MedXM Postpartum Care Program Reminder for CalViva Health Members

On behalf of CalViva Health, Health Net Community Solutions, Inc. (Health Net) is reminding providers about the MedXM postpartum care program, which began in August 2017 and continues for 2018. This program is for CalViva Health members in Fresno County who have recently given birth and have not completed their 21–56 day postpartum visit.

Lower compliance rates for postpartum care remains an issue for Medi-Cal members due to barriers accessing care timely. By working with providers, the goal is to find additional opportunities to increase postpartum care performance by insuring a visit within 21–56 days. The program encourages member engagement, detecting early warning signs of potential health complications, and offering early support and care.

OVERVIEW

The MedXM postpartum care program provides for one in-home postpartum assessment to new mothers living in California. The assessment is performed by an obstetrician/gynecologist (OB/GYN), family practitioner, primary care physician (PCP), nurse practitioner, physician's assistant (specializing in obstetrics), or midwife who provides a physical evaluation and an emotional and psychological assessment (postpartum depression screening). Health education information is also shared with the new mother in addition to community resources for services, such as Women, Infants and Children (WIC), Black Infant Health (BIH) and behavioral health.

MedXM health care specialists are not involved in care or treatment of patients nor do they prescribe medication. They only perform needed screenings at the time of the visit. The health care specialist will help and encourage members to make an appointment with their PCP or OB/GYN for follow-up with the assessment results and recommendations on treatment and continued care.

PARTICIPANT BENEFITS AND PROGRAM REFERRALS

Eligible CalViva Health postpartum members will receive a telephone call informing them of the importance of completing a postpartum visit. Members have the option of completing their postpartum visit with their PCP or OB/GYN provider or through the MedXM postpartum care program. Women who complete a postpartum assessment within 21–56 days may be eligible for a \$25 gift card from Health Net, on behalf of CalViva Health.

Providers can refer a CalViva Health member who would benefit from an in-home postpartum care assessment to the MedXM postpartum care program by completing all fields in the attached MedXM Referral form and faxing it to 1-888-353-6442. Copies of the form can be made for office use, as needed. Members also have the right to refuse the in-home postpartum assessment even when referred by their PCP.

If you have questions regarding the information contained in this update, contact CalViva Health at 1-888-893-1569.

THIS UPDATE APPLIES TO
MEDI-CAL PROVIDERS:

- Physicians
- Participating Physician Groups
