

Watch New Online Training About Clinical Care Metrics and Patient Experience

**Impact member care with on-demand, no-cost training
found in the Provider Library or use a smart device**

Health Net, on behalf of Community Health Plan of Imperial Valley, and Centene's Behavioral Health Team have partnered to offer several microlearning courses. The courses are designed to enhance provider knowledge about clinical care metrics that may directly impact the member's care and experience.

Learn something new in only 7 minutes

Each of the micro courses range from 7 to 20 minutes. They give a broad overview of a selected topic that includes behavioral health, cultural humility and member experience.

Microlearning topics available to you

There are 11 courses to choose. Select a course, then select **Register Now** to proceed.

- [Antidepressant Medication Management and Antipsychotic Medication Adherence: Optimizing the AMM and SAA HEDIS® Measures](#)
- [Cultural Competency Part 1: An Overview of Cultural Humility](#)
