

Avoid Denials and Payment Delays: Billing Requirements for Dyadic Services

ACCURATE BILLING REDUCES CLAIM DENIALS AND SUPPORTS TIMELY REIMBURSEMENT

Dyadic services support Medi-Cal members under age 21 by addressing the needs of the child together with a parent or caregiver. These services help identify and address developmental, behavioral health, and family needs early.

Action required

When billing for dyadic services:

- Confirm services clearly benefit the child.
- Apply required modifiers (U1, HB, UK).
- Follow UB-04 billing requirements.
- Submit wrap-around claims when applicable.

Failure to follow these requirements may result in claim denials or payment delays.

Why this matters

Dyadic services may include support provided to the caregiver. Claims must demonstrate that all services directly support the child.

To prevent denials:

- Link all services to the child's care.
- Use correct billing codes and modifiers.
- Submit claims according to Medi-Cal requirements.

Where dyadic services are provided

- During or after well-child visits.
- At Federally Qualified Health Centers (FQHCs) and Regional Health Clinics (RHCs).
- Through Medi-Cal Managed Care and Fee-for-Service (FFS).

Billing requirements

All items in this section must be completed to prevent claim delays or denials.

- Submit all claims on the UB-04 form.
- Include National Provider Identifiers (NPIs) and diagnosis indicators.
- Use informational lines for dyadic tracking when required.
- Use required modifiers:
 - U1 – Dyadic service
 - HB – Caregiver is a Medi-Cal member
 - UK – Caregiver is not a Medi-Cal member
