if indoor tanning started before age 25.

What do expert agencies say?

In general, the American Cancer Society does not determine if something causes cancer (that is, if it is a carcinogen), but we do look to other respected organizations for help with this. Based on the available evidence, several expert agencies have evaluated the cancer-causing nature of UV radiation.

The **International Agency for Research on Cancer (IARC)** is part of the World Health Organization (WHO). One of its major goals is to identify causes of cancer. Based on the available data, IARC has made the following determinations:

- **Solar radiation** is *carcinogenic to humans*.
- **Use of UV-emitting tanning devices** is *carcinogenic to humans*.
- **UV radiation (including UVA, UVB, and UVC)** is *carcinogenic to humans*.

The **National Toxicology Program (NTP)** is formed from parts of several different US government agencies, including the National Institutes of Health (NIH), the Centers for Disease Control and Prevention (CDC), and the Food and Drug Administration (FDA). The NTP has made the following determinations:

- **Solar radiation** is *known to be a human carcinogen*.
- **Exposure to sunlamps or sunbeds** is *known to be a human carcinogen*.
- **Broad-spectrum UV radiation** is *known to be a human carcinogen*.
- **UVA radiation** is *reasonably anticipated to be a human carcinogen*.
- **UVB radiation** is *reasonably anticipated to be a human carcinogen*.
- **UVC radiation** is *reasonably anticipated to be a human carcinogen*.

(For more information on the classification systems used by these agencies, see Determining if Something Is a Carcinogen.)

What about tanning beds?

Some people think that getting UV rays from tanning beds is a safe way to get a tan, but this isn't true.

Both **IARC** and **NTP** classify the use of UV-emitting tanning devices (including sunlamps and tanning beds) as carcinogenic to humans.

The **US Food and Drug Administration (FDA),** which refers to all UV lamps used for tanning as "sunlamps," requires them to carry a label that states, "Attention: This sunlamp product should not be used on persons under the age of 18 years."

The FDA also requires that user instructions and sales materials directed at consumers (including catalogs, specification sheets, descriptive brochures, and webpages) carry the following statements:

- Contraindication: This product is contraindicated for use on persons under the age of 18 years.
- Contraindication: This product must not be used if skin lesions or open wounds are present.
- Warning: This product should not be used on individuals who have had skin cancer or have a family history of skin cancer.
- Warning: Persons repeatedly exposed to UV radiation should be regularly evaluated for skin cancer.

The FDA has also proposed a new rule to ban the use of indoor tanning devices by anyone under age 18, to require tanning facilities to inform adult users about the health risks of indoor tanning, and to require a signed risk acknowledgment from all users. Some US states have already banned indoor tanning by all people younger than 18, while others have banned use by younger teens and children.

Are there any other health issues related to UV radiation?

In addition to **skin cancer**, exposure to UV rays can cause other health problems:

- UV rays, either from the sun or from artificial sources like tanning beds, can cause **sunburn**.
- Exposure to UV rays can cause **premature aging of the skin** and **signs of sun damage** such as wrinkles, leathery skin, liver spots, actinic keratosis, and solar elastosis.
- UV rays can also cause **eye problems**. They can cause the cornea (on the front of the eye) to become inflamed or burned. They can also lead to the formation of cataracts (clouding of the lens of the eye) and pterygium (tissue growth on the surface of the eye), both of which can impair vision.
- Exposure to UV rays can also **weaken the immune system**, so that the body has a harder time fending off infections. This can lead to problems such as reactivation of herpes triggered by exposure to the sun or other sources of UV rays. It can also cause vaccines to be less effective.

Some people are more sensitive to the damaging effects of UV radiation. Some medications can also make you more sensitive to UV radiation, making you more likely to get sunburned. And certain medical conditions can be made worse by UV radiation.

UV rays and vitamin D

Your skin makes vitamin D naturally when it is exposed to UV rays from the sun. How much vitamin D you make depends on many things, including how old you are, how dark your skin is, and how strong the sunlight is where you live.

Vitamin D has many health benefits. It might even help lower the risk of some cancers. At this time, doctors aren't sure what the optimal level of vitamin D is, but a lot of research is being done in this area.

Whenever possible, it's better to get vitamin D from your diet or vitamin supplements rather than from exposure to UV rays. Dietary sources and vitamin supplements do not increase skin cancer risk, and are typically more reliable ways to get the amount you need.

Can I avoid exposure to UV radiation?

UV rays in sunlight

It's not possible (or healthy) to avoid sunlight completely, but there are ways to help ensure you're not getting too much sun:

- If you're going to be outside, simply **staying in the shade**, especially during midday hours, is one of the best ways to limit your UV exposure from sunlight.
- Protect your skin with **clothing** that covers your arms and legs.
- Wear a **hat** to protect your head, face, and neck.
- Wear **sunglasses** that block UV rays to protect your eyes and the skin around them.
- Use **sunscreen** to help protect skin that isn't covered with clothing.

For more information, see How Do I Protect Myself from Ultraviolet (UV) Rays?

The US Centers for Disease Control and Prevention (CDC) has also recommended ways for communities to help prevent skin cancer by reducing sun exposure, including educational interventions in schools and providing shade at schools, recreational sites, and work sites.

Artificial sources of UV rays

Many people believe the UV rays of **tanning beds** are harmless. This is not true. The best thing to do is to not use tanning beds (or booths).

People who may be exposed to **artificial sources of UV at their job** should follow appropriate safety precautions, including using protective clothing and UV shields and filters.

OBTAINABLE FROM YOUR MEDICAL SUPPLY COMPANY

Infection Control Kit
This kit contains:
- 1 pair Latex Free Gloves
- 1 Disposable Coverall
- 1 Bouffant Cap
- 2 Antiseptic Bacterial Wipes
- 1 Red Polybag w/tie
- 1 fluid Resistant Mask w/Face Shield
- 1 Biohazard Label 2" x 2"
- Fits 5'6" to 5'10" 135-210 lbs

Deluxe Infection Control Kit
The Deluxe Infection Control Kit includes:
- 1 bouffant cap
- 1 pair gloves
- 1 fluid-resistant mask/eyeshield attached (Safety Shield Combo Mask)
- 1 fluid-impervious gown with full back

Bloodborne Pathogen Protection and Cleanup Kit
Ideal for compliance to OSHA Bloodborne Pathogen Standards. The cabinet is made of plastic. MSDS sheets are included as well as individual component boxes for Personal Protection and Cleanup Kit.

> **Personal Protection Pack** contains 1 disposable hospital gown, 1 pair of booties, 2 antiseptic towelettes (non-alcohol), 1 bouffant cap, 1 pair of nitrile gloves and 1 eye and face shield/splash mask combination.
>
> **Spill Cleanup Pack** contains 1 EPA registered disinfectant, 8oz pack of absorbent powder, scoop and spatula, 1 pack of paper towels, 2 biohazard bags, 2 antiseptic towelettes (non-alcohol) and 1 pair of nitrile gloves.

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Staff Qualifications	Approved date: ____________________ Approved by: ______________________ Effective date: ____________________ Revised date: _____________________ Revised date: _____________________

POLICY:
All professional health care personnel must have current California licenses and certifications and must be qualified and trained for assigned responsibilities.

PROCEDURE:
I. HEALTH CARE LICENSE AND CERTIFICATION REQUIREMENTS

A. All medical professional licenses and certifications must be current and issued from the appropriate agency to practice in California. Copies and/or lists of currently certified or credentialed personnel must be readily available when requested by reviewers.

Medical Professional	**License/Certification**	**Issuing Agency**
Certified Nurse Midwife	RN License and Nurse-Midwife certificate	CA Board of Registered Nursing
Certified Radiological Technologist (CRT)	CRT Certificate	CA Department of Public Health (Radiological Branch)
Doctor of Osteopathy (DO)	Physician’s & Surgeon’s Certificate, DEA Registration	Osteopathic Medical Board of CA, Drug Enforcement Administration
Licensed Vocational Nurse (LVN)	LVN License	CA Board of Vocational Nursing and Psychiatric Technicians
Nurse Practitioner (NP)	RN License with NP Certification and Furnishing Number	CA Board of Registered Nursing
Pharmacist (Pharm.D)	Pharmacist License	CA State Board of Pharmacy
Physician/Surgeon (MD)	Physician’s & Surgeon’s Certificate, DEA Registration	Medical Board of CA, Drug Enforcement Administration
Physician’s Assistant (PA)	PA License	Physician Assistant Examining Committee / Medical Board of CA
Radiological Technician	Limited Permit	CA Department of Health Care Services (Radiological Branch)
Registered Dietitian	RD Registration Card	Commission on Dietetic Registration
Registered Nurse	RN license	CA Board of Registered Nursing

II. IDENTIFICATION OF HEALTH CARE PRACTITIONERS

A. A health care practitioner shall disclose his or her name and practitioner's license type, as granted by the State of California, on a nametag with at least 18-point type. A health care practitioner in a practice or office, whose license is prominently displayed, may opt not to wear a nametag.

Note: It is unlawful for any person to use the title "nurse" in reference to himself or herself, in any capacity, except for an individual who is a registered nurse or licensed vocational nurse.

III. TRAINING OF SITE PERSONNEL

A. Personnel on site must be qualified for their responsibilities and adequately trained for their scope of work. Site staff should have a general understanding of the systems/processes in place, appropriate supervisions, and knowledge of the available sources of information on site.

B. Provider and staff must be able to demonstrate operation of medical equipment used in their scope of work.

Notice To Consumers Regulation

Effective June 27, 2010, a new regulation, mandated by Business and Professions Code section 138, will go into effect requiring physicians in California to inform their patients that they are licensed by the Medical Board of California, and include the board's contact information. The information must read as follows.

NOTICE TO CONSUMERS
Medical doctors are licensed and regulated by the Medical Board of California
(800) 633-2322
www.mbc.ca.gov

The purpose of this new requirement (Title 16, California Code of Regulations section 1355.4) is to inform consumers where to go for information or with a complaint about California medical doctors.

- Physicians may provide this notice by one of three methods:
- Prominently posting a sign in an area of their offices conspicuous to patients, in at least 48-point type in Arial font. (See link "Sign for printing", below, to print the actual notice.)
- Including the notice in a written statement, signed and dated by the patient or patient's representative, and kept in that patient's file, stating the patient understands the physician is licensed and regulated by the board.
- Including the notice in a statement on letterhead, discharge instructions, or other document given to a patient or the patient's representative, where the notice is placed immediately above the signature line for the patient in at least 14-point type.

For more information, please contact Frank Miller, at frank.miller@mbc.ca.gov or (916) 263-2480.
Sign for printing: http://www.mbc.ca.gov/licensee/notice_to_consumers_regulation_Sample_sign.pdf

Signature Page

(Please post on left-hand side of each Medical Record)

Please Write Initials or Signature as Typically Signed	Print Name in Full (First Name, Last Name, Title)

Getting Your Child Tested For Lead

WHY YOUR CHILD SHOULD BE TESTED FOR LEAD

Lead poisoning can make it hard for your child to learn, pay attention, or behave and may cause long-term health problems. Children may not look or act sick. Having your child tested for lead is the only way to know if there is lead in your child's body.

Ask your child's doctor for a blood lead test at one and two years old if your child is in a program such as **Medi-Cal, CHDP[1], WIC[2], Head Start, or other similar programs**. If your child is not in one of these programs, ask your child's doctor about their risk of lead exposure.

CHILDREN ARE AT A HIGHER RISK FOR LEAD EXPOSURE IF THEY:

- **Live** in a house or building built before 1978 or near a source of lead air emissions such as highways, industrial sites, general aviation airports, recycling sites.
- **Consume or come in contact with** certain foods, spices, traditional remedies, dishware or other products.
- **Spend time** outside the U.S.
- **Have a sibling with** an elevated blood lead level.
- **Have a family member who works with lead** such as construction or painting or has hobbies that involve lead such as stained glass, fishing, pottery, firearms, antiques.

For a list of lead sources, ask your doctor or visit: tinyurl.com/CLPPB-SOURCES

[1] CHDP is the Child Health and Disability Prevention Program
[2] WIC is the Special Supplemental Nutrition Program for Women, Infants, and Children

WHAT TO EXPECT: BLOOD LEAD TESTING FOR YOUR CHILD

1. The test may be done at your child's doctor's office or at a laboratory.
2. There are two methods of collecting blood for lead testing: capillary or venous. Capillary tests typically use blood taken from your child's finger. Venous tests use blood from a vein in your child's arm.
3. Depending on the result, your child's doctor may order additional tests. Follow-up blood lead tests must be venous.

For more information visit: www.cdph.ca.gov/programs/clppb or contact your local Childhood Lead Poisoning Prevention Program:

What are some sources of lead?

Talk to your health care provider if you or your child comes in contact with any of these possible sources of lead.

