

# Avoid Denials and Payment Delays: Billing Requirements for Dyadic Services

## ACCURATE BILLING REDUCES CLAIM DENIALS AND SUPPORTS TIMELY REIMBURSEMENT

Dyadic services support Medi-Cal members under age 21 by addressing the needs of the child together with a parent or caregiver. These services help identify and address developmental, behavioral health, and family needs early.

### Action required

When billing for dyadic services:

- Confirm services clearly benefit the child.
- Apply required modifiers (U1, HB, UK).
- Follow UB-04 billing requirements.
- Submit wrap-around claims when applicable.

Failure to follow these requirements may result in claim denials or payment delays.

### Why this matters

Dyadic services may include support provided to the caregiver. Claims must demonstrate that all services directly support the child.

To prevent denials:

- Link all services to the child's care.
- Use correct billing codes and modifiers.
- Submit claims according to Medi-Cal requirements.

### Where dyadic services are provided

- During or after well-child visits.
- At Federally Qualified Health Centers (FQHCs) and Regional Health Clinics (RHCs).
- Through Medi-Cal Managed Care and Fee-for-Service (FFS).

### Billing requirements

All items in this section must be completed to prevent claim delays or denials.

- Submit all claims on the UB-04 form.
- Include National Provider Identifiers (NPIs) and diagnosis indicators.
- Use informational lines for dyadic tracking when required.
- Use required modifiers:
  - U1 – Dyadic service
  - HB – Caregiver is a Medi-Cal member
  - UK – Caregiver is not a Medi-Cal member
