Initial Health Appointment Tip Sheet

Tips for Completing the New Member IHA

health net.

Patient office visits offer the chance for providers to complete the comprehensive Initial Health Appointment (IHA) and deliver needed preventive care and services to new patients. Use this guide for helpful tips to complete IHA requirements.

Requirements	 An IHA must be completed for all Health Net* members and periodically re-administered according to requirements in the Population Health Management (PHM) Program Guide and managed care plan (MCP) contract requirements. An IHA: Must be performed by a Primary Care Physician (PCP). Is not necessary if the member's PCP determines that the member's medical record contains complete information that was updated within the previous 12 months. Must be provided in a way that is culturally and linguistically appropriate for the member. The IHA must include the following: A history of the member's physical and mental health. An identification of risks. An assessment of need for preventive screens or services. Health education. The diagnosis and plan for treatment of any diseases.
Exceptions	 The exceptions below must be documented in the patient's medical record, including all contacts, outreach attempts, appointment scheduling or the member's refusal to schedule an appointment. All elements of the IHA were completed within 12 months prior to the effective date of enrollment. Physicians or other providers of an established patient can add existing physical and mental health history to the IHA but must conduct an updated physical exam if one was not completed within the last 12 months. Member refuses an IHA. Evidence of: Two call attempts and one written attempt to reach member, Physician or other provider attempts to update member's contact information, and Physician or other provider attempts to perform the IHA past the 120-day requirement until the IHA is completed. Evidence of timely and accurate completion of IHA is determined during the facility site review and medical record review periodic audits.

Use the recommended service codes for an IHA.

- Schedule appointments and reminders with your patients.
- Register with Cozeva® to access web-based care gap reports. Contact your plan representative for information on how to sign up for the care gap report or how to review the reports.

Best practices (cont.)

- Follow up with identified high-risk behaviors and needed care.
- Review patient records to fill care gaps before the appointment with the patient.
- Document in the patient's medical record all contacts, outreach attempts, appointment scheduling or the member's refusal to schedule an appointment.