Possible Sources of Lead	What You Can Do...
♦ Old paint inside or outside the home (most lead paint is in homes built before 1978)	♦ Move cribs, high chairs, and playpens away from cracked or peeling paint. ♦ Do not allow children to chew on windowsills or other painted surfaces. ♦ Call local lead poisoning prevention program (tinyurl.com/CLPPP-LIST) about testing paint for lead.
♦ Dust on windowsills, floors, and toys	♦ Wet mop floors and wet wipe windowsills and other surfaces. ♦ Wash toys often. ♦ Wash children's hands before eating and sleeping.
♦ Dirt outside the home	♦ Cover bare dirt with stones, grass, plants or gravel. ♦ Wipe shoes or take them off BEFORE going in the house.
♦ Drinking Water (tinyurl.com/EPA-LEAD-H20)	♦ For cooking or drinking, let water run until cold before using. ♦ Do not use a water crock unless it has been tested and found to be lead free.
♦ Take-home exposure from shoes/clothing/hair if family member works around lead on the job or at home, such as auto repair, metalworking, and battery or scrap metal recycling.	♦ Shower and change clothes BEFORE coming home from work, if possible, and BEFORE holding your child. Remove work clothes and shoes and store them in a plastic bag. Wash work clothes separately from other clothes.
♦ Some dishes or pots that are worn or antique, from a discount or flea market, made of crystal, handmade, or made outside the USA	♦ Call local lead poisoning prevention program (tinyurl.com/CLPPP-LIST) for more information about testing dishes and pots for lead.
Traditional remedies, such as: ♦ Azarcon and Greta – orange or yellow powder ♦ Paylooah – red powder ♦ Some Ayurvedic or traditional Chinese remedies	♦ Do not let anyone give "natural" or traditional remedies to your child without talking to your health care provider first.
Some traditional cosmetics and other substances applied to the skin, such as: ♦ Surma ♦ Kohl ♦ Sindoor	♦ Do not use these products on your child. ♦ Call local lead poisoning prevention program (tinyurl.com/CLPPP-LIST) about testing traditional cosmetics, ritual powders, and other substances applied to the skin.
Altars for religious ritual containing: ♦ Ritual powders ♦ Brass and some other metal, ceramic, or painted items	♦ Place altars with these types of items where your child can't get to them. ♦ Don't let your child handle or mouth these items. ♦ Use separate cleaning supplies to clean these items.
Some costume jewelry, amulets, and keys	♦ Do not allow your child to play with, mouth or touch these items.
Some foods and spices, such as: ♦ Some candies (especially imported) ♦ Chapulines (grasshopper snacks) ♦ Some imported spices, such as turmeric, chili powder, Khmeli Suneli ♦ Game meat containing lead shot	♦ Be aware of foods and spices that might contain lead. ♦ Offer your child meals and snacks including a variety of vegetables, fruit, legumes, seeds, nuts, whole grains, unprocessed meats, and dairy products or dairy substitutes without added sugar.
Other items, such as: ♦ Fishing sinkers, bullets, pellets, and solder ♦ Some art supplies and sewing chalk	♦ Keep these items away from your child. ♦ Wash hands well after touching these items. ♦ Do not heat, melt, cast or file any metal items at home.
Spends time at firing ranges	♦ Children and adolescents who spend time at firing ranges should be tested for lead. ♦ Use lead free ammunition. ♦ Do not eat or drink at a firing range. ♦ After shooting, immediately wash your hands and face with soap and water. ♦ Change clothes and shoes before going home / Wash those clothes separately.
Retained bullets and shrapnel	♦ Consult with your health care provider about ongoing testing and monitoring.
Lives or spends time near: ♦ Major roadways or freeways ♦ A former or current lead or steel smelter, or a foundry or industrial facility that historically emitted or currently emits lead ♦ A general aviation airport used by small aircraft	♦ Tell your health care provider if your child lives or spends time near these types of roadways or facilities. ♦ Do not let your child play or spend time near these types of roadways or facilities.

Haciendo Una Prueba De Plomo A Su Hijo

POR QUÉ SU HIJO DEBERÍA HACERSE LA PRUEBA DE PLOMO

El envenenamiento por plomo puede dificultar que su hijo aprenda, preste atención o se comporte y puede causar problemas de salud a largo plazo. Es posible que los niños no se vean ni actúen enfermos. Hacer que su hijo se haga una prueba de plomo es la única manera de saber si hay plomo en el cuerpo de su hijo.

Pídale al médico de su hijo una prueba de plomo en la sangre a los años de edad si su hijo está en un programa como **Medi-Cal, CHDP[1], WIC[2], Head Start u otros programas similares**. Si su hijo no está en uno de estos programas, pregúntele al médico de su hijo sobre su riesgo de exposición al plomo.

LOS NIÑOS ESTÁN EN MAYOR RIESGO PARA LA EXPOSICIÓN AL PLOMO SI ELLOS:

- **Vive** en una casa o edificio construido antes de 1978 o cerca de una fuente de emisiones de plomo al aire, como carreteras, sitios industriales, aeropuertos de aviación, sitios de reciclaje.
- **Consumir o entrar en contacto con** determinados alimentos, especies, remedios tradicionales, vajillas u otros productos.
- **Pasar tiempo** fuera de los EE. UU.
- **Tener un hermano con** un nivel elevado de plomo en la sangre.
- **Tener un familiar que trabaje con plomo** como la construcción o la pintura o tiene pasatiempos que involucran plomo como vidrieras, pesca, cerámica, armas de fuego, antigüedades.

Para obtener una lista de fuentes de plomo, consulte a su médico o visita: tinyurl.com/CLPPB-SOURCES

[1] CHDP es el Programa de Salud Infantil y Prevención de Discapacidades
[2] WIC es el Programa Especial de Nutrición Suplementaria para Mujeres, Bebés y Niños

QUÉ ESPERAR: ANÁLISIS DE PLOMO EN SANGRE PARA SU HIJO

1. La prueba se puede hacer en su consultorio del médico del niño o en unlaboratorio.
2. Hay dos métodos de recolección de sangre para la prueba de plomo: capilar o venosa. Las pruebas capilares suelen utilizar sangre extraída del dedo de su hijo. Pruebas venosas usar sangre de una vena en su brazo del niño.
3. Según el resultado, el médico de su hijo puede ordenar pruebas adicionales. Sangre de seguimiento las pruebas de plomo deben ser venosas.

Para más información visite:
www.cdph.ca.gov/programs/clppb
o comuníquese con su Líder de Niñez local Programa de Prevención de Envenenamiento:

¿Cuáles son algunas fuentes de plomo?

Hable con su proveedor de atención médica si usted o su hijo entran en contacto con cualquiera de estas posibles fuentes de plomo.

Posibles Fuentes de Plomo	Qué Puedes Hacer…
♦ Pintura vieja dentro o fuera de la casa (la mayoría de la pintura con plomo se encuentra en casas construidas antes de 1978)	♦ Aleje las cunas, las sillas altas y los corralitos de la pintura agrietada o descascarada. ♦ No permita que los niños mastiquen los alféizares de las ventanas u otras superficies pintadas. ♦ Llame al programa local de prevención del envenenamiento por plomo (tinyurl.com/CLPPP-LIST) para analizar la pintura para detectar plomo.
♦ Polvo en alféizares, pisos y juguetes	♦ Moje los pisos de trapeador y limpie húmedamente los alféizares de las ventanas y otras superficies. ♦ Lave los juguetes con frecuencia. ♦ Lávese las manos de los niños antes de comer y dormir.
♦ Suciedad fuera de la casa	♦ Cubra la tierra desnuda con piedras, hierba, plantas o grava. ♦ Limpie los zapatos o quíteselos ANTES de entrar a la casa.
♦ Agua potable (tinyurl.com/EPA-LEAD-H20)	♦ Para cocinar o beber, deje correr el agua hasta que se enfríe antes de usarla. ♦ No use una vasija de agua a menos que haya sido probada y se haya encontrado que no contiene plomo.
♦ Exposición a casa de zapatos/ropa/cabello si un miembro de la familia trabaja alrededor del plomo en el trabajo o en casa, como reparación de automóviles, metalurgia y reciclaje de baterías o chatarra.	♦ Dúchese/bañarse y cámbiese de ropa ANTES de llegar a casa del trabajo, si es posible, y ANTES de cargar a su hijo.Quítese la ropa y los zapatos de trabajo y guárdelos en una bolsa de plástico.Lave la ropa de trabajo por separado de otras prendas.
♦ Algunos platos o ollas que están desgastados o antiguos, de un descuento o mercado de pulgas, hechos de cristal, hechos a mano o hechosfuera de los EE.UU.	♦ Llame al programa local de prevención del envenenamiento por plomo (tinyurl.com/CLPPP-LIST) para obtener más información sobre cómo analizar platos y ollas para detectar plomo.
Remedios tradicionales, tales como: ♦ Azarcon y Greta – polvo naranja o Amarillo ♦ Paylooah – polvo rojo ♦ Algunos remedios Ayurvédicos o tradicionales Chinos	♦ No permita que nadie le dé remedios "naturales" o tradicionales a su hijo sin hablar primero con su proveedor de atención médica.
Algunos cosméticos tradicionales y otras sustancias aplicadas a la piel, tales como: ♦ Surma ♦ Kohl ♦ Sindoor	♦ No use estos productos en su hijo. ♦ Llame al programa local de prevención del envenenamiento por plomo (tinyurl.com/CLPPP-LIST) para probar cosméticos tradicionales, polvos rituales y otras sustancias aplicadas a la piel.
Altares para rituales religiosos que contienen: ♦ Polvos rituales ♦ Latón y algunos otros artículos de metal, cerámica o pintados	♦ Coloque altares con este tipo de artículos donde su hijo no pueda alcanzarlos. ♦ No permita que su hijo manipule o hable con estos artículos. ♦ Use productos de limpieza separados para limpiar estos artículos.
Algunas bisuterías, amuletos y llaves	♦ No permita que su hijo juegue, entre la boca o toque estos artículos.
Algunos alimentos y especias, tales como: ♦ Algunos dulces (especialmente importados) ♦ Chapulines (bocadillos de saltamontes) ♦ Algunas especias importadas, como la cúrcuma, chile en polvo, Khmeli Suneli ♦ Carne de caza que contiene perdigones de plomo	♦ Tenga cuidado con los alimentos y especias que pueden contener plomo. ♦ Ofrezca a su hijo comidas y refrigerios que incluyen una variedad de verduras, frutas, legumbres, semillas, nueces, granos enteros, carnes sin procesar y productos lácteos o sustitutos lácteos sin azúcar añadido.
Otros artículos, tales como: ♦ Plomos de pesca, balas, perdigones y soldadura ♦ Algunos suministros de arte y tiza de costura	♦ Mantenga estos artículos alejados de su hijo. ♦ Lávese bien las manos después de tocar estos artículos. ♦ No caliente, derrita, funda ni lima ningún artículo metálico en casa.
Pasa tiempo en los campos de tiro	♦ Los niños y adolescentes que pasan tiempo en los campos de tiro deben someterse a pruebas de plomo. ♦ Use municiones sin plomo. ♦ No coma ni beba en un campo de tiro. ♦ Después de disparar, lávese inmediatamente las manos y la cara con agua y jabón. ♦ Cámbiese de ropa y zapatos antes de irse a casa / Lave esa ropa por separado.
Balas retenidas y metralla	♦ Consulte con su proveedor de atención médica sobre las pruebas y el monitoreo continuos.
Vive o pasa tiempo cerca: ♦ Carreteras principales o autopistas ♦ Una fundición de plomo o acero anterior o actual, o una fundición o instalación industrial que históricamente emitió o actualmente emite plomo ♦ Un aeropuerto de aviación general utilizado por aviones pequeños	♦ Coméntele a su proveedor de atención médica si su hijo vive o pasa tiempo cerca de este tipo de carreteras o instalaciones. ♦ No permita que su hijo juegue o pase tiempo cerca de este tipo de carreteras o instalaciones.

BUSINESS, CONSUMER SERVICES, AND HOUSING AGENCY • GOVERNOR EDMUND G. BROWN JR.

BOARD OF REGISTERED NURSING
PO Box 944210, Sacramento, CA 94244-2100
P (916) 322-3350 F (916) 574-8637 | www.rn.ca.gov
Louise R. Bailey, MEd, RN, Executive Officer

AN EXPLANATION OF STANDARDIZED PROCEDURE REQUIREMENTS FOR NURSE PRACTITIONER PRACTICE

Standardized Procedures are authorized in the Business and Profession Code, Nursing Practice Act (NPA) Section 2725 and further clarified in California Code of Regulation (CCR 1480). Standardized procedures are the legal mechanism for registered nurses, nurse practitioners to perform functions which would otherwise be considered the practice of medicine. Standardized procedures must be developed collaboratively by nursing, medicine, and administration in the organized health care system where they will be utilized. Because of this interdisciplinary collaboration for the development and approval, there is accountability on several levels for the activities to be performed by the registered nurse, nurse practitioner.

Organized health care systems includes health facilities, acute care clinics, home health agencies, physician's offices and public or community health services. Standardized procedures means policies and protocols formulated by organized health care systems for the performance of standardized procedure functions.

The organized health care system including clinics, physician's offices (inclusive of sites listed above) must develop standardized procedures permitting registered nurse, nurse practitioner to perform standardized procedure functions. A registered nurse, nurse practitioner may perform standardized procedure functions only under the conditions specified in a health care system's standardized procedure; and **must provide the system with satisfactory evidence that the nurse meets its experience, training, and/or education requirements to perform the functions.**

A nurse practitioner is a registered nurse who possesses additional preparation and skill in physical diagnosis, psycho-social assessment, and management of health-illness needs in primary health care, and who has been prepared in a program conforming to the Board standards as specified in CCR 1484 (Standards of Education).

