

Capitated Encounter Data Submission Webinar

Register for training to get comprehensive information about data submission and reporting

Health Net,* on behalf of CalViva Health, is presenting an *Encounter Data* webinar. This training is designed to meet the training needs of physicians and staff members. The course will help you improve the quality of care and services provided to members by sending Health Net the needed encounter data.

Registration

Providers are urged to attend one of the following webinar sessions. Please register online via www.bit.ly/HNEncounters.

Course name	Dates	Time
Encounter Data webinars	Wednesday, July 10, 2019	1:00 p.m. Pacific time
	Wednesday, July 17, 2019	9:00 a.m. Pacific time
	Tuesday, July 23, 2019	2:00 p.m. Pacific time

Complete, timely and correct encounter data are critical

- Encounter data are records of the health care services for which managed care organizations (MCOs) pay. The inbound capitated encounter data identifies the services CalViva Health members have received and underlines the services our members have not received.
- To understand where the gaps are can help us identify and make changes that could improve your performance measures. Performance measures include, but not limited to, the Healthcare Effectiveness Data and Information Set (HEDIS®), the Screening, Triage, Assessment and Referral (STAR), quality and risk-adjustment, and customer experience.
- Complete, correct and timely encounter data are needed to analyze costs, usage and trends. The data also help assess benefits and quality of services provided to our members.
- Encounter data are also used in many of our incentive programs and to figure extra payouts for state initiatives.

Additional information

Providers are encouraged to access the provider portal online at provider.healthnet.com for real-time information, including eligibility verification, claims status, prior authorization status, plan summaries, and more.
