

Strengthening Cultural Humility, Dismantling Implicit Bias in the Healthcare Setting

90-Minute Self-Paced Online Course

Health Net has partnered with Dr. Sayida Peprah-Wilson to provide an on-demand training on implicit bias with a focus on maternal health and perinatal health.

Course Overview

Studies have identified implicit bias as a contributor to disparities in the outcome of marginalized and minority communities. Mitigating implicit bias among providers has been identified as a strategy to improve client/patient-provider communication and service/treatment decisions, contributing to improved quality of care and outcomes.

This training will focus on increasing cultural conscientiousness, sensitivity and humility. It will also broaden participant's awareness of their own implicit biases (subtle, unconscious assumptions about others) and equip them with tools to engage with patients/clients, in more open, respectful and empathetic ways.

Learning Objectives

By the end of this course, participants will be able to:

- Identify implicit and explicit biases
- Define types of biases including confirmation bias, affinity bias and halo effect
- Describe principles of cultural humility and cultural safety
- Practice skills for cross-cultural communication

Course meets the requirements of California State Laws on implicit bias training

AB-1407

Requires nursing schools and programs to include implicit bias training as a core part of their curriculum.

AB-241

Requires implicit bias training for physicians and surgeons.

SB-464

Requires implicit bias training for perinatal care staff at hospitals.

Course also meets the implicit bias training requirements for California Department of Health Care Services (DHCS) Medi-Cal doula providers