The Board of Registered Nursing has set educational standards for nurse practitioner certification which must be met in order to "hold out" as a nurse practitioner. Nurse practitioners who meet the education standards and are certified by the BRN are prepared to provide primary health care, (CCR 1480 b), that which occurs when a consumer makes contact with a health care provider who assumes responsibility and accountability for the continuity of health care regardless of the presence or absence of disease.

Scope of Medical Practice

The Medical Practice Act authorizes physicians **to diagnose** mental and physical conditions, **to use drugs in or** upon human beings, **to sever or penetrate the tissue** of human beings and **to use other methods** in the treatment of diseases, injuries, deformities or other physical or mental conditions. As a general guide, the performance of any of these functions by a registered nurse, nurse practitioner requires a standardized procedure.

Standardized Procedure Guidelines.

The Board of Registered Nursing and the Medical Board of California jointly promulgated the following guidelines. (Board of Registered Nursing, Title 16, California Code of Regulations (CCR) section 1474; Medical Board of California, Title 16, CCR Section 1379.)

(a) Standardized procedures shall include a written description of the method used in developing and approving them and any revision thereof.

(b) Each standardized procedure shall:

(1) **Be in writing, dated and signed by the organized health care system** personnel authorized to approve it.

(2) Specify **which standardized procedure functions** registered nurses may perform and under what circumstances.

(3) State any specific **requirements which are to be followed** by registered nurses in performing particular standardized procedure functions.

(4) Specify any **experience, training, and/or education** requirements for performance of standardized procedure functions.

(5) Establish a method for initial and continuing **evaluation** of the competence of those registered nurses authorized to perform standardized procedure functions.

(6) Provide for a method of maintaining a written record of those **persons authorized to perform** standardized procedure functions.

(7) Specify the scope of **supervision** required for performance of standardized procedure functions, for example, telephone contact with the physician.

(8) Set forth any specialized circumstances under which the registered nurse is to immediately **communicate with a patient's physician** concerning the patient's condition.

(9) State the limitations on **settings**, if any, in which standardized procedure functions may be performed.

(10) Specify patient **record-keeping** requirements.

(11) Provide for a method of **periodic review** of the standardized procedures.

An additional safeguard for the consumer is provided by steps four and five of the guidelines which, together, form a **requirement that the nurse be currently capable** to perform the procedure. If a RN or NP undertakes a procedure without the competence to do so, such an act may constitute gross negligence and be subject to discipline by the Board of Registered Nursing.

Standardized procedures which reference textbooks and other written resources in order to meet the requirements of Title 16, CCR Section 1474 (3), must include book (specify edition) or article title, page numbers and sections. Additionally, the standards of care established by the sources must be reviewed and authorized by the registered nurse, physician and administrator in the practice setting. A formulary may be developed and attached to the standardized procedure. Regardless of format used, whether a process protocol or disease-specific, the standardized procedure must include all eleven required elements as outlined in Title 16, CCR Section 1474.

SUGGESTED FORMAT FOR STANDARDIZED PROCEDURES

I. POLICY

1. Function(s): (2)*
2. Circumstances under which R.N. may perform function: (2)
   a. Setting (9)
   b. Supervision (7)
   c. Patient Conditions
   d. Other

II. PROTOCOL (3)

1. Definitions
2. Data base
   a. Subjective
   b. Objective
3. Diagnosis
4. Plan
   a. Treatment
   b. Patient conditions requiring consultation (8)
   c. Education - patient/family
   d. Follow up
5. Record keeping (10)

III. REQUIREMENTS FOR REGISTERED NURSE: (4)(5)

1. Nurse practitioner education program, specialty
2. Advance level training
3. Experience as a nurse practitioner
4. National Certification in a specialty
5. Method of initial and continuing evaluation of competence

IV. DEVELOPMENT AND APPROVAL OF THE STANDARDIZED PROCEDURE

1. Method: (Title 16, CCR Section 1474(a))
2. Review schedule (11)
3. Signatures of authorized personnel approving the standardized procedure, and dates: (1)
   a. Nursing
   b. Medicine

V. REGISTERED NURSES AUTHORIZED TO PERFORM PROCEDURE AND DATES (6)

1.
2.

*** Numbers in parentheses correspond to Board of Registered Nursing guideline numbers in Title 16, CCR Section 1474.**

EXAMPLE A (Process Protocol)

The Board of Registered Nursing does not recommend or endorse the medical management of this sample standardized procedure. It is intended as a guide for <u>format</u> purposes only.

Standardized Procedures

General Policy Component

I. Development and Review

A. All standardized procedures are developed collaboratively and approved by the Interdisciplinary Practice Committee (IDPC) whose membership consists of nurse practitioners, nurses, physicians, and administrators and must conform to all 11 steps of the standardized procedure guidelines as specified in Title 16, CCR Section 1474.

B. All standardized procedures are to be kept in a manual which includes dated, signed approval sheets of the persons covered by the standardized procedures.

C. All standardized procedures are to be reviewed every three years and as practice changes by the IDPC.

D. All changes or additions to the standardized procedures are to be approved by the IDPC accompanied by a dated and signed approval sheet.

II. Scope and Setting of Practice

A. Nurses may perform the following functions within their training specialty area and consistent with their experience and credentialing: assessment, management, and treatment of episodic illnesses, chronic illness, contraception, and the common nursing functions of health promotion, and general evaluation of health status (including but not limited to ordering laboratory procedures, x-rays, and physical therapies, recommending diets, and referring to Specialty Clinics when indicated).

B. Standardized procedure functions, such as managing medication regimens, are to be performed in (list area, i.e., short appointment clinic). Consulting physicians are available to the nurses in person or by telephone.

C. Physician consultation is to be obtained as specified in the individual protocols and under the following circumstances:

1. Emergent conditions requiring prompt medical intervention after initial stabilizing care has been started.
2. Acute decompensation of patient situation.
3. Problem which is not resolving as anticipated.
4. History, physical, or lab findings inconsistent with the clinical picture.
5. Upon request of patient, nurse, or supervising physician.

III. Qualifications and Evaluations

A. Each nurse performing standardized procedure functions must have a current California registered nursing license, be a graduate of an approved Nurse Practitioner Program, and be certified as a Nurse Practitioner by the California Board of Registered Nursing.

B. Evaluation of nurses' competence in performance of standardized procedure functions will be done in the following manner:

1. **Initial:** at 3 months, 6 months and 12 months by the nurse manager through feedback from colleagues, physicians, and chart review during performance period being evaluated.

2. **Routine:** annually after the first year by the nurse manager through feedback from colleagues, physicians, and chart review.

3. **Follow-up:** areas requiring increased proficiency as determined by the initial or routine evaluation will be re-evaluated by the nurse manager at appropriate intervals until acceptable skill level is achieved, e.g. direct supervision.

IV. Authorized Nurse Practitioners

List each

V. Protocols

The standardized procedure protocols developed for use by the nurses are designed to describe the steps of medical care for given patient situations. They are to be used in the following circumstances: management of acute/episodic conditions, trauma, chronic conditions, infectious disease contacts, routine gynecological problems, contraception, health promotion exams, and ordering of medications.

STANDARDIZED PROCEDURES

Management of Common Primary Care Conditions

I. Policy

A. As described in the General Policy Component.

B. Covers only those registered nurses as identified in General Policy Component.

II. Protocol

A. **Definition:** This protocol covers the management of common primary care conditions seen in the outpatient setting, such as eczema, headaches, acne, fatigue syndromes, allergic rhinitis, and low pain.

B. **Database** - Nursing Practice
(Perform usual total nursing assessment to establish data base).

C. **Treatment Plan** - Medical Regimen

1. **Diagnosis**
   a. Most consistent with subjective and objective findings expected by patient. If diagnosis is not clear, assessment to level of surety plus differential diagnosis.
   b. Assessment of status of disease process when appropriate.

2. **Treatment** - (Common nursing functions)
   a. Further lab or other studies as appropriate.
   b. Physical therapy if appropriate.
   c. Diet and exercise prescription as indicated by disease process and patient condition.
   d. Patient education and counseling appropriate to the disease process.
   e. Follow-up appointments for further evaluation and treatment if indicated.
   f. Consultation and referral as appropriate.

3. **Physician Consultation:** As described in the General Policy Component.

4. **Referral to Physician or Specialty Clinic:** Conditions for which the diagnosis and/or treatment are beyond the scope of the nurse's knowledge and/or skills, or for those conditions that require consultation.

5. **Furnishing Medications** - (Medical Regimen)
   Follow furnishing protocol, utilizing formulary.

PROTOCOL: DRUGS AND DEVICES

Definition: This protocol covers the management of drugs and devices for women of all ages presenting to ____________ clinic. The nurse practitioner may initiate, alter, discontinue, and renew medication included on, but not limited to the attached formulary. All Schedule I and Schedule II drugs are excluded.

Subjective Data: Subjective information will include but is not limited to:

1. Relevant health history to warrant the use of the drug or device.
2. No allergic history specific to the drug or device.
3. No personal and/or family history which is an absolute contraindication to use the drug or device.

Objective Data: Objective information will include but is not limited to:

1. Physical examination appropriate to warrant the use of the drug or device.
2. Laboratory tests or procedures to indicate/contraindicate use of drug or device if necessary.

Assessment: Subjective and objective information consistent for the use of the drug or device. No absolute contraindications of the use of the drug or device.

Plan: Plan of care to monitor effectiveness of any medication or device.

Patient Education: Provide the client with information and counseling in regard to the drug or device. Caution client on pertinent side effects or complications with chosen drug or device.

Consultation and/or Referral: Non-responsiveness to appropriate therapy and/or unusual or unexpected side effects and as indicated in general policy statement.

REFERENCES: PDR '94 50th Edition (list page)
Primary Care Medicine, 3rd Edition, Chapter (list), pp. (list)
Handbook of Gynecology and Obstetrics, 3rd Edition, Chapter (list), pp. (list)

FORMULARY

To include but not limited to those medications listed below:

Antibiotic: Ampicillin, Penicillin, Amoxicillin, Dicloxacillin, Augmentin, Keflex, Tetracycline, Noroxin, Minocin, Vibramycin, Benemid, Macrodantin, Erythromycin, Rocephin, Gantrisin, Trimethoprim/sulfamethoxazole, Nitrofurantoin, Nalidixic acid.

Antidiarrheal: Imodium, Donnagel

Antiemetic: Trans-derm V, Compazine, Phenergan, Tigan

Antifungal: Mycostatin oral suspension/tablets, Nizoral, Monistat, Femstat, Terazol, Gyne-Lotrimin

Antiviral: Zovirax ointment/capsules, Podophyllin 25-75%, Trichloroacetic acid

Antiparasite: Flagyl/Protostat, Kwell lotion/shampoo, RID lotion, Eurax cream

Biologic: RhoGAM, HypRho-D

Chemotherapeutic: 5FU for vaginal or vulvar use

Devices: Diaphragm, cervical cap, IUD, pessary, Norplant

Diuretic: Spironolactone, Dyazide

Hormone: All oral contraceptives, progesterone preparations, Estrogen (Premarin, Estinyl, Delestrogen, Estrovis, Estrace), Estraderm, Protestins (Aygestin, Provera, Micronor, Nor QD, Ovrette), Estrogen vaginal creams (Premarin, Estrace)

Local anesthetic: Xylocaine Jel 2%, Xylocaine 1% injection

Nonsteroidal Anti-inflammatory: Anaprox, Anaprox DS, Suprol, Motrin, Ponstel, Naprosyn, Rufen

Over the counter: Spermicidal agents, cold & cough preparations (non-narcotic), laxatives, stool softeners, antacids, antiflatulents, analgesics, prostaglandin inhibitors, topicals, vitamin/mineral, antihistamines, decongestants, hemorrhoidal/antidiarrheal.

Rectal:	Anusol HC, Wyanoids
Thyroid:	Synthroid, Armour thyroid tablets
Urinary analgesic:	Pyridium
Vaginal:	All appropriate antifungals, Aminocervical cream, Acijel, Betadine, Triple Sulfa cream, Estrogen cream.
Vitamin/Mineral:	Prenatal vitamins, iron pill

EXAMPLE B (Disease Specific)

The Board of Registered Nursing does not recommend or endorse the medical management of this sample standardized procedure. It is intended as a guide for format purposes only.

Standardized Procedures

DEPARTMENT:____________________ FACILITY:_______________

POLICY

I. FUNCTIONS NURSE PRACTITIONERS MAY PERFORM:

Provide care for patients with acute conditions as covered in attached protocol (see sample attached) and furnish non-controlled drugs and devices to essentially healthy patients.

II. CIRCUMSTANCES UNDER WHICH NURSE PRACTITIONERS MAY PERFORM THESE FUNCTIONS:

A. May furnish non-controlled drugs and devices under standardized procedures under the supervision of a designated physician (or designee).

B. Applies to nurse practitioners working in (indicate departments involved).

III. EXPERIENCE, TRAINING AND/OR EDUCATION REQUIRED OF THE NURSE PRACTITIONER:

Maintains a current California license to practice as an RN, is certified by the State of California as a Nurse Practitioner, has met all the requirements for and has a current Furnishing Number issued by the Board of Registered Nursing. Is oriented to the facility.

IV. METHOD OF INITIAL AND CONTINUED EVALUATION OF COMPETENCE:

General competency is initially evaluated during the probationary period through a proctoring process by the supervising physician. The registered nurse is assigned to and is supervised by a designated physician who is responsible to annually evaluate appropriateness of practice and clinical decision making. A QA review process is established to assure that compliance to standards relating to important aspects of care are maintained.

V. DOCUMENTATION

Documentation required is outlined in each protocol. Patient specific documentation is entered into the patient's medical record.

DEVELOPMENT AND APPROVAL OF THE STANDARDIZED PROCEDURE

I. THIS STANDARDIZED PROCEDURE WAS:

Developed by the supervising physician, or designee, and the Nurse Practitioner. Approved by the department Chief, Director of Nursing Practice, Physician-in-Chief or designees, and Medical Group Administrator.

II. THIS STANDARDIZED PROCEDURE WILL BE REVIEWED AT LEAST ANNUALLY.

REVISION DATED ____________ REVIEWED DATED ___________

Current list of authorized personnel are on file in the office of the Medical Group Administrator and department manager.

PROTOCOLS (List those applicable)

I.E., Urinary Tract Infection (see attached).
Respiratory tract infection
Otitis Media
Vaginitis

References: List

URINARY TRACT INFECTION PROTOCOL: INITIAL VISIT

I. RATIONALE

This protocol will assist in the differentiation between pyelonephritis and urinary tract symptoms sufficiently to eradicate the symptoms per se rather than attempt to eradicate any bacteriuria that may or may not be present. The design of the protocol for UTI encompasses these principles.

II. SYMPTOMS

A. CYSTITIS

1. **FEMALE PATIENTS**
   Order a STAT CVMS UA for female patients with any of the following symptoms;
   a. Dysuria
   b. Frequency
   c. Urgency
   d. Inability to empty bladder completely
2. Male patients
   Male patients with any of the above symptoms should be seen by an M.D., not by a NP, unless they have a urethral discharge (possible VD - follow VD protocol).

B. PYELONEPHRITIS

1. In addition to the above symptoms, patients with pyelonephritis may have:
   a. Fever greater than 100.0 F. or
   b. Flank pains, or
   c. Chills, or
   d. Nausea, vomiting or abdominal pain.
2. Continue with protocol through the physical exam with these patients, but then consult supervising physician before deciding on treatment.

III. HISTORY

A. Consult supervising physician if patient has:
1. A history of kidney problems, or
2. Is currently pregnant. To ascertain this, always ask for LMP date and record for all female patients.
3. Diabetes or insulin.
4. Three or more UTIs in past 12 months

B. Continue with UTI protocol, but also refer patient to GYN if history of:
1. Vaginal discharge, or
2. Perineal inflammation.

IV. PHYSICAL EXAM

A. Perform the following examinations:
1. Abdominal
2. CVA
3. Temperature

B. Consult supervising physician if findings of:
1. Fever greater than 100.0 F. or
2. CVA tenderness.

V. LAB TESTS

INITIAL URINALYSIS

A. Consult supervising physician if:
1. Casts
2. RBCs or protein are positive (without associated WBC abnormality).

B. If UA shows 10 or more WBCs/hpf and patient is symptomatic, give patient antibiotic prescription as described in the treatment section.

C. If UA revealed 0-10 WBCs, review symptoms. If the symptoms are definite and very severe, treat with antibiotics; if symptoms are vague and poorly defined, then give patient symptomatic treatment as described in the treatment section and consider referral to GYN for pelvic.

D. Should the initial UA be "positive": (defined in guidelines below), then give patient a repeat UA slip for the abnormality found with instructions to have that UA one week following completion of treatment.

Positive UA findings are defined as:

Casts: any except occasional hyaline or rare granular
RBCs > 3 (if not menstruating) and WBC < 5
Protein > trace and WBC < 5

VI. TREATMENT

ANTIBACTERIAL TREATMENT

To be given if initial UA reveals 10 or more WBC/hpf, or in any case where symptoms are severe, even if UA revealed, WBC/hpf.

A. Prescribe appropriate antibiotic drug (see p.6)

B. Instruct patient to call in if symptoms do not subside within 72 hours. If patient does call back, information for treatment failure instructions.

SYMPTOMATIC TREATMENT

To be given only if initial UA reveals, 10WBC/Hpf, and patient has minimal or uncertain symptoms. Consider GYN referral for pelvic.

A. Prescribe either Propantheline 15 mg #20 sig: 1-2 QID prn or Belladonna with Pb tabs #15, sig: 1 tab QID prn.
B. Instruct patient to call in if symptoms persist beyond 72 hours or if symptoms worsen at any time.

VII. REPEAT URINALYSIS (CVMS)

A. Consult supervising physician if UA shows casts.
B. If repeat UA confirms abnormality (protein and/or RBC as listed below) refer to Proteinuria and/or Hematuria protocols.

Positive UA findings are defined as:
Casts: any, except occasional hyaline or rare granular
RBCs >3 (if not menstruating) and WBC <5
Protein > trace and WBC <5

UTC PROTOCOL: ANTIBIOTIC TREATMENT

A. If organism found in patient's urine is not listed in the table below, consult supervising physician for treatment.

B. If this is the first antibiotic course (initial visit), assume E coli and use the first listed drug to which patient is not allergic, as listed for E coli in the drug table below.

C. If this is a second antibiotic course (treatment failure), go to the first drug for the organism listed that is not the same as that previously used and to which the patient is not allergic. If the patient is allergic to all drugs listed, consult supervising physician for treatment.

D. Prescribe according to the prescription table which follows:

1. If symptoms have been present within the past 48 hours, use 1 dose treatment.
2. If symptoms have been present longer than 48 hours, use 5-day treatment.
3. If symptoms persists after treatment with first drug, repeat UA and culture and consult supervising physician.

UTI PROTOCOL: TREATMENT FAILURE

If the patient calls in with persisted or recurrent symptoms after the first course of antibiotic treatment, obtain a CVMS urine specimen for UA and culture and sensitivity.

If the UA is negative, wait for the culture results before treating. If the UA is positive, treat with the next drug listed on the Antibiotic Prescription Table and review treatment choice when the culture and sensitivity results are available.

If culture is positive and patients symptoms are improving, stay with the same antibiotic. If not responding after 3 days, switch to a new antibiotic based on culture sensitivity.

Adapted from protocol developed by: ____________________, NP

______________, MD

(List names of nurse practitioners and physicians who developed the standardized procedure, including the protocol section).

ANTIBIOTIC PRESCRIPTION TABLE

ORGANISM	DRUG
E. Coli Proteus mirabilis	Septra DS, Amoxicillin Macrodantin, Keflex
Aerobacter Klebsiella	Septra DS, Macrodantin Keflex, Ciprofloxacin
Enterococcus	Ampicillin *Consult MD if allergic
Pseudomonas	Ciprofloxacin (Usually not seen in out-patient setting)
DOSAGES	
SEPTRA DS	#3 PO at once or 1 bid x 5 days
AMOXICILLIN	500mg 3gms PO at once or 250mg 1 tid x 5 days
MACRODANTIN	100mg qid x 5 days
KEFLEX	250mg qid x 5 days
CIPROFLOXACIN	250mg qid x 5 days

EXAMPLE C (Procedure Specific)

The Board of Registered Nursing does not recommend or endorse the medical management of this sample standardized procedure. It is intended as a guide for format purposes only.

Standardized Procedure for Dispensing by Registered Nurse

I. Policy

A. Drugs and devices listed in the agency formulary and prescribed by a lawfully authorized prescriber may be dispensed.
B. Setting - Adult Clinic.
C. Supervision - None required at the time of dispensing.

II. Protocol

A. Data Base
1. No patient or family history contraindications.
2. Agency required tests and procedures relative to the drug or device being dispensed demonstrate no contraindications.

B. Action
1. Affix label which contains information that follows.
   a. Agency name, address and telephone number.
   b. Patient's name.
   c. Name of the prescriber and initials of the dispenser.
   d. Date dispensed.
   e. Trade or generic name of dispensed drug.
   f. Quantity and strength of dispensed drug.
   g. Directions for use of dispensed drug.
   h. Expiration date of the drug's effectiveness.
2. Affix any appropriate auxiliary labels.
3. Use child proof containers.
4. Provide patient with appropriate information including:
   - directions for taking the drug;
   - what to do and whom to contact if side effects occur;
   - common side effects;
   - possible serious or harmful effects of the drug; and
   - any manufacturer-prepared information required by the FDA.

C. Record Keeping - Document in the patient record:
1. Name, dosage, route and amount of the drug dispensed.
2. Lot number and manufacturer's name.
3. Other information, including patient instructions given.
4. Complete information in the pharmacy dispensing log.

D. Consultation - Contact the prescriber if the item is not listed in the agency formulary for RN dispensing or regarding contraindications.

III. Requirements for Registered Nurses

A. Education, training and experience: successful completion of the agency's in-service program on dispensing.

B. Initial evaluation: Demonstration of competency in skill performance to the satisfaction of the Pharmacy Director.

C. On-going evaluation - Monthly random record review by the pharmacist and an annual performance appraisal including observation of dispensing.

IV. Development and Approval of the Standardized Procedure

This standardized procedure was approved by the following:

NURSING____ DATE _____________

MEDICINE____ DATE _____________

PHARMACY____ DATE _____________

ADMINISTRATION _______________________________________ DATE _____________

The standardized procedure will be reviewed annually.

V. RNs authorized to perform the procedure.

1. ____ DATE _________

2.____ DATE ___________

PCP:	
SECTION: Infection Control	
POLICY AND PROCEDURE: Standard and Universal Precautions	Approved date: ________________ Approved by: __________________ Effective date: _________________ Revised date: _________________ Revised date: _________________

POLICY:

Infection Control standards are practiced on site to minimize risk of disease transmission. Site personnel will apply the principles of "Standard Precautions" (CDC, 1996), used for all patients regardless of infection status. Standard precautions apply to blood, all body fluids, non-intact skin, and mucous membranes, which are treated as potentially infectious for HIV, HBV or HCV, and other bloodborne pathogens. "Universal precautions" refer to the OSHA mandated program that requires implementation of work practice controls, engineering controls, bloodborne pathogen orientation/education, and record keeping in healthcare facilities.

PROCEDURE:

I. HAND WASHING FACILITIES

A. Hand washing facilities are available in the exam room and/or utility room, and include an adequate supply of running potable water, soap and single use towels or hot air drying machines. Sinks with a standard faucet, foot-operated pedals, 4-6-inch wing-type handle, automatic shut-off systems or other types of water flow control mechanism are acceptable. Staff is able to demonstrate infection control "barrier" methods used on site to prevent contamination of faucet handle, door handles and other surfaces until hand washing can be performed. On occasions when running water is not readily available, an antiseptic hand cleanser, alcohol-based hand rub, or antiseptic towelettes is acceptable until running water is available (29 CFR 1919.1030).

B. Hand washing prevents infection transmission by removing dirt, organic material and transient microorganisms from hands. Hand washing with plain (non-antimicrobial) soap in any form (e.g., bar, leaflet, liquid, powder, granular) is acceptable for general patient care (Association for Professionals in Infection Control and Epidemiology, Inc., 1995).

II. ANTISEPTIC HAND CLEANER

A. Antimicrobial agents or alcohol-based antiseptic hand rubs are used for hand washing when indicated to remove debris and destroy transient microorganisms (e.g., before performing invasive procedures, after contact with potentially infectious materials). Plain and antiseptic hand wash products are properly maintained and/or dispensed to prevent contamination.

III. WASTE DISPOSAL CONTAINER

A. Contaminated wastes (e.g. dental drapes, band aids, sanitary napkins, soiled disposal diapers) are disposed of in regular solid waste (trash) containers, and are maintained to prevent potential contamination of patient/staff areas and/or unsafe access by infants/children.

IV. ISOLATION PROCEDURES

A. Personnel are able to demonstrate or verbally explain procedure(s) used on site to isolate patients with potentially contagious conditions from other patients. If personnel are unable to demonstrate or explain site-specific isolation procedures *and* cannot locate written isolation procedure instructions, site is considered deficient.

Information Bulletin

SB 697 – Frequently Asked Questions

Overview

SB 697 (Chapter 707, Statutes of 2018) became effective on January 1, 2020 and made numerous changes to the Physician Assistant Practice Act (Act), which provides for licensure and regulation of physician assistants by the Physician Assistant Board (Board). Generally, the new law removes requirements that the medical record identify the responsible supervising physician and surgeon, removes requirements that the physician be physically available to the physician assistant for consultation, removes requirements for review and countersignature of patient medical records, and removes requirements that written guidelines for adequate supervision be established. The new law instead authorizes a physician assistant to perform medical services authorized by the Act if certain requirements are met, including that the medical services are rendered pursuant to a practice agreement, as defined, and the physician assistant is competent to perform the medical services.

The Act now requires that a practice agreement between a physician assistant and a physician and surgeon meet specified requirements, including that the agreement have policies and procedures to ensure adequate supervision of the physician assistant, including, but not limited to, appropriate communication, availability, consultations, and referrals between a physician and surgeon and the physician assistant in the provision of medical services. In addition, a practice agreement must establish policies and procedures to identify a physician and surgeon (with privileges to practice in that hospital) who is supervising a physician assistant rendering services in a general acute care hospital.

The prior law authorized a physician assistant, under the supervision of a physician and surgeon, to administer or provide medication to a patient, or transmit orally, or in writing on a patient's record or in a drug order, an order to a person who may lawfully furnish the medication or medical device, subject to specified requirements. The new law authorizes a physician assistant to furnish or order a drug or device subject to specified requirements, including that the furnishing or ordering be in accordance with the practice agreement and consistent with the physician assistant's educational preparation or for which clinical competency has been established and maintained, and that the physician and surgeon be available by telephone or other electronic communication method at the time the physician assistant examines the patient.

The Act now authorizes the physician assistant to furnish or order Schedule II or III controlled substances in accordance with the practice agreement or a patient-specific order approved by the treating or supervising physician and surgeon and requires completion of a controlled substances course by the PA's next renewal if the PA is

authorized by a practice agreement to furnish Schedule II controlled substances and if the PA has a DEA registration.

In addition, the new law provides that any reference to a "delegation of services agreement" in any other law means "practice agreement," as defined. The Act now provides that supervision does not require the supervising physician and surgeon to be physically present, but does require adequate supervision as agreed to in the practice agreement and does require that the physician and surgeon be available by telephone or other electronic communication method at the time the physician assistant examines the patient. However, the Act also prohibits this provision from being construed as prohibiting the Board from requiring the physical presence of a physician and surgeon as a term or condition of a PA's reinstatement, probation, or imposing discipline.

For more detailed information and to review the exact text of this new legislation, a copy of SB 697 is included with this information bulletin at:

http://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=201920200SB697.

The Board is providing the following information in response to questions received:

Practice Agreement

1. **What is a practice agreement?**

   The practice agreement replaces the delegation of services agreement. The practice agreement is a written agreement developed through collaboration among one or more physicians and surgeons ("physician") and one or more physician assistants (PA). The practice agreement defines the medical services the PA is authorized to perform pursuant to Business and Professions Code (BPC) section 3502 and grants approval for the physicians and surgeons on the staff of an "organized health care system"[1] to supervise one or more PAs in an organized health care system. (See BPC, § 3501, subd. (k).).

   The practice agreement must include provisions that address the following:

   (1) The types of medical services a physician assistant is authorized to perform,
   (2) Policies and procedure to ensure adequate supervision of the PA,
   (3) The methods for continuing evaluation of the competency and qualifications of the PA,

[1] Under the new law, an "organized health care system" includes a licensed clinic, an outpatient setting, a health facility, an accountable care organization, a home health agency, a physician's office, a professional medical corporation, a medical partnership, a medical foundation, and any other entity that lawfully provides medical services (see BPC, § 3501, subd. (j)).

(4) The furnishing or ordering of drugs or devices by a PA pursuant to Section 3502.1 (see answer to Question No. 5); and,
(5) Any additional provisions agreed to by the PA and the supervising physician. (See BPC, § 3502.3, subd. (a)(1).)

The practice agreement must be signed by the PA and one or more physicians or a physician who is authorized to approve the practice agreement on behalf of the staff of the physicians on the staff of an organized health care system. (See BPC, § 3502.3, subd. (a)(2).)

2. **Will the Board be publishing a sample/template practice agreement on its website?**

No, not at this time. Further, the law does not require the Board to approve practice agreements. (BPC, § 3502.3, subd. (a)(5).)

3. **Can an existing delegation of services agreement be used instead of a practice agreement?**

Yes. Any delegation of services agreement in effect prior to January 1, 2020 shall be deemed to meet the requirements of BPC Section 3502.3. (See BPC, § 3502.3, subd. (a)(3).)

4. **What Medical Services is a PA authorized to perform?**

A PA is authorized to perform those medical services described in the practice agreement. The PA must also have the competency to perform the medical services, and the PA's education, training, and experience must have prepared the PA to render the services. (See BPC, § 3502, subd. (a).)

Finally, in addition to any other practices that meet the criteria set forth in the Act or the Board's or the Medical Board of California's regulations, a practice agreement may authorize a PA to do any of the following:

(1) Order durable medical equipment, subject to any limitations set forth in Section 3502 of the Act (particularly competency, education training, and experience), or the practice agreement.

(2) For individuals receiving home health services or personal care services, after consultation with a supervising physician, approve, sign, modify, or add to a plan of treatment or plan of care.

(3) After performance of a physical examination by the PA under the supervision of a physician, certify disability pursuant to Section 2708 of the Unemployment Insurance Code. (See BPC, § 3502.3, subd. (b).)

Prescriptions

5. **Are protocols and formularies for controlled substances required?**

No. However, there are still criteria that need to be met to authorize a PA to furnish a controlled substance. A PA may furnish or order only those Schedule II through Schedule V controlled substances under the California Uniform Controlled Substances Act that have been agreed upon in the practice agreement, and consistent with the PA's educational preparation or for which clinical competency has been established and maintained. With respect to Schedules II or III controlled substances, the practice agreement or a patient-specific order approved by the treating or supervising physician can authorize the PA to furnish a Schedule II or III controlled substance. (See BPC, § 3502.1, subds. (a), (d)(1), and (d)(2).)

A practice agreement authorizing a PA to order or furnish a drug or device shall specify all of the following:

(1) which PA or PAs may furnish or order a drug or device,
(2) which drugs or devices may be furnished or ordered,
(3) under what circumstances a drug or device will be furnished,
(4) the extent of physician supervision,
(5) the method of periodic review of the PA's competence, including peer review,
(6) review of the practice agreement (BPC, § 3502.1, subd. (b)(1); and,
(7) if the practice agreement authorizes the PA to furnish a Schedule II controlled substance, the practice agreement shall address the diagnosis of the illness, injury, or condition for which the PA may furnish the Schedule II controlled substance. (See BPC, § 3502.1, subd. (b)(2).)

To furnish any drug or device, the PA must have also completed a course in pharmacology that meets the requirements contained in section 1399.530 of Title 16 of the California Code of Regulations as that provision read on June 7, 2019. (See BPC, § 3502.1, subd. (e)(1).) For PAs that are authorized through a practice agreement to furnish Schedule II controlled substances, completion of a controlled substance education course is now mandatory, as described below.

6. **Is the Controlled Substance Education Course required?**

Yes. A PA who holds an active license, who is authorized through a practice agreement to furnish Schedule II controlled substances, who is registered with the U.S. Drug Enforcement Administration (DEA), and who has not completed a one-time course in compliance with sections 1399.610 and 1399.612 of Title 16 of the California Code of Regulations as those provisions read on June 7, 2019, shall complete, as part of their continuing education requirements, a course that

covers Schedule II controlled substances and the risks of addiction associated with their use, based on standards developed by the Board. Therefore, if a PA who holds an active license has not yet completed the required course, the PA needs to complete the course before renewing their license. (See BPC, § 3502.1, subd. (e)(3).)

7. **Can a PA furnish or order Schedule II or III controlled substances?**

   Yes. A PA may furnish or order Schedule II or III controlled substances in accordance with the practice agreement or a patient-specific order approved by the treating or supervising physician. (See BPC, § 3502.1, subd. (d)(2).) However, continuing education and practice agreement requirements also need to be met to maintain compliance with the Act (see answers to Question Nos. 5 and 6 above).

8. **Is supervising physician contact information required on PA prescriptions?**

   No. PA prescription pads are no longer required to list the name, address, and telephone number of their supervising physician. Further, a PA's drug order that is authorized to be issued under the Act must be treated in the same manner as a prescription of a supervising physician, and the signature of a PA on a drug order issued in accordance with the Act is deemed to be the signature of a prescriber for purposes of the Business and Professions Code and the Health and Safety Code. (See BPC, § 3502.1, subd. (g).)

Supervision

9. **Are PAs required to identify their supervising physician for each episode of care in the patient's medical record?**

   Not anymore. The legislation removed the requirement that each episode of care for a patient identify the physician responsible for the supervision of the physician assistant. (See BPC, § 3502, as amended.)

10. **Does the supervising physician still need to review or countersign my charts?**

    No. Unless the practice agreement requires it, the supervising physician no longer must review or countersign the medical records of a patient treated by a PA. The Board may, as a condition of probation or reinstatement of a licensee, require the review or countersignature of records of patients treated by a PA for a specified duration. (See BPC, § 3502, subd. (c).)

11. What are the Responsibilities of a Supervising Physician?

Under the new law, a supervising physician must provide adequate supervision of a PA as agreed to in the practice agreement. A supervising physician need not be physically present while the PA provides medical services but must be available by telephone or other electronic communication method at the time the PA examines the patient. (See BPC, § 3501, subd. (f)(1)(A)-(B).) However, the Board may require the physical presence of the supervising physician as a term or condition of a PA's reinstatement, probation, or imposing discipline. (See BPC, § 3501, subd. (f)(2).)

Supervision means that a physician oversees and accepts responsibility for the medical services provided by the PA. (See BPC, § 3501, subd. (f)(1).) While the PA is also no longer an agent of the supervising physician, the PA and the supervising physician can agree via practice agreement, that the PA is designated as an agent of the supervising physician. (See BPC, § 3502.3, subd. (a)(4).)

If rendering services in a general acute care hospital as defined in Health and Safety Code section 1250, the PA must be supervised by a physician who has privileges to practice in that hospital. Within a general acute hospital, the practice agreement shall establish policies and procedures to identify a physician who is supervising the PA. (See BPC, § 3502, subd. (f).)

However, amendments to the new law did not change the following requirements for physician supervision:

> (a) a physician assistant licensed by the board shall be eligible for employment or supervision by a physician who is not subject to a disciplinary condition imposed by the Medical Board of California prohibiting that employment or supervision.
>
> (b) Except as provided in Business and Professions Code section 3502.5 (state of war or emergency), a physician shall not supervise more than four physician assistants at any one time.
>
> (c) The Medical Board of California may restrict a physician and surgeon to supervising specific types of physician assistants including, but not limited to, restricting a physician and surgeon from supervising physician assistants outside of the field of specialty of the physician and surgeon. (See BPC, § 3516.)

Miscellaneous

12. Can a PA now own a majority share in a medical practice?

No. The new law did not change the Moscone-Knox Professional Corporation Act's ban on the owning of a majority of shares of a professional medical corporation. Under this prohibition a PA cannot own more than 49% of a professional medical corporation. (See Corp. Code, § 13401.5, subd. (a)(7).)

**DELEGATION OF SERVICES AGREEMENT
BETWEEN
A SUPERVISING PHYSICIAN AND A PHYSICIAN ASSISTANT**

Title 16, Section 1399.540 of the Physician Assistant Regulations states, in part, “a) A physician assistant may only provide those medical services which he or she is competent to perform and which are consistent with the physician assistant’s education, training, and experience, and which are delegated in writing by a supervising physician who is responsible for the patients cared for by that physician assistant. b) The writing which delegates the medical services shall be known as a delegation of services agreement. A delegation of services agreement shall be signed and dated by the physician assistant and each supervising physician. A delegation of services agreement may be signed by more than one supervising physician only if the same medical services have been delegated by each supervising physician. A physician assistant may provide medical services pursuant to more than one delegation of services agreement.”

The following document is a sample Delegation of Services Agreement (DSA) to assist you with meeting this legal requirement. This sample DSA is provided for information purposes; feel free to duplicate or modify it as appropriate and consistent with the law.

If you choose not to use the sample DSA, please be aware that you are still required by law to execute a DSA with your supervising physician. The DSA must be signed and dated by you and your supervising physician. The original or a copy of this document should be maintained at all practice sites where the physician assistant practices, and should be readily accessible. It is recommended that you retain prior DSAs for one to three years after the DSA is no longer current or valid.

While every practicing physician assistant is required to have a DSA, you are **not** required to submit it to the Physician Assistant Board. If requested, you must make a copy of your DSA available to any authorized agent of the Medical Board of California, the Osteopathic Medical Board of California, or the Physician Assistant Board who may request it.

Failure to have a current DSA constitutes a violation of the Physician Assistant Regulations and is grounds for disciplinary action against a physician assistant’s license. In addition, failure by the physician assistant and supervising physician to comply with the supervision requirements specified in the Physician Assistant Regulations and in the Delegation of Services Agreement is ground for disciplinary action.

THE ATTACHED DOCUMENTS DO NOT NEED TO BE RETURNED TO THE PHYSICIAN ASSISTANT BOARD

SAMPLE

DELEGATION OF SERVICES AGREEMENT BETWEEN SUPERVISING PHYSICIAN AND PHYSICIAN ASSISTANT (Title 16, CCR, Section 1399.540)

PHYSICIAN ASSISTANT____
(Name)

Physician assistant, graduated from the ____
(Name of PA Training Program)
physician assistant training program on ________________________________.
(Date)
He/she took (or is to take) the licensing examination for physician assistants recognized by the State of California (e.g., Physician Assistant National Certifying Examination or a specialty examination given by the State of California) on __________________________.
(Date)
He/she was first granted licensure by the Physician Assistant Board on ________________________, which expires on ____________________, unless renewed.
(Date) (Date)

SUPERVISION REQUIRED. The physician assistant named above (hereinafter referred to as PA) will be supervised in accordance with the written supervisor guidelines required by Section 3502 of the Business and Professions Code and Section 1399.545 of the Physician Assistant Regulations. The written supervisor guidelines are incorporated with the attached document entitled, "Supervising Physician's Responsibility for Supervision of Physician Assistants."

AUTHORIZED SERVICES. The PA is authorized by the physician whose name and signature appear below to perform all the tasks set forth in subsections (a), (b), (c), (d), (e), (f), (g) and (h) of Section 1399.541 of the Physician Assistant Regulations, when acting under the supervision of the herein named physician. (In lieu of listing specific lab procedures, etc. the PA and *supervising* physician may state as follows: "Those procedures specified in the practice protocols or which the supervising physician specifically authorizes.")

The PA is authorized to perform the following laboratory and screening procedures:

____

____

The PA is authorized to assist in the performance of the following laboratory and screening procedures:

____

____

The PA is authorized to perform the following therapeutic procedures:

____

____

The PA is authorized to assist in the performance of the following therapeutic procedures:

____

____

The PA is authorized to function as my agent per bylaws and/or rules and regulations of (name of hospital):

____

____

a) The PA is authorized to write and sign drug orders for Schedule: II, III, IV, V without advance approval (circle authorized Schedule(s). The PA has taken and passed the drug course approved by the Board on __________ (attach certificate). DEA #:______________________________. Date
or
b) The PA is authorized to write and sign drug orders for Schedule: II, III, IV, V with advance patient specific approval (circle authorized Schedule(s). DEA #:______________________________.

CONSULTATION REQUIREMENTS. The PA is required to always and immediately seek consultation on the following types of patients and situations (e.g., patient's failure to respond to therapy; physician assistant's uncertainty of diagnosis; patient's desire to see physician; any conditions which the physician assistant feels exceeds his/her ability to manage, etc.)

____
(List Types of Patients and Situations)

MEDICAL DEVICES AND PHYSICIAN'S PRESCRIPTIONS. The PA may transmit by telephone to a pharmacist, and orally or in writing on a patient's medical record or a written prescription drug order, the supervising physician's prescription in accordance with Section 3502.1 of the Business and Professions Code.

The supervising physician authorizes the delegation and use of the drug order form under the established practice protocols and drug formulary. ________ YES _________ NO

The PA may also enter a drug order on the medical record of a patient at ______________________________
(Name of Institution)
in accordance with the Physician Assistant Regulations and other applicable laws and regulations.

Any medication handed to a patient by the PA shall be authorized by the supervising physician's prescription and be prepackaged and labeled in accordance with Sections 4076 of the Business and Professions Code.

PRACTICE SITE. All approved tasks may be performed for care of patients in this office or clinic located at ____ and, in ______________________________ hospital(s) and
(Address / City) (Address / City)
____ skilled nursing facility (facilities) for care of
(Name of Facility)
patients admitted to those institutions by physician(s) ____ .
(Name/s))

EMERGENCY TRANSPORT AND BACKUP. In a medical emergency, telephone the 911 operator to summon an ambulance.

The ____ emergency room at ____________________________
(Name of Hospital) (Phone Number)
is to be notified that a patient with an emergency problem is being transported to them for immediate admission. Give the name of the admitting physician. Tell the ambulance crew where to take the patient and brief them on known and suspected health condition of the patient.
Notify ____________________________________ at __________________________________ immediately
(Name of Physician) (Phone Number/s))
(or within ________________ minutes).

PHYSICIAN ASSISTANT DECLARATION
My signature below signifies that I fully understand the foregoing Delegation of Services Agreement, having received a copy of it for my possession and guidance, and agree to comply with its terms without reservations.

______________________________	____
Date	Physician's Signature (Required)
	____
	Physician's Printed Name
_______________________________	____
Date	Physician Assistant's Signature (Required)
	____
	Physician Assistant's Printed Name

SAMPLE ONLY

(c) The requirement that the physician assistant be supervised by, or work in collaboration with, a licensed physician and surgeon.

(Amended by Stats. 2018, Ch. 92, § 2 (SB 1289), eff. January 1, 2019.)

§ 3502.2. Physical Examinations

Notwithstanding any other provision of law, a physician assistant may perform the physical examination and any other specified medical services that are required pursuant to Section 2881 of the Public Utilities Code and Sections 44336, 49406, 49423, 49455, 87408, 87408.5, and 87408.6 of the Education Code, practicing in compliance with this chapter, and may sign and attest to any certificate, card, form, or other documentation evidencing the examination or other specified medical services.

(Added by Stats. 2010, Ch. 512, § 2 (SB 1069), eff. January 1, 2011.)

§ 3502.3. Practice Agreement

(a) (1) A practice agreement shall include provisions that address the following:

(A) The types of medical services a physician assistant is authorized to perform.

(B) Policies and procedures to ensure adequate supervision of the physician assistant, including, but not limited to, appropriate communication, availability, consultations, and referrals between a physician and surgeon and the physician assistant in the provision of medical services.

(C) The methods for the continuing evaluation of the competency and qualifications of the physician assistant.

(D) The furnishing or ordering of drugs or devices by a physician assistant pursuant to Section 3502.1.

(E) Any additional provisions agreed to by the physician assistant and physician and surgeon.

(2) A practice agreement shall be signed by both of the following:

(A) The physician assistant.

(B) One or more physicians and surgeons or a physician and surgeon who is authorized to approve the practice agreement on behalf of the staff of the physicians and surgeons on the staff of an organized health care system.

(3) A delegation of services agreement in effect prior to January 1, 2020, shall be deemed to meet the requirements of this subdivision.

(4) A practice agreement may designate a PA as an agent of a supervising physician and surgeon.

(5) Nothing in this section shall be construed to require approval of a practice agreement by the board.

(b) Notwithstanding any other law, in addition to any other practices that meet the general criteria set forth in this chapter or regulations adopted by the board or the Medical Board of California, a practice agreement may authorize a PA to do any of the following:

(1) Order durable medical equipment, subject to any limitations set forth in Section 3502 or the practice agreement. Notwithstanding that authority, nothing in this paragraph shall operate to limit the ability of a third-party payer to require prior approval.

(2) For individuals receiving home health services or personal care services, after consultation with a supervising physician and surgeon, approve, sign, modify, or add to a plan of treatment or plan of care.

(3) After performance of a physical examination by the PA under the supervision of a physician and surgeon consistent with this chapter, certify disability pursuant to Section 2708 of the Unemployment Insurance Code. The Employment Development Department shall implement this paragraph on or before January 1, 2017.

(c) This section shall not be construed to affect the validity of any practice agreement in effect prior to the effective date of this section or those adopted subsequent to the effective date of this section.

(Amended by Stats. 2019, Ch. 707, § 5 (SB 697), eff. January 1, 2020.)

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Personnel Training: Child Abuse Reporting	Approved date: ____________________ Approved by: ____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:
Health care practitioners who have knowledge of or observe a child, in his or her professional capacity or within the scope of his or her employment, whom he or she knows or reasonably suspects has been the victim of child abuse or neglect shall report the suspected incident of abuse or neglect to a "child protective agency".

PROCEDURE:
I. Reporting

A. The report must be made to a "child protective agency". A child protective agency is a county welfare or probation department or a police or sheriffs department (P.C. 11165.9, P.C. 11166[a])

1. Written reports must be submitted on a Department of Justice form – Form SS 8572 (DOJ SS 8572) which can be requested from your local child protective agency

2. A report must be made **immediately (or as soon as possible) by phone**

3. **A written report must be forwarded to the child protective agency within 36 hours of receiving the information regarding the incident**

4. A single report may be made if two or more persons have knowledge of suspected child abuse or neglect

5. Have the following information ready to report:
   - Name of reporter
   - Name and present location of the child
   - Nature and extent of the injury, and any evidence of prior abuse
   - Any other information, including what led you to suspect child abuse, if requested by the child protective agency (P.C. § 11167 [a])

6. **Failure to make a required report is a misdemeanor punishable by up to six months in jail and/or up to a $1,000 fine (P.C. 1172[e]). Persons who fail to report can also be subject to a civil lawsuit, and found liable for damages, especially if the child-victim or another child is further victimized because of the failure to report**

II. Indicators of Abuse

A. Physical Abuse

1. Physical Indicators of Physical Abuse
   - Fractures, lacerations, bruises that cannot be explained, or explanations which are improbable given the extent of the injury
   - Burns (cigarette, rope, scalding water, iron, radiator)
   - Infected burns, indicating delay in seeking treatment
   - Facial injuries (black eyes, broken jaw, broken nose, bloody nose, bloody or swollen lips) with implausible or nonexistent explanations
   - Subdural hematomas, long-bone fractures, fracture in different states of healing
   - Pattern of bruising (e.g., parallel or circular bruises) or bruises in different stages of discoloration, indicating repeated trauma over time

2. Behavioral Indications of Physical Abuse
   - Hostile, aggressive, verbally abusive towards others
   - Fearful or withdrawn behavior
   - Self-destructive (self-mutilates, bangs head, etc.)
   - Destructive (breaks windows, sets fires, etc.)
   - Out-of-control behavior (seems angry, panics, easily agitated)
   - Frightened of going home, frightened of parents/caretakers or, at the other extreme, is overprotective of parent(s) or caretaker(s)
   - Attempts to hide injuries; wears excessive layers of clothing, especially in hot weather
   - Difficulty sitting or walking
   - Clingy, forms indiscriminate attachments
   - Apprehensive when other children cry
   - Wary of physical contact with adults
   - Exhibits drastic behavioral changes in and out of parental/caretaker presence
   - Suffers from seizures or vomiting
   - Exhibits depression, suicide attempts, substance abuse, or sleeping and eating disorders

B. Sexual Abuse

1. Physical Indicators of Sexual Abuse; the following may be indicative of sexual abuse:
   - Wears torn, stained, or bloody underclothing
   - Physical trauma or irritation to the anal/genital area (pain, itching, swelling, bruising, bleeding, laceration, abrasions), especially if injuries are unexplained or there is an inconsistent explanation

- Knowledge of a child's history of previous or recurrent injuries/diseases
- Swelling or discharge from vagina/penis
- Visible lesions around mouth or genitals
- Complaint of lower abdominal pain
- Painful urination, defecation
- Sexually transmitted diseases
- Difficulty in walking or sitting due to genital or anal pain
- Psychosomatic symptoms (stomachaches, headaches)

2. Behavioral Indicators of Sexual Abuse
   - Sexualized behavior (has precocious knowledge of explicit sexual behavior and engages self or others in overt or repetitive sexual behavior)
   - Compulsive indiscreet masturbation
   - Excessive curiosity about sexual matters or genitalia (self or others)
   - Unusually seductive with classmates, teachers and other adults
   - Excessive concern about homosexuality, especially by boys

3. Behavioral Indicators of Sexual Abuse in Younger Children; the following may be exhibited by younger children who are experiencing sexual abuse:
   - Wetting pant, bed wetting or fecal soiling
   - Eating disturbances such as overeating, under eating
   - Fears or phobias
   - Compulsive behavior
   - School problems or significant change in school performance (attitude and grades)
   - Age-inappropriate behavior, including pseudomaturity or regressive behavior such as bed wetting or thumb sucking
   - Inability to concentrate
   - Drastic behavior changes
   - Speech disorders
   - Frightened of parent/caretaker or of going home

4. Behavioral Indicators of Sexual Abuse in Older Children and Adolescents; the following are behaviors that may be exhibited by older children and adolescents who are experiencing sexual abuse:
   - Withdrawal, clinical depression, apathy, chronic fatigue
   - Overly compliant behaviors
   - Poor hygiene or excessive bathing
   - Poor peer relations and social skills; inability to make friends; non-participation in sports and social activities
   - Acting out; running away; aggressive, antisocial, or delinquent behavior

- Alcohol or drug abuse
- Prostitution or excessive promiscuity
- School problems, frequent absences, sudden drop in school performance
- Refusal to dress to physical education
- Fearfulness of showers or restrooms; of home life, as demonstrated by arriving at school early or leaving late; of going outside or participating in familiar activities; of males (in cases of male perpetrator and female victim)
- Self-consciousness of body beyond that expected for age
- Sudden acquisition of money, new clothes, or gifts with no reasonable explanation
- Suicide attempt, self-mutilation, or other-destructive behavior
- Crying without provocation
- Setting fires
- Pseudo-mature (seems mature beyond chronological age)
- Eating disorders

C. Neglect

1. Physical Indicators of Neglect; Neglect may be suspected when one or more of the following conditions exist:
   - Failure to thrive – the child fails to gain weight at the expected rate for a normal child
   - Malnutrition or poorly balanced diet (bloated stomach, extremely thin, dry, flaking skin, pale, fainting)
   - Inappropriate dress for weather
   - Dirty unkempt, extremely offensive body odor
   - Unattended medical or dental conditions (e.g., infections, impetigo)
   - Evidence of poor or inadequate supervision for the child’s age
2. Behavioral Indicators of Neglect
   - Clingy or indiscriminate attachment
   - Depressed, withdrawn, or apathetic
   - Antisocial or destructive behavior
   - Fearfulness
   - Substance abuse
   - Speech, eating, or habit disorders (biting, rocking, whining)
   - Often sleepy or hungry
   - Brings only candy, chips, and soda for lunch or consistently “forget” to bring food

III. Definitions

A. Physical abuse: characterized by physical injury (for example, bruises and fractures) resulting from punching, beating, kicking, biting, burning, or otherwise harming a child. Any injury resulting from physical punishment that requires medical treatment is considered outside the realm of normal disciplinary measures.

B. Neglect: the negligent treatment or the maltreatment of a child by a person responsible for the child's welfare under circumstances indicating harm or threatened harm to the child's health or welfare. The term includes both acts and omissions on the part of the responsible person.

C. Severe neglect: the negligent failure of a person having the care or custody of a child to protect the child from severe malnutrition or medically diagnosed nonorganic failure to thrive. "Severe neglect" also means those situations of neglect where any person having the care or custody of a child willfully causes or permits the person or health of the child to be placed in a situation such that his or her person or heath is endangered, including the intentional failure to provide adequate food, clothing, shelter, or medical care.

D. Sexual abuse: refers to sexual assault or sexual exploitation

1. Sexual assault includes rape, statutory rape, rape in concert, incest, sodomy, and lewd or lascivious acts upon a child, oral copulation, sexual penetration, or child molestation. It includes, but is not limited to, all of the following:
   - Any penetration, however slight, of the vagina or anal opening of one person by the penis of another person, whether or not there is the emission of semen
   - Any sexual contact between the genitals or anal opening of one person and the mouth or tongue of another person
   - Any intrusion by one person into the genital or anal opening of another person, including the use of any object for this purpose, excepting acts performed for a valid medical reason
   - The intentional touching of the genitals or intimate parts (including the breasts, genital area, groin, inner thighs, and buttocks) or the clothing covering them, of a child, or of the perpetrator by a child, for purposes of sexual arousal or gratification, excepting acts that may reasonably be construed to be normal caretaker responsibilities; interaction with, or demonstrations of affection for, the child; or acts performed for a valid medical purpose
   - The intentional masturbation of the perpetrator's genitals in the presence of a child (P.C. 11165.1[b])

2. Sexual exploitation refers to any of the following:
   - Depicting a minor engaged in obscene acts in violation of law; preparing, selling, or distributing obscene matter that depicts minors; employment of minor to perform obscene acts

- Any person who knowingly promotes, aids, or assists, employs, uses, persuades, induces, or coerces a child, or any person responsible for a child's welfare, who knowingly permits or encourages a child to engage in, or assists other to engage in, prostitution or a live performance involving obscene sexual conduct, or to either pose or model alone or with others for purposes of preparing a film, photograph, negative, slide, drawing, painting, or other pictorial depiction, involving obscene sexual conduct. "Person responsible for a child's welfare" means a parent, guardian, foster parent, or a licensed administrator or employee of a public or private residential home, residential school, or other residential institution
- Any person who depicts a child in, or who knowingly develops, duplicates, prints or exchanges, any film, photograph, video tape, negative, or slide in which a child is engaged in an act of obscene sexual conduct, except for those activities by law enforcement and prosecution agencies and other persons described in subdivisions (c) and (e) of Section 311.3 (P.C. 11165.1[c])

SUSPICIOUS INJURY REPORT

CalEMA 2-920 (rev 4/09)

Instructions To The Health Practitioner

Penal Code Section 11160 *mandates* the following regarding suspicious injuries:

- Internal procedures established to facilitate reporting and apprise supervisors and administrators of reports shall be consistent with the reporting requirements of PC Section 11160. The internal procedures shall not require any employee who must make a report to disclose his or her identity to the employer.
- Report suspicious injuries to your local law enforcement agency by telephone **immediately**, or as soon as practically possible.
- Submit the required completed written report to your local law enforcement agency *within two working days of discovering a suspicious injury,* whether or not:
  1. The person has expired;
  2. The injury was a factor contributing to the person's death; or
  3. Evidence of the conduct of the perpetrator is discovered during an autopsy.
- Use this standard form or a form, developed and adopted by another state agency, that otherwise fulfills the requirements of this form, (see "Exceptions to using this form" below).
- Two or more health practitioners with knowledge of a suspicious injury may mutually select a team member to make the telephone report and one written report signed by the selected team member. A team member who knows that the selected team member has not made the telephone call or submitted the written report shall make the report(s).
- No supervisor or administrator shall impede or inhibit the required reporting duties, and no person making a report pursuant to this section shall be subject to any sanction for making the report.

Exceptions To Using This Form

Other state reporting mandates pre-empt the use of this form to report suspicious injuries, as follows:

Incident	Form	Source of Form
Physical Child Abuse	SS 8572	Call California Department of Justice at (916) 227-3285.
Dependent Adult / Elder Abuse	SOC 341	Online: http://www.dss.cahwnet.gov/pdf/SOC341.pdf or contact your local County Adult Protective Services Dept.
Sexual Assault – Adult*	CalEMA 2-923*	Online: www.CalEMA.ca.gov under Plans and Publications or call Cal EMA at (916) 324-9100.
Sexual Assault – Child*	CalEMA 2-925* CalEMA 2-930*	

*Use these forms to conduct a forensic examination of the victim. Otherwise, use this Suspicious Injury Report form.

Definitions

Health Practitioner – Provides medical services to a patient for a physical condition that he/she reasonably suspects is a suspicious injury as listed below, and is employed in a health facility, clinic, physician's office, local or state public health department, or a clinic or other type of facility operated by a local or state public health department.

Suspicious Injury – Includes any wound or other physical injury that either was:

- Inflicted by the injured person's own act or by another where the injury is by means of a firearm, OR
- Is suspected to be the result of *assaultive or abusive conduct* inflicted upon the injured person.

Injury – Shall not include any psychological or physical condition brought about solely through the voluntary administration of a narcotic or restricted dangerous drug.

Assaultive / Abusive Conduct – includes committing, or an attempt to commit, any of the following Penal Code violations:

- Abuse of spouse or cohabitant
- Aggravated mayhem
- Administering controlled substances or anesthetic to aid in the commission of a felony
- Assault with a stun gun or taser
- Assault with a deadly weapon, firearm, assault weapon or machine gun, or by means likely to produce great bodily injury
- Assault with intent to commit mayhem, rape, sodomy, or oral copulation
- Battery
- Child abuse or endangerment (including Statutory Rape)
- Elder abuse
- Incest
- Lewd and lascivious acts with a child
- Murder
- Manslaughter
- Mayhem
- Oral copulation
- Procuring any female to have sex with another man
- Rape
- Sexual battery
- Sexual penetration
- Sodomy
- Spousal rape
- Throwing any vitriol, corrosive acid, or caustic chemical with intent to injure or disfigure
- Torture CAL

T-ACE

(T = tolerance A = annoyed C = cut down E = eye-opener)

The T-Ace questions take approximately one minute to ask and represent the first validated sensitive screen for risk-drinking appropriate for routine use in obstetric-gynecologic practice.

Scoring: T = 2 points, A = 1 point, C = 1 point, E = 1 point.
A total score of 2 or more indicates positive screening.

T How many drinks does it take to make you feel high (TOLERANCE)?

A Have people ANNOYED you by criticizing your drinking?

C Have you felt you ought to CUT DOWN on your drinking?

E Have you ever had a drink first thing in the morning to steady your nerves or get rid of a hangover (EYE-OPENER)?

TB (Tuberculosis) Risk Assessment

*** You (your child) may be at increased risk for TB if you answer YES to any of the following questions:**	Date / /	Date / /	Date / /	Date / /
1. Do you have a family member or close contact with history of confirmed or suspected TB?	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
2. Are you from Asia, Africa, Central America or South America? (These areas have a higher prevalence of TB.)	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
3. Do you (does your child) live in an “out of home” placement facility?	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
4. Do you (does your child) have a history of confirmed or suspected HIV infection?	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
5. Do you (does your child) live with any individual who is HIV positive?	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
6. Have you been, or do you (does your child) live with any individual who has been incarcerated in the last 5 years?	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐
7. Do you (does your child) live among, or are you (is he/she) frequently exposed to individuals who are homeless, migrant farm workers, users of street drugs, or resident in a nursing home.	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐	Yes ☐ No ☐

* A person who is at increased risk for TB should have a yearly TB test.
(All children are tested routinely for TB at 4-5 years, 13-16 years, regardless of risk)

Name:____ Date:____________________

Evaluando el Riesgo de Poder Contraer "TB" (Tuberculosis)

*** Sus hijos pueden tener un riesgo muy alto de poder contraer "TB" si contesta en informa afirmativa a cualquiera de las siguientes preguntas:**	Fecha / /	Fecha / /	Fecha / /	Fecha / /
1. Existe algun contacto cercano o algun miembro de la familia que haya sido declardo enfermo de TB o que se sospeche tener esta enfermedad?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
2. Cuando emigraron a este pais lo hicieron de Asia, Africa, America Central de Sudamerica? (en estas reginoes del mundo existe un porcentaje muy alto de este enfermedad)	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
3. Acaso ested (o su hijo/a) se encuentra viviendo temporalmente en un hogar o local sostenido por el gobierño o asistencia social?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
4. Acaso ested (o su hijo/a) haya sido, diagnosticado(a) con algun tipo de infeccion como el sida?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
5. Acaso ested (o su hijo/a) haya sido declardo positivo con el examen del sida?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
6. Acaso ested (o su hijo/a) vive con adultos que hayan estado presos or cualquier motivo en los ultimos 5 anos?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐
7. Acaso ested (o su hijo/a) vive o se asocia frecuentemente con personas que viven en las calles, que sean trabajadores temporales del campo, utilicen drogas ilicitas inyectables o que residan en asilos o en hospitals de convalescencia?	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐	Si ☐ No ☐

*Cualquir persona que tiene un alto riesgo de contraer /tb debe hacerse el examen de la tuberculosis cara año, (se les examina los 4 y 5 años y de los 13 a 16 años)

¡Recuerde que este examen es muy sencillo y pareciera que esta recibiendo una vacuan pero debe ser revisado por personal medico en un periodo de 2 a 3 dias, este proceso es muy importante y no debe olivarse, de otra manera el examen no tiene validez alguna!

PCP:	
SECTION: Office Management	
POLICY AND PROCEDURE: Triage	Approved date: ____________________ Approved by: ______________________ Effective date: ____________________ Revised date: _____________________ Revised date: _____________________

POLICY:
The site shall have sufficient health care personnel to provide timely, appropriate health care services. Triage is the sorting and classification of information to determine priority of need and proper place of treatment. Telephone triage is the system for managing telephone callers during and after office hours.

PROCEDURE:

A. The PCP will ensure that appropriate personnel handle emergent, urgent and medical advice telephone calls. This includes licensed medical personnel such as a CNM, NP, RN or PA. LVN's cannot perform triage independently (MCPB letter 92-15). LVNs and unlicensed personnel such as medical assistants may provide patient information or instructions only as authorized by the physician (Title 16, 1366b)

B. Staff will ensure that a telephone answering machine, voice mail system or answering service is utilized whenever office staff does not directly answer phone calls.

The practitioner is responsible for the answering service it uses. If a member calls after hours or on a weekend for a possible medical emergency, the practitioner is held liable for authorization of or referral to, emergency care given by the answering service. There must be a message immediately stating, "If this is an emergency, hang up and call 911 or go to the nearest emergency room."

- ***This message should be in the threshold languages for the office.***

- Answering service staff handling member calls cannot provide telephone medical advice if they are not a licensed, certified or registered health care professional. Staff members may ask questions on behalf of a licensed professional in order to help ascertain the condition of the member so that the member can be referred to licensed staff; however, they are not permitted, under any circumstance, to use the answers to questions in an attempt to assess, evaluate, advise, or make any decision

regarding the condition of the member, or to determine when a member needs to be seen by a licensed medical professional. Unlicensed telephone staff should have clear instructions on the parameters relating to the use of answers in assisting a licensed provider.

C. Staff will ensure that the telephone answering service, recorded telephone information, and recording devices are periodically checked and updated (see suggested scripts as seen in section 18 of this manual).

- Health Plans encourage answering services follow these steps when receiving a call:
  - Inform the member that if they are experiencing a medical emergency, they should hang up and call 911 or proceed to the nearest emergency medical facility.
  - Question the member according to the PCP's or PPG's established instructions (who, what, when, and where) to assess the nature and extent of the problem.
  - Contact the on-call physician with the facts as stated by the member.
  - After office hours, physicians are required to return telephone calls and pages within 30 minutes. If an on-call physician cannot be reached, direct the member to a medical facility where emergency or urgent care treatment can be given. This is considered authorization, which is binding and cannot be retracted

"TWEAK" TEST

Do you drink alcoholic beverages? If you do, please take our "TWEAK" test.

T	**Tolerance:** How many drinks can you "hold"? (Record number of drinks in box at right)	☐
	(For the next questions, check box at right for "yes" answers)	☐
W	Have close friends **Worried or Complained** about your drinking in the past year?	☐
E	**Eye Opener:** Do you sometimes take a drink in the morning when you first get up?	☐
A	**Amnesia** (Blackouts): Has a friend or family member ever told you about things you said or did while you were drinking that you could not remember?	☐
K(C)	Do you sometimes feel the need to Cut Down on your drinking?	☐

To score the test, a seven-point scale is used. The tolerance question scores two points if a woman reports she can "hold" more than five drinks without passing out, and a positive response to the worry question scores two points. Each of the last three questions scores one point for positive responses. A total score of three or more points indicates the woman is likely to be a heavy/problem drinker.

For more information on screening, write: Marcia Russell, Ph. D., Research Institute on Addictions, 1021 Main Street, Buffalo, New York, 14203, or telephone (716) 887-2507.

Clorox Regular Bleach

Overview:
Size/Count 60.0 oz.

- Kills 99.9% of common household germs
- Patented whitest whites technology
- Not harmful to septic systems

Q. What organisms does Clorox® Regular-Bleach kill?

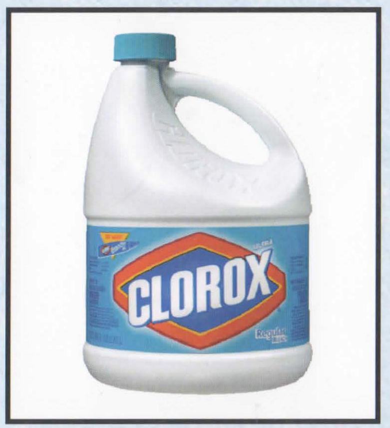
A. **Bacteria**
Staphylococcus aureus (Staph.)
Salmonella choleraesuis
Pseudomonas aeruginosa
Streptococcus pyogenes (Strep.)
Escherichia coli O157:H7 *(E. coli)*
Shigella dysenteriae
Methicillin Resistant Staphylococcus aureus (MRSA)

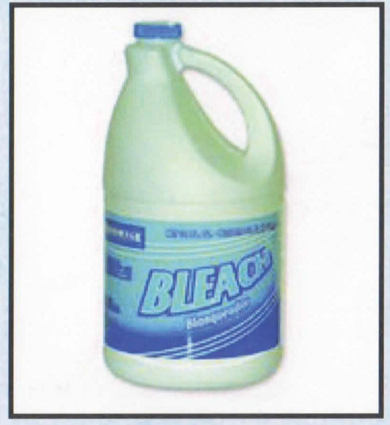
Fungi
Trichophyton mentagrophytes (can cause Athlete's Foot)
Candida albicans (a yeast)

Viruses
Rhinovirus Type 17 (a type of virus that can cause colds)
Influenza A (Flu virus)
Hepatitis A virus
Rotavirus
Respiratory Syncytial Virus (RSV)
HIV-1 (Human Immunodeficiency Virus)*
Herpes simplex Type 2
Rubella virus
Adenovirus Type 2
Cytomegalovirus

Understanding Bleach

Recognizing The Differences Between Germicidal, Laundry & Cheap Bleach





Clorox Germicidal Bleach

- Highest sodium hypochlorite concentration (6.15%)
- Lowest pH / Significantly shorter contact times for surface disinfection vs. cheap bleach
- Disinfects, sanitizes and deodorizes hard, non-porous surfaces
- EPA-registered disinfectant
- Reliable packaging and profitable distribution
- 100+ Sole Source Bleach distributors and counting...

Clorox Liquid Bleach

- Higher sodium hypochlorite concentration (6.0%)
- Higher pH / Longer contact times for surface disinfection
- Includes patented additive that keeps metals and minerals found in water and body soil from discoloring fabrics over time
- Special additive creates improved whitening power
- EPA-registered disinfectant
- Reliable packaging and profitable distribution

Cheap Bleach

- Low sodium hypochlorite concentration (5.25%)
- Highest pH / Longest contact times for surface disinfection
- Unreliable packaging and unprofitable distribution

Call 888-797-7225 or your Clorox Sales Rep for more details.

PCP:	
SECTION: Personnel	
POLICY AND PROCEDURE: Unlicensed Personnel	Approved date: ___________________ Approved by: _____________________ Effective date: ____________________ Revised date: ____________________ Revised date: ____________________

POLICY:
All professional health care personnel must be qualified and trained for assigned responsibilities.

PROCEDURE:
I. MEDICAL ASSISTANTS

A. Medical Assistants (MA) are unlicensed health personnel who perform basic administrative, clerical, and non-invasive routine technical supportive services under the supervision of a licensed physician. The licensed physician must be physically present in the treatment facility during the performance of authorized procedures by the MA.

B. Training may be administered under a licensed physician; or under a RN, LVN, PA, or other qualified medical assistant acting under the direction of a licensed physician. The supervising physician is responsible for determining the training content and ascertaining proficiency of the MA. Training documentation must be maintained on-site and include the following:

- Diploma or certification from an accredited training program/school, or
- Letter/statement from the current supervising physician that certifies in writing: date, location, content, and duration of training, demonstrated proficiency to perform current assigned scope of work, and signature.

II. MEDICATIONS

A. Unlicensed staff must have evidence of appropriate training and supervision in all medication administration methods performed within their scope of work.
   - Medication administration by a MA means the direct application of pre-measured medication orally, sublingually, topically, vaginally, or rectally; or by providing a single dose to a patient for immediate self-administration by inhalation or simple injection.
   - The pre-labeled medication container must be shown to the licensed person prior to administration.

- To administer medications by subcutaneous or intramuscular injection, or to perform intradermal skin tests or venipunctures for withdrawing blood, an MA must have completed at least the minimum number of training hours established in CCR, Title 16, Section 1366.1.
- An MA may administer injections of scheduled drugs, including narcotic medications, only if the dosage is verified and the injection is intradermal, subcutaneous, or intramuscular.
- Medical assistants may not place an intravenous needle, start or disconnect the intravenous infusion tube, administer medications or injections into an intravenous line, or administer anesthesia.
- The supervising physician must specifically authorize all medications administered by an MA by means of a specific written or standing order prepared by the supervising physician.

III. IDENTIFICATION OF HEALTH CARE PRACTITIONERS

A. A health care practitioner shall disclose his or her name and title/practitioner's license type, as granted by the State of California, on a nametag with at least 18-point type. A health care practitioner in a practice or office, whose license is prominently displayed may opt not to wear a nametag.

Note: It is unlawful for any person to use the title "nurse" in reference to himself or herself, in any capacity, except for an individual who is a registered nurse or licensed vocational nurse.

IV. TRAINING OF SITE PERSONNEL

A. Personnel on site must be qualified for their responsibilities and adequately trained for their scope of work. Site staff should have a general understanding of the systems/processes in place, appropriate supervisions, and knowledge of the available sources of information on site.

Site personnel are qualified and trained for assigned responsibilities
Provider and staff must be able to demonstrate operation of medical equipment used in their scope of work.

Trainings: Unlicensed staff (e.g. medical assistants) has evidence of appropriate training and supervision in all medication administration methods performed within their scope of work. Medication administration by a MA means the direct application of pre-measured medication orally, sublingually, topically, vaginally or rectally; or by providing a single dose to a patient for immediate self-administration by inhalation or by simple injection.

Staff shall follow procedures for confirming the correct patient, correct medication, correct dosage, and correct route prior to administration. **All medications including vaccines must be verified with (shown to) a licensed person prior to administration.**

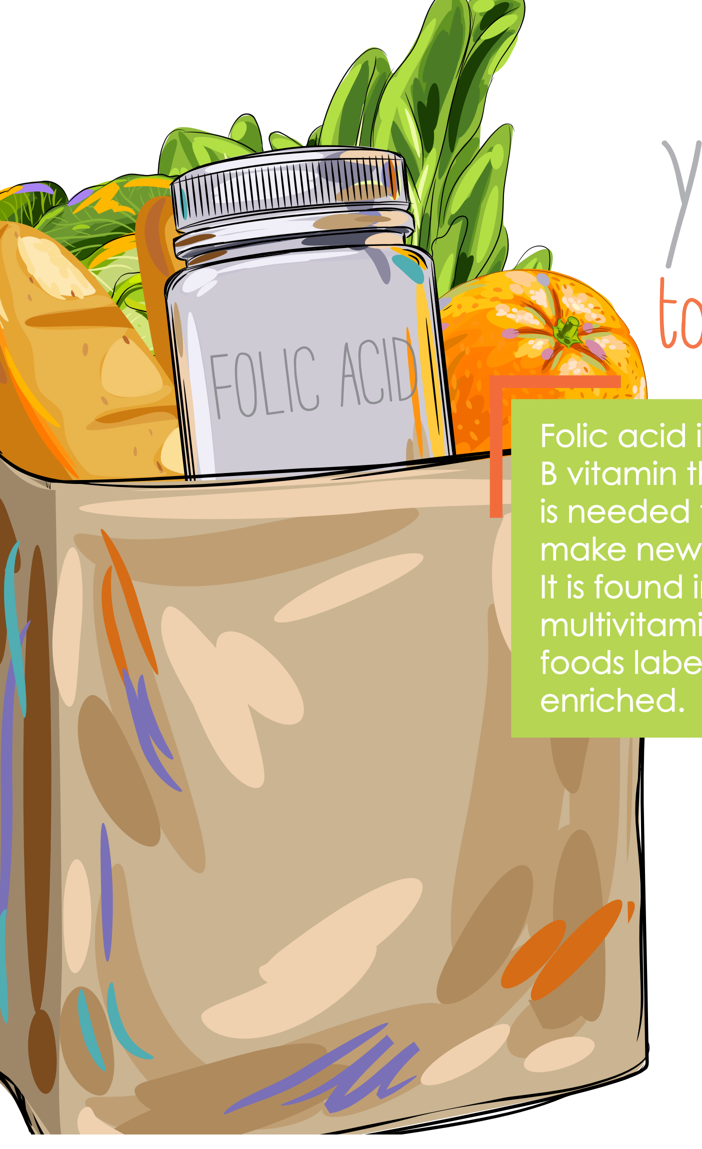
The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audio tape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC, 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.



YOU DESERVE
to be your very best!

Your body makes new cells every day—blood, skin, hair, nails and others.

Folic acid is a B vitamin that is needed to make new cells. It is found in some multivitamins and foods labeled as enriched.

MAKE GOOD HEALTH

Start a healthy habit. Get 400 micrograms of folic acid every day!

a habit for **LIFE!** Start today.

Take a multivitamin with 400 micrograms (mcg) of Folic Acid daily.

An easy way to be sure you're getting enough folic acid is to take a daily multivitamin with folic acid in it. Most multivitamins have all the folic acid you need. If you get an upset stomach from taking a multivitamin, try taking it with meals or just before bed. If you have trouble taking pills, you can try a multivitamin that is gummy or chewable. Also be sure to take it with a full glass of water.

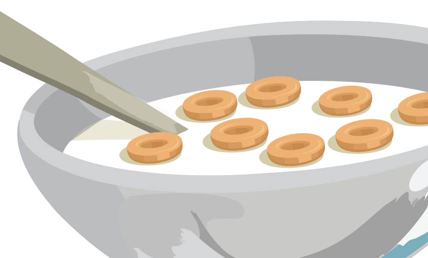
Eat right by choosing food rich in folate.

Folic acid has been added to foods such as enriched breads, pastas, rice and cereals. Check the Nutrition Facts Label on the food packaging. A serving of some cereals has 100% of the folic acid that you need each day.

In addition to getting **400 mcg of folic acid** from supplements and fortified foods, it is important to eat a diet rich in folate. Folate is a form of the B vitamin folic acid. It is found naturally in some foods, such as leafy, dark green vegetables, citrus fruits and juices, and beans.

You never know when you might become pregnant. Having enough folic acid in your body before you become pregnant and during early pregnancy helps prevent some birth defects of the brain and spine. Be ready when the time comes!

For More Information – Call 1-800-CDC-INFO (800-232-4636), visit CDC's website at www.cdc.gov/ncbddd/folicacid, or ask your doctor for more information.



CS247351-A

Workplace Violence Protocol

I. Any staff member involved in an exchange with a patient or other visitor, which he/she perceives to be escalating will:

   a. ask the visitor to remain calm. If the discussion continues to escalate he/she will notify the supervisor/practitioner.

   b. ensure the safety of staff, patients and visitors.

   c. if alone in the office, ask the visitor to leave.

   d. if the situation continues to escalate, the visitor does not leave, or at any time the staff member feels threatened, **dial 911** to summon police.

II. Any staff member who witnesses violence in the office will:

   a. immediately dial 911.

   b. notify the supervisor/practitioner.

Employee Alarm System:

Type of system (please circle or write in): verbal (if 10 employees or less), fire pull, alarm button or pull string in each room, code words, distinct sound/signal (silent alarm, paging system), panic button, and/or other________________________________.
